☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐1 ☐2 ☐3 INCREMENT(S)*Lots will be purchased as much below top bids as possible.*☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$

at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

**(Signature required)** Please make a copy of this bid sheet for your records.☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 800-872-6467

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

Current Bid	Bid Increment

## 7 Easy Ways to Bid

## 1 Internet

Simply go to [www.pearsoncmg.com](http://www.pearsoncmg.com)

Simply go to [www.HA.com](http://www.HA.com), find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

## 2 e-Mail

You can also

You can also e-mail your bids to us at [Bid@HA.com](mailto:Bid@HA.com). List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

### 3 Postal Mail

Simply complete the B

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

## 4 In Person

Come to the auction and view the lots in person and bid live on the floor.

**5 FAX**  
Follow t

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 p.m. CT the day prior to the auction date.

## 6 Live By Phone

Call 1-800-872-6467 Ext. 11

Call 1-800-872-6467 Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

**7 Live using HERITAGE Live!®**  
Auctions designated as "Heritage Live Enabled" have

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit [HA.com/Live](http://HA.com/Live) and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

*Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.*

## Heritage Signature® Auction #1203

# U.S. Coins

Featuring: Christopher Bently's Nob Hill Collection • The Fidelis Collection  
The Collection of Donald E. Bently, sold for the benefit of the Bently Foundation

February 27-28 & March 2, 2014 | Atlanta

Dear Bidder:

Welcome to Atlanta! Heritage has the privilege of being the Official Auctioneer of the 2014 National Money Show. As always, we have put together a marvelous selection of coins and related items from across U.S. history, including a number of valuable gold pieces struck at the famous Dahlonega Mint in northern Georgia. What could be a better souvenir of your visit to the Peach State?

This Official Auction has three Featured Collections. We invite you to read about them below.

## Christopher Bently's Nob Hill Collection

Christopher Bently's Nob Hill Collection continues with important early eagles, Liberty tens, and gold assay bars. Among the major highlights are a rare 1875 ten dollar gold piece, AU50 PCGS, one of only 100 business strikes produced; an 1804 ten dollar with Crosslet 4 in Date, AU55 PCGS; and an 1870-CC eagle, AU50 PCGS, from the first year of operations for the legendary Carson City Mint.

## The Collection of Donald E. Bently, sold for the benefit of the Bently Foundation

Christopher Bently has decided to sell the collection of Donald E. Bently to build a new legacy of creativity, sustainability, and animal rights in the Bay Area and Northern Nevada communities with Bently Foundation.

Donald E. Bently was founder, owner and Chief Executive Officer of Bently Nevada Corporation, and President of Bently Pressurized Bearing Corporation. He pioneered technology that created the foundation of a new discipline of Mechanical Engineering, the Diagnostics of Machinery Malfunctions.

Donald's tradition of innovation, sustainability, and community development are carried on by his son Christopher through the Bently Foundation. All proceeds will go to the Bently Foundation and help bring Christopher Bently's forward-thinking vision — one of community and local sustainability — into reality.

## The Fidelis Collection

The Fidelis Collection features the two famous coinage designs contributed by Augustus Saint-Gaudens, the Liberty-with-headress ten dollar and the eponymous Saint-Gaudens double eagle. In the former group the most prestigious lot is the 1920-S ten dollar, graded MS65 by NGC. Among Saint-Gaudens twenties, the late dates that experienced mass melting in the 1930s are well-represented. Significant examples include a 1920-S double eagle, MS61 PCGS, CAC; a 1929 twenty, MS64+ PCGS, CAC; and a 1931 twenty dollar, MS63 PCGS.

As always, Heritage offers you seven ways to win in this auction. Before the event, we are happy to accept your bid through our website, HA.com, as well as by mail, fax, and e-mail. During the auction, you can participate wherever you are in the world by telephone and through Heritage's award-winning proprietary online platform, Heritage LIVE!™ Should you be able to join us in Atlanta, of course, we would love to see you on the auction floor. Remember to visit our booth on the Bourse and say hello.

Good luck!

Sincerely,

Greg Rohan  
President

Todd Imhof  
Executive Vice-President

# SESSION ONE

## COLONIALS

1652 Oak Tree Shilling, Very Fine  
Noe-6, Late Die State  
Planchet Cracks

- 3001** 1652 Oak Tree Shilling VF20 PCGS. CAC. Noe-6, W-480, Salmon 4-D, Low R.7. 68.05 gn. A pleasing cream-gray representative of this rare Noe variety. A late die state with advanced breaks near the AN in AN DOM. The planchet has a crack at 12:30 and 5 o'clock that causes uneven wear, especially on the reverse near EW EN. The remainder of the reverse, as well as the left and center portions of the tree, are fairly sharp. Listed on page 39 of the 2014 *Guide Book*. PCGS# 20

Pine Tree Shilling, VF25  
Small Planchet, Noe-17, W-840

- 3002** 1652 Pine Tree Shilling, Small Planchet VF25 PCGS. Noe-17, W-840, Salmon 3-B, R.3. 70.67 gn. A minimally abraded cream-gray representative of this important colonial silver type. The strike is typical on the tree but a majority of the letters are sharp. Struck a few degrees off center toward 6 o'clock. Listed on page 39 of the 2014 *Guide Book*. PCGS# 24
- 3003** 1723 Rosa Americana Twopence AU50 PCGS. M. 3.11-E.6, W-1334, R.4. Deep brown dominates though glimpses of lemon-gold persist in selected design crevices. A lightly circulated and mildly granular example of the largest Rosa Americana denomination. Listed on page 43 of the 2014 *Guide Book*. PCGS# 128
- 3004** 1773 Virginia Halfpenny, Period MS63 Brown PCGS. N. 23-Q, W-1560, R.3. The initial orange-red clings to design elements though most of this colonial halfpenny is gunmetal-gray. Nicely struck and unabraded with a hint of verdigris on the obverse exergue. Listed on page 45 of the 2014 *Guide Book*. PCGS# 240
- 3005** 1788 Massachusetts Cent, Period XF40 PCGS. Ryder 3-A, W-6210, Low R.4. A well defined example of a scarcer Ryder variety. The medium brown surfaces are minimally abraded though minor build-up is noted along with a granular area near 4:30 on the reverse. Listed on page 59 of the 2014 *Guide Book*. PCGS# 311

1787 Nova Eborac Copper, AU53  
Scarce Seated Right Variety, W-5760

- 3006** 1787 Nova Eborac Copper, Seated Right AU53 PCGS. CAC. Breen-987, W-5760, R.4. The Seated Right variety is rarer than the Seated Left variety (W-5755) that shares the same obverse die. Well centered for the type, though EBORAC is tight. The remaining legends are fully present. Sharply defined. Nearly ideal save for two small obverse spots on the neck and a faint III entered on the right obverse field near the chin. The crescent die break near the foot is usual for the variety. Listed on page 68 of the 2014 *Guide Book*. PCGS# 475

1787 New Jersey Copper, AU55  
'Camel Head,' M. 56-n  
Sans Undertype

- 3007** 1787 New Jersey Copper, Camel Head AU55 PCGS. Maris 56-n, W-5310, R.1. This handsome medium-brown example is evenly defined and minimally abraded. The reverse is well centered but the obverse is slightly off center toward 5 o'clock. Most of the date is present. Unlike the majority of Camel Head coppers, which were struck over any available copper, the present piece is on good stock and shows no sign of an undertype. Listed on page 70 of the 2014 *Guide Book*. Population: 6 in 55, 4 finer (1/14). PCGS# 515
- 3008** 1786 Vermont Copper, VERMONTENSIMUM VF30 PCGS. CAC. RR-6, Bressett 4-D, W-2020, R.2. The scarce late die state with a fairly large break beneath the U in QUARTA. An unabraded deep tan-brown republic copper. The landscape is well defined though the centers show softness and retain portions of the granular planchet surface. Struck slightly off center toward 5:30, though most of the date is present. Listed on page 72 of the 2014 *Guide Book*. PCGS# 545
- 3009** 1786 Vermont Copper, VERMONTENSIMUM XF40 PCGS. RR-6, Bressett 4-D, W-2020, R.2. A sharply defined example with a powder-blue obverse and a mahogany and lavender reverse. Minimally abraded though mildly granular. The dies are widely rotated. Struck several degrees off center toward 9:30, with DECIMA and VERMONTENSIMUM partly off the flan. Listed on page 72 of the 2014 *Guide Book*. PCGS# 545
- 3010** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF30 PCGS. N. 12-M, W-6800, R.3. A lavender-brown Fugio type coin with pleasing design detail for the VF30 level. A lens reveals a few thin marks and occasional slight rim nicks. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

**3011** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF40 PCGS. N. 16-N, W-6925, R.3. Newman Die State B/C with heavy reverse cracks. A moderately granular lavender-brown example with bold legends and a soft impression on the sun. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

**3012** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF40 PCGS. N. 13-R, W-6850, R.4. This glossy medium brown Fugio copper was struck on a well-made, defect-free planchet. Peripheral elements are generally sharp, although the centers were incompletely impressed. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

**3013** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 PCGS. N. 11-X, W-6790, R.4. The vertical die crack on the reverse at 6 o'clock is characteristic of the familiar 'X' reverse. Olive-brown high points contrast with mahogany fields. A lamination noted on the upper left reverse border. Listed on page 87 of the 2014 *Guide Book*. PCGS# 883

**3014** 1787 Fugio Cent, UNITED STATES, Cinquefoils AU55 NGC. N. 8-B, W-6740, R.3. Lilac-red and forest-green encompass satiny and unabraded surfaces. Two-thirds of the coin is well struck though the lower obverse and upper reverse show softness and minor flan flaws. Listed on page 87 of the 2014 *Guide Book*. PCGS# 889

**1787 Fugio Cent, MS63 Brown  
N. 8-B, UNITED STATES  
Excellent Eye Appeal**

**3015** 1787 Fugio Cent, UNITED STATES, Cinquefoils MS63 Brown PCGS. CAC. N. 8-B, W-6740, R.3. The dark brown surfaces display prominent clashes (as made) but are unabraded. From a superior planchet despite a small flaw at the U in FUGIO. The dies were slightly misaligned, such that the BUSINESS and the upper rings are lightly impressed, while the remainder of the coin is well struck. Listed on page 87 of the 2014 *Guide Book*. PCGS# 889

**1787 New Haven Restrike, MS64  
N. 104-FE, Rare Brass Striking**

**3016** 1787 New Haven Brass MS64 PCGS. CAC. N. 104-FE, W-17560. Thin rings and a prominent chin on the sun identify the "New Haven Restrike," an engaging Fugio fantasy struck from copy dies in 1860 at Waterbury, Connecticut. Ever since, Fugio collectors have embraced the issue as part of the series. Most examples were struck in copper. Brass pieces are rare. The present satiny and unabraded near-Gem is mostly tan-brown with glimpses of peach-gold near the rims. Listed on page 88 of the 2014 *Guide Book*. Population: 2 in 64, 1 finer (1/14). PCGS# 919

**3017** 1783 Washington & Independence Cent, Small Military Bust, Engrailed Edge AU50 PCGS. Baker-4B, W-10150, R.6. The scarcer edge variety of the Small Military Bust type, which is in turn more elusive than the Large Military Bust. Toned deep powder-blue with glimpses of mahogany-brown at the borders. Listed on page 79 of the 2014 *Guide Book*. PCGS# 673

**3018** 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge PR64 Brown PCGS. CAC. Baker-3, W-10370, R.5. The 17 in the date is repunched, as is the O in WASHINGTON. The well made Large Letters W.S. Lincoln restrike. The prooflike golden-brown fields and intricately impressed motifs are exceptionally preserved. Listed on page 80 of the 2014 *Guide Book*. PCGS# 685

**1791 Washington Cent, MS64 Brown  
Large Eagle, Baker-15**

**3019** 1791 Washington Large Eagle Cent MS64 Brown PCGS. Baker-15, W-10610, R.2. A magnificent chocolate-brown near-Gem that boasts a bold strike and undisturbed semiprooflike surfaces. The well made 1791 Small and Large Eagle cents were struck in England in an attempt to secure a Federal coinage contract. The dies are credited to teenaged engraver John Gregory Hancock. Listed on page 81 of the 2014 *Guide Book*. PCGS# 702

**3020** Undated Washington Liberty & Security Penny MS62 Red and Brown PCGS. Baker-30, W-11050, R.2. The usual plain rims variant of this early and skillfully executed Washington medal. Refreshingly free from marks, and the obverse border retains the initial mint red, though the fields and motifs are chiefly olive-brown. A couple of slender lamination streaks extend from the G in GEORGE to the epaulets, and the right (facing) wing is lightly brought up. In a green label holder. Listed on page 84 of the 2014 *Guide Book*. PCGS# 768

**HALF CENTS**

**1793 C-3 Half Cent, AG3  
Bold Date and LIBERTY**

**3021** 1793 AG3 PCGS. C-3, B-3, R.3. Fairly sharp for the designated grade. LIBERTY, the date, and the fraction are clear. Most letters in UNITED STATES OF AMERICA are evident. The portrait is well outlined. The mahogany-brown surfaces are minutely granular. Only a single thin mark is present, near the first T in STATES. Our EAC grade Fair 2. NGC ID# 2222, PCGS# 1000

**3022** 1802/0 Reverse of 1802 VG8 NGC. C-2, B-2, R.3. Manley Die State 2.0. An ebony-brown example of this conditionally rare half cent date. Sharpness is uneven on the legends but the wreath and portrait are well outlined. Free from evidence of corrosion, and marks are minor for the grade. Our EAC grade Good 5. NGC ID# 222D, PCGS# 1057

**3023 1811 Wide Date — Edge Damage — NGC Details. XF. C-1, B-1, Low R.4.** Manley Die State 1.0. The rarer of the two Mint-issued varieties for this challenging date. A well defined example with attractive dark brown surfaces. Both rims have distributed small to moderate marks, most apparent near the date. Our EAC grade Fine 15.

**3024 1828 12 Stars MS63 Brown PCGS. CAC. C-2, B-3, R.2.** Manley Die State 2.0 with faint clash marks. A lovely Select example of this popular mint-blundered variety. Toned golden-brown, lilac-red, steel-blue, and olive-green. A strong lens shows a faint hair-thin line near Liberty's eye. Our EAC grade MS60. NGC ID# 222W, PCGS# 1150

#### 1835 C-1, B-1 Half Cent MS65 Red and Brown

**3025 1835 MS65 Red and Brown PCGS. C-1, B-1, R.1.** Prominent clash marks are visible in the usual locations at the face and chin, and inside the wreath. This Gem combines original orange mint color with sea-green and iridescent toning. Our EAC grade MS63. Population: 20 in 65 Red and Brown, 0 finer (1/14). NGC ID# 2233, PCGS# 1169

#### 1853 Half Cent, MS66 Brown Glossy Surfaces

**3026 1853 MS66 Brown PCGS. C-1, B-1, R.1.** After a one-year hiatus, half cent business strikes were resumed in 1853 with 129,694 pieces minted, although there was no significant commercial use for the denomination. This exceptional Premium Gem is a worthy memento of the series, which continued until 1857 when the half cent was discontinued and ultimately withdrawn from circulation. Traces of vivid mint Red appear at the margins surrounded by high, perfect rims. This lustrous, Brown example is technically and visually impressive. The strike is uncompromisingly full. Our EAC grade MS63. Population: 5 in 66 Brown, 0 finer (1/14). NGC ID# 26YX, PCGS# 1227

**3027 1854 MS65 Brown NGC. C-1, B-1, R.1.** A chocolate-brown Gem with glimpses of fire-red evident in protected areas, especially on the reverse. A lens reveals only superficial imperfections. The strike is intricate. Our EAC grade MS62. NGC ID# 26YY, PCGS# 1230

**3028 1855 MS65 Brown PCGS. CAC. C-1, B-1, R.1.** Medium brown and lilac-red embrace this satiny and virtually mark-free Gem. The portrait and wreath are well struck though the dentils and right-side stars are softly brought up. Our EAC grade MS60. NGC ID# 26YZ, PCGS# 1233

## LARGE CENTS

**3029 1793 Chain AMERI. — Corroded — ANACS. AG3 Details. S-1, B-1, R.4.** The first die variety struck at the fledgling Philadelphia Mint. Sheldon-1 is also noteworthy for its abbreviated AMERICA, presumably an unauthorized decision made by the humble die engraver. The reverse has Very Good sharpness while the obverse is well worn, though the portrait is outlined and most of LIBERTY is clear. The deep walnut-brown surfaces are granular, especially on the obverse. Our EAC grade Fair 2.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 223G, PCGS# 1340*

**3030 1794 Head of 1795 Fine 15 PCGS. S-67, B-59, R.3.** The date is widely spaced and the first A in AMERICA is repunched. A deep mahogany-brown Liberty Cap cent with no evidence of verdigris. Occasional minor marks include small nicks on the lower reverse rim. Housed in an old green label holder. Our EAC grade VG8. NGC ID# 223R, PCGS# 1365

**3031 1797 Reverse of 1797, Stems VF30 NGC. S-136, B-7, R.3.** A chocolate-brown cent with little evidence of contact or carbon. The strike is uneven but traces of luster remain. A planchet flaw affects the T in UNITED. The obverse is misaligned toward 2 o'clock, though only dentil width is affected. Our EAC grade Fine 15. NGC ID# 2242, PCGS# 1422

#### 1797 Draped Bust Large Cent, AU Details S-126 Variety, Die State IV

**3032 1797 Reverse of 1797, Stems — Cleaning — PCGS Genuine. AU Details. S-126, B-16, R.3.** Breen Die State IV. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been Cleaned and Retoned. A faint diagonal crack from the nose distinguishes this middle die state. This crisply struck and well-detailed cent is attractive despite the cleaning and probable retoning to a deep brown. The reverse is centrally weak as is diagnostic for this variety. Our EAC grade VF35.

**3033 1798 Second Hair Style XF45 PCGS. S-174, B-35, R.2.** A deep brown example with traces of mahogany-red in design recesses. Liberty's hair is well struck though the lower obverse and upper reverse show incompleteness. The unmarked surfaces have small spots on the N in ONE and inside the left ribbon loop. Our EAC grade VF25. NGC ID# 2244, PCGS# 1434

**1799 S-189 Cent, VF Details  
Large Cent Stopper**

- 3034** 1799 — Surface Damage — PCGS Genuine. VF Details. S-189, B-3, R.2. A well detailed key date cent. The date is bold, and Liberty's curls display plentiful detail. The lavender-red and wheat-gold surfaces are granular, and a thin mark passes through the O in ONE. A pair of small pits are noted near Liberty's neck. Our EAC grade Good 6. NGC ID# 2246, PCGS# 1443

**1800/79 S-196 Large Cent, XF40  
Style Two Hair**

- 3035** 1800 80 Over 79, Style Two Hair, XF40 PCGS. S-196, B-10, R.1. An early state of the dies with no clash marks shown and a stronger strike at the upper and lower reverse than seen on later die states. The overdate is easily seen with the crossbar of the 7 visible in the upper loop of the 8 and the 9 plainly seen within the first 0. The coin is relatively unabraded and sharp on the obverse. The reverse displays a noticeably strong strike with a couple of minor rim indentations near CA of AMERICA and a dig near the right ribbon end. The surfaces of this pleasing cent are a rich, dark brown with some remaining glossiness. Our EAC grade VF30. NGC ID# 2U57, PCGS# 1455

- 3036** 1803 Small Date, Small Fraction AU50 PCGS. S-263, B-22, R.3. The cud beneath the date, the diagonal crack through the fraction, and the heavy break on the upper reverse all identify the Sheldon marriage. A sharp medium brown cent with minimal marks and a strike-through (as made) near the E in ONE. Our EAC grade XF40. NGC ID# 224G, PCGS# 1482

**1804 S-266c, B-1 Large Cent  
Highly Collectible VG8  
Late Die State**

- 3037** 1804 VG8 NGC. S-266c. B-1. R.2. Typically found in low grades or encountered with damage and other problems, this attractive VG example joins a small group of survivors in wholesome, original condition. Heavy rim breaks appear on both sides of the coin. The 1804 is the second rarest large cent date following 1799, although the 1793 Liberty Cap cents are also rarer as a group. Scattered circulation marks are present and the reverse has some weakly struck letters of the legend, but this dark chocolate-brown piece shows no serious flaws for the assigned grade. Always eagerly sought by large cent collectors with demand much greater than the supply. Our EAC grade Good 5. Census: 6 in 8, 35 finer (1/14). NGC ID# 224H, PCGS# 1504

- 3038** 1807/6 Large 7 — Cleaning — PCGS Genuine. AU Details. S-273, B-3, R.1. A briefly circulated steel-gray example. The obverse has vertical hairlines. The reverse displays diagonal hairlines. Struck from clashed dies. S-273 is the sole Large 7 overdate die marriage, and is in demand from collectors of *Guide Book* varieties. Our EAC grade VF30. NGC ID# 224N, PCGS# 1528

- 3039** 1814 Plain 4 XF45 NGC. S-295, B-2, R.1. A "Mumps" example with die lumps above the chin and beneath the jaw. This medium brown final-year Classic Head cent has a smooth reverse while the obverse displays a few inconspicuous marks and spots. Our EAC grade VF35. NGC ID# 224Y, PCGS# 1576

**1814 Plain 4 Cent, AU53  
S-295, Final Sheldon Variety**

- 3040** 1814 Plain 4 AU53 PCGS. S-295, B.2, R.1. The final Sheldon variety, the Plain 4 1814 is obtained with little difficulty in well worn grades, but sharp examples are scarce. This deep brown cent is only lightly abraded and retains ample mint gloss. The profile shows strike doubling but there are no "mumps" die breaks present due to the early die state. Our EAC grade XF40. NGC ID# 224Y, PCGS# 1576

- 3041** 1816 MS64 Brown NGC. N-2, R.1. The late die state with two right-side obverse rim breaks. The satiny olive-brown and steel-gray surfaces show only minor marks. A small spot is near the final A in AMERICA. The strike is good except on the left-side stars and Liberty's forehead. Our EAC grade AU55. NGC ID# 224Z, PCGS# 1591

- 3042 1816 MS64 Brown NGC. CAC. N-2, R.1.** This is the first date of the Matron Head design, which lasted from 1816 through 1836 before it was modified in 1837. A mintage of 2.8 million pieces was heavily circulated and near-Gem or finer examples are scarce. This example is an early die state of the common N-2 variety. It displays attractive, mint-red highlights around glossy devices, with mahogany-red base toning. A sharply struck cent with excellent eye appeal. Our EAC grade MS63. Census: 43 in 64 (1 in 64 ★) Brown, 6 finer (1/14). NGC ID# 224Z, PCGS# 1591
- 3043 1817 13 Stars MS63 Brown NGC. N-14, R.1.** An awkwardly spaced date and a repunched N in ONE identify this familiar Newcomb marriage. The charcoal-gray surfaces are satiny and uncommonly unabraded. Due to misaligned dies, the strike is sharp on the left borders and soft on the right peripheries. Our EAC grade AU55. NGC ID# 2252, PCGS# 1594
- 3044 1817 13 Stars MS64 Red and Brown PCGS. CAC. N-14, R.1.** Ample orange-red lingers on both sides though the portrait and open fields are brown. The glossy surfaces show only incidental contact. Likely once part of the famous Randall Hoard of Matron Head cents. Our EAC grade MS63. NGC ID# 2252, PCGS# 1595
- 3045 1820 Large Date MS64 Brown NGC. N-10, R.2.** A triple denticle near the U in UNITED provides prompt identification. Golden-brown and mauve toning embraces this coruscating near-Gem. Marks are absent except for hair-thin lines on the field near the profile. Our EAC grade AU58.  
Ex: *St. Louis Central States Bulletin (Heritage, 5/2005), lot 113.* NGC ID# 2256, PCGS# 1615
- 3046 1820 Large Date MS65 Brown NGC. CAC. N-13, R.1.** Faded orange-red fills design recesses but the open fields and high points are gunmetal-gray. Marks are essentially absent though the reverse has two minor spots. The popular Randall Hoard variety with spindly cracks across the obverse periphery. Our EAC grade MS62. NGC ID# 2256, PCGS# 1615
- 3047 1821 XF45 PCGS. N-2, R.1.** A low mintage date with only two die marriages. The mint-made die line from the bust tip distinguishes N-2 from its N-1 alternative. Toned walnut-brown and steel-gray with impressively unblemished surfaces. Our EAC grade VF35. NGC ID# 2258, PCGS# 1621
- 3048 1822 MS62 Brown NGC. N-3, R.2.** A later die state with a crack through much of AMERICA. Toned deep steel-gray with glimpses of lighter olive-gold. Well struck except for the left-side stars. No marks are apparent though a subtle spot is near star 10. Our EAC grade AU55. NGC ID# 2259, PCGS# 1624
- 3049 1835 Head of 1836 MS63+ Brown PCGS. CAC. N-17, R.1.** Stars 3 and 5 are repunched, and scattered die rust confirms the Newcomb variety. A coruscating golden-brown example with unmarked surfaces and impressive eye appeal. LIBERTY and the profile are strike doubled. Our EAC grade AU58. NGC ID# 225S, PCGS# 1714
- 3050 1837 Plain Cords, Medium Letters MS64 Brown NGC. N-6, R.2.** A medium golden-brown near-Gem with glimpses of gunmetal-blue on the portrait. Satiny and sharply struck with a smooth obverse and a few faint marks near the denomination. Our EAC grade AU58.  
Ex: *Dallas Signature (Heritage, 12/2004), lot 5046, which realized \$517.50.* PCGS# 1735
- 3051 1838 MS64 Brown PCGS. CAC. N-3, R.1.** A lustrous golden-brown Choice cent. Glimpses of the initial mint color linger at the borders. The stars are lightly brought up but the major devices are sharp. Smooth aside from thin marks on the bust tip and beneath star 8. Our EAC grade MS60. NGC ID# 225V, PCGS# 1741
- 3052 1838 MS65 Red and Brown NGC. N-1, R.1.** A late die state with obverse rim crumbling near 12 o'clock. Orange-gold occupies a majority of both sides, though the cheek and upper obverse are brown. Devoid of visible contact. Certified in an older generation holder. Our EAC grade MS63. NGC ID# 225V, PCGS# 1742
- 3053 1843 Petite Head, Small Letters MS64 Brown NGC. N-2, R.1.** Grellman Die State a. A rim cud is present near the UN in UNITED. Peach-red illuminates design crevices, but most of this smooth and satiny cent is chocolate-brown. The Petite Head subtype was a late accomplishment for Chief Engraver Gobrecht, who died in 1844. Our EAC grade MS60. PCGS# 1844
- 3054 1844 MS63 Brown NGC. N-1, R.1.** Grellman Die State e. A beautiful Mature Head type coin with a deep medium brown obverse and lavender shades on the central reverse. The strike is bold except on the lowest two stars. A lens reveals infrequent and unobtrusive obverse marks. Our EAC grade AU58. NGC ID# 226A, PCGS# 1856
- 3055 1844/81 AU53 PCGS. CAC. N-2, R.2.** Ex: Jack Conour Collection. Grellman Die State a. The date logotype was initially entered upside down, then corrected. The most famous blundered date variety of the large cent denomination. This medium brown example is smooth except for minor marks near the N in CENT. Our EAC grade XF45. NGC ID# 226A, PCGS# 1859
- 3056 1847 MS64 Red and Brown PCGS. CAC. N-21, R.1.** Grellman Die state b. The die state was described in the classic Newcomb reference as #40. Newcomb was unaware that N-21 and N-40 were respectively early and late die states of the same marriage. Plentiful fire-red accompanies the legends and stars though the portrait and obverse field are brown. Bill Noyes grades it MS65, and lists it as Condition Census #1 with photo #31561. Our EAC grade MS64.  
Ex: *Dr. Kenneth J. Sartoris, 7/1972; Denis Loring; Ted Naftzger (Ira & Larry Goldberg, 9/2009), lot 781.* NGC ID# 226D, PCGS# 1878
- 3057 1847/47 Large Over Small 47 MS62 Brown PCGS. N-18, R.5.** Grellman Die State a. The so-called "Large 7 Over Medium 7" variety. From a different obverse than the "Large 7 Over Small 7" N-2 and N-31. The 8 is boldly repunched north. A smooth golden-brown representative. Well struck aside from a few stars. Our EAC grade AU55. NGC ID# 226D, PCGS# 1880
- 3058 1850 MS65 Brown PCGS. CAC. N-10, High R.2.** Grellman Die State c. Rim die breaks at 12 o'clock and 1:30 on the reverse identify the Newcomb marriage. This lustrous Gem is well struck except on STATES and the dentils. A tiny spot noted near an outer point of star 13. Our EAC grade MS62. NGC ID# 226G, PCGS# 1889

#### 1852 N-3 Cent, MS66 Brown

- 3059 1852 MS66 Brown PCGS. CAC. N-3, R.1.** Grellman Die State b. Mint red clings to crevices of the obverse design, but most of this lustrous high grade cent is olive-brown or ocean-blue. Only a couple of stars lack a full strike. Marks are essentially absent aside from a faint graze beneath the EN in CENT and faint contact on the reverse exergue. Our EAC grade MS62. NGC ID# 226J, PCGS# 1898
- 3060 1853 MS66 Brown NGC. N-3, R.1.** Grellman Die State a. Clash marks below the inner hairbun and above the T in CENT identify the Newcomb marriage. This lustrous high grade cent exhibits blended sea-green and golden-brown toning. Nicely struck and virtually void of contact and carbon. Our EAC grade MS63.  
Ex: *Orlando FUN Signature (Heritage, 1/2009), lot 7253.* NGC ID# 226K, PCGS# 1901

**3061 1855 Upright 5s MS64+ Red PCGS. N-4, R.1.** Grellman Die State a. The specialist-familiar variety with die lumps west and south of the earlobe. A splendid pumpkin-gold near-Gem that boasts potent luster and is free from marks. A strike-through (as made) is above the N in ONE. A small spot below the left upright of that N. Our EAC grade MS64. NGC ID# 226M, PCGS# 1909

**3062 1855 Knob on Ear MS65 Brown NGC. CAC. N-9, R.1.** A *Guide Book* variety, this Gem 1855 Knob on Ear example is Grellman Die State e, with the branch of an additional knob under the Y of LIBERTY starting to show cracks but not yet raised. The well-known “knob cud” under T is fully formed. Lustrous orange accents complement medium red-brown toning on the obverse, with a smooth, chocolate-brown patina on the reverse. This well-struck MS65 cent has pleasing surfaces and few distractions. Our EAC grade MS63. NGC ID# 226M, PCGS# 1913

### 1856 Cent, MS66 Red and Brown Upright 5, N-6

**3063 1856 Upright 5 MS66 Red and Brown NGC. CAC. N-6, R.1.** Grellman Die State a. The dull lump from the bust tip attributes this late Mature Head Newcomb variety. A lustrous Premium Gem about evenly divided between peach-red and steel-blue. Marks are essentially absent. The central reverse displays shallow strike-throughs, as produced. Our EAC grade MS64. NGC ID# 226N, PCGS# 1920

## FLYING EAGLE CENTS

**3064 1857 MS64 PCGS.** This attractive Choice Flying Eagle cent exhibits well-detailed design elements with a touch of softness on the eagle's tail and the leaves in the wreath. Traces of glossy mint luster clings to the devices and the surfaces are lightly marked. NGC ID# 2276, PCGS# 2016

**3065 1857 MS64 PCGS. CAC.** A satiny golden-brown Choice type coin without individually mentionable faults. Sharply struck, although the tips of the cotton leaves lack absolute detail.  
*Ex: Orlando FUN (Heritage, 1/2007), lot 60281; The Connelly Collection (Heritage, 9/2010), lot 3113.* NGC ID# 2276, PCGS# 2016

**3066 1857 Doubled Die Obverse MS63 PCGS. Snow-3, FS-105.** UNITED STATES OF AMERICA is strongly die doubled in a clockwise direction. A satiny and nicely struck golden-brown representative. Marks are limited to the fields above the back wing and east of the E in ONE. PCGS# 37378

### 1858 Small Letters Flying Eagle Cent, MS65 Problem-Free Surfaces

**3067 1858 Small Letters MS65 PCGS.** Collectors of this short set of cents invariably include the Large and Small Letters variants from 1858. The difference is noticeable with the A and M in AMERICA separated at the bottom of each letter on the Small Letters subtype. This piece displays a remarkably sharp strike on each side. The surfaces have taken on a slight reddish patina, but significant underlying golden-tan is still in evidence. Problem-free surfaces. NGC ID# 2277, PCGS# 2020

### 1858 Large Letters Cent, MS65 Attractive, Full Strike

**3068 1858 Large Letters MS65 NGC. CAC. Eagle Eye Photo Seal,** card included. This attractive example displays reddish-orange and coppery-tan toning, with spot-free surfaces and a full strike on the devices, including the eagle's head and tail. A Gem survivor from a mintage of more than 24 million pieces, but just a two-year type before being replaced by Liberty in a headress. NGC ID# 2277, PCGS# 2019

### 1858 Large Letters Cent, MS65 A Great Final-Year Gem

**3069 1858 Large Letters MS65 PCGS. CAC.** Primarily peach surfaces have occasional mahogany variations. This Large Letters Gem is uncommonly well-defined for a copper-nickel cent, particularly in the fine details of the eagle's feathers and the vegetation in the wreath. PCGS has graded only 28 pieces as MS66 or finer (1/14). NGC ID# 2277, PCGS# 2019

## INDIAN CENTS

### 1861 Indian Head Cent, MS66+ Bright Mint Luster, Full Strike

- 3070 1861 MS66+ PCGS Secure.** A high-end Premium Gem with the PCGS Plus designation, this popular issue is fully struck and amazingly lustrous. Radiant orange-tan surfaces display rich, red highlights. The surfaces are wholly unabraded as expected for this grade level, and the annoying spots that often defy careful preservation are unseen on the coin. An outstanding strike delivers full feather vanes and sharpness on the headdress feather tips. This coin is among the finest of more than 10 million pieces minted. PCGS and NGC combined have certified just 14 pieces numerically finer (1/14). NGC ID# 227G, PCGS# 2061

- 3071 1862 MS65 PCGS.** Primarily pale peach with elements of salmon and violet. Excellent detail on Liberty's ribbon with four complete diamonds, an unusual feature. A small flyspeck is noted to the left of the O in OF on the obverse. NGC ID# 227H, PCGS# 2064

- 3072 1863 MS65 NGC.** Generous copper-gold fire with apricot elements and occasional tiny flyspecks. This Civil War-era Gem hails from the penultimate copper-nickel cent issue.  
*Ex: New England Rare Coin Galleries.* NGC ID# 227J, PCGS# 2067

- 3073 1864 L On Ribbon MS64 Red and Brown PCGS. CAC. Snow-4, FS-2303.** The date is multiply repunched. Both sides display substantial fire-red though steel-blue and lilac are also extensive. The strike is incomplete on the wreath ribbon and upper feather tips. NGC ID# 227M, PCGS# 2080

### 1867 Cent, MS65 Red Just One Certified Finer

- 3074 1867 MS65 Red PCGS.** Fully struck and especially noticeable on the headdress feather tips and vanes of this radiant and undisturbed cent. Light-orange toning shows deeper red accents. The four diamonds on the ribbon are bold. Liberty's cheek is rounded and unblemished. Many of the nearly 10 million pieces minted were melted or ignored by collectors. As a result, Gem examples of this issue in Red are rare and examples any finer are practically non-existent. This appealing MS65 coin is a significant opportunity for Indian Head specialists. Population: 21 in 65 Red, 1 finer (1/14). NGC ID# 227R, PCGS# 2090

### 1867/67 Cent, MS64 Red and Brown FS-301, Mark-Free Surfaces

- 3075 1867/67 MS64 Red and Brown PCGS. Snow-1, FS-301.** The final two date digits are blatantly repunched north. Fire-red and apple-green grace unabraded and lustrous surfaces. A late-state near-Gem with clash marks on the obverse field and a mattelike obverse appearance, all as made. The strike is typical on the date and the top of the shield. PCGS# 92089

- 3076 1868 MS64 Red PCGS.** Primarily peach-gold with a few areas of lighter copper and a small spot to the left of Liberty's eye. All four diamonds on the ribbon have full outlines. Housed in a green label holder. Population: 59 in 64 (2 in 64+) Red, 36 finer (1/14). NGC ID# 227S, PCGS# 2093

### 1868 Indian Cent, MS65 Red Fiery Orange Surfaces, Full Strike

- 3077 1868 MS65 Red PCGS.** The mass coinage melts of 1871 to 1875 didn't spare the small change, with many 1868-dated cents disappearing into the melting pots. Relatively few high-grade examples were put aside. This boldly struck cent survived with blazing orange surfaces and few distractions of any kind. Two or three tiny carbon flecks are seen on the reverse with a glass, but not with the unaided eye. The headdress is boldly rendered without weakness on the feather tips or on the vanes. Population: 33 in 65 Red, 3 finer (1/14). NGC ID# 227S, PCGS# 2093

- 3078 1869 MS65 Red and Brown PCGS. CAC.** The well-preserved surfaces of this delightful Gem are mostly original red, with some light brown and crimson mixed in. The design elements are sharply detailed and vibrant mint luster radiates from both sides. PCGS has graded five numerically finer examples (1/14). NGC ID# 227T, PCGS# 2095

- 3079 1872 MS63 Brown PCGS. CAC.** Bold N in ONE. Chestnut-gold is present though much of the coin is medium brown. A satiny semikey cent with a mark-free appearance. The centers are sharp though the borders are lightly brought up. NGC ID# 227W, PCGS# 2103

- 3080 1872 MS64 Red and Brown NGC.** The design elements of this impressive Choice example are sharply detailed and the lustrous surfaces show a mix of original red and light brown patina with few signs of contact. NGC ID# 227W, PCGS# 2104

- 3081 1873 Doubled LIBERTY, Closed 3 — Environmental Damage** — NGC Details. XF. Snow-1, FS-101. Aside from the 1888/7, the most important die variety in the Indian cent series. The doubling on LIBERTY is clear on the present dark brown example. Well defined though moderately granular. The cheek and nearby field display a few thin marks.
- 3082 1877 XF45 NGC.** Violet-imbued fields are glossy and beautiful. This lightly worn 1877 cent would fit well in an otherwise AU or even Brown Mint State series set. NGC ID# 2284, PCGS# 2127
- 3083 1877 XF45 NGC.** Uniform medium brown patination covers this Choice XF key date representative, and expectedly sharp detail is apparent on the design features, including boldness in all of the letters in LIBERTY. A few minuscule marks are within the context of a lightly circulated coin, but the original surfaces are completely devoid of unsightly carbon spots, encrustation's, or verdigris. Sure to please the collector desiring a problem-free, high-grade circulated coin. Ex: *Houston Signature (Heritage, 11/2007)*, lot 60067. NGC ID# 2284, PCGS# 2127

**1877 Indian Cent, AU50**  
**Lightly Circulated Key to the Series**

- 3084 1877 AU50 NGC.** This medium brown AU should be of interest to many collectors of this popular series. The strike is well-defined overall, the only exception being the upper feather tips in the headdress. A number of small handling marks are scattered across each side, but the only one of any note is in the left obverse field out from the nose of the Indian. NGC ID# 2284, PCGS# 2127

**1883 Indian Head Cent, MS66 Red**  
**Scarce This Nice**

- 3085 1883 MS66 Red PCGS.** A large mintage of more than 45 million pieces makes this issue one of the more common ones from the 1880s, but relatively few examples survived in Gem or better condition. In Premium Gem state, the date is a true condition rarity. This example is extremely lustrous and smooth on the obverse, boldly struck with radiant red-orange surfaces and no mentionable distractions. The reverse displays the same bold strike and exquisite color, but two small, shallow planchet flaws are seen — one above the O, the other between E and N. A couple of flecks exist above the shield. Population: 28 in 66 Red, 6 finer (1/14). NGC ID# 228A, PCGS# 2147

- 3086 1893 MS65+ Red PCGS. CAC.** Frosty peach and reddish-gold luster gives this Red MS65+ piece great eye appeal. A small spot is noted just to the right of the reverse shield. NGC ID# 228M, PCGS# 2186
- 3087 1899 MS66 Red NGC.** The well-preserved surfaces of this impressive Premium Gem are brightly lustrous, with original red color and no mentionable distractions. The design elements are well-detailed and eye appeal is quite strong. Census: 51 in 66 (1 in 66+ Red, 1 in 66 ★), 10 finer (1/14) NGC ID# 228U, PCGS# 2204
- 3088 1901 MS66 Red PCGS. CAC.** The original red surfaces of this dynamic Premium Gem show prooflike reflectivity in many areas, and the design elements are sharply detailed throughout. Eye appeal is tremendous. Population: 57 in 66 (3 in 66+) Red, 2 finer (1/14). NGC ID# 228W, PCGS# 2210
- 3089 1903 MS66 Red PCGS.** This Premium Gem Indian cent exhibits blazing original red surfaces with vibrant mint luster and a couple of microscopic carbon spots near the left obverse rim. The design elements are sharply detailed and eye appeal is terrific. Population: 73 in 66 (3 in 66+) Red, 5 finer (1/14). NGC ID# 228Y, PCGS# 2216
- 3090 1908 MS66 Red PCGS.** The original red surfaces of this delightful Premium Gem display blazing mint luster and a few microscopic flecks of carbon, with no mentionable contact marks. The design elements are sharply detailed throughout. Population: 48 in 66 (2 in 66+) Red, 1 finer (1/14). NGC ID# 2295, PCGS# 2231
- 3091 1909 MS66 Red PCGS. CAC.** A surprisingly fresh example of the last Philadelphia Indian cent issue. Apricot-gold and peach surfaces are bright with a hint of satin to the texture. PCGS has graded only four pieces as MS67 Red or finer (1/14). NGC ID# 2297, PCGS# 2237
- 3092 1909-S MS63 Red and Brown PCGS.** This final San Francisco Indian cent issue's mintage is actually lower than that of the more famous 1909-S VDB cent. The Select Red and Brown coin offered here has a mix of copper-orange fire and violet mellowing. NGC ID# 2298, PCGS# 2239
- 3093 1909-S MS64 Red and Brown PCGS.** Primarily apricot-gold on the obverse with a few areas of lighter yellow. The well-defined reverse shows just enough mellowing to make a Red and Brown designation appropriate. A great example of this series-ending key. NGC ID# 2298, PCGS# 2239

## PROOF INDIAN CENTS

- 3094 1870 PR65 Red PCGS. CAC.** Shallow N in ONE. A lovely example of this elusive date. The pumpkin-gold surfaces are virtually unmellowed, and are clean aside from a fleck beneath the F in OF. The strike appears full, even on the tips of the headdress. A highly attractive Gem proof Indian cent. Population: 25 in 65 Red, 5 finer (1/14). NGC ID# 229N, PCGS# 2299
- 3095 1872 PR64 Red PCGS.** Bold N in ONE. An orange-red Choice proof that boasts an intricate strike and an absence of contact. A loupe reveals infrequent tiny gray spots. A popular series semi-key. NGC ID# 229R, PCGS# 2305

**1877 Cent, PR64 Brown  
Popular Year**

- 3096 1877 PR64 Brown NGC.** With business-strike 1877 cents in huge demand as key dates, considerable price pressure affects the proofs of the year as well. This PR64 Brown piece has deep blue overtones with glimpses of reddish fire near the borders. Census: 17 in 64 Brown, 14 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 229W, PCGS# 2318*

- 3097 1878 PR65 Red Cameo PCGS.** Primarily light peach-gold with a few hints of apricot. Both sides are clearly contrasted and unturned, a rare combination. Population: 9 in 65 Red Cameo, 5 finer (1/14). PCGS# 82323

- 3098 1879 PR66 Red and Brown NGC. CAC.** This delightful Premium Gem proof displays sharply detailed design elements and deeply reflective fields. The well-preserved surfaces show a mix of original red and light brown toning. Census: 33 in 66 (2 in 66 ★) Red and Brown, 2 finer (1/14). NGC ID# 229Y, PCGS# 2325

- 3099 1880 PR66 Red Cameo NGC. Snow-PR1.** This interesting variety shows a defective date punch with broken 8s over regular 8s; this same die was later used to coin business strikes. This splendid Cameo proof Gem shows sharply contrasting devices against the deeply mirrored fields. Even red color dominates the surfaces of this high-end example. Fantastic eye appeal. Census: 1 in 66 Red Cameo, 1 finer (1/14). PCGS# 82329

- 3100 1881 PR66 Red and Brown PCGS.** The well-preserved surfaces of this sharply detailed Premium Gem are mostly original red, with a few hints of light brown patina. The design elements are sharply detailed and the fields are brightly reflective. Population: 19 in 66 (1 in 66+) Red and Brown, 7 finer (1/14). NGC ID# 22A2, PCGS# 2331

- 3101 1882 PR66 Red and Brown NGC.** Rich brown patina mixes with original red on the well-preserved surfaces of this sharply detailed Premium Gem proof. Reflective fields shine beneath the surfaces. Census: 24 in 66 (2 in 66 ★) Red and Brown, 6 finer (1/14). NGC ID# 22A3, PCGS# 2334

- 3102 1884 PR65 Red Cameo PCGS. CAC.** From pale gold to richer orange, this Red Cameo Gem proof offers variety within the color designation. Pleasingly preserved and undeniably appealing. Population: 2 in 65 Red Cameo, 3 finer (1/14). PCGS# 82341

- 3103 1889 PR66 Red and Brown PCGS. CAC.** Vibrant red, pink, orange, and copper colors provide this Premium Gem example with immediate eye appeal. Hints of yellow and violet are also present. The obverse reveals several tiny as-made lint marks. Population: 6 in 66 Red and Brown, 0 finer (1/14). NGC ID# 2732, PCGS# 2355

- 3104 1897 PR65 Red PCGS. CAC.** The upper reverse is rose-red and the remainder of the coin is butter-gold. A fully struck and satiny Gem with only minor carbon. Both sides display moderate cameo contrast. Housed in a first generation holder. Population: 12 in 65 Red, 11 finer (1/14).

*Ex: New York Signature (Heritage, 12/2011), lot 3100, which realized \$1,955. NGC ID# 22AK, PCGS# 2380*

- 3105 1898 PR66 Red and Brown PCGS.** A sharply detailed Premium Gem from a proof mintage of 1,795 pieces, this coin offers deeply mirrored fields and pristine original red surfaces that show a few hints of light brown. Population: 19 in 66 (1 in 66+) Red and Brown, 2 finer (1/14). NGC ID# 22AL, PCGS# 2382

- 3106 1902 PR66 Red and Brown PCGS.** Spectacular shades of violet patina blanket the obverse of this sharply detailed Premium Gem proof, while the reverse remains original red. Population: 31 in 66 (4 in 66+) Red and Brown, 3 finer (1/14). NGC ID# 22AR, PCGS# 2394

- 3107 1906 PR66+ Red and Brown PCGS.** Pinpoint definition shows on all design elements and the deeply mirrored fields of this high-end Premium Gem are free of mentionable distractions. A few hints of light brown patina mixes with the predominant original red color. Population: 9 in 66 (1 in 66+) Red and Brown, 2 finer (1/14). NGC ID# 22AV, PCGS# 2406

**1906 Indian Cent, PR66+ Red  
Only Three Finer Coins at PCGS**

- 3108 1906 PR66+ Red PCGS. CAC.** From a small proof mintage of 1,725 pieces, this high-end Premium Gem displays pinpoint definition on all design elements and deeply mirrored fields. The well-preserved original red surfaces are free of mentionable distractions. Population: 14 in 66 (2 in 66+) Red, 3 finer (1/14). NGC ID# 22AV, PCGS# 2407

- 3109 1909 PR66 Red PCGS.** A delightful Premium Gem proof from the last year of the Indian Head design, this coin offers sharply detailed design elements and original red reflective surfaces. Population: 15 in 66 Red, 2 finer (1/14). NGC ID# 22AY, PCGS# 2416

**LINCOLN CENTS**

- 3110 1909-S VDB — Altered Color — NGC Details. Unc.** Ocean-blue and rose-red dominate though the field near the profile has numerous tiny tan freckles. This key date cent provides dynamic cartwheel luster and a crisp strike. NGC ID# 22B2, PCGS# 2426

- 3111 1909-S VDB — Corroded — ANACS. MS60 Details.** Well struck and satiny with an absence of abrasions. Generally toned medium to deep olive-brown. Only mildly granular, and acceptable to many seekers of this low mintage key. NGC ID# 22B2, PCGS# 2426

- 3112 1909-S VDB MS65 Brown PCGS.** Rich satin luster provides this chocolate-brown Gem with exceptional visual appeal. Areas of rich red-orange color appear at portions of the peripheries and the all-important VDB initials are well defined. Few marks are present and they are minuscule. Population: 57 in 65 Brown, 4 finer (1/14). NGC ID# 22B2, PCGS# 2426

- 3113 1909-S VDB MS64 Red and Brown PCGS. CAC.** A lustrous orange-gold and olive-green near-Gem. The obverse approaches full Red though the reverse has deeper hues about the central legends. Free from marks and boldly struck. A splendid key date cent. NGC ID# 22B2, PCGS# 2427

---

**1909-S VDB Cent, Gem Red and Brown  
Lively Central Reverse**

- 3114 1909-S VDB MS65 Red and Brown NGC.** Both sides show a mix of violet-brown and faded orange with the central reverse appearing far from faded. A gorgeous example of one of the most enduringly popular collector coins in all of U.S. numismatics, prized from the year it was struck. NGC has graded 46 finer Red and Brown coins (1/14). NGC ID# 22B2, PCGS# 2427

---

**1909-S VDB Lincoln Cent, MS65 Red and Brown  
Low-Mintage Series Key**

- 3115 1909-S VDB MS65 Red and Brown PCGS. CAC.** Scattered splashes of pink and bright yellow-gold color add to the eye appeal of the obverse on this lovely well-struck Gem. The reverse displays attractive deep wheat-gold color with accents of red, ice-green, and orange. A dark spot appears on the bridge of Lincoln's nose and a few flyspecks of carbon are present. PCGS has awarded higher numeric grades to only 32 examples in this color designation (1/14). NGC ID# 22B2, PCGS# 2427

---

**1909-S VDB Cent, MS65 Red and Brown  
Delicate Olive Toning**

- 3116 1909-S VDB MS65 Red and Brown PCGS. CAC.** All aspects of this impressive Gem exhibit bold design motifs and the surfaces display brilliant orange and gold mint color with frosty luster. Traces of pale olive-brown toning just barely prevent assignment of the Red color designation to this beauty. NGC ID# 22B2, PCGS# 2427

- 
- 3117 1909-S VDB MS64 Red PCGS.** The original red surfaces of this famous series key show a few hints of lilac and light brown patina. The design elements are sharply detailed and both sides radiate vibrant mint luster. NGC ID# 22B2, PCGS# 2428

---

**1909-S Lincoln Cent, MS66 Red  
Only Four Numerically Finer at PCGS**

- 3118 1909-S MS66 Red PCGS.** A delightful Premium Gem Lincoln cent from the first year of the design, this coin offers sharply detailed design elements and original red surfaces with vibrant mint luster. No mentionable distractions are evident and eye appeal is outstanding. PCGS has graded four numerically finer examples (1/14). NGC ID# 22B4, PCGS# 2434

- 
- 3119 1910 MS66+ Red PCGS.** This high-end Premium Gem Lincoln cent displays well-preserved original red surfaces with vibrant mint luster and outstanding eye appeal. PCGS has graded 22 numerically finer examples (1/14). NGC ID# 22B5, PCGS# 2437

- 3120 1910-S MS66 Red and Brown PCGS. CAC.** Gold and peach surfaces are mellowed through the central obverse but uncommonly vibrant elsewhere. An attractive Premium Gem example of a little-saved issue. Population: 4 in 66 Red and Brown, 0 finer (1/14). NGC ID# 22B6, PCGS# 2439

- 3121 1910-S MS65 Red PCGS.** A wheat-gold and olive Gem with booming luster and exceptional eye appeal. Well struck and essentially devoid of contact, though a small spot is noted between the letters in OF. Encased in an old green label holder. NGC ID# 22B6, PCGS# 2440

- 3122 1911-D MS65 Red PCGS.** Light peach-to-pink overall with an area of lavender-blue behind Lincoln's head. An attractive example of this initial cent issue from the Denver Mint. PCGS has graded just 21 coins as MS66 Red or finer (1/14). NGC ID# 22B8, PCGS# 2446

- 3123 1914-D AU55 NGC.** This lightly circulated low-mintage key shows smooth medium brown surfaces with no trace of carbon and only minor signs of contact. A few hints of crimson and traces of mint luster cling to the obverse surfaces. NGC ID# 22BH, PCGS# 2471

- 3124 1914-D — Cleaned — ANACS. MS60 Details.** This lustrous and fully struck key date cent is worn and virtually free from marks. Recolored and principally olive-green, though a blush of ruby-red visits the upper obverse. One tiny spot on the stem of the left wheat ear. NGC ID# 22BH, PCGS# 2471

**1914-D Cent, MS64 Brown  
Olive and Sandy-Brown Color**

- 3125 1914-D MS64 Brown PCGS.** The surfaces of this well-struck near-Gem have swaths of olive and sandy-brown, as well as significant areas of slightly faded copper-orange around the reverse periphery. While this low-mintage issue did not attract much contemporary notice, collectors today avidly pursue attractive examples. Population: 48 in 64 (1 in 64+) Brown, 11 finer (1/14). *Ex: Long Beach Signature (Heritage, 2/2007), lot 2337; Long Beach Signature (Heritage, 9/2007), lot 343.* NGC ID# 22BH, PCGS# 2471

**1914-D Cent, MS63 Red and Brown  
Well-Struck, Mostly Red**

- 3126 1914-D MS63 Red and Brown PCGS.** The 1914-D Lincoln cent is a rarity in all grades, but especially when sharply struck with mostly red surfaces. Many collectors prefer Red and Brown graded coins over full Red examples for their undisturbed originality. This is such a cent. The orange-red surfaces are lightly dusted with almond toning, and a partial fingerprint exists on the reverse. NGC ID# 22BH, PCGS# 2472
- 3127 1915-D MS65 Red PCGS.** This delightful Gem exhibits razor-sharp definition on all design elements and the original red surfaces radiate blazing mint luster on both sides. Few signs of contact are evident. PCGS has graded 27 numerically finer examples (1/14). NGC ID# 22BL, PCGS# 2482
- 3128 1915-S MS64 Red PCGS.** Pale copper-gold and lavender hues mingle on this Red near-Gem. Well-defined with a handful of scattered spots, the largest at the bottom left reverse. Population: 57 in 64 (3 in 64+) Red, 31 finer (1/14). NGC ID# 22BM, PCGS# 2485
- 3129 1918 MS66 Red PCGS.** Razor-sharp definition is evident on all design elements of this spectacular Premium Gem and the original red surfaces show no mentionable distractions. Vibrant mint luster adds to the outstanding eye appeal. PCGS has graded 21 numerically finer examples (1/14). NGC ID# 22BV, PCGS# 2506
- 3130 1918-S MS64 Red NGC.** The obverse has copper-gold and peach coloration with a few isolated flyspecks. On the reverse a sizable violet patch appears below the word AMERICA. Census: 19 in 64 Red, 6 finer (1/14). NGC ID# 22BX, PCGS# 2512
- 3131 1918-S MS64 Red PCGS. CAC.** This impressive Choice Lincoln cent displays original red surfaces that have mellowed to crimson in a few areas. The design elements are sharply rendered and vibrant mint luster adds to the outstanding eye appeal. Population: 65 in 64 (1 in 64+) Red, 15 finer (1/14). NGC ID# 22BX, PCGS# 2512

- 3132 1919-D MS65 Red NGC.** Peach-red luster bathes this fully struck Denver Mint Gem. Marks are absent though minor carbon includes a small spot between the ME in AMERICA. Housed in a former generation holder. Census: 20 in 65 Red, 0 finer (1/14). NGC ID# 22BZ, PCGS# 2518

- 3133 1919-S MS64 Red PCGS.** A pumpkin-gold early branch cent with vibrant luster and a good strike. We note only a thin mark beneath GOD and a couple of small reverse spots. Certified in a green label holder. NGC ID# 22C2, PCGS# 2521

- 3134 1921 MS66+ Red PCGS.** This high-end Premium Gem exhibits sharply detailed design elements throughout and vibrant mint luster on both sides. The original red surfaces are free of mentionable distractions. Population: 67 in 66 (1 in 66+) Red, 11 finer (1/14). NGC ID# 22C6, PCGS# 2533

- 3135 1922 No D Strong Reverse VF35 PCGS. FS-401.** Die Pair 2. The high points are light chestnut-tan while the fields display deeper walnut-brown. Free from obvious spots or abrasions. Due to an unprecedented silver dollar mintage, the Philadelphia Mint omitted cent production in 1922. NGC ID# 22C9, PCGS# 3285

- 3136 1922 No D Strong Reverse — Cleaning — PCGS Genuine. XF Details. FS-401.** Die Pair 2. The reverse shows little evidence of wear, but the portrait is glossy. Attractively retoned golden-brown, lime-green, and lilac. TRUST and the second 2 in the date are sharp. NGC ID# 22C9, PCGS# 3285

**1922 Cent, Choice XF  
No D, Strong Reverse**

- 3137 1922 No D Strong Reverse XF45 PCGS. FS-401.** Die Pair 2. Some varieties capture the imagination of numismatists in unexpected ways. While a lapped die is less than spectacular on most coins, the sans-mintmark appearance of FS-401 places it among the most desirable Lincoln cents. This lightly circulated deep brown cent has a richly detailed reverse and only scattered small marks. *Ex: Long Beach Signature (Heritage, 2/2007), lot 2355, which realized \$3,737.50.* NGC ID# 22C9, PCGS# 3285

**1924-S Lincoln Cent, MS65  
Lovely Blended Toning  
None Certified Finer in Red and Brown**

- 3138 1924-S MS65 Red and Brown PCGS.** An above-average strike and surfaces that are virtually free from contact combine to confirm the Gem designation. Ruby-red color embraces the peripheries and frames the sharply struck portrait on the obverse, which approaches full Red. The reverse surfaces are subtly muted by olive-brown overtones for a delightful blended appeal. Population: 23 in 65 Red and Brown, 0 finer (1/14). NGC ID# 22CE, PCGS# 2556

**1924-S Cent, MS64 Red  
Rich Mint Luster**

- 3139 1924-S MS64 Red PCGS.** Rich mint luster is largely apricot and copper-gold with a few streaks of caramel-honey, particularly across the reverse. This Red near-Gem has the typically blurry appearance of this issue on the obverse, a lack of detail that should not be mistaken for wear. Population: 83 in 64 (1 in 64+) Red, 8 finer (1/14). NGC ID# 22CE, PCGS# 2557

**1925-S Cent, MS65 Red and Brown  
Attractive Surfaces**

- 3140 1925-S MS65 Red and Brown PCGS.** Both sides offer a blend of apricot, peach, and mahogany shadings. This softly lustrous Gem has few marks or flyspecks, making for an uncommonly appealing example of its little-saved San Francisco issue. Great for the series specialist. Population: 8 in 65 Red and Brown, 0 finer (1/14). NGC ID# 22CH, PCGS# 2565

**1926-S Lincoln Cent, MS64 Red and Brown  
Glossy, Purple-Red Surfaces  
Strong Strike**

- 3141 1926-S MS64 Red and Brown PCGS. CAC.** Prohibitively priced when in full Red, quality Red and Brown examples of this low-mintage issue are eagerly sought as an alternative but they are seldom found. A mintage of just 4.5 million pieces yielded few high-grade coins with strong strikes and eye appeal. This MS64 example is thoroughly attractive with purple-red toning, glossy surfaces, and unusually bold details on the central devices. Lincoln is well-detailed on the hair, beard, and shoulder. Virtually no abrasions or marks are present on the coin. It is hard to imagine a more impressive 1926-S cent for the grade. NGC ID# 22CL, PCGS# 2574

- 3142 1927 MS67 Red PCGS.** The lustrous surfaces have a prevailing bright orange with a subtle yet perceptible hint of mint-green on each side. One small tick on Lincoln's cheek is the only mentionable contact, and a loupe reveals a single small carbon fleck. A beautiful example of this P-mint issue, among the finest graded. Population: 39 in 67 (1 in 67+) Red, 0 finer (1/14). NGC ID# 22CM, PCGS# 2578

- 3143 1927-D MS65 Red PCGS.** The obverse is largely pale peach and pink, while the reverse offers deeper tones and adds lavender. A well-defined Red Gem with occasional carbon but generous eye appeal. Population: 53 in 65 Red, 2 finer (1/14). NGC ID# 22CN, PCGS# 2581

- 3144 1927-S MS64 Red NGC.** Vibrant coruscating mint luster radiates from both sides of this delightful Choice Lincoln cent, with sharply detailed design elements and pristine original red surfaces. Census: 16 in 64 Red, 7 finer (1/14). NGC ID# 22CP, PCGS# 2584

- 3145 1930 MS67+ Red PCGS.** A memorable high-end Superb Gem, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved original red surfaces add to the outstanding eye appeal. Population: 84 in 67 (1 in 67+) Red, 1 finer (1/14). NGC ID# 22CX, PCGS# 2605

- 3146 1931-D MS65 Red PCGS. CAC.** Sharply detailed throughout, with vibrant mint luster on both sides and well-preserved original red surfaces, this spectacular Gem possesses terrific eye appeal. PCGS has graded 31 numerically finer examples (1/14). NGC ID# 22D3, PCGS# 2617

**1933 Cent, MS67 Red  
None Graded Finer**

- 3147 1933 MS67 Red PCGS. CAC.** Fiery orange surfaces show splendid luster with no mentionable impairments on this low-mintage, Depression-era cent. The Superb Gem Red level is the top grade for this issue, as it is for its cohorts, the 1932, 1932-D, and 1933-D. A few scattered flecks appear under a loupe, and the reverse die is rotated a bit counterclockwise with respect to the obverse. Population: 42 in 67 Red, 0 finer (1/14). NGC ID# 22D7, PCGS# 2629

- 3148 1935-D MS67 Red PCGS. CAC.** A sharply detailed Superb Gem Lincoln cent, with vibrant mint luster and well-preserved original red surfaces. Eye appeal is terrific. Population: 77 in 67 (1 in 67+) Red, 1 finer (1/14). NGC ID# 22DC, PCGS# 2644

- 3149 1937 MS67+ Red PCGS. CAC.** Lemon-gold surfaces are essentially untuned with minimal spotting. A die crack passes through the left side of ONE CENT. PCGS has graded only four pieces as MS67+ Red and just one numerically finer (1/14). NGC ID# 22DH, PCGS# 2659

- 3150 1938-S MS67+ Red PCGS. CAC.** The 1938-S Lincoln cent is not too difficult to locate in MS67 Red condition, but finer examples are virtually unobtainable. This high-end Superb Gem offers vibrant mint luster and pristine original red surfaces. PCGS has graded no coins in finer numeric grades (1/14). NGC ID# 22DN, PCGS# 2674

- 3151 1941 Doubled Die Obverse MS65 Red PCGS. FS-101.** The spread is most obvious on the 4 in the date, LIBERTY, and IN GOD WE TRUST. A pumpkin-gold Gem with a good strike and potent luster. A couple of minor strike-throughs above the A in STATES and beneath the ME in AMERICA. PCGS# 92695

**1941 Doubled Die Obverse Cent, FS-101  
MS66+ Red, Sole Finest Graded**

- 3152 1941 Doubled Die Obverse MS66+ Red PCGS. CAC. FS-101.** The G in GOD is noticeably doubled on the FS-101, while all of GOD shows doubling on the FS-102. IN is broadly doubled as well on this variety. This is a sharply struck, great-looking orange-red example of this variety, showing no mentionable distractions. It takes a loupe to see a couple of tiny flecks on the reverse. This piece is currently the sole finest Red Doubled Die Obverse at PCGS, although there are 16 without the Plus (1/14). PCGS# 92695
- 3153 1942-S MS67+ Red PCGS. CAC.** This high-end Superb Gem Lincoln cent possesses incredible eye appeal and technical quality. The design elements are sharply rendered and the original red surfaces remain flawless. PCGS has graded two numerically finer examples (1/14). PCGS# 2710
- 3154 1947-S MS67+ Red PCGS. CAC.** Generous apricot-gold and peach "fire" enhances the eye appeal of this MS67+ Red coin. Both sides are smooth and utterly unturned. PCGS has graded just two MS67+ Red examples and none finer (1/14). NGC ID# 22ER, PCGS# 2758

**1951 Cent, MS67 Red  
Conditionally Rare**

- 3155 1951 MS67 Red PCGS. CAC.** Few examples of this early-1950s Philadelphia Lincoln cent have attained the PCGS MS67 Red grade of the present piece — precisely sixteen, in fact, turning on its head the conventional wisdom that the mintmarked Lincoln cents are conditionally rarer than their P-mint counterparts. Splendid luster runs over orange-red, problem-free surfaces. Population: 16 in 67 Red, 0 finer (1/14). NGC ID# 22F3, PCGS# 2788

**1955 Cent, MS67 Red  
Significant Registry Coin**

- 3156 1955 MS67 Red PCGS. CAC.** From light lemon-gold to apricot and peach, this 1955 (normal) cent displays a range of Red shades without ever falling into Red and Brown territory. Overall detail is excellent and only a few minuscule flyspecks appear on the reverse. Population: 20 in 67 Red, 0 finer (1/14). NGC ID# 22FF, PCGS# 2824
- 3157 1955 Doubled Die Obverse — Environmental Damage — PCGS Genuine. AU Details.** The obverse margin has a few peripheral gray spots including two near the date. A chocolate-brown key date cent with noticeable luster and only a trace of wear. A lens reveals infrequent small marks. NGC ID# 22FG, PCGS# 2825
- 3158 1955 Doubled Die Obverse AU53 ANACS. FS-101.** The remarkable obverse die doubling caused a hobby sensation during 1955. This briefly circulated key date example has blended chocolate-brown, jade-green, and ruby-red toning. Mint gloss is nearly universal across the minimally abraded surfaces. NGC ID# 22FG, PCGS# 2825
- 3159 1955 Doubled Die Obverse AU58 NGC. FS-101.** Ex: Manhattan Collection. Slight friction on the jaw confirms a brief sojourn in commerce, but this medium brown example is coruscating and only minimally abraded. The reverse exergue displays nearly imperceptible retained laminations, as made. NGC ID# 22FG, PCGS# 2825
- 3160 1955 Doubled Die Obverse MS62 Brown PCGS. FS-101.** The 1955 FS-101 is the most visually impressive of the many doubled die Lincoln cent varieties. The present boldly struck, coruscating, and unabraded example has mottled walnut-brown, rose-gold, and sea-green obverse toning. The reverse is mahogany-brown. NGC ID# 22FG, PCGS# 2825
- 3161 1955 Doubled Die Obverse MS62 Brown PCGS. CAC. FS-101.** A chocolate-brown representative with coruscating luster and a good strike. A lens reveals distributed trivial marks. A pleasing example of the famous mint error that confounded Eisenhower-era hobbyists. NGC ID# 22FG, PCGS# 2825

**1955/55 Lincoln Cent, MS64 Brown  
Glossy Steel-Brown Surfaces**

- 3162 1955 Doubled Die Obverse MS64 Brown PCGS. FS-101.** This dramatic overdate variety has become an important issue in the Lincoln cent series, highly coveted by collectors. This near-Gem is sharply struck and lustrous, with chocolate-brown coloration enhanced by noticeable steel-green accents on the high points. A few tiny contact marks limit the grade.  
Ex: Long Beach Signature (Heritage, 9/2007), lot 386. NGC ID# 22FG, PCGS# 2825

**3163 1955-S MS67+ Red PCGS.** An immaculate example of this always-popular final year of issue. A memorable '55-S cent. Fiery-red color complements a bold strike. PCGS has graded one numerically finer example (1/14). NGC ID# 22FJ, PCGS# 2833

**3164 1956-D MS67 Red PCGS.** Pleasing orange luster energizes the sharply struck surfaces of this D-mint superb Gem. A few scattered light ticks are within the parameters of the designated grade. Population: 46 in 67 (1 in 67+) Red, 0 finer (1/14). NGC ID# 22FL, PCGS# 2839

**3165 1956-D/D MS67 Red PCGS. FS-501.** The mintmark is strongly repunched southwest with a prominent upright and curve of the secondary mintmark. A virtually pristine orange-gold Superb Gem. As of (1/14), the single finest PCGS-certified example, and highly desirable for the competitive Registry Set. PCGS# 37942

**3166 1957-D MS67 Red PCGS.** This Superb Gem Lincoln cent displays well-detailed design elements and vibrant mint luster on virtually pristine original red surfaces. Population: 50 in 67 Red, 0 finer (1/14). NGC ID# 22FN, PCGS# 2845

#### 1960 Large Date Cent, MS67 Red Notable Condition Rarity

**3167 1960 Large Date MS67 Red PCGS.** The Large Date 1960 cents are more available than their Small Date counterparts in most grades, but by the MS67 Red level both are condition rarities. This piece has magnificent copper-orange fire with only a few tiny flyspecks, most visibly below the word IN on the obverse. Population: 7 in 67 Red, 0 finer (1/14). NGC ID# 22FW, PCGS# 2860

#### 1960-D Large Date Cent, MS67 Red Among the Finest Known

**3168 1960-D Large Date MS67 Red PCGS.** Several small, interesting die breaks are present on this beautifully preserved Superb Gem example exhibiting strong mint luster and vibrant copper-orange color. The die breaks are present across Lincoln's head, in the 9 of the date, and the B in LIBERTY. The fields reveal a number of die polish lines on this well struck piece. Population: 13 in 67 Red, 0 finer (1/14). NGC ID# 22FY, PCGS# 2866

#### 1963 Cent, MS67 Red A Registry Collecting Essential

**3169 1963 MS67 Red PCGS.** Uncommonly fresh for a 50-year-old early brass Lincoln cent and gorgeous with a mix of light apricot and deeper peach shades. Frosty highlights on the portrait further the eye appeal. With just 10 MS67 Red representatives graded by PCGS and none finer (1/14), this is a Registry collecting essential. NGC ID# 22G5, PCGS# 2884

#### 1969 Cent, MS67 Red Significant Registry Coin

**3170 1969 MS67 Red PCGS.** Both sides are largely pale copper-gold with occasional hints of apricot and peach. Though the hub device of Lincoln's portrait was weakened from use by 1969, the reverse shows good crispness of detail. Carefully preserved, a significant Registry coin. Population: 11 in 67 Red, 0 finer (1/14). NGC ID# 22GF, PCGS# 2914

**3171 1972 Doubled Die Obverse MS66 Red PCGS. FS-101.** With the exception of the 1955 FS-101, the most dramatic of all Lincoln doubled die varieties. A lustrous peach-red Premium Gem with a precise strike and only minor imperfections. Encapsulated in an old green label holder. NGC ID# 22GU, PCGS# 2950

#### 1973-D Cent, MS67 Red Tied for Finest Known

**3172 1973-D MS67 Red PCGS.** Hard to believe that out of more than 3.5 billion pieces produced none have certified finer than MS67 Red, but that is the case. This Superb Gem example is extremely rare and a likely target for a Registry Set. Rich orange surfaces have considerable reddish fire everywhere. Lincoln is extremely well brought up by the full strike. There are no discernible abrasions or spots. Population: 8 in 67 Red, 0 finer (1/14). NGC ID# 22GY, PCGS# 2962

- 3173 1985 MS68+ Red PCGS.** This magnificent 1985 Lincoln cent is the finest example certified at PCGS. The design elements exhibit razor-sharp definition and the pristine original red surfaces radiate vibrant mint luster on both sides. Population: 20 in 68 (1 in 68+) Red, 0 finer (1/14). NGC ID# 22J3, PCGS# 3071

## PROOF LINCOLN CENTS

- 3174 1910 PR64 Red PCGS.** A generous mintage of 4,118 matte proof Lincoln cents was accomplished in 1910. This attractive Choice specimen is sharply detailed throughout, with original red surfaces that show few signs of contact. Population: 40 in 64 Red, 63 finer (1/14). NGC ID# 22KT, PCGS# 3308
- 3175 1912 PR65 Red and Brown PCGS.** A delightful Gem from a matte proof mintage of 2,172 pieces, this coin displays a mix of original red, violet, and light brown patina on the well-preserved surfaces. The design elements are sharply detailed throughout. Population: 47 in 65 Red and Brown, 15 finer (1/14). NGC ID# 22KV, PCGS# 3313
- 3176 1913 PR65 Red and Brown PCGS.** Lustrous and boldly detailed with a remarkable array of gold, purple, green, and bluish-purple hues. A few flecks are scattered across each side. Population: 76 in 65 Red and Brown, 21 finer (1/14). NGC ID# 22KW, PCGS# 3316
- 3177 1913 PR66 Red and Brown PCGS.** From a matte proof mintage of 2,983 pieces, the well-preserved surfaces of this delightful Premium Gem display a mix of original red and light brown toning. Population: 17 in 66 (1 in 66+) Red and Brown, 4 finer (1/14). NGC ID# 22KW, PCGS# 3316
- 3178 1936 Type Two — Brilliant Finish PR65 Red PCGS.** This delightful Gem features fully struck design elements and well-preserved all-brilliant surfaces with outstanding eye appeal. PCGS has graded 38 numerically finer examples (1/14). NGC ID# 22L3, PCGS# 3335
- 3179 1953 PR67+ Cameo PCGS.** The sharply detailed design elements of this high-end Superb Gem have a frosty texture that contrasts boldly with the deeply mirrored fields and the pristine surfaces retain their original red color. Population: 41 in 67 (3 in 67+) Cameo, 2 finer (1/14). NGC ID# 22LD, PCGS# 83368

## TWO CENT PIECES

- 3180 1864 Small Motto AU55 NGC. FS-401.** Although close to 20,000,000 two cent pieces were struck in 1864, a time when most U.S. coins were hoarded, only a tiny percentage of the production constituted the Small Motto subtype. Smooth chocolate-brown fields accompany dove-gray high points. NGC ID# 22N8, PCGS# 3579
- 3181 1864 Large Motto MS65 Red PCGS.** A spectacular Red Gem of the more available Large Motto variant from the first year of the denomination. The design elements are sharply detailed and the peach-gold surfaces remain radiant. NGC ID# 22N9, PCGS# 3578
- 3182 1868 MS64 Red PCGS.** Orange-gold color overall, though the obverse interior also exhibits light olive and rose shades. This near-Gem has good luster and only a handful of minor marks and carbon flecks. Housed in a first-generation holder. Population: 29 in 64 Red, 14 finer (1/14). NGC ID# 22NC, PCGS# 3599
- 3183 1872 AU55 NGC.** The last business strike two cent issue saw production of just 64,000 pieces. This lightly worn example has deep mahogany-chocolate surfaces and few marks of any significance. Census: 8 in 55, 56 finer (1/14). NGC ID# 22NG, PCGS# 3612

## 1872 Two Cent, Red and Brown Impressive Near-Gem, Final-Year Issue

- 3184 1872 MS64 Red and Brown PCGS.** Only 65,000 business-strike two cent pieces were struck in 1872, the last regular-issue coinage of the series. This impressive Choice example offers sharply-detailed devices and lustrous surfaces that are patinated in shades of original red and light brown. Population: 34 in 64 (1 in 64+) Red and Brown, 11 finer (1/14). NGC ID# 22NG, PCGS# 3613

## PROOF TWO CENT PIECES

- 3185 1870 PR64 Red PCGS.** Predominantly copper-gold with touches of peach and one significant flyspeck just right of 12 o'clock on the reverse rim. A pleasing specimen that is surprisingly unmelting. Population: 39 in 64 Red, 53 finer (1/14). NGC ID# 274Z, PCGS# 3644
- 3186 1870 PR67 Red PCGS.** The original red and lilac surfaces of this spectacular Superb Gem are moderately reflective and free of mentionable distractions. The design elements are sharply detailed throughout. Population: 1 in 67 Red, 0 finer (1/14). NGC ID# 274Z, PCGS# 3644
- 3187 1872 PR65 Red and Brown PCGS. CAC.** A razor-sharp Gem of this low mintage date. The obverse has a lemon-gold center bounded by blended orange and olive. The reverse displays deeply variegated magenta and tan-brown. Certified in a first generation holder. NGC ID# 2752, PCGS# 3649

## THREE CENT SILVER

- 3188 1851 MS66 PCGS.** This well-detailed Premium Gem exhibits well-preserved lustrous surfaces under shades of lavender, gray, and greenish-gold toning. PCGS has graded 13 numerically finer examples (1/14). NGC ID# 22YX, PCGS# 3664
- 3189 1852 MS66+ NGC.** Ivory surfaces host wispy gold toning on this Premium Gem. Both sides have brilliant luster with excellent eye appeal. Heavy flowlines diminish the peripheral sharpness and a meandering die crack connects the 1 to the star and border. NGC ID# 22YZ, PCGS# 3666
- 3190 1853 MS65 PCGS. CAC.** Lightly gold-toned over a pale silver base. This Gem's swirling luster has a touch of satin but also a certain brightness that makes it appealing. NGC ID# 22Z2, PCGS# 3667
- 3191 1859 MS65 NGC.** An attractive Gem from a mintage of 364,200 pieces, this coin exhibits well-detailed design elements and vibrant mint luster, with shades of lavender, champagne-gold, and amber toning. Census: 41 in 65 (2 in 65 ★), 18 finer (1/14). NGC ID# 22Z8, PCGS# 3677

**1863 Three Cent Silver, MS66**  
Many Examples Melted

- 3192 1863 MS66 NGC.** The 1863 three cent silver is an elusive business strike because most examples were melted after the denomination became obsolete in 1873. This lustrous Premium Gem has frosty silver interiors and outer green-gold and blue-violet patina. Census: 12 in 66, 6 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 22ZD, PCGS# 3682*

- 3193 1864 MS66 NGC.** A boldly die clashed example with variegated, speckled iridescence over both sides. The fields are glassy and semiprooflike, and there are no contact marks on the well-struck surfaces. Just 12,000 business strikes were issued, and survivors are scarce in any grade.

*Ex: Dallas Signature (Heritage, 11/2005), lot 442; Dallas Signature (Heritage, 12/2005), lot 230.*

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 22ZE, PCGS# 3684*

**PROOF THREE CENT SILVER**

- 3194 1862 PR66 Cameo NGC. CAC.** The mintage of proof three cent silver coins in 1862 totaled a mere 550 pieces, and the issue is extremely rare at the PR66 Cameo level today. Few survivors can compete with the quality of the coin offered here. The design elements are fully brought up and contrast starkly with the liquid, mirrored fields. Only five coins have been certified In PR66 Cameo by NGC and PCGS combined, with one finer (1/14). PCGS# 83711

**1873 Three Cent Silver, PR65**  
Proof-Only Final Issue

- 3195 1873 PR65 PCGS.** The three cent silver denomination finished with a proof-only issue of 600 pieces in 1873. This Gem of that final date has a mix of light apricot and deeper blue-green hues embracing still-reflective fields. Great eye appeal. Population: 57 in 65, 13 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 27CJ, PCGS# 3724*

**1873 Three Cent Silver, PR65**  
Closed 3, Proof-Only Issue

- 3196 1873 PR65 NGC.** From a tiny proof-only mintage of 600 pieces, all 1873 three cent silver pieces feature a Closed 3 in the date. This impressive Gem displays sharply detailed design elements and reflective surfaces under shades of greenish-gray and electric-blue toning. Census: 67 in 65 (1 in 65+, 1 in 65 ★), 32 finer (1/14). NGC ID# 27CJ, PCGS# 3724

**1873 Three Cent Silver, Beautifully Toned PR65**

- 3197 1873 PR65 PCGS. CAC.** Final year of the type, three cent silver pieces were brought to a close by the "Crime of '73," the same legislation that ended other non-traditional denominations. This deeply mirrored example shines brightly through the green and rose toning seen over each side. Exceptional quality. Population: 57 in 65, 13 finer (1/14). NGC ID# 27CJ, PCGS# 3724

**THREE CENT NICKELS**

- 3198 1871 MS66 NGC.** The 1871 three cent nickel is virtually unobtainable in grades above the MS66 level. This well-detailed Premium Gem displays vibrant mint luster and well-preserved surfaces with accents of greenish-gold toning. Census: 15 in 66 (3 in 66+), 1 finer (1/14). NGC ID# 22NN, PCGS# 3737

- 3199 1872 MS65+ PCGS. CAC.** This high-end Gem exhibits sharply detailed design elements and vibrant mint luster, with well-preserved-gray surfaces. Population: 25 in 65 (2 in 65+), 14 finer (1/14). NGC ID# 2757, PCGS# 3738

**1879 Three Cent Nickel, MS67**  
Semireflective Reverse

- 3200 1879 MS67 PCGS. CAC.** The obverse has a satiny finish while the reverse is brighter and semireflective. Both sides have a blue overtone, lighter on the reverse. With just 38,000 business strikes produced, the 1879 three cent nickel is conditionally rare as a Superb Gem. Population: 10 in 67, 0 finer (1/14). NGC ID# 275B, PCGS# 3747

- 3201 1880 MS66 PCGS.** This sharply detailed Premium Gem exhibits well-preserved nickel-gray surfaces with accents of champagne-gold toning and vibrant mint luster on both sides. Population: 59 in 66 (4 in 66+), 34 finer (1/14). NGC ID# 275C, PCGS# 3748
- 3202 1888 MS67 PCGS.** A magnificent Superb Gem from a mintage of 36,500 pieces, this coin exhibits sharply detailed design elements and vibrant mint luster, with well-preserved surfaces under shades of greenish-gold patina. Population: 37 in 67, 1 finer (1/14). NGC ID# 275H, PCGS# 3757

## PROOF THREE CENT NICKELS

### 1865 Three Cent Nickel, PR65 Only 500 Pieces Struck

- 3203 1865 PR65 NGC.** A sharply detailed three cent nickel from the last year of the Civil War, this delightful Gem displays reflective fields with few signs of contact and pleasing greenish-gold and powder-blue toning. From a small proof mintage of just 500 pieces. Census: 58 in 65, 15 finer (1/14). NGC ID# 275K, PCGS# 3761
- 3204 1867 PR66 Cameo PCGS.** This boldly contrasted Premium Gem offers sharply detailed design elements with rich mint frost and well-preserved reflective surfaces that show hints of pale gold toning. Population: 26 in 66 (1 in 66+) Cameo, 0 finer (1/14). PCGS# 83763
- 3205 1867 PR66 Cameo NGC.** The design elements of this sharply detailed Premium Gem are richly frosted and contrast noticeably with the deeply mirrored fields. Census: 68 in 66 Cameo (1 in 66+ Cameo, 5 in 66 ★ Cameo), 5 finer (1/14). PCGS# 83763
- 3206 1868 PR66 Cameo NGC.** Lightly blue-toned across each side with strong underlying contrast. A tiny flyspeck appears just inside the right reverse wreath. Census: 28 in 66 Cameo (5 in 66 ★ Cameo, 2 in 66+★ Cameo), 12 finer (1/14). PCGS# 83764
- 3207 1869 PR66 Cameo NGC.** Shades of pale gold and lavender toning enliven the pristine surfaces of this sharply detailed Premium Gem proof. The frosty devices contrast boldly with the deeply mirrored surfaces. Census: 35 in 66 Cameo (1 in 66+ Cameo, 6 in 66 ★ Cameo), 5 finer (1/14). PCGS# 83765

### 1869 Three Cent Nickel Dazzling PR66 Deep Cameo

- 3208 1869 PR66 Deep Cameo PCGS. CAC.** A brilliant fully struck, high-grade specimen whose snowy devices and glassy fields combine for exceptional white on black contrast. The eye appeal is outstanding. Deep Cameo proofs of the series are increasingly collected. Population: 8 in 66 Deep Cameo, 0 finer (1/14). PCGS# 93765

- 3209 1872 PR66 NGC.** From a reported mintage of 950 pieces, this delightful Premium Gem proof displays sharply detailed design elements and well-preserved reflective surfaces. Census: 29 in 66, 0 finer (1/14). NGC ID# 275T, PCGS# 3768
- 3210 1875 PR65 PCGS.** Green-gold border toning and blue-green interiors are equally reflective on this solidly struck Gem proof. Colorful eye appeal is the coin's calling card. PCGS has graded just 19 coins as PR66 or finer (1/14). NGC ID# 22NV, PCGS# 3771
- 3211 1876 PR66 NGC.** A premium Gem proof from a mintage of 1,150 pieces, this coin exhibits sharply defined design elements and deeply mirrored fields with greenish-gold and lavender patina. Census: 31 in 66 (1 in 66 ★), 3 finer (1/14). NGC ID# 275W, PCGS# 3772
- 3212 1876 PR66 Cameo PCGS.** A moderately contrasted Premium Gem specimen with pleasing reflectivity and hints of blue and gold color. Quality eye appeal. Population: 15 in 66 Cameo, 0 finer (1/14). PCGS# 83772
- 3213 1876 PR66 Cameo NGC.** The sharply detailed frosty design elements of this spectacular Premium Gem contrast boldly with the deeply reflective fields and the well-preserved surfaces are blanketed in shades of pale gold toning. Census: 18 in 66 Cameo (3 in 66 ★ Cameo, 1 in 66+★ Cameo), 4 finer (1/14). PCGS# 83772

### 1877 Three Cent Nickel, PR66 Popular Proof-Only Date

- 3214 1877 PR66 NGC.** A pleasing Premium Gem from a proof-only issue of just 510 pieces, delicately toned gold and blue over fields that are watery on the obverse and satiny on the reverse. Exquisite detail on Liberty's hair and the finer elements of the wreath confirms the coin's proof status. Census: 72 in 66 (1 in 66+★), 4 finer (1/14). NGC ID# 275X, PCGS# 3773
- 3215 1878 PR66 Cameo NGC.** The design elements of this delightful Premium Gem are strongly impressed, but there are some areas of incomplete detail due to die polishing. The frosty devices contrast boldly with the deeply mirrored fields. Census: 60 in 66 Cameo (2 in 66+ Cameo, 2 in 66 ★ Cameo), 31 finer (1/14). PCGS# 83774
- 3216 1878 PR67 Cameo PCGS.** This splendid Superb Gem displays excellent field-motif contrast over both sides, each of which exhibits sharply struck design features, including the lines in the III denomination. Light gray surfaces are impeccably preserved. Population: 21 in 67 (1 in 67+) Cameo, 1 finer (1/14). PCGS# 83774
- 3217 1879 PR67 Cameo PCGS.** A generous proof mintage of 3,200 three cent nickels was accomplished in 1879. This spectacular Superb Gem displays deeply reflective fields that contrast boldly with the sharply detailed frosty design elements. Population: 36 in 67 Cameo, 1 finer (1/14). PCGS# 83775
- 3218 1880 PR66 PCGS. CAC.** Principally toned ice-blue though the high points display straw-gold. The strike is full, but portions of the wreath ribbon are missing due to a lapped reverse die. Satiny and immaculate. Encased in a first generation holder. NGC ID# 2762, PCGS# 3776

**3219 1881 PR67 NGC.** A spectacular Superb Gem from a generous proof mintage of 3,575 pieces, this coin offers sharply detailed design elements and deeply reflective fields with no mentionable distractions. Census: 56 in 67 (4 in 67 ★), 8 finer (1/14). NGC ID# 2763, PCGS# 3777

**3220 1881 PR67 NGC.** Ex: "Col." E.H.R. Green. The 8s are repunched west and the final 1 is repunched south. Lustrous and nearly brilliant with a full strike. Census: 56 in 67 (4 in 67 ★), 8 finer (1/14). Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$2.50; Eric P. Newman Numismatic Education Society. NGC ID# 2763, PCGS# 3777

**3221 1882 PR67 Cameo PCGS. CAC.** Pleasingly contrasted through light patina, mostly pastel-yellow with touches of peripheral blue. This Superb Gem has solid quality within the grade. Population: 65 in 67 (3 in 67+) Cameo, 5 finer (1/14). Ex: Long Beach Signature (Heritage, 9/2003), lot 5872. PCGS# 83778

**3222 1884 PR67 PCGS. CAC.** A fully struck and coruscating Superb Gem. The essentially pristine surfaces exhibit pastel chestnut-gold and milk-gray toning. Housed in an old green label holder. A low mintage date. NGC ID# 2766, PCGS# 3780

**3223 1884 PR67 Cameo NGC.** Impressively preserved for this late-date three cent nickel proof issue. While the gold-kissed fields are a touch watery, light frost over the devices carries the day. PCGS# 83780

**3224 1884 PR67 Cameo NGC. CAC.** While 3,942 proofs were struck for this three cent nickel issue, few can compare to the eye appeal of this Superb Gem Cameo coin. Clearly contrasted surfaces show just a touch of golden color against a backdrop of nickel-white. Census: 23 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo, 1 in 67+★ Cameo), 5 finer (1/14). PCGS# 83780

**3225 1886 PR67 NGC.** The design elements of this magnificent Superb Gem exhibit razor-sharp definition throughout and the pristine reflective surfaces are blanketed in shades of pale gold toning. Census: 41 in 67 (2 in 67 ★), 2 finer (1/14). NGC ID# 2768, PCGS# 3782

**3226 1886 PR67 Cameo NGC.** Considerable golden overtones grace each side of this Superb Gem Cameo proof. Gleaming fields provide a suitable backdrop for the well-frosted devices. Census: 16 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo), 0 finer (1/14). PCGS# 83782

**3227 1888 PR67 PCGS. CAC.** The obverse is well-defined and bright nickel-white, though not strongly mirrored. The reverse of this Superb Gem specimen has more flash, and both sides have their own flavors of eye appeal. Population: 22 in 67 (2 in 67+), 1 finer (1/14). NGC ID# 276B, PCGS# 3785

## EARLY HALF DIMES

**3228 1795 — Polished — NGC Details. XF. V-2, LM-3, R.5.** A very scarce variety interesting for a heavy linear crack across the portrait and through the R in LIBERTY. Deeply toned with an aquamarine obverse and a lilac-red reverse. Glossy from a wipe, and the obverse displays heavy planchet marks (as made) on the cheek and Liberty's hair. The cheek also has a fairly large strike-through, as coined. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 22ZV, PCGS# 4251

## 1797 Half Dime, Fine 12 15 Stars, V-2, LM-1

**3229 1797 15 Stars Fine 12 NGC. V-2, LM-1, R.3.** LM-1 is the sole 1797 variety with 15 stars, though it is moderately more available than the 16 Stars and 13 Stars subtypes. An autumn-brown example with bold legends and minimal abrasions. A few small gray spots are of little import. Lightly impressed at the obverse center, typical for the two-year Small Eagle type. A pleasant example with old-silver appeal. NGC ID# 22ZZ, PCGS# 4258

## 1803 Half Dime, AU Details Large 8, V-2, LM-3

**3230 1803 Large 8 PCGS Genuine. AU Details. V-2, LM-3, R.3.** The PCGS number ending in .95 suggests Scratched as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been scratched. A diagonal pinscratch is on the upper obverse between the ribbon and the R in LIBERTY. The moderately granular surfaces are gunmetal-gray aside from glimpses of stone-white. NGC ID# 2329, PCGS# 4269

## 1805 Half Dime, VF30 V-1, LM-1, Only Dies for the Year

**3231 1805 VF30 ANACS. V-1, LM-1, R.4.** Ocean-blue and tan-gold embrace this midgrade rare date half dime. Refreshingly unabraded. Though the F in OF is weakly impressed, the strike is sharp for an 1805, which is often seen with a partial right wing. The sole die pair for the date, and not much more available than the famous 1802. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 232A, PCGS# 4272

## BUST HALF DIMES

- 3232** 1829 MS64 NGC. V-7, LM-1, R.2. Fire-red, sea-green, and powder-blue endow this colorful and crisply struck first-year type coin. Smooth aside from a slender diagonal mark near the right shield border.  
*Ex: Autumn Sale (Stack's, 9/2007), lot 3233, which realized \$1,265. NGC ID# 232B, PCGS# 4276*
- 3233** 1832 MS64 PCGS. CAC. V-5, LM-8.4, R.3. Die cracks from F and M to rim. Chestnut-gold, dove-gray, and sea-green enrich this unmarked and lustrous near-Gem. The strike is sharp except on the first two stars and the US in PLURIBUS. NGC ID# 232E, PCGS# 4279

### 1832 Capped Bust Half Dime, MS65 Scarce V-3, LM-2 Variety

- 3234** 1832 MS65 PCGS. V-3, LM-2, R.3. The 1832 Capped Bust half dime claims a substantial mintage of 965,000 pieces, with 14 die varieties known for the date. This well-detailed Gem represents the scarce LM-2 variety, with stars 6 and 7 spaced close together and the letters in MERI touching at the bottom. The lustrous surfaces display vibrant mint luster and shades of greenish-gold and powder-blue toning. Population: 56 in 65, 48 finer (1/14). NGC ID# 232E, PCGS# 4279

### 1832 Half Dime, MS66 Multicolor Toning V-4, LM-11.2

- 3235** 1832 MS66 NGC. V-4, LM-11.2, R.5. A "Scarface" variety with a vertical die crack on Liberty's cheek. This crack is joined by another that extends diagonally from the 2 in the date across the neck. Attractive golden-brown and stone-white centers are bounded by sea-green and plum-mauve. Lustrous and pristine with well struck borders and incomplete centers.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 232E, PCGS# 4279*

### 1833 Capped Bust Half Dime, MS65 Popular V-1, LM-10 Variety

- 3236** 1833 MS65 PCGS. V-1, LM-10, R.1. The LM-10 variety is easily identified by the position of the numerals 8 and 3 leaning together in the date and the second S in STATES with both loops filled. This impressive Gem possesses sharply detailed design elements, with some clash marks on the reverse, and well-preserved surfaces with vibrant mint luster. Population: 36 in 65, 31 finer (1/14). NGC ID# 232F, PCGS# 4280

- 3237** 1836 Large 5C MS64 NGC. V-5, LM-1.1, R.6. Cataloged as "Proof-63" in its September 1988 auction appearance, the present coin realized \$2,970 in that sale. LM-1.1 is rare and associated with prooflike strikes. The reverse die was then used to coin the 1835 LM-9.2 before the present die pair reunited for 1836 LM-1.2, with reverse cracks more advanced. This flashy and unmarked example has a good strike and rich cherry-red, apple-green, and lemon-gold toning.  
*Ex: Mann and Smedley Collections (Bowers and Merena, 9/1988), lot 146; Mamiye Collection (Bowers and Merena, 3/1998); Public Auction (Stack's, 5/2006), lot 1666, which realized \$1,840. NGC ID# 232J, PCGS# 4287*

- 3238** 1836 Small 5C MS63 NGC. V-1, LM-2, R.3. *Ex: Eliasberg.* The bisecting obverse crack between 12 and 6 o'clock is diagnostic when paired with a Small 5C reverse. Attractively toned peach-gold, stone-gray, forest-green, lavender, and cobalt-blue. The fields display a few minor grazes.  
*Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 932. PCGS# 4288*

## SEATED HALF DIMES

- 3239** 1840-O Drapery AU50 PCGS. Small O. Lavender and sea-green dominate but cede to stone-gray centers. Unabraded except for a hair-thin line on the shield. Liberty's head is soft, but the rest of the strike is good. A conditionally rare New Orleans issue. NGC ID# 232X, PCGS# 4327

**1847 Half Dime, MS66 Prooflike  
Only Piece Certified as Such**

- 3240 1847 MS66 Prooflike NGC.** At first glance, this impressive Premium Gem has every appearance of a proof strike. The fields are fully mirrored and exhibit striae usually associated with proof coins from this era. The devices have full mint frost, also common to proofs. With the date high in the field, joining the base of Liberty, and defects near most of the stars, this piece matches Breen's description of the proof variety. All of the design elements are bold, and the surfaces are essentially brilliant. As of (1/14), the sole example certified as Prooflike by NGC.  
*Ex: West Palm Beach FUN (Heritage, 7/2007), lot 466, which realized \$2,990. NGC ID# 2339, PCGS# 4337*

**1850 Half Dime, MS66  
Thick Mint Frost**

- 3241 1850 MS66 PCGS. CAC.** The fields and devices of this Premium Gem half dime are lustrous and attractive, with silver-gray toning on the obverse and a dappling of golden-gray toning on the reverse. Thick mint frost covers the surfaces, which are fully struck and free of any significant abrasions. Few MS66 or finer examples exist of this date despite a mintage of 955,000 pieces; apparently, not many were saved in high grade. Population: 16 in 66, 11 finer (1/14). NGC ID# 233F, PCGS# 4345

**1851-O Seated Half Dime, MS65  
Very Rare Any Finer**

- 3242 1851-O MS65 NGC.** The 1851-O Seated Liberty half dime claims a mintage of 860,000 pieces and few examples were saved by contemporary collectors. This delightful Gem displays well-detailed design elements and lustrous well-preserved surfaces under shades of greenish-gold and bluish-gray toning. Census: 10 in 65, 6 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 233J, PCGS# 4348*

- 3243 1853-O No Arrows VF30 NGC.** Blue overtones at the margins with peach-gray interiors. Most details are sharp, though the date is weak. A handful of small marks appear on each side. Few 1853-O No Arrows half dimes have survived, as many were melted following the weight reduction for minor silver coinage the same year. Census: 2 in 30, 18 finer (1/14). NGC ID# 233N, PCGS# 4352

- 3244 1854 Arrows MS66 PCGS.** Frosty silver at the interiors with dotted peach and blue-violet toning at the margins. Unlike the dime, the half dime went through only one Arrows series because it was discontinued in 1873. Population: 11 in 66 (1 in 66+), 1 finer (1/14). NGC ID# 2342, PCGS# 4358

- 3245 1856 MS65 PCGS.** This well-detailed Gem exhibits well-preserved lustrous surfaces under shades of lavender-gray, champagne-gold, and amber toning. Population: 21 in 65, 14 finer (1/14). NGC ID# 233P, PCGS# 4363

- 3246 1856 MS66 PCGS.** Peach, cerulean, and sea-green shades wash over each side of this Seated half dime. Well-defined overall with impressively preserved surfaces. Population: 14 in 66 (4 in 66+), 0 finer (1/14). NGC ID# 233P, PCGS# 4363

**1858 Over Inverted Date Half Dime, MS65  
Richly Toned**

- 3247 1858 Over Inverted Date MS65 NGC. CAC.** This *Guide Book* variety is one of the most spectacular die gaffes in U.S. Mint history — at least under high magnification. This Gem example has rose-to-peach centers and cerulean-to-aqua hues at the margins. Housed in a prior-generation holder. Census: 1 in 65, 2 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 233U, PCGS# 4368*

- 3248 1861 MS65+ PCGS. CAC.** Softly lustrous under rich gold-gray, steel-blue, and violet patina. Pleasingly detailed overall, if a touch soft on Liberty's head. Population: 47 in 65 (1 in 65+), 25 finer (1/14). NGC ID# 2349, PCGS# 4379

- 3249 1864-S MS64 PCGS.** A scarce issue in spite of its generous mintage, this 1864-S is fully struck, including the bow knot. Deep rose and olive patina is splashed over each side with intermittent areas of near-brilliance. Population: 6 in 64, 8 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 234F, PCGS# 4385*

- 3250 1865 MS63 PCGS.** Only 13,000 business-strike Seated Liberty half dimes were struck at the Philadelphia Mint in 1865. This sharply detailed Select specimen displays partially prooflike surfaces under shades of blue, lavender, and greenish-gold toning. Population: 8 in 63, 28 finer (1/14). NGC ID# 234G, PCGS# 4386

- 3251 1865-S Repunched Date MS62 ANACS.** The 8 is lightly repunched. Mostly untuned and uncommonly sharp for this scarcer S-mint half dime. The surfaces are a bit lackluster, but the luster is complete throughout. Strongly die clashed. Minimal abrasions.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 234H, PCGS# 4387*

- 3252 1867 MS65 PCGS.** Brilliant, flashy, and pristine. The strike is sharp except near the D in DIME. Coined from multiply clashed dies. Just 8,000 pieces were struck, since unbacked fractional currency replaced Seated silver in Reconstruction commerce. Encapsulated in an old green label holder. Population: 9 in 65, 7 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 234L, PCGS# 4390*

- 3253 1868-S MS65 NGC.** This lustrous Gem example displays splotches of cobalt-blue and lilac-gray patination resting over well-preserved surfaces. The design elements are precisely struck, though the mintmark has low relief since it was lightly entered into the die. A condition rarity at this level. Census: 18 in 65, 6 finer (1/14). NGC ID# 234P, PCGS# 4393

## PROOF SEATED HALF DIMES

### 1857 Seated Liberty Half Dime, PR64 Well-Preserved and Lightly Toned

- 3254 1857 PR64 NGC. CAC.** The mintage of proof half dimes in 1857 was not recorded, but it was undoubtedly small. This impressive Choice example exhibits sharply detailed design elements and slightly reflective fields, under attractive shades of champagne-gold and lavender toning. Census: 8 in 64, 15 finer (1/14). NGC ID# 235M, PCGS# 4436

### 1860 Half Dime, PR66 Cameo Highly Contrasted Devices

- 3255 1860 PR66 Cameo PCGS. CAC.** Amazing contrast with subtle hints of gold and blue-green patina against the gleaming silver-white fields and the elegantly frosted devices. An impressively preserved survivor from this early proof issue. Population: 3 in 66 (1 in 66+) Cameo, 2 finer (1/14).  
*Ex: FUN Signature (Heritage, 1/2008), lot 913. PCGS# 84443*

- 3256 1863 PR65 NGC.** The 1863 half dime proofs were produced to the extent of only 460 coins midway through the Civil War, and a goodly number have survived to this day in high grades. This Gem proof is one of 24 so graded at NGC, with 21 finer (1/14). The surfaces are fully struck throughout, with no visible contact marks or other distractions, and just a whisper of pinkish hue appears on either side. NGC ID# 235Y, PCGS# 4446

### 1864 Seated Half Dime, PR67 Cameo Only Two Finer Coins at PCGS

- 3257 1864 PR67 Cameo NGC.** The 1864 is one of the key dates to the Seated half dime series. The business strike mintage was a modest 48,000 pieces, and that of the proofs a mere 470 coins. While nearly 300 proofs have been certified by NGC and PCGS, only about 30 specimens have been given the Cameo designation. The Superb Gem Cameo that we offer in this lot is one of the finest survivors. Its untuned surfaces reveal profound field-motif contrast and crisply impressed design features. A faint pinscratch on the right (left facing) breast and a few minute marks on the cheek are mentioned for complete accuracy, and help to identify the coin. Census: 3 in 67 Cameo, 2 finer (1/14).  
*Ex: Dallas Signature (Heritage, 4/2007), lot 512. PCGS# 84447*

### 1867 Seated Liberty Half Dime, PR66 Rare Cameo Example

- 3258 1867 PR66 Cameo PCGS. CAC.** This intensely contrasted Premium Gem proof is spectacularly patinated in shades of cobalt-blue and greenish-gold, with sharply detailed design elements and well-preserved deeply reflective surfaces. Eye appeal is terrific. Population: 9 in 66 (2 in 66+) Cameo, 1 finer (1/14). PCGS# 84450

### 1869 Half Dime, PR67 ★ Cameo Among the Finest Known

- 3259 1869 PR67 ★ Cameo NGC.** Mirrored fields and ice-white devices display dramatic contrast. This is a fully struck and flawless Superb Gem. It is brightly reflective and devoid of toning, a combination that doubtlessly inspired the Star designation. Just 600 proofs were struck. Census: 8 in 67 Cameo (3 in 67 ★ Cameo), 2 finer (1/14). PCGS# 84452

- 3260 1872 PR66 PCGS.** From a proof mintage of 950 pieces, this sharply detailed Premium Gem displays well-preserved reflective surfaces under shades of greenish-gold and cerulean-blue toning. Population: 7 in 66, 3 finer (1/14). NGC ID# 2369, PCGS# 4455

## EARLY DIMES

- 3261 1801 VG8 PCGS. JR-1, R.4.** The large A in STATES distinguishes JR-1 from the even rarer JR-2. No other die marriages are known for the low mintage date. Stone-white motifs contrast with cream-gray fields. A few thin and faint obverse marks. Certified in a green label holder. NGC ID# 236J, PCGS# 4471

### 1801 Dime, Evenly Worn VF25 Scarcer JR-1 Variety

- 3262 1801 VF25 PCGS. CAC. JR-1, R.4.** Attractive medium-gray surfaces and pleasing peripheral brown toning. An appealing example with surfaces that lack any problems. Although this issue is not as rare as those of the next few years (especially 1802 and 1804), it is far from a common date in the series. It is doubtful that more than 250 examples of this date survive in all grades.  
*Ex: Long Beach Signature (Heritage, 6/2006), lot 1006; Central States Signature (Heritage, 4-5/2009), lot 77.*  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236J, PCGS# 4471*

- 3263 1802 Fair 2 PCGS. CAC. JR-2, R.5.** A dove-gray example of this rare Heraldic Eagle date. Three-quarters of the date is sharp, though only the IB in LIBERTY is clear. The bust is mostly outlined. The reverse appears Good except for the lower right quadrant, which is well worn.  
*Ex: Long Beach Signature (Heritage, 5/2012), lot 3460, which realized \$862.50. NGC ID# 236K, PCGS# 4472*

### 1802 Capped Bust Dime, VF20 The Scarce and Unusual JR-4 Die Pairing

- 3264 1802 VF20 ANACS. JR-4, R.4.** Dove-gray patination covers the surfaces of this scarce Draped Bust dime. The low mintage of 10,985 pieces is divided between four very scarce to rare die marriages. This variety is indicated by the tip of the back wave of Liberty's hair and located under the curves of the B in LIBERTY. JR-4 is also recognized by the placement of star 8, further from the Y than on any other variety of the date. Another diagnostic is the lowest reverse star, which touches both tips of the eagle's beak. Striking weakness in the centers is characteristic for the variety. This example is weak on the reverse at the center, but surrounding detail is much stronger. The obverse also demonstrates some central weakness of strike, but it is strong at the margins.

The reverse of this die pairing is among the more famous and illustrious in early U.S. numismatics, having been used not only for the 1802 JR-4 and 1804 JR-1 die marriages among dimes, and also on the 1802 BD-2 and 1804 BD-1 pairings among the quarter eagle denomination. Thus, it is a "dual denomination" reverse die. NGC ID# 236K, PCGS# 4472

### 1803 JR-3 Dime, VF25 Very Scarce Date

- 3265 1803 VF25 PCGS. CAC. JR-3, R.4.** Although five die pairs of 1803 dimes are known, all are very scarce to very rare. The *Guide Book* mintage is just 33,040 pieces. The present example has lavender fields and cream-gray high points. Marks are minor for the grade though we note a faint thin vertical line on the portrait.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236L, PCGS# 4473*

- 3266 1805 4 Berries — Plugged — ANACS. XF40 Details. JR-2, R.2.** Plugged and skillfully re-engraved near the R in LIBERTY and the C in AMERICA. A pleasing silver-gray representative with unmarked surfaces and substantial design definition.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236S, PCGS# 4477*

- 3267 1807 Fine 12 PCGS. JR-1, R.2.** Rotation beneath a light reveals iridescent golden-brown, electric-blue, and stone-gray toning. No marks are readily evident. Liberty's curls are nicely defined. A few letters in UNITED are faint.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236T, PCGS# 4480*

- 3268 1807 XF40 ANACS. JR-1, R.2.** This silver-gray Draped Bust type coin has well defined motifs though the left borders are lightly brought up. No abrasions are consequential save for a few marks near UNITED.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236T, PCGS# 4480*

## BUST DIMES

- 3269 1811/09 VF25 NGC. JR-1, R.3.** Sole dies for the year and a scarce variety regardless of grade. A smooth slate-gray example with ample plumage detail despite 35 points of wear. A middle die state without the reverse crack from 9 o'clock through the eagle to 12:30. NGC ID# 236V, PCGS# 4487

### 1825 JR-2 Dime, MS64 Beautiful Peripheral Patina

- 3270 1825 MS64 NGC. JR-2, R.2.** Iridescent powder-blue, jade-green, autumn-brown, and rose-red illuminate the margins of this satiny and well preserved near-Gem. The centers are mostly brilliant. The strike shows blending at the centers and claws usual for the variety. The borders are well struck. Census: 14 in 64 (1 in 64+), 11 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2374, PCGS# 4503*

**1827 Capped Bust Dime, MS63  
JR-12, Pointed Top 1 in 10 C**

- 3271 1827 MS63 PCGS. JR-12, R.1.** A Select Uncirculated example of this relatively common variety, confirmed by a low digit 7 in the date and stars 5 and 6 very close together. A mintage of 1.3 million pieces resulted in enough survivors to make this issue a good selection for type. This example is lustrous and generously toned with golden-orange, lilac, and aqua surfaces. The coin is unabraded and attractive with bold devices. Population: 39 in 63, 70 finer (1/14). NGC ID# 2375, PCGS# 4504

- 3272 1829 Small 10C MS63 PCGS. JR-3, R.4.** A better die variety of this collectible Capped Bust date. A smooth and satiny example with medium stone-gray, lilac, navy-blue, and plum-mauve toning. Well struck aside from the claws. Struck from clashed dies. NGC ID# 2378, PCGS# 4511

- 3273 1831 MS64 NGC. JR-2, R.3.** Caramel-gold, cobalt-blue, and ruby-red endow this flashy and fully struck near-Gem. A loupe fails to locate any detractors. Although JR-2 is collectible, it is the rarest of the six 1831 die marriages in Uncirculated grades. NGC ID# 237B, PCGS# 4520

- 3274 1832 MS62 NGC. JR-2, R.2.** A mere trace of almond-gold and ice-blue visit this sharply struck example. Lustrous and unmarked with superior eye appeal for the designated grade. The reverse die, identified by a spur from the upper arrowhead, is shared with the scarce JR-3. NGC ID# 237C, PCGS# 4521

- 3275 1834 Large 4 MS64 NGC. JR-1, R.1.** Ex: Eliasberg. Deep cream-gray and sea-green toning dominates this well-pedigreed, sharply struck, and satiny Choice Bust dime. Devoid of noticeable marks. Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 1097; Long Beach Signature (Heritage, 2/2005), lot 6195, which realized \$2,185. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 4526

**1835 JR-4 Dime, MS64  
Rich Album Toning**

- 3276 1835 MS64 PCGS. JR-4, R.2.** Splendid peripheral ocean-blue, sun-gold, and ruby-red fills the borders and encompasses the brilliant centers. A razor-sharp Choice dime with exemplary eye appeal and preservation. JR-4 shows repunching on the 83 in the date and has a widely spaced 10 C. JR-9 shares the same reverse die but shows a closely spaced 10 C. NGC ID# 237F, PCGS# 4527

**SEATED DIMES**

- 3277 1838 Large Stars MS64 PCGS.** An attractive Choice example from the first year of the Stars obverse, with sharply detailed design elements and well-preserved lustrous surfaces. Vivid shades of lavender and pale gold toning add to the considerable eye appeal. Population: 72 in 64, 55 finer (1/14). NGC ID# 237U, PCGS# 4568

**1839 No Drapery Dime, MS65 ★**

- 3278 1839 No Drapery MS65 ★ NGC.** One of the most eye-catching early Seated dimes available today, this No Drapery Gem deserves its Star designation and then some. Pale silver interiors are amply lustrous, as are the margins with their gold-orange toning. An added outer ring of violet visits the reverse. Census: 26 in 65 (1 in 65+, 1 in 65 ★), 39 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 237X, PCGS# 4571*

**1842 Dime, Border-Toned MS65**

- 3279 1842 MS65 NGC.** Peach and gold outer toning yields to near-silver at the centers. Excellent all-around definition and eye appeal to match make this Gem 1842 dime a numismatic force. Census: 7 in 65, 5 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2386, PCGS# 4581*

- 3280 1845 MS65 NGC.** Repunched date. An attractive Gem with well-detailed design elements and strong mint luster. The well-preserved surfaces are visited by shades of greenish-gold, lavender, and blue toning. Census: 9 in 65, 8 finer (1/14). NGC ID# 238B, PCGS# 4586

**1847 Seated Liberty Dime, MS63  
Attractive Multicolor Toning**

- 3281 1847 MS63 PCGS. CAC.** From a reported mintage of 245,000 pieces, the 1847 Seated Liberty dime is a condition rarity at the MS63 grade level. This attractive Select specimen is sharply detailed throughout, with well-preserved lustrous surfaces under shades of cerulean-blue and greenish-gold toning. Population: 4 in 63, 3 finer (1/14). NGC ID# 238E, PCGS# 4589
- 3282 1849 MS64 NGC.** Blended tan-brown and apple-green dominates this smooth and sharply struck Choice dime. Likely a large portion of the 1849 production was melted, since the bullion value exceeded face. Certified in a prior generation holder. Census: 17 in 64, 10 finer (1/14). NGC ID# 238G, PCGS# 4591
- 3283 1853 Arrows MS65 NGC.** A short-lived type with the arrows added to denote a weight change in 1853, this magnificently toned dime is a memorable and attractive Gem example of the type. Bullseye toning shows blue and purple margins merging into lustrous red-gold centers. The same colors appear on the reverse in concentric rings with a sliver center. Bright mint luster resides beneath the toning of this colorful MS65 example, which is fully struck and virtually without abrasions. Census: 75 in 65 (1 in 65+, 2 in 65 ★), 57 finer (1/14). NGC ID# 2398, PCGS# 4603
- 3284 1854 Arrows MS65 NGC.** Nearly brilliant with just the slightest tinge of peripheral color. The Arrows type is needed by collectors and is not generally available in higher grades. This is a fully struck example with superior luster characteristics.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 239A, PCGS# 4605*
- 3285 1857 MS65 PCGS. CAC.** Surprisingly bright silver luster has frosty touches. Softly struck at the margins, though the shield and letters LIBERTY within are sharp. Population: 18 in 65, 4 finer (1/14). NGC ID# 238X, PCGS# 4614
- 3286 1858-S VF30 PCGS.** The 1858-S Seated Liberty dime claims a small mintage of 60,000 pieces, making the issue scarce-to-rare in all grades. All the letters in LIBERTY remain bold on this pleasing VF30 specimen and the lavender-gray surfaces are lightly abraded. Population: 11 in 30, 33 finer (1/14). NGC ID# 2393, PCGS# 4618

**1858-S Dime, Deeply Toned AU55  
Scarce S-Mint Issue**

- 3287 1858-S AU55 PCGS. Fortin-101.** The 1858-S is a scarce dime with a mintage of only 60,000 pieces. Most circulated extensively across the West Coast, and few are known today above VF. This is a darkly toned AU that shows minimal signs of friction from handling. Sharply struck throughout. Population: 4 in 55, 9 finer (1/14). NGC ID# 2393, PCGS# 4618

- 3288 1859-OMS64 NGC. Fortin-105.** Large O. Attractive powder-blue, almond-gold, and sea-green toning graces this lustrous and precisely struck Choice New Orleans dime. Smooth aside from minor contact on the obverse rim near 1 o'clock. Census: 25 in 64, 34 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2395, PCGS# 4620*
- 3289 1861-S — Filed Rims — PCGS Genuine. Unc. Details. Fortin-102.** The obverse rim is uniformly filed near the edge, but the fields and motifs are unblemished. Satiny and nearly untuned. The strike is good though Liberty's hair is incomplete. A rare issue with Uncirculated sharpness. NGC ID# 239G, PCGS# 4634
- 3290 1863 MS63 PCGS.** The 1863 Seated dime issue is difficult and rare in Mint State, Gerry Fortin rating it at High R.5, or 31-45 surviving. This Select coin displays deep olive, aqua, and pinkish patina as well as a good strike (save for the bowknot). A small mark appears between the two E's on the reverse. Population: 10 in 63, 15 finer (1/14). NGC ID# 239K, PCGS# 4637
- 3291 1863-S AU58 PCGS.** Gold-orange patina of varying intensity settles over light silver surfaces. Only a touch of rub visits the high points of this still-lustrous Civil War-era dime. Population: 3 in 58, 10 finer (1/14). NGC ID# 239L, PCGS# 4638
- 3292 1864-S AU55 NGC.** A lightly circulated example of this scarce Civil War issue, from a mintage of 230,000 pieces. Attractive shades of greenish-gold toning enliven the lightly abraded surfaces. Census: 1 in 55, 22 finer (1/14). NGC ID# 239N, PCGS# 4640
- 3293 1866-S AU53 PCGS.** Lightly worn but still-lustrous surfaces have hints of blue and pink patina. A die crack extends from the 8 in the date across Liberty's form to the M of AMERICA. A small dig below the word OF contributes to the grade. Population: 1 in 53, 13 finer (1/14). NGC ID# 239T, PCGS# 4644
- 3294 1871-CC — Environmental Damage — NGC Details. XF.** The first Carson City issue is a rarity. Most of the 20,100-piece mintage was eventually melted or lost. Survivors are desirable regardless of grade. The present gunmetal-gray example has impressive sharpness but the obverse and left reverse are granular.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23A5, PCGS# 4654*
- 3295 1872-CC VG8 PCGS.** All letters in LIBERTY remain intact on this well-worn Seated Liberty dime and the pleasing gray surfaces are problem-free. From a mintage of 35,480 pieces. Population: 8 in 8, 48 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23A8, PCGS# 4657*

**1872-CC Seated Liberty Dime, VG10  
Scarce Low-Mintage Issue**

- 3296 1872-CC VG10 NGC.** From a tiny mintage of 35,480 pieces, the 1872-CC Seated Liberty dime is prized by collectors in all grades and conditions. This pleasing VG10 example is well-worn, but LIBERTY, the date, legend, and mintmark are all legible. The problem-free surfaces are silver-gray, with a few hints of pink and gold toning. Census: 3 in 10, 28 finer (1/14). NGC ID# 23A8, PCGS# 4657
- 3297 1872-CC — Corroded — ANACS. XF40 Details.** A low mintage and Old West circulation combine to make the 1872-CC rare in all grades. This steel-gray and chestnut-gold Carson City dime has a granular obverse but the reverse shows only minimal corrosion.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23A8, PCGS# 4657*

**3298 1872-CC — Environmental Damage — NGC Details. AU.** The 1872-CC is even rarer than its mintage of 35,480 pieces would suggest. Few were saved, and most survivors are in VF or lower grades. The present example ranks among the sharpest '72-CC dimes. The obverse center is brilliant but the remainder of the coin is deep orange-brown. Both sides display gray verdigris. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 23A8, PCGS# 4657

**3299 1875 MS66 PCGS.** Frosty and strikingly toned silver, peach, cerulean, and sky-blue. Striking softness on Liberty's head is as often seen on this issue. Population: 25 in 66, 5 finer (1/14). NGC ID# 23AC, PCGS# 4672

**3300 1876 MS66 NGC. Fortin-101a.** Type Two Reverse. The shattered die state with myriad cracks and a break on a portion of the corn ear. Olive-gray and golden-brown embraces this lustrous and beautifully preserved Premium Gem. Census: 25 in 66 (1 in 66+, 3 in 66 ★), 7 finer (1/14). NGC ID# 23AH, PCGS# 4679

**3301 1876-S MS65 PCGS.** Type One Reverse. A lovely San Francisco type coin. The obverse displays forest-green and golden-brown though Liberty is mostly stone-gray. The reverse has peripheral chestnut patina and a practically brilliant center. Moderately prooflike with noticeable cameo contrast on the reverse. NGC ID# 23AK, PCGS# 4681

**1878-CC Dime, MS65 ★  
Brilliant, Almost Fully Prooflike**

**3302 1878-CC MS65 ★ NGC.** A beautiful example of this important Carson City issue. From a drastically reduced mintage of 200,000 pieces, this lovely Gem is fully untuned with clean surfaces illuminated by intense mint frost on both sides. A few faint, raised die lines and spindly die cracks are noted, but the singular post-strike disturbance is a minor abrasion in the upper right obverse field. The exceptional eye appeal of this example is acknowledged by NGC with their coveted Star designation. Census: 7 in 65 (2 in 65 ★), 11 finer (1/14). NGC ID# 23AR, PCGS# 4686

**3303 1879 MS66 NGC.** Only 14,000 business-strike Seated Liberty dimes were coined in 1879. This delightful Premium Gem displays well-detailed design elements and prooflike brilliant fields. Census: 45 in 66 (2 in 66+, 5 in 66 ★), 41 finer (1/14). NGC ID# 23AS, PCGS# 4687

**3304 1891 MS66 NGC.** A spectacular Premium Gem with well-detailed design elements and vibrant satiny mint luster under shades of greenish-gold and powder-blue toning. Census: 64 in 66 (4 in 66 ★), 21 finer (1/14). NGC ID# 23BD, PCGS# 4706

**PROOF SEATED DIMES**

**3305 1862 PR64 PCGS. CAC.** Only 550 proof Seated Liberty dimes were coined in 1862, the second year of the Civil War. This sharply detailed Choice example displays reflective fields under shades of cerulean-blue and golden-brown toning. Population: 39 in 64, 6 finer (1/14). NGC ID# 23CL, PCGS# 4755

**3306 1863 PR66 NGC. CAC.** Both sides are impressively preserved beneath substantial patina. The obverse has a lighter coat of green-gold and orange while the reverse is duskier with largely blue-based hues. Census: 24 in 66, 8 finer (1/14). NGC ID# 23BS, PCGS# 4756

**3307 1864 PR65 NGC.** Light aqua rim toning yields to deeper blue and eventually peach at the centers. An exquisitely detailed Gem proof from the Civil War period. Census: 28 in 65, 15 finer (1/14). NGC ID# 23CM, PCGS# 4757

**1871 Seated Dime, PR66 Ultra Cameo  
Single-Finest Certified**

**3308 1871 PR66 Ultra Cameo NGC.** A generous proof mintage of 960 Seated Liberty dimes was accomplished in 1871 and this coin is the single-finest Ultra Cameo survivor. The richly frosted design elements are sharply detailed and contrast profoundly with the deeply mirrored fields. The virtually pristine brilliant fields add to the terrific eye appeal. Census: 1 in 66 Ultra Cameo, 0 finer (1/14). PCGS# 94764

**3309 1872 PR66 NGC.** This spectacular Premium Gem exhibits sharply detailed design elements throughout, with deeply mirrored fields under shades of champagne-gold and cerulean-blue toning. Census: 6 in 66, 3 finer (1/14). NGC ID# 23CW, PCGS# 4765

**1873 Seated Liberty Dime, PR67  
Closed 3, No Arrows Variant**

**3310 1873 No Arrows, Closed 3 PR67 NGC.** This spectacular Superb Gem proof was struck early in the year, before the Open 3 replaced the Closed 3 in the date and the Arrows were added to the design. The design elements are sharply detailed and the reflective surfaces are blanketed in shades of greenish-gold and cerulean-blue toning. Census: 8 in 67 (2 in 67+), 1 finer (1/14). NGC ID# 23CX, PCGS# 4766

**3311 1874 Arrows PR64 Cameo PCGS.** An attractive Cameo near-Gem proof from the short-lived Arrows subtype. Light gold and blue overtones do not interfere with the considerable contrast. Population: 11 in 64 Cameo, 2 finer (1/14). PCGS# 84770

**1875 Dime, PR66 Cameo**  
Lovely Multicolored Toning

- 3312 1875 PR66 Cameo PCGS. CAC.** A hefty 1,150 proof dimes were struck in 1875, but very few have achieved the technical grade of this piece, and even fewer still have the commanding eye appeal seen here. The fields are deeply mirrored and the devices thickly frosted, rather surprising considering the toning present. The tonal qualities are mostly in the red and blue range and are irregularly distributed across each side. Population: 6 in 66 Cameo, 1 finer (1/14). PCGS# 84772

- 3313 1883 PR65 PCGS. CAC.** Peach-gold, blue, and violet toning is deeper on the obverse. This Gem proof has great reflective charm and is housed in a first-generation PCGS holder. Population: 40 in 65, 38 finer (1/14). NGC ID# 23D8, PCGS# 4780

- 3314 1884 PR65 Cameo PCGS.** The sharply detailed and frosty design elements of this attractive Cameo Gem proof contrast noticeably with the reflective fields. Well-preserved beneath attractive jade and powder-blue toning. Population: 13 in 65 (1 in 65+) Cameo, 35 finer (1/14). PCGS# 84781

- 3315 1885 PR64 Cameo PCGS.** Vivid shades of greenish-gold and electric-blue toning blanket the well-preserved surfaces of this sharply detailed Seated Liberty proof. The frosty devices contrast boldly with the reflective fields. Population: 21 in 64 (1 in 64+) Cameo, 37 finer (1/14). PCGS# 84782

- 3316 1887 PR65 PCGS.** Fantastically mirrored beneath rich toning. This Gem specimen has bold blue-to-violet central toning that yields to bright emerald-green close to the rims. Population: 29 in 65, 11 finer (1/14).  
Ex: Milwaukee Signature (Heritage, 4/2010), lot 575. NGC ID# 23DC, PCGS# 4784

**1887 Dime, PR67 Cameo**  
Brightly Mirrored, Sharply Contrasted

- 3317 1887 PR67 Cameo PCGS.** Of the 710 proof dimes struck in 1887 few can rival the intensely mirrored fields of this piece. Likewise, the devices are noticeably frosted and, in our opinion, borderline DPL. Each side is brilliant throughout and there are no mentionable or detracting contact marks to report. Population: 2 in 67 Cameo, 0 finer (1/14). PCGS# 84784

- 3318 1888 PR66 PCGS.** Gold-orange along stretches of the rims with blue-green interiors, the two areas more clearly defined and duskier on the reverse. A charming Premium Gem proof Seated dime. Population: 16 in 66, 3 finer (1/14). NGC ID# 23DD, PCGS# 4785

**1890 Seated Dime, PR67 ★ Cameo**  
Only One Finer Coin at NGC

- 3319 1890 PR67 ★ Cameo NGC. CAC.** One of the most wonderfully well-preserved specimens from an issue of just 590 pieces, this incredible Superb Gem has exemplary visual appeal and strong contrast. The snow-white devices have pleasing, rich frost, while the fields are essentially untuned and deeply reflective. A few minuscule points of contact on each side are not distracting in the least. Census: 5 in 67 Cameo (2 in 67 ★ Cameo), 1 finer (1/14).  
Ex: ANA Signature (Heritage, 8/2007), lot 562. PCGS# 84787

**BARBER DIMES**

- 3320 1892 MS66 PCGS. CAC.** This Premium Gem offers exceptional eye appeal. Full mint frost is visible beneath blue-green and gold toning with bold central motifs. A lovely piece destined for a high-grade date or type set. Population: 71 in 66 (1 in 66+), 10 finer (1/14). NGC ID# 23DK, PCGS# 4796

- 3321 1892-O MS65+ PCGS.** This high-end Gem exhibits sharply detailed design elements and vibrant mint luster under attractive shades of champagne-gold and pink toning. Population: 19 in 65 (1 in 65+), 11 finer (1/14). NGC ID# 23DL, PCGS# 4797

- 3322 1895-O — Improperly Cleaned — NGC Details. VF.** A powder-blue, lilac, and tan-brown example of this low mintage key. All letters in LIBERTY are bold. Mildly glossy but unmarked. A majority of '95-O dimes are in Fair to Fine grades. NGC ID# 23DW, PCGS# 4807

- 3323 1895-O VF25 PCGS.** With just 440,000 pieces struck, the 1895-O dime is challenging to find as an attractive midrange coin. This VF25 example is smooth with olive-gold accents on primarily blue-gray surfaces. NGC ID# 23DW, PCGS# 4807

**1896-S Dime, Colorful MS65**

- 3324 1896-S MS65 NGC.** Semireflective and attractively toned with aqua and sapphire elements overall and occasional hints of ruby and emerald. A small silver streak on Liberty's cheek should not be taken for an abrasion. A gorgeous Gem example of a tough date. Census: 12 in 65, 18 finer (1/14).  
From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2300, PCGS# 4811

- 3325 1900-O MS64 NGC.** Sharply struck for an O-mint, the only exception is localized weakness on the lower reverse. Each side is mostly brilliant with remarkably few abrasions. Census: 12 in 64, 16 finer (1/14).  
From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23ED, PCGS# 4822

**1906-O Dime, MS67  
Conditionally Rare**

- 3326 1906-O MS67 PCGS.** Dappled gold, green, and blue hues enrich the eye appeal of this late-date New Orleans Barber dime. Bold underlying luster forms a cartwheel pattern on the obverse and the peripheral reverse. The 1906-O dime is a condition rarity as a Superb Gem. Population: 7 in 67, 0 finer (1/14). NGC ID# 23EZ, PCGS# 4840

- 3327 1909-O MS64 NGC.** This attractive Choice specimen displays shades of pale gold and amber toning over well-preserved surfaces that show few signs of contact. Census: 23 in 64, 20 finer (1/14). NGC ID# 23FD, PCGS# 4852

- 3328 1915-S MS65 PCGS. CAC.** Light silver luster has a hint of satin. Peripheral gold-gray and violet elements are largely dotted with only a few small streaks and patches. All-in-all, a pleasing Gem. Population: 14 in 65, 10 finer (1/14). NGC ID# 23FX, PCGS# 4869

**PROOF BARBER DIMES**

- 3329 1894 PR65 Cameo PCGS.** Attractive iridescent toning in shades of deep gold, fuchsia, and green ring the obverse of this Gem proof. The reverse displays champagne toning on brilliant surfaces. Population: 21 in 65 (1 in 65+) Cameo, 18 finer (1/14). PCGS# 84878

- 3330 1898 PR66 NGC.** The fields remain reflective beneath the colorful toning on this sharply struck piece, particularly on the reverse. The hues include sky-blue, orange, russet, plum, sea-green, and gold. Census: 31 in 66, 34 finer (1/14). NGC ID# 23GB, PCGS# 4882

- 3331 1899 PR65 PCGS.** Rich blue-to-violet luster overall with hints of green at the margins. This Gem proof is too deeply patinated for a Cameo designation but has contrast at certain angles to the light. Population: 36 in 65, 47 finer (1/14). NGC ID# 23GC, PCGS# 4883

- 3332 1904 PR64 PCGS. CAC. Ex: Larry Shapiro.** Silver interiors yield to bands of blue and gold-green at the margins. This near-Gem proof has a hint of contrast on both sides and stronger reflectivity on the reverse. NGC ID# 23GH, PCGS# 4888

- 3333 1904 PR65 NGC.** The design elements of this delightful Gem Barber dime exhibit razor-sharp definition throughout. The deeply reflective fields show no mentionable signs of contact and eye appeal is terrific. Census: 42 in 65, 38 finer (1/14). NGC ID# 23GH, PCGS# 4888

- 3334 1904 PR65 PCGS.** Only 670 proof Barber dimes were struck in 1904. This delightful Gem exhibits sharply detailed design elements and reflective fields that show minimal signs of contact. Population: 36 in 65, 34 finer (1/14). NGC ID# 23GH, PCGS# 4888

**1905 Dime, PR67  
Richly Toned**

- 3335 1905 PR67 NGC. CAC.** Rich vibrant toning and reflective fields provide this Superb Gem with strong visual appeal. The colors include copper, yellow, teal, plum, orange, and sea-green. An additional attribute this coin possesses is a sharp strike. Census: 14 in 67 (1 in 67 ★), 8 finer (1/14). NGC ID# 23GJ, PCGS# 4889

**1907 Dime, PR67+  
Bright Mirrors, Superb Coloration**

- 3336 1907 PR67+ NGC.** Only 575 proofs were struck in 1907, and this must surely rank at the top of the list of most attractive survivors. Each side displays rose and cobalt-blue toning in varying patterns, but the beauty is in the mirrored fields that give a luminosity that would be lacking on a business strike with the same colors. Just outstanding color and overall eye appeal. Census: 19 in 67 (1 in 67+, 1 in 67 ★), 1 finer (1/14). NGC ID# 23GM, PCGS# 4891

- 3337 1908 PR65 Cameo NGC.** Uncommonly well-contrasted for this post-1901 proof issue. Areas of light golden-brown toning are present, primarily near the outer edges of the obverse. Several tiny, as-made strike-throughs are located near the center of the reverse. Census: 7 in 65 Cameo, 8 finer (1/14). PCGS# 84892

**1911 Dime, PR67 ★  
Captivating Colors**

- 3338 1911 PR67 ★ NGC. Ex: Bingham Collection.** A marvelously toned PR67 ★ example that earns its Star with bold underlying reflectivity that lights up gold, peach, green, blue, and violet patina. The portrait is subtly frosted and shows hints of contrast at certain angles to the light. Census: 18 in 67 (1 in 67 ★), 8 finer (1/14). NGC ID# 23GS, PCGS# 4895

**1911 Dime, Superb Gem Proof  
Low-Mintage Date**

- 3339 1911 PR67 PCGS. CAC.** This fully struck and flawless Superb Gem displays vibrant sea-green centers and olive-gold peripheries. In addition, the portrait and lower reverse margin displays glimpses of plum-mauve toning. The devices demonstrate modest contrast despite the rich palette of colors. A scant 543 proofs were produced. Population: 11 in 67 (1 in 67+), 4 finer (1/14). NGC ID# 23GS, PCGS# 4895

- 3340 1912 PR65 PCGS.** The design elements of this impressive Gem are sharply detailed throughout and the reflective fields show no mentionable distractions. Vivid hints of greenish-gold and cerulean-blue toning add to the outstanding eye appeal. Population: 29 in 65, 29 finer (1/14). NGC ID# 23GT, PCGS# 4896

- 3341 1913 PR65 PCGS.** A tiny proof mintage of 622 Barber dimes was accomplished in 1913. This attractive Gem is sharply detailed throughout, with reflective surfaces under shades of lavender, blue, and green toning. Population: 29 in 65, 19 finer (1/14). NGC ID# 23GU, PCGS# 4897

- 3342 1914 PR66 NGC.** Only 425 proof Barber dimes were struck in 1914. This spectacular Premium Gem displays sharply detailed frosty design elements and deeply reflective fields under shades of greenish-gold and lavender-gray toning. Census: 22 in 66, 12 finer (1/14). NGC ID# 23GV, PCGS# 4898

## TWENTY CENT PIECES

- 3343 1875-CC XF45 ANACS.** Gold, peach, and violet toning covers most of this Choice XF twenty cent from the first year of the denomination and the Carson City Mint. Moderate striking softness affects the central devices.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23R6, PCGS# 5297*

- 3344 1875-S MS64 PCGS. CAC.** The most populous twenty cent issue, offered here as an attractive near-Gem for the type collector. Soft blue and peach toning settles over frosty luster. NGC ID# 23R7, PCGS# 5298

**1875-S Twenty Cent Piece  
Lustrous, Lightly Toned Gem**

- 3345 1875-S MS65 NGC.** Vibrant satin luster emanates from both sides of this Gem, with an overall glint of light-gold toning. The coin retains a bright appearance despite the toning. The strike is sharp overall, including the stars and the tops of the eagle's wings. Although not mentioned on the holder, a misplaced digit appears below the 7 in the denticles — a common occurrence for this date, perhaps more often present than not on the 1.15 million mintage. A number of die cracks are present, primarily on the reverse.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23R7, PCGS# 5298*

**1875-S Twenty Cent Piece, MS65  
Ideal Type Coin**

- 3346 1875-S MS65 PCGS.** The 1875-S twenty cent piece is the most available issue of this short-lived denomination, making it the usual choice of type collectors. This delightful Gem exhibits well-detailed design elements and well-preserved lustrous surfaces that show accents of pale gold and lavender toning. NGC ID# 23R7, PCGS# 5298

## PROOF TWENTY CENT PIECES

**1875 Twenty Cent, PR63 Cameo  
Strong Contrast Through Soft Patina**

- 3347 1875 PR63 Cameo ANACS.** A first-year proof of the short-lived twenty cent denomination. Interiors have a mix of pearl and gold-gray shades, while the margins are largely champagne. Appreciably contrasted through the patina and appealing for a Select Cameo proof.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 85303*

- 3348 1876 PR61 Cameo NGC.** This second-year twenty cent proof is moderately contrasted on both sides. The obverse has little toning aside from a touch of gray, though on the reverse broad swaths of peach and blue-violet cover the wings. Census: 2 in 61 Cameo, 76 finer (1/14). PCGS# 85304

**1878 Twenty Cent Piece, PR62  
Final-Date Proof-Only Issue**

- 3349 1878 PR62 ANACS.** Only 600 proof twenty cent pieces were struck in 1878, and no business-strikes were produced. This pleasing PR62 example displays well-detailed design elements and brightly reflective fields under mingled shades of greenish-gold, cerulean-blue and amber toning. The surfaces show only minor signs of contact. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 27H5, PCGS# 5306*

**EARLY QUARTERS**

- 3350 1804 AG3 PCGS. B-1, R.3.** The date is sharp, and most of LIBERTY and ED STATES OF is bold. The lower reverse periphery is well worn, as is the portrait and right obverse field. Relevant marks are absent. The first and rarest date of the Heraldic Eagle type. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23RB, PCGS# 5312*
- 3351 1805 VF30 PCGS. B-3, R.1.** Tompkins Die State 5/3 with various clashes and cracks. This mildly glossy cream-gray representative has good eye appeal and is free from any detrimental abrasions. Most letters in E PLURIBUS UNUM are bold. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23RC, PCGS# 5313*
- 3352 1806/5 Fine 12 PCGS. B-1, R.2.** The lower half of a 5 is obvious within the 6 in the date. The sole overdated 1806 Browning variety. Steel-gray fields contrast with stone-white high points. Minutely granular but without any noticeable marks. NGC ID# 23RD, PCGS# 5315

**BUST QUARTERS**

**1815 Capped Bust Quarter, AU55  
First Year of the John Reich Design**

- 3353 1815 AU55 ANACS.** This Choice AU quarter is an appealing example of the Mint's resumption of quarter production in 1815, when 89,235 pieces were struck of the new Reich Capped Bust design. The most recent minting of quarters had been in 1807, with 2 real pieces from the Spanish Colonial Mints often circulating in place of U.S. quarters during the gap in production. Golden-gray toning on this example is enhanced by reddish-brown accents around the margins of this well-struck quarter. Attractive for the date and type. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23RG, PCGS# 5321*

**1819 Small 9 Quarter, AU55  
B-3, Struck from Perfect Dies**

- 3354 1819 Small 9 AU55 NGC. B-3, R.1.** An early die state of the Small (also called Normal) 9 variety, this example has none of the die cracks found on later states of the dies. The B-3 obverse shows the 8 in the date evenly spaced between the two 1s. The denomination is broadly recut at the 5 followed by double periods, diagnostic of the reverse die. A dappling of charcoal-gray toning surrounds the margins of this smooth, pearl-gray quarter, interspersed with remaining mint luster. The coin is a well-struck and problem-free — a Choice AU example. Census: 15 in 55, 43 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23RK, PCGS# 5325*
- 3355 1820 Small 0 AU55 NGC. B-4, R.2.** The borders display peach-gold and navy-blue, but the fields and devices remain brilliant. A minimally abraded and nicely struck example of a collectible Browning variety. Encased in a prior generation holder. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23RL, PCGS# 5328*

**1822 B-1 Capped Bust Quarter, AU55**  
**Richly Toned and Choice**

- 3356 1822 AU55 NGC. B-1, R.2.** The B-1 variety has a flat-based 2 as part of the denomination — the most common of two die pairings for the date, each sharing the same obverse die for the Mint's total production of 64,080 pieces. Minimal wear is present on the high points of this attractive quarter, accounting for the assigned grade. There are no distractions or other grade-limiting factors, however, and the coin displays original, smooth surfaces with a sharp strike for the issue. A tiny mark in the right obverse field is the only mentionable abrasion. Golden mint luster enlivens pleasing, bronze-gray surfaces with olive-green undertones. Census: 5 in 55, 37 finer (1/14). NGC ID# 23RN, PCGS# 5332

**1825/2 B-1 Quarter, VF20**  
**Rare Overdate Variety**

- 3357 1825/2 VF20 PCGS. B-1, R.5.** The Browning-1 variety of the 1825 overdate Capped Bust quarter is an R.5 variety. It is one of the most interesting and controversial overdates in any series.

We describe the overdate as 1825/2, which is how it appears in the 2014 *Guide Book*. Others identify it as 1825/4/2, as it is listed on the PCGS holder, the result of research by Steve M. Tompkins in his 2008 book and more recently in the 2010 work of Rory R. Rea, Dr. Glenn Peterson, Bradley S. Karoleff and John J. Kovach Jr. in their book, *Early Quarter Dollars of the United States Mint*.

While the exact underdigits in the date are still open for discussion, the B-1 die variety of this scarce quarter can be confirmed by the positions of stars 8 and 13 in relation to Liberty's hair curls, and by the presence of a prominent die line running from the lowest arrowhead into the field. This B-1 example is moderately worn with golden-lilac toning over well-detailed devices. It is an attractive, highly sought-after variety of the issue, always popular in this desirable collector grade. NGC ID# 23RS, PCGS# 5337

**1825/2 Capped Bust Quarter, VF30**  
**B-1 Overdate**  
**Attractive, Mid-Grade Example**

- 3358 1825/4/2 VF30 PCGS. B-1, R.5.** This rarity has broad appeal, thanks to its inclusion in the *Guide Book*, where it is listed as 1825/2 although current research leans toward describing the overdate as 1825/4/2. The exact underdigit is debatable since some examples seem to show only a 2 beneath the 5, while others indicate the existence of both a 4 and a 2. The present example has light wear in a high-point pattern and is toned dove-gray where worn, with brown and olive-green patina elsewhere. A well-detailed example of a desirable collector grade for this rare and popular issue. NGC ID# 23RS, PCGS# 5337

- 3359 1825/4 AU53 PCGS. B-3, R.3.** Designated as 1825/4/3 on the PCGS holder. The *Guide Book* lists the same variety as 1825/4. Not to be confused with the very scarce B-1 1825/2. Deeply toned lilac, rose-red, ocean-blue, and tan-gold. Well defined and unmarked with ample glimmers of luster.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 23RU, PCGS# 5336

- 3360 1835 AU58 NGC. B-7, R.2.** No period follows 25 C, diagnostic for Browning-7. Golden-brown and lavender centers are framed by lustrous aquamarine borders. Nicely struck and only lightly abraded. NGC ID# 23S2, PCGS# 5354

**1838 B-1, Capped Bust Quarter, MS62**  
**Final-Year Issue, Desirable for Type**

- 3361 1838 MS62 PCGS. B-1, R.1.** The B-1 variety is the only die pair for this final year of the Capped Bust quarters, with 366,000 pieces produced by the Philadelphia Mint. This example is brilliant-white, frosted, and highly lustrous. A strong strike on Liberty and the eagle is evident but a touch of weakness resides at the peripheries, where several stars are flat. The Capped Bust design yielded to the Seated Liberty motif in 1838, with 466,000 of the new design also struck during the year. Population: 13 in 62, 39 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 23S5, PCGS# 5357

## SEATED QUARTERS

- 3362 1839 No Drapery MS61 NGC.** A notable early No Drapery quarter with ample gold, rose, and violet patina across each side. Glimmers of reflectivity appear in the protected areas next to the devices. Census: 6 in 61, 31 finer (1/14). NGC ID# 23SF, PCGS# 5392
- 3363 1840-O No Drapery MS61 NGC. Briggs 1-A.** Large O. The 8 in the date is repunched. Steel-gray, lavender, and tan toning embraces satiny and unblemished surfaces. The strike is bold aside from the eagle's neck. The first New Orleans quarter issue. NGC ID# 23SG, PCGS# 5393

### 1840-O Seated Liberty Quarter, MS62 Earlier No Drapery Design

- 3364 1840-O No Drapery MS62 NGC.** The 1840-O No Drapery Seated Liberty quarter claims a mintage of 382,200 pieces and few high-quality examples were saved by contemporary collectors. This well-detailed MS62 example shows a touch of softness on the stars and the pleasing lavender-gray surfaces show only minor signs of contact. Census: 16 in 62, 13 finer (1/14). NGC ID# 23SG, PCGS# 5393
- 3365 1842-O Large Date MS61 NGC.** From a mintage of 769,000 pieces, the 1842-O Large Date Seated Liberty half is more available than its Small Date counterpart. This sharply detailed Mint State example displays vibrant mint luster under shades of lavender and pale gold toning. Census: 1 in 61, 4 finer (1/14). NGC ID# 23SP, PCGS# 5402

### 1842-O Quarter, Small Date, VF25 A Great Midrange Example

- 3366 1842-O Small Date VF25 PCGS.** Much more elusive than the Large Date variant and scarce regardless of condition, the 1842-O quarter with Small Date is a real prize in the middle grades. This VF25 example has a range of blue-gray hues from pale to steel. Minimally abraded. Population: 3 in 25, 17 finer (1/14). NGC ID# 23SN, PCGS# 5403

### 1849-O Quarter, AU55 Details Lightly Retoned

- 3367 1849-O — Cleaned — ANACS. AU55 Details.** The broad luminosity of the fields has a uniform cast to it and close inspection reveals hairlines from cleaning. Delicate blue and rose toning softens the appearance. The 1849-O quarter is a small issue with an imprecisely recorded mintage and survivors are scarce regardless of condition.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*
- 3368 1852 MS63 PCGS.** This fully struck antebellum quarter offers light to medium tan-brown toning. Satiny and nearly unabraded. Housed in an old green label holder. Population: 6 in 63, 22 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 23T8, PCGS# 5419
- 3369 1853 No Arrows Fine 12 PCGS.** With a reported mintage of 44,200 pieces, the 1853 No Arrows Seated Liberty quarter is much more elusive than its Arrows and Rays counterpart. This pleasing Fine 12 example is well-worn, but LIBERTY is still legible. Population: 5 in 12, 44 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 23TA, PCGS# 5421

### 1853 No Arrows Quarter, Near-Mint Lightly Toned and Amply Lustrous

- 3370 1853 No Arrows AU58 ANACS.** The last quarter issue struck before the weight adjustments of 1853 was produced for only a short time and melted in quantity for its silver content. Survivors such as this near-Mint piece, gold-tinged with generous remaining luster, are elusive regardless of grade.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 23TA, PCGS# 5421
- 3371 1853 Arrows and Rays MS62 PCGS. CAC.** An attractive MS62 example of this popular type issue, with sharply detailed design elements and an extensive network of peripheral die cracks on both sides. The surfaces are lustrous and lightly marked. NGC ID# 23U4, PCGS# 5426

**1854-O Seated Liberty Quarter, VF20  
Huge O Variant**

**3372 1854-O Huge O VF20 NGC.** The Huge O mintmark quarter is appropriately named as the O is indeed oversized, most likely from being hand cut in the die. This piece shows even wear over each side and the fields are gray with contrasting pinkish-rose accents over the higher points. The only mentionable mark is in the field just along the right side of the eagle's neck. Census: 3 in 20, 22 finer (1/14). NGC ID# 23U7, PCGS# 5434

**3373 1857-O MS62 NGC.** This antebellum New Orleans quarter is primarily pale silver with occasional blushes of pastel-yellow in the fields. Wispy abrasions and occasional luster scrapes account for the grade. Census: 7 in 62, 6 finer (1/14). NGC ID# 23TF, PCGS# 5443

**3374 1859-S Fine 12 PCGS. CAC.** Deep blue-gray in the fields with a more steel-tan tone to the higher design elements. All letters of LIBERTY are readable. A nick on the arm supporting the shield contributes to the grade. Population: 5 in 12, 47 finer (1/14). NGC ID# 23TN, PCGS# 5450

**3375 1861 MS64 PCGS.** Type Two Obverse and Reverse. The present Civil War near-Gem is precisely struck and thoroughly lustrous. Hints of golden toning endow clashed but unmarked pearl-gray surfaces. NGC ID# 23TT, PCGS# 5454

**1871-CC Seated Quarter, Good Details  
Elusive Low-Mintage Issue**

**3376 1871-CC — Scratch — PCGS Genuine. Good Details.** The date, denomination, and legend are all legible, but the motto and LIBERTY are not complete on this elusive Carson City issue. From a low mintage of 10,890 pieces, the 1871-CC Seated Liberty quarter is seldom encountered and collectors prize examples in all grades and conditions. NGC ID# 23UN, PCGS# 5479

**3377 1875-CC AU55 ANACS.** As the only collectible CC twenty cent piece, the 1875-CC is a very popular type coin. This is a sharply struck example with significant mint luster remaining beneath the light gray-lilac toning seen across each side.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23UY, PCGS# 5499*

**3378 1876 MS65 PCGS. CAC.** Type Two Reverse. The golden-tan and stone-gray toning is more evident on the obverse than on the reverse. A lustrous and undisturbed Gem. Well struck save for a few star centers. NGC ID# 23V2, PCGS# 5501

**3379 1876-CC MS64 NGC. CAC.** Type One Reverse. Small CC. Autumn-brown and forest-green intermingle across this precisely struck and satiny Carson City type coin. A lint mark (as made) is near star 3 but only trivial contact emerges beneath a loupe. NGC ID# 23V3, PCGS# 5502

**3380 1878-CC MS63 PCGS Secure.** Faintly gold-tinged silver-gray surfaces have a few dots of deep color scattered on both sides. A quality Carson City quarter with a shallow cut at Liberty's midsection largely accounting for the grade. NGC ID# 23V9, PCGS# 5509

**3381 1878-S MS61 NGC.** Pale silver, apricot, and plum hues mingle on this S-mint quarter condition rarity. Color is deepest on the highest points of the design. Census: 3 in 61, 15 finer (1/14). NGC ID# 23VA, PCGS# 5510

**3382 1879 MS62 PCGS.** Semireflective with gold-gray patina that is deeper on the reverse. The underlying silver surfaces have wispy abrasions but few deep marks. One of just 13,600 business strikes produced. Housed in a green label holder. NGC ID# 23VB, PCGS# 5511

**3383 1880 MS66 PCGS.** This is a lovely Premium Gem from this small-mintage remnant from the 1880s dearth of minor coins, caused by the glut of Morgan dollars struck at the same time. The obverse is patinated with pinkish-gold in the center that cedes to sky-blue at the rim, while the reverse has more-intense blushes of amber-gold and cinnamon near the margin. One of only 13,600 pieces coined, essentially mark-free and well-struck. Population: 34 in 66 (1 in 66+), 13 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23VC, PCGS# 5512*

**1882 Seated Liberty Quarter, MS66+  
Low-Mintage Issue**

**3384 1882 MS66+ NGC.** The 1882 Seated Liberty quarter claims a small business-strike mintage of 15,200 pieces. This high-end Premium Gem exhibits well-detailed design elements and vibrant mint luster throughout. The well-preserved brilliant surfaces add to the outstanding eye appeal. Census: 12 in 66 (1 in 66+), 13 finer (1/14). NGC ID# 23VE, PCGS# 5514

**1883 Quarter, Near-Brilliant MS66  
Semiprooflike Fields**

**3385 1883 MS66 NGC.** Brilliantly lustrous with silver-white surfaces accented with a smidgen of amber-gold at the rims on each side, this piece is one of only 14,400 business strikes produced in this low-mintage year. A well-struck and pleasing example, with essentially flawless surfaces. The upper left berry on the branch is separated from its stem because of die lapping. Census: 15 in 66, 4 finer (1/14).  
*Ex: FUN Signature (Heritage, 1/2007), lot 2942. NGC ID# 23VF, PCGS# 5515*

**1887 Seated Liberty Quarter, MS66  
Elusive Low-Mintage Issue**

**3386 1887 MS66 PCGS.** Only 10,000 Seated Liberty quarters were struck in 1887, and the issue is quite rare in MS66 Condition. This spectacular Premium Gem offers well-detailed design elements and well-preserved lustrous surfaces with attractive shades of pale gold toning. Population: 26 in 66, 6 finer (1/14). NGC ID# 23VK, PCGS# 5519

**3387 1891 MS65 PCGS.** The Seated Liberty design was retired after 1891, making the date an important one for type collectors. This sharply detailed Gem displays strong mint luster under variegated gold, blue, amber, and green toning. Population: 61 in 65, 31 finer (1/14). NGC ID# 23VR, PCGS# 5524

**3388 1891 MS66 PCGS.** A well-detailed Premium Gem example from the last year of the Seated Liberty design, this coin displays vibrant mint luster under lavender, blue, and champagne-gold toning. Population: 27 in 66 (1 in 66+), 4 finer (1/14). NGC ID# 23VR, PCGS# 5524

**3389 1891-O VF30 PCGS.** This midrange O-mint quarter from the final year of the Seated design remains faintly luminous under gold and blue patina. Small scattered marks contribute to the grade. Population: 8 in 30, 33 finer (1/14). NGC ID# 23VS, PCGS# 5525

**PROOF SEATED QUARTERS**

**3390 1861 PR63 NGC.** Type Two Obverse and Reverse. The frosty devices are fully struck. The obverse border is golden-brown while the reverse margin displays sea-green. Lightly hairlined. Scarcer than the mintage of 1,000 pieces implies, since many unsold proof sets were melted. NGC ID# 23WN, PCGS# 5557

**1863 Seated Quarter, Deeply Toned PR65**

**3391 1863 PR65 PCGS.** Deep patina in shades of purple, pink, rose, cobalt-blue, and violet covers both sides of this attractive Gem proof 1863 quarter, one of 460 struck for the year. The strike is full throughout both sides, making this a tempting acquisition to represent the type. Population: 10 in 65, 9 finer (1/14). NGC ID# 23WR, PCGS# 5559

**3392 1864 PR64 PCGS.** From a small proof mintage of 470 pieces struck at the height of the Civil War, this impressive Seated Liberty quarter displays sharply detailed design elements and reflective fields that show few signs of contact. Population: 54 in 64 (1 in 64+), 15 finer (1/14). NGC ID# 23WS, PCGS# 5560

**3393 1866 Motto PR65 PCGS.** Deep plum-red and gunmetal-blue dominate this originally toned specimen. An intricately struck and well preserved Gem. Encased in a green label holder. One of just 725 proofs issued. NGC ID# 23WX, PCGS# 5565

**1868 Seated Quarter, PR65  
Only 600 Examples Struck**

**3394 1868 PR65 PCGS.** From a small proof mintage of just 600 pieces, this spectacular Gem displays well-preserved reflective surfaces under vivid shades of cobalt-blue and gray toning. The design elements are sharply detailed throughout. Population: 10 in 65 (1 in 65+), 3 finer (1/14).

*Ex: Tice Family Collection (Stack's, 6/1962), lot 720. flip accompanies the lot. NGC ID# 23WZ, PCGS# 5567*

**3395 1871 PR64 PCGS.** Deep blue at the interiors with lighter aqua in rings around. Faintly hairlined with a few tiny contact marks but an appealing near-Gem proof overall. NGC ID# 23X4, PCGS# 5570

**3396 1873 No Arrows PR64 PCGS.** An attractive No Arrows proof with delicate gold, green, and blue patina across each side. The fields gleam and the lightly frosted devices supply visible, albeit not Cameo-worthy contrast. Population: 36 in 64, 19 finer (1/14). NGC ID# 23X6, PCGS# 5572

**1873 Arrows Quarter, PR64  
Attractive Example of This Two-Year Type**

**3397 1873 Arrows PR64 PCGS.** From a mintage of 540 pieces, the 1873 Arrows proof quarter becomes somewhat difficult in near-Gem and finer levels of preservation. This lovely example displays only wisps of speckled milky color under magnification. The design features are fully impressed. A few trivial handling marks are not disturbing. Population: 33 in 64, 15 finer (1/14).

*Ex: FUN Signature (Heritage, 1/2007), lot 2976. NGC ID# 23XR, PCGS# 5574*

**3398 1874 Arrows PR62 NGC.** A sharply detailed proof Seated Liberty quarter, from a mintage of 700 pieces. This coin offers deeply reflective surfaces under vivid shades of cobalt-blue and golden-brown toning. NGC ID# 23XS, PCGS# 5575

**1876 Quarter, Scarce PR66  
Deep, Dappled Toning**

- 3399 1876 PR66 PCGS.** The substantial proof mintage of 1,150 pieces should ensure that an abundant number of high-grade proofs are available today. Unfortunately, that is just not the case. PCGS has only certified seven other coins in this grade (minus any resubmissions) and only two are finer (1/14). Each side displays dappled royal blue and deep rose toning with strong underlying proof mirrors. Fully struck in all areas. NGC ID# 23X8, PCGS# 5577

- 3400 1878 PR64 PCGS Secure.** From a proof mintage of 800 pieces, this attractive Choice example exhibits well-detailed design elements and reflective surfaces under shades of cerulean-blue, lime-green, and lavender-gray toning. Population: 43 in 64, 25 finer (1/14). NGC ID# 23XA, PCGS# 5579

- 3401 1879 PR65 PCGS.** Both sides of this attractive Gem display cerulean-blue centers surrounded by a ring of emerald-green. The devices are sharply detailed and the fields show deep mirrors underneath the toning. Population: 33 in 65, 16 finer (1/14). NGC ID# 23XB, PCGS# 5580

**1880 Quarter, PR67  
Delicate Multicolor Patina**

- 3402 1880 PR67 NGC.** Type One Reverse. Delicate shades of champagne-gold and cerulean-blue toning enhance the pristine surfaces of this delightful Superb Gem. The design elements are well-detailed and the fields are deeply mirrored, with outstanding visual appeal. From a generous proof mintage of 1,355 pieces. Census: 15 in 67 (3 in 67 ★), 5 finer (1/14). NGC ID# 23XC, PCGS# 5581

- 3403 1882 PR65 PCGS. CAC.** The obverse has bold peach and rose interior toning surrounded by blues and greens. The reverse has a silver center that fades through to the colors above. Well-contrasted on the reverse. Population: 32 in 65, 31 finer (1/14). NGC ID# 23XE, PCGS# 5583

- 3404 1885 PR65 Cameo NGC.** Well-defined with gleaming fields and light but distinct frost on the central devices. Golden rim toning adds a touch of color to the otherwise silver-white surfaces. Census: 16 in 65 Cameo (2 in 65 ★ Cameo), 25 finer (1/14).  
Ex: *Denver Signature (Heritage, 8/2006), lot 1189.* PCGS# 85586

- 3405 1891 PR65 Cameo NGC.** Surprisingly strong contrast for a "mere" Cameo example. Attractively preserved with just a hint of gold at the rims and a few small milky patches at the peripheral reverse. Census: 12 in 65 Cameo, 34 finer (1/14).  
Ex: *Dallas Signature (Heritage, 12/2004), lot 5903; Denver Signature (Heritage, 8/2006), lot 1197.* PCGS# 85592

**BARBER QUARTERS**

- 3406 1892 MS65 PCGS.** Type One Reverse. The reverse border is lightly die doubled, most evident on QUARTER and the olive branch. A pristine first-year type coin with good luster and rich sea-green, cream-gray, and autumn-brown toning. A mint-made strike-through is noted below the chin.  
Ex: *Dallas Signature (Heritage, 11/2007), lot 590, which realized \$1,063.75.* NGC ID# 23XT, PCGS# 5601

- 3407 1892 MS66 PCGS.** Type One Reverse. Golden-brown and apple-green margins frame the cream-gray centers. A fully struck and essentially immaculate first year type coin. Die breaks are noted beneath Liberty's shoulder and on the upper loops of both S in STATES.  
Ex: *Milwaukee Signature (Heritage, 8/2007), lot 7960.* NGC ID# 23XT, PCGS# 5601

**1893 Barber Quarter, MS66  
Rare Any Finer**

- 3408 1893 MS66 PCGS.** Nearly 10 million Barber quarters were struck in 1893, with more than half of them at the Philadelphia Mint and the balance produced by the San Francisco and New Orleans branches. This Philadelphia example is among the finest known of the issue. Extremely lustrous, brilliant-white surfaces are lightly frosted and pristine. Not a bit of toning exists on the mark-free, silver surfaces. The strike is full with no weakness on the eagle, shield, or stars and extremely high rims. Population: 12 in 66 (2 in 66+), 1 finer (1/14). NGC ID# 23XW, PCGS# 5604

- 3409 1894-O MS64 NGC. CAC.** This fully struck and coruscating near-Gem is bathed in sea-green and steel-gray patina. Both sides display only faint grazes. Very scarce in quality Mint State despite a generous mintage. Census: 36 in 64 (1 in 64 ★), 15 finer (1/14). NGC ID# 23Y2, PCGS# 5608

- 3410 1894-S MS64 PCGS.** Vivid shades of greenish-gold and lavender toning grace the lightly marked surfaces of this attractive Choice example. The design elements are sharply detailed and vibrant mint luster shines through the patina. Population: 58 in 64 (1 in 64+), 22 finer (1/14). NGC ID# 23Y3, PCGS# 5609

- 3411 1895-O MS64 NGC.** Pearl-gray toning overall with peach and blue-violet tints along parts of the rims. Well-struck overall, though the claw clutching the arrows shows typical softness. Census: 22 in 64 (1 in 64 ★), 17 finer (1/14). NGC ID# 23Y5, PCGS# 5611

**1898-O Barber Quarter, MS64+  
Challenging New Orleans Issue**

- 3412 1898-O MS64+ PCGS.** The relatively low New Orleans mintage of just over 1.8 million pieces contributes to the condition rarity of this issue, which is seldom seen any finer than this borderline Gem example. Brilliant-white with lustrous, frosted surfaces, a mere hint of golden toning confirms the coin's original surfaces. A full strike helped this radiant quarter earn the Plus designation from PCGS for high quality and eye appeal. Population: 21 in 64 (4 in 64+), 12 finer (1/14). NGC ID# 23YE, PCGS# 5620
- 3413 1898-S MS62 NGC.** With a recorded mintage of just over 1 million pieces, the 1898-S Barber quarter is rare in MS62 condition. This sharply detailed example displays satiny mint luster under shades of lavender and golden-brown toning. Census: 7 in 62, 28 finer (1/14). NGC ID# 23YF, PCGS# 5621
- 3414 1899-O MS64 NGC.** Watery reflectivity lends this gold-tinged near-Gem great eye appeal. This New Orleans issue was little-saved at the time of release and is conditionally rare at the MS64 level. Census: 25 in 64, 13 finer (1/14). NGC ID# 23YH, PCGS# 5623
- 3415 1900-O MS64+ PCGS. CAC.** Light silver-blue overall with occasional hints of golden-tan. Tiny dots of deep sapphire lie nestled between certain dentils on both sides. Population: 15 in 64 (2 in 64+), 19 finer (1/14). NGC ID# 23YL, PCGS# 5626

**1901-S Quarter, Good 4  
Light, Original Surfaces**

- 3416 1901-S Good 4 PCGS.** The obverse exhibits outlined definition over virtually all major features, the reverse rim is worn into the peripheral devices. Both sides are originally toned with remarkably smooth features for a quarter that saw this extensive wear. One of only 72,664 pieces produced, and important as such.  
*Ex: Long Beach Signature (Heritage, 10/2001), lot 6353.*  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23YR, PCGS# 5630*
- 3417 1913-S Good 6 PCGS.** The L and Y in LIBERTY are clear, as is the entire reverse peripheral legend. About one-third of E PLURIBUS UNUM is present. Toned stone-gray and ice-blue with a smooth appearance. A remarkably low mintage of 40,000 pieces ensures the demand for this key-date Barber quarter.  
*Ex: ANA Signature (Heritage, 8/2010), lot 4789. NGC ID# 23ZW, PCGS# 5666*

- 3418 1914 MS66 PCGS.** The surfaces on this wholly original 1914 are nearly mark-free under a mottled coating of lilac-gray, carmine, and coppery-orange toning. As with so many issues in the Barber quarter series, the vast majority of Mint State survivors fall short of Gem quality. Population: 23 in 66, 2 finer (1/14).  
*Ex: FUN Signature (Heritage, 1/2005), lot 4166. NGC ID# 23ZX, PCGS# 5667*
- 3419 1915 MS66 NGC.** Deep apple-green, ruby-red, and gunmetal-gray encompasses this satiny and exceptionally preserved Barber type coin. The strike is crisp but slightly incomplete. Certified in a former generation holder. Census: 9 in 66, 1 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2422, PCGS# 5670*
- 3420 1915-D MS65 NGC.** Arcs of peach-gold adorn the left borders of this lustrous and impressively unabraded Gem. Nicely struck despite the minor blending customary on the fletchings and right shield corner.  
*Ex: Houston Signature (Heritage, 12/2009), lot 576. NGC ID# 2423, PCGS# 5671*
- 3421 1915-S MS65 PCGS. CAC.** Beautifully patinated in swaths of fire-red, peach-gold, and steel-gray. Sharply struck and unmarked. Housed in an old green label holder. Rare as a Gem, unlike its Denver Mint counterpart. Population: 22 in 65, 14 finer (1/14). NGC ID# 2424, PCGS# 5672
- 3422 1916-D MS65 PCGS. CAC.** Tiny splashes of gold and teal toning are present, primarily on the reverse. Cartwheel luster adds to the eye appeal of this Gem. Wispy die cracks are present on both sides. NGC ID# 2426, PCGS# 5674
- 3423 1916-D MS66+ NGC.** Excellent cartwheel luster is this final-year Denver Barber quarter's greatest asset. Minimally toned with just a few small marks scattered on each side. Census: 58 in 66 (2 in 66+, 5 in 66 ★), 13 finer (1/14). NGC ID# 2426, PCGS# 5674

**PROOF BARBER QUARTERS**

- 3424 1892 PR64 Cameo PCGS.** Type Two Reverse. Faint honey-gold toning visits this mostly brilliant and fully struck Choice Cameo proof. Frosty motifs provide favorable contrast with smooth, glassy fields. PCGS# 85678

**1893 Quarter, PR66 Cameo  
Boldly Contrasted Obverse**

- 3425 1893 PR66 Cameo PCGS. CAC.** From a reported mintage of 792 pieces, the proof 1893 Barber quarter is an available issue in lower grades, but examples in PR66 condition, and with the Cameo designation, are quite rare. The cameo contrast on the obverse is particularly strong on this attractive Premium Gem example. Scattered flecks of light toning are present, primarily on the reverse. Population: 13 in 66 (1 in 66+) Cameo, 18 finer (1/14). PCGS# 85679
- 3426 1895 PR65 Cameo PCGS.** The design elements of this delightful Gem Barber quarter are sharply detailed and richly frosted, providing intense cameo contrast with the deeply reflective brilliant fields. Population: 9 in 65 Cameo, 29 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 85681*

**3427 1897 PR66 Cameo NGC.** The silver-white surfaces of this early proof Barber quarter show not the slightest hint of patina, for those who prefer their coins untuned, although there is a suggestion of powder-gray in the obverse field. The field-device contrast is marvelous on both sides, particularly deep on the reverse. Census: 19 in 66 Cameo, 18 finer (1/14). PCGS# 85683

**3428 1899 PR66 PCGS.** This spectacular Premium Gem is richly toned in shades of greenish-gold and lavender-gray, with sharply detailed design elements and deeply mirrored surfaces under the patina. Population: 24 in 66, 6 finer (1/14). NGC ID# 242E, PCGS# 5685

#### 1899 Quarter, PR66 Cameo An All-Brilliant Example

**3429 1899 PR66 Cameo NGC.** The 1899 has always had a certain cachet as the final year of the 19th century. This is an exceptionally attractive proof striking that is deeply mirrored. Contrasted against the "black" fields are snowy-white frosted devices. Very few Barber quarters of this, or any other date, are available to type collectors. Census: 12 in 66 Cameo, 12 finer (1/14). PCGS# 85685

**3430 1906 PR66 NGC.** A sharply detailed Premium Gem from a low proof mintage of 675 pieces, this coin offers deeply mirrored field with no mentionable distractions, under shades of pale gold and powder-blue toning. Census: 49 in 66, 38 finer (1/14). NGC ID# 242M, PCGS# 5692

**3431 1908 PR64 PCGS.** Lightly gold-tinged with glimmering luster through the fields. Well-contrasted for the issue, particularly on the reverse, though not to a Cameo level. NGC ID# 242P, PCGS# 5694

**3432 1908 PR66 PCGS.** The obverse of this Premium Gem remains brilliant overall, with subtle hints of light toning present. The reverse displays toning in shades of yellow, gold, red, copper, light green, cerulean-blue, and olive-green. Only 545 proof Barber quarters were struck in 1908. Population: 13 in 66, 21 finer (1/14). NGC ID# 242P, PCGS# 5694

**3433 1913 PR64 PCGS.** Dappled shades of cerulean-blue and apple-green toning enhance the surfaces of this sharply detailed Choice proof, with well-preserved reflective fields under the patina. Population: 47 in 64 (1 in 64+), 70 finer (1/14). NGC ID# 242V, PCGS# 5699

## EARLY HALF DOLLARS

### 1794 Flowing Hair Half, Fine Details Rare O-107 Variety

**3434 1794 — Bent, Damaged — NGC Details. Fine. O-107, R.6.** Although the variety is not designated on the holder, this 1794 half is the elusive O-107 variety, which was upgraded from an R.5 rarity to R.6 in the current rarity ratings for bust halves. Although this example has its problems, several of the highest rated examples in the Census for the variety do as well. The highest-rated O-107 is a VF20, while the sixth-rated example of the variety is a F12 with damage.

This example appears original and wholesome except for a trio of dents on the obverse and a resultant bend in the coin. Otherwise, it displays natural deep, dove-gray color with details approaching VF if not for the damage. The diagnostics for the O-107 variety are clear with Star 1 terminating at Liberty's first curl (but not penetrating it) and the point of Star 15 very close to the extreme end of Liberty's bust. It has the correct reverse die pairing with berries 10-11 (the only reverse with 21 berries, also seen on several other varieties of the date).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**3435 1795 2 Leaves VG8 ANACS. O-105a, R.4.** Rich aquamarine, tan-brown, and stone-gray toning encompasses this Flowing Hair half. All legends are distinct. Lightly marked overall, though the reverse has a minor rim ding at 1 o'clock. Encapsulated in an ANA cache holder. PCGS# 6052

**3436 1795 2 Leaves — Improperly Cleaned — NGC Details. Fine. O-110, R.4.** This Flowing Hair type coin is hairlined but lacks any individually consequential marks. The straw-gold centers are framed by navy-blue borders. The devices show partial hair and plumage definition.

**1795 Two Leaves Flowing Hair Half, VF20  
O-109, Attractive Early Type**

- 3437 1795 2 Leaves VF20 PCGS. O-109, R.4.** Pleasing lilac and blue accents complement a golden-gray obverse, with some silver luminosity peeking through the toning. The reverse is a bit more deeply toned with the blues edging toward purple, but the golden-gray retains its iridescent appeal. The obverse surfaces are remarkably unabraded well-detailed. The reverse shows a few mint-made adjustment marks across the eagle's right (facing) wing and tail feathers.

The O-109 variety has few distinguishing characteristics other than the arrangement of the stars (about equidistant from Liberty's lowest curl at the points of stars 1 and 2). Star 15 is a similar distance from the end of Liberty's bust. The O-108 variety shares this obverse, but with some die defects and a diagnostic die crack that do not appear on O-109 and make the O-108 simpler to identify. Overton's reverse G is unique to the O-109 variety and confirms the attribution. The VF20 grade of this coin is a favored condition for collectors building a set of flowing hair halves. PCGS# 6052

**1801 O-101 Half Dollar, VF30  
Unmarked Surfaces**

- 3438 1801 VF30 PCGS. O-101, R.3.** The 1801 is a very scarce Draped Bust date. Just two die varieties are known. Most examples are O-101, easily identified by several small die breaks on the reverse. The present piece is primarily dove-gray, though reverse high points are pearl-white. Void of relevant marks.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24ED, PCGS# 6064*

- 3439 1803 Large 3, Small Reverse Stars VF35 PCGS. O-101, R.3.** A gunmetal-blue example of this scarce Large Eagle date. The wings and curls exhibit ample remaining detail. Marks are few, and none are worthy of individual discussion. NGC ID# 24EF, PCGS# 6066

- 3440 1803 Small 3, Large Reverse Stars VF30 PCGS. O-104, R.3.** Gunmetal-gray fields contrast with pearl-white high points. Marks are minor for the grade. All letters in E PLURIBUS UNUM are clear. O-104 is the sole Small 3 marriage and a scarce *Guide Book* variety. NGC ID# 24EF, PCGS# 6067

- 3441 1805 XF40 ANACS. O-112, R.2.** Pearl-white high points contrast with charcoal-gray fields. Refreshingly unabraded, though we note a small reverse rim flaw at 1 o'clock. The rim-to-rim crack near STATES is present, but there is no other indication of the eventual O-112'a' retained die break.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24EG, PCGS# 6069*

- 3442 1806/5 VF30 PCGS. O-103, R.2.** Rich steel-gray toning is uniform save for occasional olive-gold high points. We note thin horizontal marks beneath the right scroll end and from star 3 across Liberty's neck. NGC ID# 24EK, PCGS# 6077

- 3443 1806 Pointed 6, No Stem VF35 ANACS. O-109, R.1.** Overton-109 is the only Pointed 6, No Stem die marriage. It is widely collected as a *Guide Book* variety. The present Choice VF example displays deep aquamarine and rose-gold toning. A mint-made obverse lamination is at 7 o'clock and a few small rim nicks are noted. PCGS# 6073

- 3444 1807 Draped Bust VF20 PCGS. CAC. O-110a, R.3.** This colorful Very Fine half dollar displays orange-gold, ocean-blue, and lilac-red. Marks are absent aside from a faint field tick near the nose. Several peripheral cracks provide additional interest. NGC ID# 24EM, PCGS# 6079

## BUST HALF DOLLARS

- 3445 1807 Large Stars, 50 Over 20 VF35 PCGS. O-112, R.1.** The popular *Guide Book* variety with a blundered denomination. Generally pearl-gray and butter-gold with deeper orange, forest-green, and plum-mauve toning at the margins. Pockets of luster are prevalent despite moderate wear on the motifs.  
*Ex: Stu Keen, Long Beach (1991). NGC ID# 24EN, PCGS# 6086*

- 3446 1807 Capped Bust, Small Stars VF35 PCGS. CAC. O-113, R.2.** Jade-green, apricot-gold, and lavender toning embrace this minimally abraded and moderately glossy Choice VF representative. The Small Stars *Guide Book* variety is limited to a single Overton marriage. NGC ID# 24EN, PCGS# 6087

- 3447 1807 Capped Bust, Large Stars XF40 NGC. O-114a, High R.5.** Neither Overton nor Parsley describe the several lengthy peripheral die cracks visible on the present lot, but not on the Overton plate coin. Herrman lists an O-114'a' variety as High R.5 with a question mark after the rarity. The upper obverse and lower left reverse have arcs of ocean-blue and lilac-red, but the majority of this moderately abraded example is stone-gray. NGC ID# 24EN, PCGS# 6088

- 3448 1808/7 AU50 PCGS. CAC. O-101, R.1.** Deep dove-gray and straw-gold toning encompasses this lightly circulated and minimally abraded half dollar. The sole overdated 1808 variety. The flag and crossbar of the 7 is plain within the final date digit.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24EP, PCGS# 6091*

- 3449 1809 Normal Edge AU53 NGC. O-106, R.3.** The N in UNITED is repunched. Luster brightens the margins and motifs of this slate-gray and chestnut-gold representative. A loupe locates only unimportant contact. NGC ID# 24ES, PCGS# 6092

- 3450 1809 Normal Edge AU55 NGC. O-111, R.2.** The O-111 variety exhibits a die mark in the drapery on the shoulder of Liberty just to the left of the lowest curl. It is diagnostic on all specimens of this variety, and it is the most recognizable feature to identify the obverse die. The reverse die shows a small center dot within the horizontal lines of the shield. The letters AM are joined at the base. This Choice AU example is untuned and brilliant-white with mint luster remaining primarily beneath the stars and legend. A desirable early date of the bust half series. NGC ID# 24ES, PCGS# 6092

- 3451 1809 AU55 PCGS. O-102, R.1.** The U in UNITED is widely repunched. A die crack through the bust tip distinguishes O-102 from the other two Overton varieties that share the distinctive reverse die. This powder-blue, olive-green, and sun-gold half dollar is nearly unabraded and shows slight wear. NGC ID# 24ES, PCGS# 6092

- 3452 1811/10 XF45 PCGS. CAC. O-101, R.1.** Glimmers of luster emerge from the richly toned cream-gray and sea-green surfaces. Abrasions are inconsequential except for a diagonal thin mark on the left obverse field. The *Guide Book* now lists this variety as “1811 (18.11), 11 Over 10,” referring to the die dot in the date.  
*Ex: Orlando FUN Signature (Heritage, 1/2012), lot 3465. NGC ID# 24EV, PCGS# 6099*
- 3453 1812 Large 8 AU55 PCGS. O-103, R.1.** An unabraded example with noticeable cartwheel sheen on both sides. Dusky pearl-gray centers are framed by pale jade-green borders. Struck from double-clashed dies. Certified in a first generation holder. NGC ID# 24EW, PCGS# 6100
- 3454 1812 Large 8 AU55 PCGS. O-103, R.1.** Vertical die lines beneath the eagle’s beak allows prompt attribution. This lightly circulated and unblemished half dollar displays stone-gray and almond-gold toning. Certified in a first generation holder. NGC ID# 24EW, PCGS# 6100
- 3455 1812 Large 8 AU58 PCGS. CAC. O-110, R.1.** Dusky gunmetal-gray and walnut-brown toning encompasses this multiply clashed but unabraded representative. The curls near the ear display light wear. Minor residue is between star 13 and the 2 in the date. NGC ID# 24EW, PCGS# 6100

1812 Half Dollar, MS62  
O-107 Variety, the ‘Jumping 1’

- 3456 1812 Large 8 MS62 NGC. O-107, R.1.** A richly lustrous example that has light gold color on the reverse and dappled olive-green hues on the obverse. A couple of faint pinscratches on the obverse deny a finer grade. Struck from multiply clashed dies, the BER in LIBERTY is plainly visible on two places on the reverse. The variety is defined by a left-leaning date with the first 1 high (called the “jumping 1” in the Peterson reference), and a diagnostic die lump above the eagle’s left (facing) wing. NGC ID# 24EW, PCGS# 6100
- 3457 1813 50C Over UNI AU53 PCGS. CAC. O-101, R.2.** A lightly rubbed but still-lustrous example of the popular *Guide Book* variety. Largely silver interiors yield to richer golden-tan and blue along the margins. NGC ID# 24F2, PCGS# 6104
- 3458 1813 AU53 PCGS. O-103, R.2.** Olive-gold toning is chiefly confined to the right borders. Luster is extensive for the AU53 level. Field abrasions are inconsequential, though Liberty’s cheek and neck display faint marks. NGC ID# 24EZ, PCGS# 6103
- 3459 1813 AU55 PCGS. O-107, R.4.** A slender horizontal die flaw above the upper ribbon end confirms the Overton variety. The scarce early die state without a lengthy lower reverse die crack. Richly patinated golden-brown, cobalt-blue, and lilac. Unabraded save for a single thin diagonal mark on the upper portion of the eagle. NGC ID# 24EZ, PCGS# 6103
- 3460 1814 AU58 PCGS. CAC. O-103, R.1.** Readily attributed by the broad vertical die line from the left (facing) wing to the scroll. Medium chestnut-gold and dove-gray toning embraces partly lustrous and unmarked surfaces. NGC ID# 24F3, PCGS# 6105

- 3461 1814 E Over A AU53 PCGS. O-108a, R.1.** The only 1814 die marriage with an E over a blundered A in STATES. Retrograde lettering was entered by hand into working dies prior to 1836, and was the cause of the error. Smooth and satiny with olive-gold and lavender toning. Struck from multiply clashed dies. NGC ID# 24F3, PCGS# 6107
- 3462 1819/8 Large 9 AU55 PCGS. O-102, R.2.** A brilliant representative with ample luster and an even strike. The curls and claws display light wear. Mostly smooth, though a few small field marks are noted beneath UNUM.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 6119*
- 3463 1820/19 Square Base 2 AU53 PCGS. O-101, R.2.** Light chestnut-gold patina visits this partly lustrous and problem-free Choice AU representative. The curls and claws show only minor wear. The only overdated die pair with a Square Base 2. A Curl 2 overdate (O-102) is also known. NGC ID# 24FE, PCGS# 6125
- 3464 1821 AU58 NGC. O-106a, R.2.** The die break within the N in UNITED confirms the late die state. This lustrous half dollar is unabraded but displays slight wear on the cheek, curls, and drapery. The reverse is brilliant while the obverse exhibits light butter-gold toning. NGC ID# 24FF, PCGS# 6128
- 3465 1822/1 AU55 NGC. O-101, R.1.** Gunmetal-gray centers cede to autumn-brown, cherry-red, and navy-blue borders. Unabraded except for a faint field scuff near the chin. Glimpses of luster illuminate design elements. NGC ID# 24FH, PCGS# 6130
- 3466 1824 AU58 NGC. O-105, R.2.** Golden-tan and dove-gray shades enrich this satiny and blemish-free half dollar. Only slight wear on the claws and the crests of the wings precludes a Mint State assessment. NGC ID# 24FK, PCGS# 6137
- 3467 1825 AU58 PCGS. CAC. O-112, R.3.** Tan-gold patina visits the cheek and borders, though the remainder of this near-Mint half dollar is brilliant. Marks are confined to a vertical line behind Liberty’s mouth and a field scrape above 50 C. NGC ID# 24FL, PCGS# 6142
- 3468 1826 AU58 PCGS. O-109, R.1.** Cherry-red, lime-green, orange-gold, and slate-gray encompass this briefly circulated Capped Bust half dollar. Even a loupe fails to locate any detrimental marks. Luster is particularly evident at the peripheries and within the plumage. NGC ID# 24FM, PCGS# 6143
- 3469 1826 MS61 NGC. O-108a, R.1.** Struck from the latest state of the O-108 dies, this example has the diagnostic die cracks described by Overton on both sides of the coin. Plentiful mint luster is present beneath light, golden-gray toning on this sharp bust half dollar. All the critical areas are fully struck and appealing. The hair curls are bold and fully detailed, as are the clasp and drapery folds. Liberty’s cap is fully brought up. The eagle and its wings and talons are sharp. No weakness shows on the scroll. A few minor abrasions, none significant, determine the grade. NGC ID# 24FM, PCGS# 6143
- 3470 1826 MS62 PCGS. O-110, R.2.** The dove-gray fields and motifs are bounded by sea-green and sun-gold at the margins. There are no noticeable marks. The strike is crisp except on the stars. A die dot above the right (facing) claw is Dr. Glenn Peterson’s pick-up point for the Overton variety. NGC ID# 24FM, PCGS# 6143
- 3471 1827 Square Base 2 AU58 PCGS. O-106, R.2.** Dusky golden-brown and dove-gray dominate the fields and devices. The margins display forest-green and plum-mauve. An attractive near-Mint example of this diverse and collectible date.  
*Ex: Long Beach Signature (Heritage, 9/2009), lot 8065, which realized \$604.90. NGC ID# 24FN, PCGS# 6144*

**1827 Capped Bust Half, MS63  
O-129, Square 2, Jointed L**

- 3472 1827 Square Base 2 MS63 PCGS. O-129, Low R.4.** This is a scarce die pairing for the 1827 date. 29 obverse dies and 34 reverse dies produced 49 die pairings in 1827 according to the Overton reference. This one is O-129, with a jointed L in PLURIBUS diagnostic of the reverse and flatness of stars on the left (particularly stars 5, 6, and 7) diagnostic for the obverse.

Those interested in this bust half only for its quality and eye appeal will appreciate the sharp strike and the album-style, colorful toning. Golden-gray centers blend into rose, russet, and turquoise peripheral toning. Liberty's drapery folds, clasp, and hair curls are sharp. The eagle is fully feathered with just a touch of softness on the right (facing) talons. The scroll is complete. Soft luster is pervasive on both sides of the coin. The O-129 variety has an R.4 rating, with this MS63 example likely one of the half-dozen finest of the variety. NGC ID# 24FN, PCGS# 6144

- 3473 1828 Curl Base 2, No Knob MS61 PCGS. O-103, R.2.** A die defect at the bottom of the shield is diagnostic for this Overton marriage. Lovely golden-brown, navy-blue, and cherry-red endow the peripheries of this otherwise brilliant example. Lustrous and exceptionally free from marks.

*Ex: Allgood Collection (Heritage, 1/2011), lot 3718, which realized \$1,667.50. NGC ID# 24FR, PCGS# 6148*

**1828 Capped Bust Half, MS64  
Overton-118a, R.4  
Condition Census for the Variety**

- 3474 1828 Square Base 2, Small 8, Large Letters MS64 NGC. O-118a, R.4.** This is a scarce R.4 die pairing, with all the diagnostics present for the late state of the reverse. Multiple die cracks encircle the denomination and legend. Despite the late die state, the strike is full on the eagle, talons, and arrows. The scroll is bold and complete. The obverse is similarly bold, with the stars, clasp, Liberty's hair, cap, and dentils all sharp. Attractive, gunmetal gray toning displays undertones of rose, blue, and green with silver luster radiant beneath the toning. The surfaces appear smooth, hard, and virtually without abrasions.

Overton-118a is well-known as the large letters variety with the legend running together, particularly between UNITED and STATES where the words are crowded. This example ranks high in Condition Census for the variety, where the finest-known is an MS65 example. This MS64 half is likely the second finest of the variety. PCGS# 6151

- 3475 1829 Small Letters MS63 NGC. O-103, R.1.** Glossy surfaces and deeply colorful toning define this attractive, Select Uncirculated bust half. A sharp strike exists on most of the critical areas, with exception of flatness on a few stars and softness at the PL of PLURIBUS. Charcoal-bronze toning displays alternating hues of blue, red, and purple accents with silvery luster shining through. A distinctive and thoroughly pleasing example of this 1829 bust half with the O-103 die pairing. NGC ID# 24FS, PCGS# 6154

- 3476 1830 Small 0 MS63 PCGS. O-117, R.2.** A repunched stand on the 5 in 50 C helps attribute the otherwise unremarkable Overton marriage. Dusky steel-gray, olive-green, and cherry-red toning adorns this coruscating and minimally abraded representative. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24FU, PCGS# 6156*

- 3477 1830 Medium 0 AU58 PCGS. CAC. O-119, R.1.** A late die state, the stars are drawn to the rim and a clash mark from the scroll is beneath the bust. Overton omitted the state from his classic reference. A silver-gray Capped Bust slider with unblemished surfaces and substantial cartwheel sheen. NGC ID# 24FU, PCGS# 6156

- 3478 1830 Large 0 AU58 PCGS. O-121, R.3.** The nearly mark-free surfaces are deeply patinated golden-brown, cobalt-blue, and sea-green. Minor lacquer residue is evident beneath the N in UNUM and on the reverse margin between 6 and 7 o'clock. Encapsulated in a first generation holder. PCGS# 6157

- 3479 1830 Large 0 MS62 PCGS. O-120, R.1.** Delicate caramel-gold and silver-gray toning graces lustrous and uncommonly smooth surfaces. The strike is good except on star 5. Although available in circulated grades, O-120 is surprisingly elusive in Mint State. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 6157*

- 3480 1830 Large 0 MS63 PCGS. O-123, R.1.** Rich peach-gold, lime-green, and jade-green encompass the obverse of this lustrous Select representative. The reverse is mostly brilliant but has a honey-gold margin. No marks are remotely consequential. PCGS# 6157

- 3481 1832 Small Letters AU58 PCGS. CAC. O-115, R.1.** Colorful with gold-green and blue bands around silver cores, that of the obverse larger than that of the reverse. Amply lustrous despite light wear across the high points. NGC ID# 24FW, PCGS# 6160

- 3482 1832 Small Letters AU58 PCGS. CAC. O-118, R.1.** Medium olive-gold and ice-blue toning. Light friction on the curls and the top of the eagle's head confirms momentary Jackson-era circulation. No marks are visible except for a thin diagonal mark on the field near the beak. NGC ID# 24FW, PCGS# 6160

- 3483 1832 Small Letters MS62 PCGS. CAC. O-103, R.1.** The 5 in 50 C is repunched. Rich cream-gray and olive-green toning embraces this satiny and refreshingly unabraded half dollar. The strike is bold except on star 9 and the top of 50. NGC ID# 24FW, PCGS# 6160

- 3484 1833 AU58 PCGS. O-108, R.1.** A Borderline Uncirculated Bust type coin that provides considerable luster yet lacks any remotely consequential marks. Slight wear on the nose tip and curls decides the grade. NGC ID# 24FX, PCGS# 6163

- 3485 1833 AU58 PCGS. O-109, R.3.** Many collectors would regard this half dollar as Mint State, since cartwheel luster dominates both sides. However, the eyebrow and the top of the eagle's head show a trace of wear. The nearly brilliant surfaces are smooth save for a cluster of tiny marks above the beak. NGC ID# 24FX, PCGS# 6163

- 3486 1833 AU58 PCGS. O-108, R.1.** A blanket of autumn-brown, steel-blue, and olive-green embraces this partially lustrous and minimally marked near-Mint example. One of many delightful Bust half "sliders" in the present auction. Certified in a green label holder. NGC ID# 24FX, PCGS# 6163

- 3487 1833 AU58 PCGS Secure. O-112, R.2.** Star 10 is strongly repunched, characteristic of Overton-112. A lustrous and nearly brilliant slider. Generally unabraded, though a pair of thin marks are noted beneath Liberty's ear. NGC ID# 24FX, PCGS# 6163
- 3488 1833 AU58 PCGS. CAC. O-109, R.3.** A die line from the lower right foot of the I in AMERICA attributes the moderately scarce Overton-109 marriage. Vibrant cartwheel luster and unblemished surfaces attest to the quality of this untuned near-Mint half dollar. NGC ID# 24FX, PCGS# 6163
- 3489 1834 Large Date, Large Letters AU58 PCGS. O-102, R.1.** The 3 in the date is repunched south. The gunmetal-gray centers are bounded by apple-green and orange-gold margins. Lustrous and nicely struck with smooth fields and minor facial marks. Housed in a first generation holder. NGC ID# 24FY, PCGS# 6164

## REEDED EDGE HALF DOLLARS

### 1836 Capped Bust Half, VF35 Reeded Edge

- 3490 1836 Reeded Edge VF35 PCGS. CAC. GR-1, R.2.** Gunmetal gray toning is complemented by lighter, silver-gray high points on this Choice VF, first-year type coin. Sharply struck with few abrasions for the grade, this example has smooth fields and hints of olive-green beneath the deep gray toning. The traditional mintage for the Reeded Edge 1836 half dollar is only 1,200 pieces, although either that figure is incorrect, or much of the initial mintage has survived to the present day. Always in demand by type collectors and Bust half specialists. NGC ID# 2U28, PCGS# 6175
- 3491 1837 MS60 PCGS. GR-13, R.1.** Silver-gray and straw-gold centers are bounded by peripheral ocean-blue. The major devices are well struck, though a few stars are incomplete. The satiny surfaces appear unabraded to the naked eye, though a loupe reveals hairlines. Encapsulated in a first generation holder. NGC ID# 24G4, PCGS# 6176
- 3492 1838 AU58 PCGS. GR-9, R.3.** A distinctive die variety due to the lengthy reverse crack from the rim at 6 o'clock across the eagle to 10 o'clock. Rich cobalt-blue and autumn-gold toning drapes well defined surfaces. Smooth aside from a thin field mark near the chin.  
*Ex: Long Beach Signature (Heritage, 9/2004), lot 6608, which realized \$776.25. NGC ID# 24G5, PCGS# 6177*
- 3493 1838 AU58 PCGS. GR-8, R.2.** Star 8 is widely repunched. This Borderline Uncirculated type coin has good luster and a narrow peripheral band of autumn-brown and cobalt-blue toning. Faint field marks correlate with the grade. NGC ID# 24G5, PCGS# 6177
- 3494 1839-O VF30 NGC. GR-1, R.1.** A very late die state with the both fields buckling inside of peripheral cracks. A slate-gray midgrade representative of the only collectible New Orleans Bust issue. There are no obtrusive abrasions. NGC ID# 24G7, PCGS# 6181

- 3495 1839-O XF40 PCGS. GR-1, R.1.** An early die state with bold repunching on the mintmark. The sole die crack extends through the ERIC in AMERICA. Toned cream-gray and wheat-gold. The obverse displays hairlines and the reverse has a thin mark through the right (facing) wing. Housed in a green label holder. NGC ID# 24G7, PCGS# 6181

## SEATED HALF DOLLARS

- 3496 1842-O Small Date, Small Letters — Cleaning — PCGS Genuine. VF Details.** A glossy cream-gray and gunmetal example. Mostly unmarked though the reverse field is scuffed near the CA in AMERICA. A rare *Guide Book* variety struck using the Small Letters reverse of 1839. The 1842-O Medium Date, Large Letters is comparatively plentiful. NGC ID# 24GV, PCGS# 6238
- 3497 1846 Tall Date MS62 NGC.** The open 6 in the date identifies the Tall Date variety. Both sides of this well-detailed MS62 specimen are blanketed in shades of cobalt-blue and sea-green toning, with bright mint luster underneath. Census: 13 in 62, 11 finer (1/14). PCGS# 6252
- 3498 1846-O Tall Date XF40 PCGS. WB-106, Die Pair 27.** Lavender toning envelops this unblemished and well-defined, rare-variety New Orleans half. While the Southern facility struck more than 2.3 million halves in 1846, the vast majority of those utilized a Medium Date. The Large (Tall) Date variety is always a favorite with Seated half collectors. Population: 8 in 40, 12 finer (1/14). NGC ID# 24H9, PCGS# 6256

### 1850 Liberty Seated Half Dollar, MS62 Rare and Undervalued Issue

- 3499 1850 MS62 PCGS. WB-101.** The small mintage of 227,000 pieces largely has disappeared over the years, leaving this Philadelphia date on a par with the equally rare 1851 date as extremely difficult to find in any Mint State grade. This is a wonderful example, with remarkably smooth surfaces and prooflike flash around the devices. Light, attractive toning covers both sides of the coin in a colorful mix of golden-orange, lilac, sky-blue and lime-green with a silver-gray base. Generous amounts of soft luster and a bold strike add life to the pleasing surfaces. Only a few light abrasions on the reverse keep this rare Seated half from an even higher grade. Population: 3 in 62, 17 finer (1/14). NGC ID# 24HG, PCGS# 6264

**1851 Seated Half, MS61  
Overlooked Key Date**

**3500 1851 MS61 PCGS. WB-101, R.6.** With one of the lower mintages of the long Liberty Seated half dollar series, the 1851 Philadelphia issue seldom gets its due. Just 200,750 pieces were produced and remarkably few are graded in Mint State by either service, and it is scarce in lesser grades as well. Wiley-Bugert assigned a rarity of R-6 in their 1991 book, and although that was a while ago the population numbers today appear to support the assessment. In recent years, collectors have warmed up to the early 1850s dates in the series but have focused on mintmarked issues. The 1851 half remains overlooked. This example is brilliant-white and frosted with brightly lustrous surfaces. The virtually unabraded, fully struck surfaces are suggestive of a higher grade. Population: 1 in 61, 26 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24HJ, PCGS# 6266

**3501 1853 Arrows and Rays AU58 NGC. CAC.** Olive-gold and blue-gray shadings mingle on this Arrows and Rays half dollar that represents a one-year-only design type. Softly struck, particularly on Liberty's head, but with little actual wear. NGC ID# 24JJ, PCGS# 6275

**3502 1855-O Arrows MS63 PCGS Secure. CAC.** A delightful Select representative of the short-lived Arrows design, this coin exhibits well-detailed design elements and vibrant mint luster under shades of greenish-gold and cerulean-blue toning. Population: 54 in 63, 97 finer (1/14). NGC ID# 24JP, PCGS# 6283

**3503 1857 MS64 PCGS.** Green-gold and light blue-gray overtones enhance the eye appeal of this subtly frosted near-Gem. Well-struck overall, if a trifle soft on the lowest star to Liberty's right. Population: 19 in 64, 7 finer (1/14). NGC ID# 24HS, PCGS# 6290

**3504 1858-S AU58 NGC. WB-101, Die Pair 14.** This 1858-S half dollar is an important opportunity for the date collector. Examples of this issue in higher-circulated grades do not appear on the market with even remote frequency. This example is lustrous and attractive with pale grayish-brown toning over silver luster and a sharp strike. The WB-101 variety has a large S mintmark and uses a transitional reverse die that also makes an appearance on the following year's 1859-S Seated half. Census: 8 in 58, 13 finer (1/14). NGC ID# 24HX, PCGS# 6295

**3505 1859-O MS63 PCGS. CAC.** The 1859-O Seated Liberty half dollar was produced in large numbers, but few high-quality examples were saved by contemporary collectors. This attractive Select specimen exhibits well-detailed design elements and vibrant mint luster, under shades of golden-brown and cerulean-blue toning. Population: 19 in 63, 22 finer (1/14). NGC ID# 24HZ, PCGS# 6297

**3506 1860-S AU58 PCGS. WB-102, Die Pair 2.** Medium S. Rich, silver-gray toning mingles with bright silver luster on both sides of this unmarked and appealing San Francisco Seated half. The strike is bold except on star 8. It is nearly a "No Drapery" example, though a single strand is present beneath the elbow. Population: 12 in 58, 26 finer (1/12). NGC ID# 24J6, PCGS# 6301

**3507 1861-O Bisected Date MS62 PCGS. WB-103. Die Pair 13.** Seated half specialist Randy Wiley researched this important New Orleans issue and determined that W-13 was struck by the Confederacy. A lustrous butter-gold representative with a good strike and no singularly evident abrasions. Both sides are faintly hairlined. PCGS# 572147

**3508 1864-S AU58 NGC. WB-102, Die Pair 2.** Listed as an R.4 variety, this WB-102 example features a small, wide "perfect" S mintmark and is the result of a single WB-2 die pair for the variety. Subtle lilac toning accents the mostly brilliant, frosty-silver surfaces. A few small rim disturbances and some porosity around the date limit the grade. Flashy luster complements the razor-sharp devices. This is a nice example of a conditionally scarce issue with excellent eye appeal. Census: 14 in 58, 15 finer (1/14). NGC ID# 24JE, PCGS# 6312

**3509 1865-S XF45 PCGS. WB-103, Die Pair 7, R.5.** No less than five dramatic cuds are seen on the reverse of this interesting WB-103 variety with a small, thin S mintmark. The WB-7 die pairing approaches a near-terminal state of the reverse die, displaying multiple, severe die breaks that have evolved into cuds. This attractive, silver-gray Seated half is a scarce date in its own right and an R.5 rarity in this state of the dies. Virtually unabraded surfaces and a strong strike allow a clear view of the advanced die state. NGC ID# 24JG, PCGS# 6314

**3510 1867-S MS61 NGC. WB-102, Die Pair 9, R.4.** The Bill Bugert plate coin, pictured in Volume I of *A Register of Liberty Seated Half Dollar Varieties*. From the Dick Osburn Collection. This brilliant Seated half shows just a tinge of golden-gray tone at the margins with undisturbed luster and virtually abrasion-free surfaces. The strike is bold on all of the devices. It is the WB-102 variety with doubling on the reverse, particularly evident on the motto. The die pairing is WB-9, rated R.4 for rarity. This 1867-S half is scarce this fine with attractive, frost-white appeal suggestive of a higher grade. Census: 8 in 61, 16 finer (1/14). NGC ID# 24JU, PCGS# 6322

**3511 1870 MS63 ANACS. WB-101.** The 1870 is curiously unavailable in MS63 and better grades in spite of a substantial mintage. This brilliant example has slightly subdued, satiny mint luster. Sharply struck throughout. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24JZ, PCGS# 6327

**3512 1871-CC VF25 NGC.** Medium-gray interiors with a deepening toward steel-blue at the margins. This midrange second-year Carson City half dollar is lightly abraded but still pleasing. Census: 6 in 25, 26 finer (1/14). NGC ID# 24K5, PCGS# 6331

**1871-CC Seated Half, XF45  
Scarce Carson City Issue**

**3513 1871-CC XF45 NGC. WB-101, Die Pair 7, R.4.** A well-detailed example of this scarce Carson City date, bright and untoned except for a touch of gold that remains at the reverse legend. Normal marks and abrasions exist on the surfaces, with light wear from circulation at the high points. Always in demand from Seated half specialists and Carson City collectors. Census: 4 in 45, 7 finer (1/14). NGC ID# 24K5, PCGS# 6331

**1871-CC Half Dollar, AU Details  
Repunched Date Die Pairing**

- 3514 1871-CC — Improperly Cleaned — NGC Details. AU. WB-102, Die Pair 4, R.4.** The repunching on the date is very faint, only visible with strong magnification just below the top of the 7 and the flag on the final 1 in the date. Only 153,950 coins were struck of this issue from seven die marriages, suggesting an average of 22,000 coins per die pair. This is a well-detailed example that shows no mentionable marks. Each side is covered by streaks of gray and blue toning with underlying brightness from light cleaning. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24K5, PCGS# 6331

- 3515 1873 Closed 3, No Arrows MS63 PCGS.** Frosty silver overall with a few hints of reddish-gold near the rims. This pre-weight-adjustment half dollar is frosty with strong all-around eye appeal. Population: 11 in 63, 12 finer (1/14). NGC ID# 24KA, PCGS# 6336

**1873 Arrows Half, MS64  
Distinctively Toned**

- 3516 1873 Arrows MS64 PCGS. CAC.** Light gray, rose, gold, and green toning embraces each side of this With Arrows near-Gem half dollar. Luster is predominantly frosty, though a few reflective glimmers appear in protected areas of the design. A great type coin. Population: 33 in 64 (2 in 64+), 14 finer (1/14). NGC ID# 24L7, PCGS# 6343

- 3517 1873-CC Arrows — Cleaned — ANACS. AU50 Details.** Large CC. This Carson City Arrows type coin exhibits noticeable luster, though the slate-gray surfaces are subdued. Neither side has any detracting abrasions. A majority of survivors are in Very Fine or lower grades. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24L8, PCGS# 6344

- 3518 1874-S Arrows AU58 PCGS. WB-101, Die Pair 1.** Bright, silver-gray surfaces reveal good remaining luster. The design elements are sharply struck, and both sides appear to be free of mentionable abrasions. A nice example of the small, wide-S mintmark variety. Population: 7 in 58, 27 finer (1/14). NGC ID# 24LC, PCGS# 6348

- 3519 1875 MS64 PCGS. CAC.** The 1875 Seated Liberty half dollar is a scarce issue in MS64 condition. This well-detailed Choice example displays prooflike reflectivity in sheltered areas, with a blanket of vivid greenish-gold, blue, and gray patina on both sides. Population: 40 in 64, 18 finer (1/14). NGC ID# 24KD, PCGS# 6349

- 3520 1875-S VF35 PCGS. WB-105, Die Pair 19, R.5.** Micro S. One of the noteworthy varieties in the Seated half series, this is the 1875-S Micro-S variety WB-105 (die pairing WB-19). It is listed as an R.5 rarity with 31 to 75 examples thought to exist. The actual number of survivors may be at the lower end of this range. Most are in low grades and the variety is unknown in Uncirculated condition, making this nice VF35 coin a suitable candidate for any collection. Pleasing, old-silver toning covers unabraded surfaces. The coin displays sharp detail for the assigned grade and smooth, original surfaces. A prize for the Seated half specialist. NGC ID# 24KE, PCGS# 6351

- 3521 1875-S MS64 PCGS. WB-101, Die Pair 18, MPD-001.** A thin veneer of light gold color visits lustrous surfaces, and the design elements are well brought up on this pleasing near-Gem. Fine peripheral die cracks are noted on each side of the coin. This is the WB-101 “very small S mintmark” variety paired with the blundered date obverse, with an errant 1 protruding from the rock above the date. Population: 71 in 64, 72 finer (1/14). NGC ID# 24KE, PCGS# 6351

- 3522 1876-S MS62 PCGS. WB-101, Die Pair 5.** Micro S. Mostly prooflike fields and frosted devices display untuned, brilliant-silver appeal for this fully struck Seated half. This is the WB-101 micro-mintmark variety, struck from tail hub variety 1 with an open bud below the olive branch. It is the WB-5 die pairing, described by Randy Wiley and Bill Bugert as an R.4 die pair. The coin is attractive, frosted-white, and exceptionally sharp. Population: 37 in 62, 93 finer (1/14). NGC ID# 24KJ, PCGS# 6354

- 3523 1877-CC MS62 NGC.** Type Two Reverse. Medium CC. Dusky shades of sea-green and amber toning visit the surfaces of this attractive MS62 example, with sharply detailed design elements and frosty mint luster underneath. No large or distracting contact marks are evident. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24KL, PCGS# 6356

- 3524 1877-S MS64 NGC. WB-104, Die Pair 22.** This fully struck, highly reflective Seated half has prooflike surfaces that display reddish-orange toning with lavender and purple accents. It uses the Type 2 reverse hub, with a closed bud beneath the olive branch (the Type 1 hub shows an open bud). This is a sharp and colorfully toned example of the “very small mintmark” variety, one of a whopping 38 die marriages for the date (and still counting). NGC ID# 24KM, PCGS# 6357

- 3525 1877-S MS64 PCGS.** The 1877-S Seated Liberty half dollar is seldom encountered in MS64 condition. This sharply detailed Choice specimen displays vibrant mint luster under attractive shades of cobalt-blue and golden-brown patina. Population: 76 in 64 (1 in 64+), 49 finer (1/14). NGC ID# 24KM, PCGS# 6357

- 3526 1877-S MS64 PCGS. CAC.** Shades of bluish-gray, greenish-gold, and amber patina blanket the lightly marked surfaces of this well-detailed Choice example. Prooflike reflectivity is evident in sheltered areas. Population: 76 in 64 (1 in 64+), 49 finer (1/14). NGC ID# 24KM, PCGS# 6357

- 3527 1878-CC VG10 PCGS.** Upon the advent of the Morgan dollar, Carson City coinage of other silver denominations came to an abrupt halt. The 1878-CC half dollar has a mintage of only 62,000 pieces. This steel-gray example displays partial drapery and plumage detail. A thin mark is noted near Liberty’s left (facing) arm. Encapsulated in a green label holder. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24KP, PCGS# 6359

- 3528 1881 MS63 Prooflike NGC.** From a low business-strike mintage of 10,000 pieces, this well-detailed Select specimen offers deeply reflective brilliant surfaces with few signs of contact. Census: 9 in 63 Prooflike, 47 finer (1/14). PCGS# 86363

**3529 1884 MS62 PCGS.** Only 4,400 business-strike Seated Liberty half dollars were struck at the Philadelphia Mint in 1884. This well-detailed MS62 example displays lustrous brilliant centers that yield to vivid greenish-gold and violet at the peripheries. Population: 9 in 62, 92 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24KX, PCGS# 6366*

**3530 1884 MS62 PCGS.** Golden-gray toning visits this semiprooflike and lightly abraded representative. Due to ongoing large-scale silver dollar coinage, just 4,400 business half dollars were issued in 1884. Certified in a green label holder. NGC ID# 24KX, PCGS# 6366

## PROOF SEATED HALF DOLLARS

**3531 1861 PR63 PCGS.** Blue-violet through the centers with green-gold peripheral elements. A dusky yet intriguing Select proof that blazes with luster at certain angles to the light. NGC ID# 27TL, PCGS# 6415

**3532 1862 PR63 NGC.** This Civil War-era Select proof has clear obverse contrast, though the reverse has less of a cameo effect. Blue-violet outer toning on each side yields to silver around Liberty's form and peach at the eagle. NGC ID# 27TN, PCGS# 6416

### 1863 Seated Liberty Half, PR64 Bright, Richly Toned Example

**3533 1863 PR64 PCGS.** Only 460 proof Seated Liberty half dollars were minted in 1863. This spectacular Choice specimen is richly toned golden-brown and electric-blue on the obverse with violet-gray and dark green hues on the reverse. The design elements are sharply detailed and the fields are reflective under the toning. Population: 40 in 64, 21 finer (1/14). NGC ID# 27TP, PCGS# 6417

**3534 1870 PR63 PCGS.** A generous mintage of 1,000 proof Seated Liberty half dollars was accomplished in 1870. This sharply detailed Select example is darkly toned in shades of blue, gray, and pale gold, with deeply reflective fields under the patina. Population: 48 in 63, 73 finer (1/14). NGC ID# 27U5, PCGS# 6428

**3535 1871 PR64 NGC.** Blue-toned at the obverse margins and through most of the reverse, while the area on and around Liberty has a more apricot tone. Only a few small faults appear in the fields of this near-Gem proof. Census: 38 in 64 (1 in 64 ★), 30 finer (1/14). NGC ID# 27U6, PCGS# 6429

**3536 1872 PR64 NGC.** Gold-to-orange peripheral toning yields to pale pearl-gray at the centers. This near-Gem proof has crisp detail and mild contrast but also a handful of grade-defining hairlines. Census: 36 in 64, 25 finer (1/14). NGC ID# 27U7, PCGS# 6430

**3537 1877 PR63 PCGS.** Delicately toned gold and blue-green across gleaming surfaces. A modestly contrasted Select proof with light hairlines through the fields. Population: 44 in 63, 37 finer (1/14). NGC ID# 27UC, PCGS# 6438

**3538 1879 PR63 PCGS.** Rich blue-to-violet at the rims with extensive peach coverage along the interiors. Though lightly hairlined, this Select proof has great arm's-length eye appeal. NGC ID# 27UE, PCGS# 6440

### 1879 Half Dollar, PR65 Deeply Toned and Sharply Struck

**3539 1879 PR65 PCGS.** Deep russet patination at the obverse border highlights the lighter-colored center, while cobalt-blue rims on the reverse cede to varying shades of crimson in the central area. The design elements are sharply struck throughout, and neither side reveals mentionable marks. Population: 27 in 65 (2 in 65+), 14 finer (1/14). NGC ID# 27UE, PCGS# 6440

### 1879 Seated Half Dollar, PR65 Attractive Multicolor Toning

**3540 1879 PR65 PCGS.** From a generous proof mintage of 1,100 pieces, this spectacular Gem displays well-detailed design elements and deeply reflective surfaces under shades of cerulean-blue and greenish-gold toning. No mentionable distractions are evident and eye appeal is outstanding. Population: 27 in 65 (2 in 65+), 14 finer (1/14). NGC ID# 27UE, PCGS# 6440

**3541 1881 PR63 NGC.** Type One Reverse. This flashy Select proof has moderately frosted devices, though NGC has chosen not to award it a Cameo designation. Color in the fields ranges from gold-gray to blue. NGC ID# 27UG, PCGS# 6442

**3542 1882 PR64 PCGS.** The fields are deeply mirrored on each side and shine brightly through the concentric rings of deep toning. The strike details show pinpoint definition throughout. Always popular as a low total mintage date. Population: 90 in 64 (2 in 64+), 50 finer (1/14). NGC ID# 27UH, PCGS# 6443

**3543 1887 PR62 Cameo PCGS.** Faintly glimmering golden peripheral accents yield to bright silver on the interiors. Hairlines beside the well-frosted devices account for the grade. Population: 8 in 62 Cameo, 43 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 86448*

**1889 Seated Half, PR65**  
**Exceptional Toning on Each Side**

- 3544 1889 PR65 PCGS. CAC.** Only 711 proofs were struck of this scarce, low total-mintage half dollar. This is a wondrously beautiful coin. The center has an off-center oval of brilliance that is surrounded by violet and cobalt-blue. The reverse displays lighter and more diverse shades. In spite of the significant toning, the fields are brightly reflective. Population: 12 in 65, 15 finer (1/14). NGC ID# 27UR, PCGS# 6450

**1890 Seated Liberty Half Dollar, PR65 Cameo**  
**Only 590 Pieces Struck**

- 3545 1890 PR65 Cameo NGC.** Only 590 Seated Liberty half dollars were struck in proof format in 1890. This delightful Gem exhibits sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. A few hints of green and blue toning visit the peripheries. Census: 9 in 65 Cameo, 17 finer (1/14). PCGS# 86451
- 3546 1891 PR64 NGC.** Delicate gold and rose tints visit the centers of this final-year proof Seated half while the right sides show crescents of sapphire-blue. A lightly hairlined but still-appealing near-Gem proof. NGC ID# 27UT, PCGS# 6452

**BARBER HALF DOLLARS**

- 3547 1892 MS64 PCGS. CAC.** A solidly struck example of this first-year Barber half, minimally toned with pleasing luster. Well-preserved for the grade, particularly in the portrait area. Ex: ANA Signature (Heritage, 3/2010), lot 1025. NGC ID# 24LF, PCGS# 6461

**1892 Barber Half, MS65**  
**First-Year Issue, Richly Toned**

- 3548 1892 MS65 PCGS.** The mintage for Philadelphia half dollars was recorded as 934,000 pieces in 1892, and many were saved as the first of their kind. Although the Barber design was reluctantly welcomed, it had been 53 years since the last major design change. This example has glowing luster beneath a light-gray patina with russet accents along the borders. Toning on the reverse is a lively mix of orange, olive-green, and golden-gray. The design elements come sharply struck, with a touch of minor softness in the upper right (facing) corner of the shield. Only a few tiny marks are scattered on the surfaces, but in no way detract from this Gem half dollar's overall eye appeal and quality. NGC ID# 24LF, PCGS# 6461
- 3549 1892-O AU53 PCGS.** From a low first-year mintage of 390,000 pieces, this attractive Barber half offers lightly abraded lustrous surfaces under shades of greenish-gold and lavender toning. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24LG, PCGS# 6462
- 3550 1892-O MS63 PCGS. CAC.** Apricot, peach, and lavender over most of each side with glimpses of frosty silver on parts of the obverse. This Select example is well-struck overall with only trifling softness on the eagle's talons. Population: 31 in 63, 65 finer (1/14). NGC ID# 24LG, PCGS# 6462
- 3551 1894-O MS64 PCGS. CAC.** This impressive Choice example exhibits well-detailed design elements and pleasing lavender-gray toning, with satiny mint luster underneath. Population: 56 in 64, 14 finer (1/14). NGC ID# 24LP, PCGS# 6469
- 3552 1895 MS63 PCGS.** Shades of lavender-gray, golden-brown, and amber toning visit the lightly marked surfaces of this well-detailed Select Barber half dollar. Population: 34 in 63, 63 finer (1/14). NGC ID# 24LS, PCGS# 6471
- 3553 1895-O MS62 PCGS.** Light straw-gold and pearl-gray toning visits this satiny and minimally abraded New Orleans half dollar. The strike is above average though slightly incomplete. Scarce in Uncirculated grades, and certified in an old green label holder. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24LT, PCGS# 6472
- 3554 1895-S MS62 PCGS.** This impressive Barber half displays well-detailed design elements and satiny mint luster under shades of greenish-gold and lavender-gray toning. Population: 27 in 62, 77 finer (1/14). From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24LU, PCGS# 6473

---

**1901-O Barber Half, Brilliant MS62**

**3555 1901-O MS62 PCGS.** A remarkable example of the scarce 1901-O Barber half dollar with exceptional satiny luster and brilliant silver-white surfaces. The limited grade is based on a few faint slide marks and abrasions, in addition to strike weakness over the center of the reverse. Population: 7 in 62, 24 finer (1/14).  
*Ex: Central States Signature (Heritage, 4/2008), lot 1232. NGC ID# 24MD, PCGS# 6490*

**3556 1902 MS63 NGC.** Rich blue, plum, and peach toning overall with the reverse a touch lighter. Attractive and well-defined, even on often-weak spots such as the eagle's talons. NGC ID# 24MF, PCGS# 6492

---

**1902 Barber Half, MS65  
Challenging in This Grade**

**3557 1902 MS65 PCGS.** A plentiful issue in lesser grades with nearly 5 million pieces produced, the 1902 Philadelphia issue is conditionally rare in MS65 or finer. At first, this seems like an anomaly since the issue isn't on anyone's rarity list. In fact, the issue is considered common. A quick check reveals the 1902 half is often weakly struck at the upper-right shield and adjacent wing, and the eagle's left (facing) leg and tail feathers. The present example is an exception. The shield is bold (yet not quite full) but the leg and tail feathers are complete. Elsewhere, the strike is full. Few abrasions of any kind are seen on the coin and soft luster enhances lilac and silver-gray surfaces. A touch of reddish-gold toning surrounds the rims. Rare in this condition. Population: 16 in 65, 6 finer (1/14). NGC ID# 24MF, PCGS# 6492

**3558 1903 AU58 PCGS. CAC.** Gold-to-gray overall with a reddish streak tucked under the back of Liberty's hair. Modestly worn but still luminous, a pleasing near-Gem. Population: 18 in 58, 81 finer (1/14). NGC ID# 24MJ, PCGS# 6495

---

**1903 Barber Half Dollar, MS64+  
Lightly Toned With Satiny Luster**

**3559 1903 MS64+ NGC.** The 1903 Barber half dollar claims a substantial mintage of nearly 2.3 million pieces, but few high-quality examples were saved by contemporary collectors. This high-end Choice specimen is well-detailed and lustrous, with hints of greenish-gold and cerulean-blue toning. Census: 13 in 64 (4 in 64+), 6 finer (1/14). NGC ID# 24MJ, PCGS# 6495

**3560 1909 MS65 PCGS.** The obverse offers strong gold-orange and blue patina, while the reverse remains near-silver. The detail on the eagle's talons is uncommonly strong. Population: 56 in 65, 13 finer (1/14). NGC ID# 24N8, PCGS# 6516

---

**1910 Barber Half Dollar, MS65  
Only Five Numerically Finer Coins at PCGS**

**3561 1910 MS65 PCGS.** This brilliant, untoned Gem is a scarce and pleasing example of this elusive, low-mintage date. Only 418,000 pieces were produced and apparently the survival rate is low, especially in this state of preservation. Sharply detailed and lustrous, this example displays surfaces that are brilliant-white, frosted, and exceedingly smooth. Only tiny abrasions exist on the coin — none that are significant in any way. The luster is outstanding. Population: 23 in 65 (1 in 65+), 5 finer (1/14). NGC ID# 24NB, PCGS# 6519

**3562 1911-D MS65 NGC.** The highly lustrous surfaces of this D-mint Gem half dollar are visited by dapples of russet and electric-blue at the margins, and a well directed strike leaves strong definition on the design elements, save for minor softness in the upper right corner of the shield. A couple of grade-consistent marks are noted on the cheek. Census: 16 in 65 (1 in 65+), 7 finer (1/14). NGC ID# 24NE, PCGS# 6522

**3563 1913 MS62 PCGS.** The Philadelphia Mint struck only 188,000 business-strike Barber half dollars in 1913. This attractive MS62 example displays well-detailed design elements and lustrous surfaces with hints of pale gold, gray, and amber toning. Population: 12 in 62, 67 finer (1/14). NGC ID# 24NK, PCGS# 6527

**3564 1915-D MS62 PCGS.** A frosty late-date Denver Barber half with primarily pale silver luster and hints of reddish-tan near the rims. Striking softness appears on the center-right zones of the eagle. NGC ID# 24NS, PCGS# 6533

**3565 1915-D MS64 NGC.** The 1915-D Barber half dollar is very scarce in grades above the MS64 level. This brightly lustrous Choice example offers well-detailed design elements and lightly marked brilliant surfaces. NGC ID# 24NS, PCGS# 6533

- 3566 1915-S MS64 PCGS.** Each side displays a near-brilliant interior with light golden toning around the margins. Well, but not fully struck, with minimal abrasions present. Final year of issue and always popular as such.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24NT, PCGS# 6534*

**1915-S Barber Half, MS65**  
**Excellent for Date and Type Collectors**

- 3567 1915-S MS65 PCGS. CAC.** The mintmarked 1915-D and 1915-S Barber half issues seem to have been saved in ample quantities as the last of their series (the 1915 Philadelphia is a low-mintage rarity). This Gem 1915-S is frosty silver-white, accented with sprinkles of golden-gray toning near the rims and a sharp strike. A great-looking type coin, and scarce in MS65 condition. Population: 43 in 65, 9 finer (1/14). NGC ID# 24NT, PCGS# 6534

**PROOF BARBER HALF DOLLARS**

- 3568 1892 PR63 Cameo PCGS.** Faint glimmers of peripheral gold-gray yield to well-contrasted centers. Lightly hairlined but still broadly pleasing. Population: 15 in 63 Cameo, 68 finer (1/14). PCGS# 86539
- 3569 1895 PR63 PCGS.** A sharply detailed Select Barber half from a nominal proof mintage of 880 pieces, this coin displays vivid shades of greenish-gold and cerulean-blue toning. The reflective fields show a few minor hairlines and contact marks. NGC ID# 24NX, PCGS# 6542
- 3570 1896 PR64 NGC.** A small mintage of 762 proof Barber half dollars was achieved in 1896. This sharply detailed Choice specimen offers well-preserved reflective surfaces under shades of greenish-gold and lavender toning. Census: 62 in 64, 84 finer (1/14). NGC ID# 24NY, PCGS# 6543
- 3571 1906 PR63 PCGS.** Dusky shades of slate-gray and greenish-gold toning blanket the surfaces of this Select Barber half dollar, with reflective fields and well-detailed design elements underneath. From a small proof mintage of 675 pieces. NGC ID# 24PA, PCGS# 6553
- 3572 1906 PR64 NGC.** The luminous surfaces of this sharply detailed near-Gem proof display just a few wisps of gold-orange color at the margins. Fine hairlines are visible on Liberty's portrait. NGC ID# 24PA, PCGS# 6553

**EARLY DOLLARS**

- 3573 1795 Flowing Hair, Three Leaves — Obverse Repaired — NGC Details. Fine. B-5, BB-27, R.1.** A small X test mark on the left obverse field is accompanied by a cluster of small, dull abrasions. This lightly toned ice-blue and wheat-gold Flowing Hair type coin is otherwise minimally abraded except for faint hairlines.  
*Ex: Milwaukee Central States Signature (Heritage, 4/2010), lot 977. NGC ID# 24WZ, PCGS# 6852*

**1795 Flowing Hair Dollar, VF Details**  
**Popular B-5, BB-27 Variety**

- 3574 1795 Flowing Hair, Three Leaves — Obverse Scratched — NGC Details. VF. B-5, BB-27, R.1.** Bowers-Borckardt Die State III. The BB-27 variety is easily identified by the "bar" in the obverse field, near the top curl. This popular type coin retains some detail in the central hair tresses and the peripheral devices remain bold. A number of shallow scratches below the bust and some small digs in the right obverse field constitute the noted damage.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24WZ, PCGS# 6852*
- 3575 1795 Flowing Hair, Two Leaves — Plugged, Whizzed — NGC Details. VF. B-2, BB-20, R.3.** Plugged and smoothed near 12 o'clock with the ER in LIBERTY and the C in AMERICA carefully re-engraved. Whizzed throughout to help conceal the repair. Steel-gray centers are bounded by deeper tan-brown and sea-green borders. A collectible example of this briefly coined introductory crown-sized type.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24WZ, PCGS# 6853*
- 3576 1795 Flowing Hair, Two Leaves — Damaged — NGC Details. VF. B-2, BB-20, R.3.** This nicely defined cream-gray early dollar has scattered tiny marks and a few small rim nicks, the most noticeable above the E in STATES. Scarcer than B-1, the usually encountered Two Leaves variety. NGC ID# 24WZ, PCGS# 6853

**1795 Flowing Hair Dollar, VF Details**  
**B-1, BB-21**

- 3577 1795 Flowing Hair, Two Leaves — Harshly Cleaned — NGC Details. VF. B-1, BB-21, R.2.** A moderately worn example of this relatively accessible die pair, cleaned in the past but since retoned gold-gray with orange and green elements. Abrasions are generally minor on the obverse, though the reverse has a substantial planchet void of indeterminate origin curving below the second A in AMERICA.  
*Ex: Summer FUN Signature (Heritage, 7/2010), lot 3779.*

**1795 Flowing Hair Dollar, VF Details  
Silver Plug, B-7, BB-18**

- 3578 1795 Flowing Hair, Three Leaves, Silver Plug — Plugged — NGC Details. VF B-7, BB-18, R.3.** Bowers Die State I. A silver plug, as made, is visible at the centers of both sides. The silver plug was added prior to the strike to raise the flan weight to within standard. Later, an attempted puncture was made on the lower reverse, beneath the right ribbon end. The attempted puncture was subsequently plugged, and dentils were crudely strengthened on the reverse between 3:30 and 7 o'clock. The silver-gray surfaces are moderately glossy. Marks are relatively minor though we note an obverse rim ding at 5:30. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 6854*

- 3579 1795 Draped Bust, Centered VG8 NGC. B-15, BB-52, R.2.** Bowers Die State III. Light powder-blue and straw-gold toning visits this first-year Draped Bust type coin. No marks merit mention and all legends are crisp. Unlike on B-14, the die engraver correctly entered the punch for the bust device into the obverse die. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24X2, PCGS# 6858*

**1795 Draped Bust Dollar, Centered Portrait  
B-15, BB-52, VF Sharpness**

- 3580 1795 Draped Bust, Centered — Improperly Cleaned — NGC Details. VF B-15, BB-52, R.2.** Both sides show hairlines and luminosity, a mix left behind by a past cleaning, though the non-device areas have retoned from silver-gray to golden-tan on the interior with deep green-gray at the borders. Lightly abraded with wispy slide marks noted on the bust. Overall, an attractive coin despite its impairment. *Ex: Summer FUN Signature (Heritage, 7/2010), lot 3783.*

**1795 Draped Bust Dollar, VF30  
Centered Bust, B-15, BB-52 Variety**

- 3581 1795 Draped Bust, Centered VF30 ANACS. B-15, BB-52.** Only two varieties of the 1795 silver dollar feature the Draped Bust obverse. This coin represents the BB-52 variety, with the bust properly centered. Uneven, multihued toning appears on both sides of this moderately worn dollar. Housed in an early generation ANACS holder. NGC ID# 24X2, PCGS# 6858

- 3582 1795 Draped Bust, Off Center VG8 NGC. B-14, BB-51, R.2.** Steel-gray motifs are accompanied by aquamarine and golden-brown fields. The glossy surfaces are lightly abraded aside from a small reverse rim nick at 5 o'clock. The first Draped Bust variety, yet collectible in the present grade. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 96858*

- 3583 1795 Draped Bust, Off Center — Obverse Damage — NGC Details. VF B-14, BB-51, R.2.** Bowers Die State I. Five small obverse digs include one nestled within the lower loop of the B in LIBERTY. A couple of short scratches are noted near star 5. The reverse is smooth save for thin marks beneath the right (facing) wing. Stone-gray high points contrast with powder-blue and olive-green fields. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 96858*

**1795 Draped Bust Dollar, B-14, BB-51  
Off-Center Bust, XF Details**

- 3584 1795 Draped Bust, Off Center — Obverse Graffiti — NGC Details. Extra Fine. B-14, BB-51, R.2.** Obverse graffiti is noted on the NGC holder, referring to an "X" lightly inscribed in the right field opposite Liberty's neck. A narrow, half-moon punch mark — not noted on the holder — exists beneath the bow on the reverse. Gunmetal gray toning covers smooth surfaces of this early dollar. Nice detail remains on the eagle's breast feathers and Liberty's hair strands show only light wear. A few Mint-caused adjustment marks are seen at the lower rim and near the eagle's talons. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**1795 Off Center Draped Bust Dollar  
B-14, BB-51, AU Details**

- 3585** 1795 Draped Bust, Off Center — Improperly Cleaned — NGC Details. AU. B-14, BB-51, R.2. Excellent design detail for this die pair, which has its own variety in the *Guide Book*. Lightly rubbed surfaces have mostly retoned in apricot, peach, and sage, though hairlines from the coin's past cleaning remain visible behind Liberty's head and elsewhere on close inspection.

Ex: Central States Signature (Heritage, 4-5/2010), lot 989.

**1796 B-4, BB-61 Dollar, VF Details  
Large Letters, Small Date**

- 3586** 1796 Small Date, Large Letters — Improperly Cleaned — NGC Details. VF. B-4, BB-61, R.3. Bowers Die State I. Both sides are predominantly gray, but the obverse has rose-red tints while the reverse exhibits powder-blue undertones. This Small Eagle collector coin displays ample design detail and lacks any mentionable abrasions. Though designated as cleaned by NGC, the surfaces are only mildly glossy.

From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 6860

- 3587** 1796 Large Date, Small Letters — Graffiti — NGC Details. Fine. B-5, BB-65, R.2. Bowers Die State IV. A late die state with a large break between the IC in AMERICA. A stone-gray example with traces of lime-green lacquer on the reverse. The reverse has a pair of deep thin marks. The obverse center displays three intersecting light pinscratches. A rim ding is noted on the reverse at 2 o'clock. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 6861

**1797 Draped Bust Dollar, VF Details  
Small Eagle, B-3, BB-71 Variety**

- 3588** 1797 10x6 Stars, Large Letters — Rim Filing — NGC Details. VF. B-3, BB-71, R.2. Bowers-Borckardt Die State III. The BB-71 variety is easily recognized by the 10x6 obverse star arrangement. This moderately worn example retains a significant amount of interior detail on the major devices, but the left side of the drapery is worn smooth. The noted filing is most apparent on the reverse. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

- 3589** 1798 Large Eagle, Pointed 9 — Improperly Cleaned — NGC Details. VF. B-11, BB-111, R.3. Bowers Die State VI. A heavy obverse diagonal crack extends from 4:30 to the hair above the ear. Light wheat-gold toning visits this hairlined but sharply defined silver dollar. The central shield lines are delicately strengthened. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24X6, PCGS# 6873

**1798 Draped Bust Dollar, VF30  
Heraldic Eagle, B-13, BB-108**

- 3590** 1798 Large Eagle, Pointed 9, 10 Arrows VF30 NGC. B-13, BB-108, R.2. Bowers Die State II. The BB-108 variety is easily identified by a die flaw between the inside ray of star 13 and the bust. This pleasing VF30 example retains much of its interior design detail, but the left side of the drapery is worn smooth. The lightly abraded surfaces are blanketed in shades of gray and amber patina. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 6876

**1798 Wide Date Dollar, Choice VF  
Pointed 9, B-15, BB-112**

- 3591** 1798 Large Eagle, Pointed 9, Wide Date VF35 PCGS. B-15, BB-112, R.3. Bowers Die State III. A Heraldic Eagle type coin with caramel-gold fields and slate-gray motifs. Marks are minor aside from a small reverse rim ding at 5:30. The strike shows moderate incompleteness on the upper right reverse stars and the hair below the ear. PCGS# 6877

**3592** 1799/8 13 Stars Reverse Fine 12 NGC. B-2, BB-143, R.4. Bowers Die State II. The die crack at the D in UNITED distinguishes B-2 from the similar B-1. Deeply toned walnut-brown, dove-gray, and olive-green. Marks are minor though we note a single thin line from Liberty's neck to her ear. PCGS# 6884

**3593** 1799 Irregular Date, 13 Stars Reverse VF30 NGC. B-15, BB-152, R.3. Bowers Die State IV. The first 9 was entered as if the date would be curved, but the second 9 was entered in line with the first two digits. Deep golden-brown and steel-gray encompasses this midgrade early dollar. Smooth aside from several tiny marks on the shield. PCGS# 6880

#### 1799 Draped Bust Dollar, AU Details Scarce B-13, BB-151 Variety

**3594** 1799 Irregular Date, 13 Stars Reverse — Repaired — NGC Details. AU. B-13, BB-151, R.5. Bowers-Borckardt Die State II. This still-attractive early dollar represents the scarce “Irregular Date” variety, BB-151, easily identified by the die break over the E in STATES. The design elements retain most of their original detail, but the obverse fields show evidence of smoothing. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**3595** 1799 7x6 Stars VF20 PCGS. B-9, BB-166, R.1. Bowers Die State V. Tan-gold and cream-gray encompass this “Apostrophe” early dollar. The nickname derives from the die break after the second S in STATES. Well detailed for the VF20 grade. The reverse has four small visible marks, and the obverse has an unobtrusive rim flaw past 7 o'clock. NGC ID# 24X7, PCGS# 6878

**3596** 1799 7x6 Stars — Improperly Cleaned — NGC Details. VF. B-8, BB-165, R.3. Bowers Die State II. Slate-gray high points are accompanied by almond-gold fields and dusky powder-blue borders. Abrasions are inconsequential for the VF level. Minutely granular but nonetheless attractive. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24X7, PCGS# 6878

**3597** 1799 7x6 Stars VF30 PCGS. B-6, BB-162, R.4. Bowers Die State IV. A charming cream-gray representative of this scarcer Bolender variety, distinguished by a radial die crack on the reverse past 1 o'clock. Liberty's hair and the eagle's wings retain much definition. Void of noticeable marks. NGC ID# 24X7, PCGS# 6878

**3598** 1799 7x6 Stars VF30 ANACS. B-10, BB-163, R.2. Bowers Die State III. Powder-blue, stone-gray, and olive-green toning visits this pleasing Heraldic Eagle type coin. Glimmers of luster fill the shield and wings, and there are no relevant abrasions. A rim defect at 1 o'clock is of mint origin. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24X7, PCGS# 6878

**3599** 1799 7x6 Stars — Whizzed — ANACS. XF45 Details. B-21, BB-169, R.3. Bowers Die State II. Blended gunmetal-gray and olive-green toning encompasses this Heraldic Eagle type coin. Evenly whizzed throughout, but luster persists within the legends and Liberty's hair. A minor rim ding on the reverse at 1:30 but no other marks merit mention. *Ex: Palm Beach Signature (Heritage, 3/2006), lot 1624.* NGC ID# 24X7, PCGS# 6878

**3600** 1799 8x5 Stars — Whizzed — ANACS. AU Details, Net XF40. B-23, BB-159, R.3. Bowers Die State II. Though unobtrusively whizzed to enhance its luster, this richly detailed silver dollar exhibits significant eye appeal. Broad sea-green and lemon-gold borders encompass lightly toned centers. No marks are relevant aside from a light diagonal pincscratch on Liberty's neck. *Ex: Rocky Mountain Collection (Stack's, 11/2006), lot 443, which realized \$2,760.* PCGS# 6881

**3601** 1800 12 Arrows Fine 12 ANACS. B-17, BB-196, R.1. Bowers Die State IV. Iridescently toned electric-blue, jade-green, tan-gold, and slate-gray. The moderately bright surfaces are only lightly abraded for the grade. A mildly granular area is noted on the right (facing) wing. PCGS# 6890

**3602** 1800 12 Arrows Fine 15 PCGS. B-17, BB-196, R.1. Bowers Die State IV. Dove-gray toning is predominant, though the portrait high points are straw-gold. A charming and problem-free example of the popular *Guide Book* variety. It appears that the engraver simply miscounted the arrows. PCGS# 6890

**3603** 1800 12 Arrows VF25 NGC. B-17, BB-196, R.1. Bowers Die State IV. This Large Eagle type coin has stone-white high points and deeper cream-gray fields. Traces of russet patina congregate in design crevices. We note a trio of hair-thin marks on the shield and faint abrasions near the F in OF and the A in STATES. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* PCGS# 6890

**3604** 1803 Large 3 — Improperly Cleaned — NGC Details. VF. B-6, BB-255, R.2. Bowers Die State I. The fields are deep gunmetal-blue and contrast with the stone-gray high points. No marks merit individual description. A nicely defined but glossy Heraldic Eagle type coin. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* PCGS# 6901

## SEATED DOLLARS

**3605** 1841 AU50 PCGS. CAC. Medium butter-gold and blue-green enrich this well defined Seated dollar. Luster is prominent on the drapery, eagle, and legends. The fields display distributed marks. Certified in a first generation holder. NGC ID# 24YB, PCGS# 6927

**3606** 1841 AU53 NGC. Extensively toned blue-to-gray with elements of dusty rose. Both sides remain luminous despite modest wear. Rim bumps are noted at 4 o'clock on the obverse and 3 o'clock on the reverse. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24YB, PCGS# 6927

**3607** 1841 — Obverse Planchet Streak Removed — NGC Details. Unc. A well struck and satiny example. Mostly brilliant, though a blush of powder-blue fills much of the obverse border. A small rod-shaped planchet streak near 7:30 on the obverse is darkly toned, and accompanied by numerous faint pincatches. A cluster of wispy marks is noted over the ER in LIBERTY. Both sides are lightly hairlined. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24YB, PCGS# 6927

**3608** 1842 AU55 NGC. The 1842 Seated Liberty dollar claims a mintage of 184,618 pieces, but the issue is seldom encountered in high grade. This Choice AU specimen retains considerable amounts of original mint luster, under pleasing shades of lavender-gray and greenish-gold toning. NGC ID# 24YC, PCGS# 6928

**3609** 1843 AU53 PCGS. Still-luminous and distinctly toned. The obverse has dusky hues rooted in blue and gold-gray, while the reverse has a more yellow-orange and steel appearance. An intriguing example of an earlier Seated dollar issue. NGC ID# 24YD, PCGS# 6929

**3610** 1843 AU58 PCGS. A stone-white Borderline Uncirculated example of the scarce No Motto type. The strike is good and luster illuminates design elements. Typically abraded for the grade. Certified in a green label holder. Population: 43 in 58, 45 finer (1/14). NGC ID# 24YD, PCGS# 6929

- 3611 1843 MS61 PCGS.** An available date in lower circulated grades, the 1843 Seated Liberty dollar is rare in Mint State condition. This attractive MS61 example is lustrous and sharply detailed, with no large or distracting signs of contact. Population: 9 in 61, 33 finer (1/14). NGC ID# 24YD, PCGS# 6929
- 3612 1844 AU50 NGC.** Powder-blue and chestnut-gold grace this dusky and well defined example. Liberty's legs display faint slide marks. The obverse is die doubled, most evident on the shield and LIBERTY. A low mintage No Motto issue, yet collectible in better circulated grades.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24YE, PCGS# 6930*
- 3613 1844 — Improperly Cleaned — NGC Details. Unc.** Just 20,000 business strikes were issued, and examples can be identified by die doubling on LIBERTY and the shield lines. The reverse has heavy die lines on the central field near the eagle. A mildly glossy stone-gray dollar with a few scattered obverse abrasions.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24YE, PCGS# 6930*
- 3614 1844 — Improperly Cleaned — NGC Details. Unc.** The 1844 is a better date with a scant production of 20,000 pieces. As always for the issue, the obverse is die doubled, evident on the shield and LIBERTY. This stone-gray example is thickly hairlined but displays only slight wear. NGC ID# 24YE, PCGS# 6930
- 3615 1845 AU50 NGC.** From a low mintage of 24,500 pieces, this attractive AU specimen shows just a trace of wear on the well-detailed design elements. Traces of mint luster are evident under delicate shades of lavender and golden-brown toning, and some roller marks in the upper obverse field are the only flaws of note.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24YE, PCGS# 6931*
- 3616 1845 AU55 NGC.** The 1845 Seated Liberty dollar claims a low mintage of 24,500 pieces, making the issue very scarce in AU55 condition. This Choice AU specimen retains much of its original design detail and mint luster and the lightly abraded surfaces show hints of pale gold toning. Census: 37 in 55 (1 in 55 ★), 46 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24YE, PCGS# 6931*
- 3617 1846 AU58 NGC.** Light golden overtones across much of each side with touches of blue extending from parts of the rims. Well-defined at the centers, if a trifle soft on the obverse's surrounding stars. NGC ID# 24YG, PCGS# 6932
- 3618 1846 — Improperly Cleaned — NGC Details. Unc.** A crisply struck No Motto dollar with ample luster and only a trace of golden patina. Both sides display faint vertical hairlines.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*
- 3619 1847 AU53 PCGS.** Pleasing shades of sea-green and lavender-gray patina blanket the lightly abraded surfaces of this attractive AU53 Seated dollar. The design elements show just a touch of wear and original mint luster shines through the toning. NGC ID# 24YJ, PCGS# 6934
- 3620 1850 XF45 NGC.** Light silver cores yield to pale gold-gray and then orange and violet. Faintly luminous fields lend further eye appeal to this lightly worn Seated dollar. Census: 10 in 45, 85 finer (1/14). NGC ID# 24YM, PCGS# 6937
- 3621 1850-O VF35 NGC.** The 1850-O Seated Liberty dollar claims a low mintage of 40,000 pieces and few examples were saved by contemporary collectors. This Choice VF specimen retains much interior design detail, including a bold LIBERTY on the ribbon. Traces of mint luster cling to the design elements and the lightly abraded surfaces display a blend of slate-gray, blue-steel, and golden-brown toning.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24YN, PCGS# 6938*
- 3622 1850-O — Graffiti — NGC Details. AU.** Deep dove-gray and walnut-brown toning. The Roman numerals XII are pinscratched on the left obverse field. Abrasions are otherwise of little import, though we note a few thin light marks near the beak. The rarest New Orleans issue of the type. NGC ID# 24YN, PCGS# 6938

- 3623 1850-O — Harshly Cleaned — NGC Details. AU.** The 1850-O is the rarest and lowest mintage of the four New Orleans issues. The present golden-gray example is attractive to the unaided eye, though a lens reveals a uniform mattelike appearance. The field is smoothed near the O in OF.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*
- 3624 1850-O — Improperly Cleaned — NGC Details. AU.** The rarest of the four New Orleans issues of the series. A scant 40,000 pieces were issued. The present well defined example is toned gunmetal-gray and has glossy, moderately marked surfaces. NGC ID# 24YN, PCGS# 6938
- 3625 1857 — Improperly Cleaned — NGC Details. AU.** A lightly circulated representative of this challenging date. Luster shimmers across design elements but the fields display vertical hairlines. Faintly toned golden-gray. A mere 94,000 pieces were struck.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24YW, PCGS# 6945*
- 3626 1857 — Improperly Cleaned — NGC Details. Unc.** This low mintage silver dollar is mildly bright but is only delicately hairlined. Brilliant aside from a few freckles of russet patina east of the date. The strike is good except for softness on the obverse periphery between 10 and 4 o'clock. NGC ID# 24YW, PCGS# 6945
- 3627 1859-O AU55 NGC.** A surprisingly radiant O-mint Seated dollar with bright silver interiors. Delicate blue and gold-orange elements visit the rims. Scattered small abrasions contribute to the grade.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24YY, PCGS# 6947*

---

**1859-O Seated Liberty Dollar, MS62+  
Ideal Mintmark Type Coin**

- 3628 1859-O MS62+ PCGS Secure.** From a mintage of 360,000 pieces, the 1859-O Seated Liberty dollar is relatively available in grades up to the MS62 level, but Select specimens are scarce. This high-end MS62 example is a good balance of quality and value. The design elements are sharply detailed in most areas, but some of the star radials are a little weak. The lustrous surfaces show the expected number of minor contact marks for the grade. NGC ID# 24YY, PCGS# 6947
- 3629 1859-S VF35 NGC.** Deep blue-gray overall with sage elements on the worn high points. This attractive Choice VF coin has only a handful of shallow abrasions on the obverse.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24YZ, PCGS# 6948*
- 3630 1859-S — Improperly Cleaned — NGC Details. AU.** Traces of golden toning visit lightly hairlined slate surfaces. The left obverse field has a few thin marks. The only No Motto San Francisco issue. A meager 20,000 pieces were struck, and few if any were saved by collectors.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*
- 3631 1860-O AU50 PCGS.** The 1860-O Seated Liberty dollar enjoyed a substantial mintage of 515,000 pieces, making it an available date and a favorite choice of mintmark type collectors. This lightly circulated example displays attractive shades of electric-blue and greenish-gold toning with traces of mint luster underneath. NGC ID# 24Z3, PCGS# 6950

- 3632 1860-O MS62 PCGS.** Delicately frosted on the high points with little color variation from pale silver on the obverse, though light golden-brown elements visit the reverse. An amply lustrous antebellum Seated dollar with scattered abrasions but no hint of wear. NGC ID# 24Z3, PCGS# 6950
- 3633 1861 — Rim Damage — NGC Details. AU.** The obverse has moderate rim dings at 2 and 7 o'clock. The reverse has a minor ding at 11 o'clock and a filed ding at 3:30. Otherwise, this low mintage slate-gray Civil War silver dollar is only lightly abraded.
- 3634 1863 — Improperly Cleaned — NGC Details. AU.** This Civil War issue has a meager mintage of 27,200 pieces and is rare in all grades. The present stone-gray and almond-gold example is a bit bright from a wipe and exhibits the expected number of inconspicuous field abrasions. NGC ID# 24Z6, PCGS# 6953
- 3635 1864 — Improperly Cleaned — NGC Details. AU.** Glimpses of butter-gold adorn the margins of this momentarily circulated Seated dollar. Prooflike with moderate cameo contrast. The fields display parallel hairlines from a wipe long ago, and the obverse shows scattered minor contact. A low mintage Civil War date.
- 3636 1864 — Obverse Scratched — NGC Details. Unc.** A Civil War silver dollar seldom seen in Mint State, partly due to its low mintage of 30,700 pieces. The present example has golden-brown toning that moderately deepens on the reverse. Though designated as "Obv Scratched," the only noticeable scratch is a diagonal line on the reverse across the shield. NGC ID# 24Z7, PCGS# 6954
- 3637 1868 AU53 NGC.** Gold-tinged through the fields with a stronger tone at the reverse rim. Both sides remain semiprooflike despite light wear and long, wispy abrasions. Census: 9 in 53, 48 finer (1/14). NGC ID# 24ZB, PCGS# 6961
- 3638 1869 AU58 PCGS.** The 1869 has a fairly high mintage for a Seated dollar issue. However, most were exported, and better grade examples are very scarce. The present stone-white slider is well struck and displays delicate hairlines. Certified in an old green label holder. NGC ID# 24ZC, PCGS# 6962
- 3639 1870 AU53 PCGS.** A substantial mintage of 415,000 Seated Liberty dollars was accomplished at the Philadelphia Mint in 1870, but the issue is harder to locate in high grade than the mintage figures suggest. This attractive AU53 example offers lustrous lightly abraded surfaces and just a touch of wear on the devices. NGC ID# 24ZD, PCGS# 6963
- 3640 1870 AU53 NGC.** The obverse is pale gold-gray with a horizontal streak of blue-violet at the top of the gown and into the right field. The still-lustrous reverse has a pronounced patch of peach at the southwest. NGC ID# 24ZD, PCGS# 6963
- 3641 1870-CC — Improperly Cleaned — NGC Details. Fine. Variety 1-D.** Powder-blue, honey-gold, and cream-gray embrace this mildly glossy Carson City Seated dollar collector coin. Three and a half letters are visible in LIBERTY. The eagle's plumage is nicely defined. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24ZE, PCGS# 6964
- 3642 1870-CC — Improperly Cleaned — NGC Details. XF. Variety 3-C.** A well defined representative of the historic initial Carson City issue. The slate-gray and almond-gold surfaces display vertical hairlines. A mere 12,462 pieces were struck. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24ZE, PCGS# 6964
- 3643 1870-CC — Environmental Damage — NGC Details. XF. Variety 1-A.** Despite a reported mintage of just 12,462 pieces, three obverse dies and five reverse dies were used to strike the introductory Carson City issue. This medium to deep gray representative is richly detailed but noticeably granular. NGC ID# 24ZE, PCGS# 6964
- 3644 1870-CC — Reverse Graffiti — NGC Details. XF. Variety 2-E.** A trio of slender but fairly deep marks are noted between ONE and DOL. A moderately circulated example of the first Carson City issue. The glossy gray surfaces display caramel-gold and powder-blue undertones. NGC ID# 24ZE, PCGS# 6964
- 3645 1870-CC — Smoothed — PCGS Genuine. XF Details. Variety 3-C.** This introductory year Carson City dollar displays rich definition except on Liberty's hair. The cream-gray and almond-gold surfaces are microgranular. The left and right obverse field is smoothed. NGC ID# 24ZE, PCGS# 6964
- 3646 1871 AU53 NGC.** The 1871 Seated Liberty dollar is an available date in the series, always in demand as a type issue. This attractive AU53 example shows just a trace of wear on the strongly impressed design elements and the lightly abraded surfaces retain much of their original mint luster. NGC ID# 24ZG, PCGS# 6966
- 3647 1871 AU55 NGC.** With a mintage over 1 million pieces, the 1871 Seated Liberty dollar is a popular choice with type collectors. This lightly circulated example retains traces of mint luster under shades of sea-green and lavender-gray patina. NGC ID# 24ZG, PCGS# 6966
- 3648 1871 AU55 NGC.** From dusky peach to blue and violet, this Choice AU Seated dollar is a richly toned representative of its late date. Ample luster remains beneath the patina. NGC ID# 24ZG, PCGS# 6966

### 1872 Seated Dollar, Toned MS63 High-Mintage Type Coin Issue

- 3649 1872 MS63 NGC.** This dove-gray Select 1872 Seated dollar shows deeper charcoal accents around the devices amid frosty surfaces throughout both sides. The mintage of business strikes was abnormally large, at more than 1.1 million pieces. At the time they were struck, their melt value was \$1.03, but in ensuing years their face value exceeded their melt value, and they began to circulate in the years after the "Crime of '73" as silver prices continued to plummet. The average certified survivor is only Choice XF. Small marks and rather subdued luster account for the grade on this coin. NGC ID# 24ZJ, PCGS# 6968

- 3650 1872-S XF45 NGC.** The 1872-S is the last collectible San Francisco Seated dollar issue, as no examples of the 1873-S are known to numismatists. This Choice XF example has glimmers of reflectivity in the pale pearl-gray fields despite scattered abrasions and light wear. Census: 23 in 45, 48 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24ZL, PCGS# 6970

- 3651 1872-S — Brushed — NGC Details. AU.** Butter-gold outlines design elements, though this rare silver dollar is mostly pearl-gray. A loupe reveals parallel hairlines. The only collectible Motto S-mint issue. Nonetheless very scarce, since just 9,000 pieces were coined. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

## PROOF SEATED DOLLARS

- 3652 1861 PR58 NGC.** Minor cabinet friction visits the high points and contact marks are scattered through the gold-tinged fields. Even so, this proof, while impaired, retains considerable majesty. Census: 1 in 58, 88 finer (1/14). NGC ID# 252F, PCGS# 7004
- 3653 1866 Motto — Improperly Cleaned — NGC Details. AU.** This first-year proof Motto silver dollar has AU sharpness and displays patches of hairlines. Scattered small abrasions are commensurate with a brief appearance in 19th century commerce. NGC ID# 252M, PCGS# 7014

**1866 With Motto Seated Dollar, PR63  
Only 725 Pieces Struck**

**3654 1866 Motto PR63 NGC.** The 1866 proof Seated Liberty dollar boasts a low mintage of 725 pieces. This attractive Select specimen offers sharply detailed design elements and brightly reflective fields, under pleasing shades of pale jade toning. Only minor signs of contact are evident. Census: 40 in 63 (1 in 63+), 86 finer (1/14). NGC ID# 252M, PCGS# 7014

**3655 1872 PR58 PCGS.** From a proof mintage of 950 pieces, this lightly circulated Seated Liberty dollar displays sharply detailed design elements and deeply reflective surfaces with a scattering of minor contact marks. NGC ID# 252U, PCGS# 7020

**TRADE DOLLARS**

**3656 1874 MS62 PCGS.** No period after FINE. Iridescent plum-red, peach-gold, and cobalt-blue toning dominates this satiny and sharply struck Trade dollar. Refreshingly devoid of relevant marks, and very scarce in Uncirculated grades. NGC ID# 252Z, PCGS# 7034

**1874-CC Trade Dollar, MS62  
Scarce Issue in Mint Condition**

**3657 1874-CC MS62 NGC.** Tall CC, Period after FINE. The 1874-CC Trade dollar is seldom encountered in high grade because few examples were saved by contemporary collectors. This attractive MS62 specimen exhibits well-detailed design elements and lightly marked lustrous surfaces that show a few highlights of pink and gold toning. Census: 47 in 62 (1 in 62+), 44 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2532, PCGS# 7035

**3658 1875-CC Chop Mark AU58 PCGS.** Type One Reverse. An interesting incused punch near star 2 displays a retrograde 4. More conventional punches are near star 3, Liberty's waist, and beneath the eagle's right (facing) shoulder. Orange-gold toning visits the margins. PCGS# 87038

**3659 1875-CC MS61 NGC.** Type One Reverse. Sweeping cartwheel luster illuminates this lightly toned and nicely struck Carson City type coin. The smattering of small field marks is expected of the grade. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2535, PCGS# 7038

**3660 1875-S MS62 PCGS. CAC.** Type Two Reverse. Large S. Dusky cream-gray, sea-green, and tan-brown toning blankets this satiny, nicely struck, and minimally abraded silver type coin. Both sides display occasional parallel roller marks, as made. NGC ID# 2536, PCGS# 7039

**3661 1875-S MS63 PCGS.** Type One Reverse. Large S. Light golden patina graces this lustrous and carefully preserved Select Trade dollar. The strike is good although Liberty's hair and the right (facing) claw are incompletely impressed. NGC ID# 2536, PCGS# 7039

**3662 1875-S/CC AU55 NGC. FS-501.** Type One Reverse. Large S. A middle die state with a crack through AMERICA but no internal breaks. The silver-gray surfaces display partial luster but minor wear is evident on the drapery. Distributed small marks are consistent with the grade.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2537, PCGS# 7040

**1876 Trade Dollar, MS64  
Fully Struck, Nearly White**

**3663 1876 MS64 NGC.** Type One Obverse, Type Two Reverse. The usual subtype combination for the issue, though others are known. Light tan toning adorns this fully struck and lustrous Choice Centennial Trade dollar. Only minor marks are present, though a slender and mildly granular area is noted between star 3 and Liberty's branch. *Ex: Orlando FUN Signature (Heritage, 1/2012), lot 3858, which realized \$2,645.* NGC ID# 2539, PCGS# 7041

**1876 Trade Dollar, MS64  
Transitional Date for the Series**

**3664 1876 MS64 PCGS.** Type One Obverse, Type Two Reverse. A transitional variety of sorts. All Trade dollars from 1873 through 1875 have the Type One obverse, and all from 1877 to 1883 (or 1885) have the Type Two obverse. Only in 1876 do both obverse types appear. This piece is a delightful Choice Mint State example with sharp design details, satiny silver luster, and light golden toning. *Ex: Fort Worth Signature (Heritage, 3/2010), lot 1253, which realized \$2,760.* NGC ID# 2539, PCGS# 7041

**3665 1876-CC Doubled Die Reverse — Improperly Cleaned — NGC Details. Unc.** Type One Obverse and Reverse. Tall CC. The eagle's right wingtip is widely die doubled, as is the beak, branch, and various other design elements. This crisply struck example displays rose-gold and cobalt-blue peripheral patina. The obverse displays vertical hairlines.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* PCGS# 97042

**3666 1876-S MS62 PCGS.** Type One Obverse and Reverse. Large S. The fields appear moderately prooflike beneath a deep palette of orange-gold, powder-blue, and lilac-red shades. The strike is crisp and the only noticeable mark is beneath the eagle's beak. NGC ID# 253B, PCGS# 7043

- 3667 1877-S MS62 PCGS.** Large S. The obverse is mostly pearl-white despite a blush of autumn-gold near the center. The reverse is dusky silver-gray and chestnut-brown. Granularity is chiefly confined to the reverse border near 2 o'clock. NGC ID# 253E, PCGS# 7046
- 3668 1877-S MS62 NGC. Breen-5814.** Minute S, scarcer than its Large S counterpart. A brilliant and well struck example with good luster and surprisingly minimal marks. The obverse field is mildly granular above Liberty's legs and above star 7. NGC ID# 253E, PCGS# 7046
- 3669 1877-S MS63 PCGS.** Large S. Freckles of apricot-gold, magenta, and cobalt-blue visit the borders of this otherwise brilliant Select Trade dollar. Crisply struck and lustrous with only unimportant field contact. NGC ID# 253E, PCGS# 7046

**1878-CC Trade Dollar, XF45  
Low-Mintage Key Issue**

- 3670 1878-CC XF45 NGC.** Only 97,000 Trade dollars were struck at the Carson City Mint in 1878, making the issue elusive in all grades. This attractive Choice XF example shows light wear on the design elements, but the mottos and LIBERTY remain sharp. Pleasing shades of lavender-gray and champagne-gold toning blanket the lightly abraded surface. Census: 14 in 45, 46 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 253F, PCGS# 7047*

- 3671 1878-CC — Reverse Scratched — NGC Details. AU.** Lightly toned golden-gray aside from a band of blue-green at the obverse periphery. A straight, narrow scratch extends from the fletchings to the scroll near the P in PLURIBUS. Other tiny marks are scattered but none require mention. Only 97,000 pieces were struck, and many were likely melted at Carson City once the Bland-Allison Act became law.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

- 3672 1878-S MS62 PCGS.** A sharply impressed example, deep gray overall with caramel-gold and sky-blue tints seen upon rotation beneath a light. Moderately marked on the obverse, though the reverse is comparatively clean. NGC ID# 253G, PCGS# 7048

**PROOF TRADE DOLLARS**

- 3673 1873 PR62 NGC.** Light apricot-gold toning covers most of each side. This first-year proof has numerous hairlines in the fields but still retains considerable arm's-length eye appeal. NGC ID# 27YJ, PCGS# 7053
- 3674 1875 PR60 NGC.** Type Two Reverse. UNITED is lightly die doubled. Dappled straw-gold toning adorns this intricately specimen. Evaluation beneath a lens reveals wispy hairlines. Just 700 proofs were issued.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 27YL, PCGS# 7055*
- 3675 1875 PR61 Cameo PCGS.** Type One Reverse. Light but consistent caramel-gold toning adorns this flashy proof Trade dollar. The strike is bold except on the right (facing) claw. Both sides show noticeable contrast along with wispy hairlines.  
*Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 1264, which realized \$1,840. PCGS# 87055*

- 3676 1876 PR58 NGC.** Type One Obverse. Type Two Reverse. Light peach-gold toning graces the borders though the fields and devices are stone-gray. This Centennial-year proof was spent and shows slight wear on the eagle's claws. The fields exhibit faint hairlines.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 27YM, PCGS# 7056*

**1876 Trade Dollar, PR63 Cameo  
Scarce Issue With Bold Contrast**

- 3677 1876 PR63 Cameo NGC.** Type One Obverse, Type Two Reverse. From a generous proof mintage of 1,150 pieces, this spectacular Select specimen exhibits sharply detailed frosty design elements that provide startling contrast with the deeply mirrored fields. The lightly marked surfaces show attractive hints of pale gold toning. Census: 15 in 63 Cameo, 32 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 87056*

- 3678 1877 PR62 NGC.** Only 510 proof Trade dollars were struck in 1877. This attractive PR62 example offers strongly impressed design elements that show some incomplete detail on the eagle's feathers due to die polishing.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 27YN, PCGS# 7057*

**1878 Trade Dollar, PR64  
Bold Reflectivity Shines Through the Patina**

- 3679 1878 PR64 NGC.** From a mintage of 900 pieces, the proof 1878 Trade dollar is a scarce issue in high grade. This sharply detailed Choice example is darkly toned in shades of bluish-gray and champagne-gold, with deeply reflective fields under the patina. Census: 84 in 64, 58 finer (1/14). NGC ID# 27YP, PCGS# 7058

- 3680 1878 PR61 Cameo NGC.** The sharply detailed design elements have a frosty texture that contrasts boldly with the mirrored fields, under pleasing shades of pale gold toning. Census: 2 in 61 Cameo, 75 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 87058*

- 3681 1879 — Stained — NGC Details. Proof.** This unworn proof-only Trade dollar displays dusky olive-green and sky-blue shades. The field reflectivity is subdued but the strike is full. The left obverse is faintly hairlined.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

---

1879 Trade Dollar, Near-Gem Proof  
Elegantly Patinated

- 3682 1879 PR64 NGC.** By 1879 the only Trade dollars being struck were proofs. This near-Gem is an uncommonly well-preserved example of its date, distinctly toned pink, peach, and orange overall with a few windows of silver. Great for the type enthusiast. NGC has certified just 82 non-Cameo examples as PR65 or finer (1/14). NGC ID# 27YR, PCGS# 7059

- 3683 1880 — Improperly Cleaned — NGC Details. Proof.** This fully defined proof-only Trade dollar has only a glimpse of sun-gold toning. Both sides display myriad delicate hairlines but the fields retain significant flash.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

---

1880 Trade Dollar, Toned PR64  
Popular Late-Date Issue

- 3684 1880 PR64 NGC.** From a generous proof-only mintage of 1,987 pieces, this reddish-tinted Choice Trade dollar offers well-detailed design elements and reflective fields, with subtle undertones of peach, green, gold, and cobalt-blue colors. A few hairlines and minor contact marks do little to detract from this coin's appeal. NGC ID# 27YS, PCGS# 7060

---

1880 Trade Dollar, PR64  
Delicate Multicolor Toning

- 3685 1880 PR64 NGC.** The design elements of this attractive Choice Trade dollar are sharply detailed in most areas, but just a touch of softness is evident on Liberty's hair and the eagle's claw. The reflective fields show accents of greenish-gold and lavender-gray toning, with only minor signs of contact. From a proof-only mintage of 1,987 pieces. NGC ID# 27YS, PCGS# 7060

---

1880 Trade Dollar, PR64  
Proof-Only Date

- 3686 1880 PR64 PCGS. CAC.** The toning on this pleasing near-Gem representative accents the well-struck design elements. The surfaces reveal a mix of pearl-gray, green-gray, and tan-gray colors. At a glance, however, closer examination reveals areas of copper, sea-green, teal, and yellow-gold hues. Reflectivity shines through the patina. NGC ID# 27YS, PCGS# 7060

- 3687 1882 PR61 PCGS.** From a proof-only mintage of 1,097 pieces, this well-detailed 1882 Trade dollar is richly patinated in shades of greenish-gold, cerulean-blue, and amber. The surfaces show minor hairlines and contact marks. NGC ID# 27YU, PCGS# 7062

*End of Session One*

# PREMIER SESSION TWO

## COLONIALS

1652 Pine Tree Threepence, AU55  
Noe-36, Even Strike, Full Legends

- 3688** 1652 Pine Tree Threepence AU55 PCGS. Noe-36, W-640, Salmon 2-B, R.4. No pellets at trunk. This lovely gunmetal-gray threepence is sharply struck with the sole exceptions of the T at 9 o'clock and G at 4:30. Two slight waves are present above and below the tree from its rocker press manufacture. Listed on page 39 of the 2014 *Guide Book*. Population: 13 in 55, 2 finer (1/14).  
Ex: Phoenix ANA Signature (Heritage, 3/2008), lot 5, which realized \$6,612.50. PCGS# 21

Small Planchet Pine Tree Shilling  
VF30, Noe-17

- 3689** 1652 Pine Tree Shilling, Small Planchet VF30 PCGS. CAC. Noe-17, W-840, Salmon 3-B, R.3. 69.29 gn. A pleasing gunmetal-gray shilling with unmarked surfaces and good centering. The sharpness is consistent except for softness near 7 o'clock on the obverse and opposite at 5 o'clock on the reverse. Small die breaks are evident near the O in DO. Listed on page 39 of the 2014 *Guide Book*. PCGS# 24

Lord Baltimore Fourpence, Choice VF  
Hodder 1-A, Colorful and Luminous

- 3690** (1659) Lord Baltimore Fourpence VF35 PCGS. CAC. Hodder 1-A, W-1010, R.6. The smallest silver denomination struck for the colony of Maryland was the fourpence, or groat. The groats, like their larger fellows, bore the portrait of Cecil Calvert, the second Lord Baltimore and first Lord Proprietor of Maryland. While many surviving Lord Baltimore silver coins are holed or otherwise impaired, this is a beautiful Choice VF coin with honest wear on faintly luminous surfaces, pale blue-gray on the interiors and high points with deeper indigo at the margins and protected areas. Population: 1 in 35, 3 finer (1/14).  
Ex: Loyal L. Lauder (Doyle, 12/1983), lot 126. PCGS# 32

Lord Baltimore Sixpence, Hodder 2-C, Fine 15  
Cecil Calvert's Private Coinage

- 3691** (1659) Lord Baltimore Sixpence Fine 15 PCGS. Hodder 2-C, W-1060, R.5. The sole accessible Lord Baltimore sixpence die pair, though still rare regardless of condition. Unlike the thriving and well-populated state Maryland is today, in 1659 it was a hardscrabble, albeit religiously tolerant colony that had yet to develop its plantation economy, and so few silver coins such as this sixpence were needed. The obverse is deeply toned blue-gray with a few long old cuts down through Calvert's hair. The reverse is significantly smoother and faintly luminous with similar coloration. Listed on page 40 of the 2014 *Guide Book*. Population: 1 in 15, 34 finer (1/14). PCGS# 33

---

Lord Baltimore Maryland Shilling, AU50+  
Hodder 1-A, W-1080, Very Rare

**3692 (1659) Lord Baltimore Shilling AU50+ PCGS. Hodder 1-A, W-1080, R.6.** Ex: Roper. The state of Maryland is one of only two among the “original 13” that was controlled directly by the same family at the time of its foundation and the beginning of the American Revolution. (Pennsylvania is the other.) George Calvert, the first Baron Baltimore, campaigned for a New World charter and persevered over the opposition of the Virginia interests. He died before receiving the charter, however, and it passed to his eldest son Cecil Calvert, second Lord Baltimore and the “Lord Baltimore” who is most famous to Americans.

After the Glorious Revolution the third Baron Baltimore lost his proprietorship because he had supported the losing side. The fourth Baron Baltimore petitioned for his claim to be restored, but in another near-miss he died before receiving royal assent and the fifth Baron Baltimore took up the proprietorship instead. It then passed to the sixth and last Baron Baltimore and finally to Henry Harford. Harford was the sixth Baron Baltimore’s only son, but by a mistress; due to his illegitimacy, Harford was eligible to inherit the proprietorship but not his father’s title. Harford was still in his teens when the American Revolution broke out, depriving him of the proprietorship once and for all.

As noted above, Cecil Calvert, first Lord Proprietor of Maryland and second Baron Baltimore, is the most famous of the Barons Baltimore in the States and usually is known simply as “Lord Baltimore.” During the English Interregnum he ordered silver coins bearing his image to be struck and shipped to his colony, “Mary’s Land.” Though the act practically claimed a royal prerogative and flew in the face of mercantilist principles, it was permitted and the coins —fourpence, sixpence, and shilling, along with a copper penny — circulated in Maryland for a time.

This is among the finer Maryland / Lord Baltimore shillings known, beautifully toned blue and gold over a medium-gray base. Ample luster remains on each side, though wear is plain at the top of the crown and in Calvert’s hair. Well-centered, better-struck than usual, and all-around appealing. Listed on page 40 of the 2014 *Guide Book*.

Ex: John L. Roper, 2nd Collection (*Stack’s*, 12/1983), lot 43; John “Jack” Royse Collection (*Stack’s Bowers*, 11/2012), lot 6009. PCGS# 34

---

London Elephant Token, Thick Planchet  
Finest Certified, MS66 Red and Brown  
Ex: Eliasberg, W-12040

**3693** (1694) London Elephant Token, Thick Planchet MS66 Red and Brown PCGS. CAC. Hodder 2-B, W-12040, R.2. Ex: Eliasberg. The London Elephant token was struck from the same obverse die as the very rare New England and Carolina PROPRIETORS varieties. It has been collected as part of the Early American series since the 19th century. The typical Elephant token grades VF. Although Uncirculated examples are known, they are usually fully brown. The present piece, pedigreed to the illustrious Eliasberg collection, is the single finest certified and retains glimpses of the initial rose-red color. Exposed portions of the token are chocolate-brown. The strike is precise, the surfaces are unabraded, and the sole imperfections are a few tiny flecks on the obverse field. Listed on page 46 of the 2014 *Guide Book*. Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 42. PCGS# 56

---

1776 Continental Dollar, MS61  
Pewter, CURENCY, Newman 1-C

**3694** 1776 Continental Dollar, CURENCY, Pewter MS61 NGC. Crosby pl. VIII, Newman 1-C, W-8445, R.3. Today, we consider the obverse of this design to include the date and sundial with the reverse containing the 13 interlinked rings bearing the state names. In 1875, however, Sylvester S. Crosby considered the obverse and reverse to be exactly opposite. The design of these coins was taken from a similar motif appearing on Colonial Currency notes, prompting the “dollar” description for these coins; however, also suggesting that they may have been a fiat coinage that was intended only as a substitute for paper money, and never intended to have any intrinsic value.

In the *Whitman Encyclopedia of Colonial and Early American Coins*, Q. David Bowers states, “It was likely intended that the pewter Continental dollar coin serve in place of the \$1 note during the latter part of 1776.” These coins are therefore often collected by those who specialize in silver dollars, and most collectors have waited a long time for just the right example. The Continental Currency coinage is also important from a historical standpoint, bearing the 1776 date of our nation’s founding.

This is a remarkable Mint State example of the pewter Continental Currency coinage with the misspelling CURENCY. The surfaces are light gray with considerable prooflike finish. A few minor blemishes are visible on each side; however, the overall aesthetic appeal of this example is quite high. The strike is generally bold, although the sun is incompletely defined, as is the opposite portion of the reverse. Although a few examples are known in brass, copper, and silver, nearly all Continental Currency pieces have pewter composition. Listed on page 81 of the 2014 *Guide Book*.

Ex: Karl Scheible Collection (*Heritage*, 8/2004), lot 5042; Cincinnati Central States (*Heritage*, 4/2009), lot 2004, lot 2004; Pittsburgh Signature (*Heritage*, 10/2011), lot 3009, which realized \$57,500. PCGS# 791

1786 New Jersey Copper, VF30  
No Coulter, Date Under Plow  
Maris 12-G

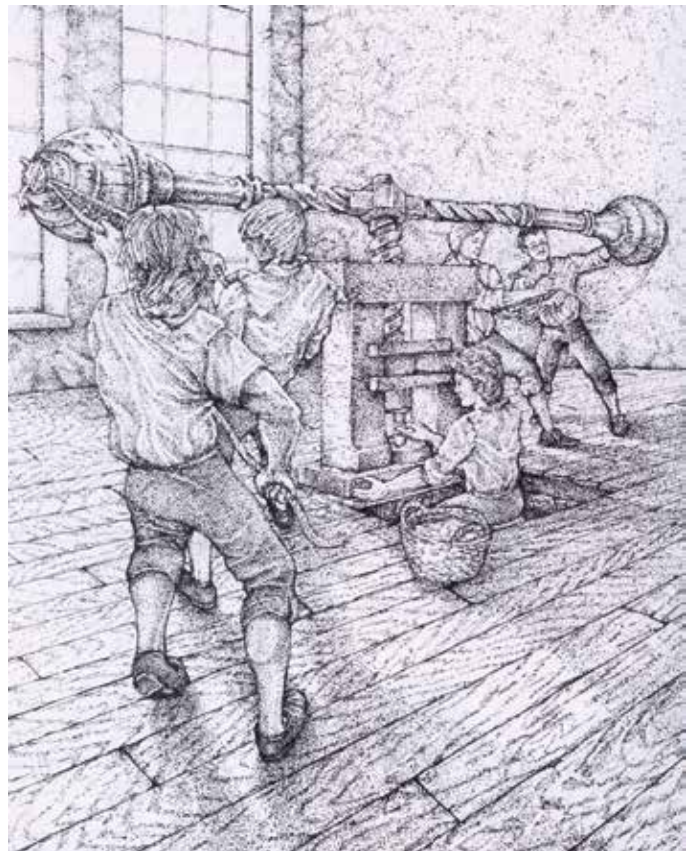

- 3695 1786 New Jersey Copper, Date Under Plow, No Coulter VF30 PCGS. Maris 12-G, W-4790, R.4. Deep walnut-brown fields contrast with lightly toned high points. A lovely first-year New Jersey copper with even wear and smooth surfaces. Marks are inconsequential aside from faded contact on the shield. Listed on page 69 of the 2014 *Guide Book*. PCGS# 494

1783 Chalmers Shilling, VF30  
Long Worm, W-1790

- 3696 1783 Chalmers Shilling, Long Worm VF30 PCGS. CAC. Breen-1012, W-1790, R.4. John Chalmers was a Maryland silversmith whose private issues attempted to replace problematic worn-out and cut-down Spanish-American silver. The significance of his enigmatic types have long been debated by specialists. The "worm" is the vertical object between the two birds. Long and Short Worm varieties are known, with the Long Worm considered slightly rarer. This lightly abraded cream-gray example has a well defined obverse and a softer impression on the central reverse. Listed on page 51 of the 2014 *Guide Book*. PCGS# 595

---

Libertas Americana Medal, MS62  
Struck in Silver, Original Dies  
Betts-615

**3697** (1781) Libertas Americana Medal, Silver MS62 PCGS Secure. CAC. Betts-615, Loubat-14. Original Dies. When Whitman published *100 Greatest American Medals and Tokens*, nobody was surprised to see the famous Libertas Americana medal ranked #1. It is difficult to overstate the influence that the medal had on U.S. coinage, especially on the 1793 Liberty Cap half cent.

Benjamin Franklin conceived the medal in 1782 while serving in Paris as the first U.S. Ambassador to France. A sketch was made by Antoine Gibelin, and Augustin Dupré (1748-1833) served as engraver. Struck at the Paris Mint. The obverse date, July 4, 1776, is obviously that of the American Declaration of Independence. The reverse dates, October 17, 1777 and October 19, 1781, respectively represent the British surrenders at Saratoga and York.

The obverse motif is a representation of American Liberty with a Phrygian cap and pole symbolic of freedom over her right shoulder. The reverse features France (as Minerva) shielding America (as the infant Hercules) from England (as an aggressive lion). Though yet a baby, Hercules participates in his defense by strangling two serpents. The legend translates as "The courageous child is not without the aid of the gods."

Fewer than 60 were struck in silver. In their exhaustive census, Adams and Bentley were able to locate 22 examples in silver, including a number housed in museum collections. Most survivors show light wear from non-numismatic handling, but the present piece has virtually full detail. The golden-brown and powder-blue surfaces show only incidental hairlines. Population: 4 in 62, 2 finer (1/14). PCGS# 151000

## PROOF CLASSIC HEAD HALF CENTS

1831 B-2 Half Cent, PR65 Red and Brown  
Reverse of 1836, Ex: Eliasberg Collection

**3698** 1831 Reverse of 1836 PR65 Red and Brown PCGS. CAC. B-2, High R.5. Ex: Eliasberg. 1831 half cents are identified as Original, First Restrike, and Second Restrike. This Gem is the First Restrike with large berries. The obverse has the distinctive small date and large stars that is seen on all three obverses used on 1831 proof half cents. The reverse shows the highest leaf under the left foot of the second S of STATES. The obverse is mostly fire-red, although the cheek and left obverse field are toned steel-blue. The reverse is predominantly sea-green, with cherry-red emerging from the peripheral letters. Well struck with flashy fields and exquisite eye appeal. A brief thin vertical mark above the jaw is provided for identification in any future auction appearances. Certified in a green label holder.

This example was described in the Eliasberg catalog as a Series I Restrike with the weight recorded at 82.4 grains. We find no evidence of reverse die bulging or die cracks, representing the earliest known die state. This piece was omitted from the Breen Census. Although he would have examined this coin when he viewed the Eliasberg Collection, his notes were incomplete or lost, requiring him to reconstruct the rosters of many coins from memory. Our EAC grade PR64.

Ex: John G. Mills (S.H. and H. Chapman, 4/1904); John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 5/1996), lot 444. PCGS# 1190

**1833 Half Cent, Deeply Mirrored PR65 Brown  
C-1, B-1, Die State III**

- 3699 1833 PR65 Brown NGC. C-1, B-1, R.5 as a proof.** The 1833 is one of the more available dates in proof format in the half cent series. Breen speculates that as many as 50 pieces may have been struck to commemorate the opening of the new mint building in January 1833. The first three die states are seen only on proofs. This is a Die State III coin that shows the die crack through the left stars all the way to star 2. However, there is no evidence of die clashing in the fields. The fields are deeply mirrored on each side with a rich overlay of blue and a brown undertone. An outstanding example of this popular and widely needed proof type coin. Our EAC grade PR60. Census: 4 in 65 Brown, 0 finer (1/14).  
Ex: *Dallas Signature* (Heritage, 4/2007), lot 157. NGC ID# 2239, PCGS# 1198

**PROOF BRAIDED HAIR HALF CENTS**

**1842 Half Cent, PR64 Brown  
Large Berries Original**

- 3700 1842 Original PR64 Brown PCGS. B-1, R.6.** The Original variety with large berries in the wreath, likely struck in the year displayed. This example has pleasing chocolate-brown surfaces with traces of blue and tan toning. The fields are mostly mirrored, although subdued at the upper reverse where some green residue is noted. Careful conservation might successfully remove that matter. Our EAC grade PR55. NGC ID# 2627, PCGS# 1260

**1843 First Restrike Half Cent  
B-2, PR64 Brown**

- 3701 1843 Restrike PR64 Brown NGC. SR-5, B-2, R.6.** The doubled T in CENT identifies this as a First Restrike half cent. Bold design details are evident on both sides, with reflective, lightly mirrored fields and gorgeous turquoise-green toning. This proof meets the criteria for Walter Breen's Series I Restrikes: "They tone light iridescent brown, blue, or blue-green." The current population of the 1843 First Restrike proofs is between 20 and 30 coins. Breen discussed 20 pieces in his *1983 Half Cent Encyclopedia*. Our EAC grade PR60.  
Ex: *Long Beach Signature* (Heritage, 5/2009), lot 47. NGC ID# 2629, PCGS# 1269

**1848 First Restrike Half Cent, PR64 Brown  
Only 30 Pieces Believed to Exist**

- 3702 1848 Restrike PR64 Brown NGC. B-2, High R.5.** Both sides of this sharply detailed near-Gem proof have rich and deep violet, emerald, and blue toning. The fields have full but shallow mirrors around lustrous devices. A few minor blemishes include small marks on Liberty's cheek. Only a little over 30 of these First Restrike 1848 half cents are thought to exist today. Our EAC grade PR60. NGC ID# 262K, PCGS# 1299

**1854 Half Cent, PR65 Red and Brown  
Elusive B-2 Variety**

- 3703 1854 PR65 Red and Brown NGC. B-2, Low R.6.** Bright orange-red color with traces of blue toning appears on the obverse. The reverse has deep brown color with bluish overtones. Both sides have extremely sharp design features with reflective fields. Among the proof half cents from the 1850s, this is a scarce issue, and it is more elusive than the 1852 proof-only issue, for example. Our EAC grade PR60. Census: 1 in 65 Red and Brown, 0 finer (1/14).  
Ex: *Central States Signature* (Heritage, 4/2006), lot 237. PCGS# 1324

## LARGE CENTS

### 1793 Wreath Cent, XF45 Vine and Bars Sheldon-8, Early Die State

- 3704** 1793 Wreath, Vine and Bars, XF45 PCGS. S-8, B-13, R.3. Early Die State. A pleasingly glossy, chocolate-brown cent, this Sheldon-8, Breen-13 example shows only scattered abrasions and few other distractions of any kind. The horizontal twig and a triangular, concave bow (not the kidney-shaped one of S-9) confirm the variety, as do several die state characteristics — many of which indicate an important early state of the dies. In later states, the 9 of the date appears stubby due to deterioration of the dies. However, it is long and pointed on this example. Likewise, the 3 in the date is often defective — to a greater extent than the 3 on this coin, where its shape is characteristic of an earlier die state.

On the reverse, a diagnostic diagonal bulge is seen within the wreath, passing through the center dot. A lack of wear on this well-detailed cent reveals the die crack that travels with the bulge, perhaps more representative of Die State II than the earliest state of the dies. No other cracks are visible. Two small digs are seen, one on each side of the 1 in the fraction. Our EAC grade VF35. PCGS# 35456

### 1794 Large Cent, AU50 S-31, Second Marred Field Variety

- 3705** 1794 Head of 1794 AU50 PCGS. S-31, B-13, R.1. The obverse for this variety was reground to remove a flaw on Liberty's neck and minimize clash marks in the field below the Liberty's cap. Remnants of the clash marks remain (diagnostic for the variety), but this cent is otherwise exceptional in its appeal and smooth surfaces. Liberty is especially sharp and full-cheeked, with the hair strands bold and glossy. Copper-brown color reveals golden-olive highlights. The reverse is smooth and lightly reflective, with the exception of weakness at UNITED, where a few scattered marks exist in the area where the legend was not fully brought up, preventing an even higher grade. Nevertheless, this is an attractive and desirable Liberty Cap cent. Our EAC grade XF40. NGC ID# 223P, PCGS# 901374

### 1794 Cent, AU55 Head of 1794, S-22, 'Mounds' Variety

- 3706** 1794 Head of 1794 AU55 PCGS. S-22, B-6, R.1. Die buckling caused the word OF to be faint on this otherwise sharply detailed cent. The variety is identified by incomplete leaves that appear below UN, ST, (N)T, and above O(N) as described by Breen. Eight berries left and seven right confirm the attribution. The fraction is diagnostic with the final 0 very high in the denominator. Although this is the Mounds variety, no mounds are seen, nor are any clash marks or die cracks, indicating a scarce early state of the dies. Glossy and chocolate-brown fields are remarkably smooth and unmarked. The coin is boldly struck and attractive for the grade. Our EAC grade XF45. NGC ID# 223P, PCGS# 901374

**1794 Liberty Cap Cent, AU55**  
**S-70, Blundered 1, Triple Leaf at D**  
**Late Die State**

- 3707** 1794 Head of 1795 AU55 PCGS. S-70, B-62, R.2. Breen Die State IV, with a heavy crack between TY to the forehead and cheek, nearly reaching the jaw. The reverse has light clash marks at the fraction and near OF, with additional light clashing below ER and IT. Only a few scattered marks are noted on the smooth, olive-brown fields and devices of this pleasing cent, and the surfaces are altogether glossy and attractive. Our EAC grade XF45. NGC ID# 223R, PCGS# 1365

**1798 S-170 Cent, Choice AU**  
**Second Hair Style, Small 8**

- 3708** 1798 Second Hair Style AU55 PCGS. S-170, B-29, R.3. Breen Die State IV. The arc-shaped crack through the hair ribbon helps attribute this conditionally rare Sheldon marriage. The R in AMERICA is repunched. The richly detailed tan-brown and steel-gray surfaces show only unimportant marks. Population: 16 in 55, 11 finer (1/14). Our EAC grade XF45. NGC ID# 2244, PCGS# 1434

**1808 Large Cent, AU58**  
**S-278, Bold Strike**

- 3709** 1808 AU58 PCGS. S-278, B-2, R.3. This issue is often found weakly struck in one way or another because of misaligned dies, but this near-Mint example is a welcome exception. The strike is bold on Liberty as well as on the reverse wreath and legends. Stars 6 through 13 are complete but flat — a situation we also observed with the memorable MS66 Mervis example that sold in our January 2014 auction.
- Three or four tiny marks exist near various stars on the obverse, but nothing serious. The reverse is sharp and without distractions. The obverse displays an appealing medium-brown patina with reddish undertones; the reverse is chestnut-brown with the same suggestion of red beneath the toning. This is an exceptional 1808 cent and one of the finest survivors of the date. Our EAC grade AU50. Population: 1 in 58, 4 finer (1/14). PCGS# 36460

**1810/09 Classic Head Cent, AU55**  
**S-281, Scarce This Nice**

- 3710** 1810/09 AU55 PCGS. S-281, B-1, R.1. This intriguing overdate is confirmed by an outline of a 0 around the second 1 in the date and the remnants of a 9 beneath the final digit. The overdigit 1 used to replace the 0 appears to have been entered too high and then crudely corrected.
- The obverse of this deep-brown cent is struck slightly off-center left. Otherwise, the surfaces and strike are excellent. It is a Choice AU example, with smooth fields and devices showing virtually no marks and perhaps just a whisper of rub. The strike is exceptionally bold for the issue, which is often seen mushy and weak. Rich, dark-chocolate toning presents an attractive, semigloss appeal. Our EAC grade AU50. Population: 7 in 55, 5 finer (1/14). NGC ID# 224T, PCGS# 1552

**1820 N-13 Cent, MS65 Brown**  
**Large Date, Matron Type Coin**

- 3711** 1820 Large Date MS65 Brown NGC. N-13, R.1. Consistently deep walnut-brown toning embraces this coruscating and virtually unabraded Gem. The strike is sharp, though a few stars exhibit slightly incomplete radials. The well-known Randall Hoard variety, popular among type collectors for its uncommon quality. Our EAC grade MS60. NGC ID# 2256, PCGS# 1615

**1857 N-4 Cent, MS65 Red and Brown**  
**Small Date**

- 3712** 1857 Small Date MS65 Red and Brown PCGS. CAC. N-4, R.1. Three short lines extend down from the ear on this Small Date cent, identifying the N-4 die pair. Grellman Die State b, early, with a trace of the line from the dentils to star 1 still visible. A low area is noted at the E in ONE. This pristine Gem has traces of original red on the bluish-brown obverse surface, and traces of blue patina on the nearly full brilliance of the reverse. Our EAC grade MS63. PCGS# 1932

## PROOF LARGE CENT

1855 Cent, PR64 Red and Brown  
Slanted 55, N-10

- 3713** 1855 Slanted 55 PR64 Red and Brown PCGS. CAC. N-10, R.5 as a proof. Grellman Die State a. The small die defect on the front edge of the coronet attributes the Newcomb pairing. The flashy fields, mark-free surfaces, and sharp strike are all characteristic of proof production. The pumpkin-gold obverse appears full Red except for moderate carbon. The reverse is orange-red but the borders are dusky and also display forest-green. Our EAC grade PR63.  
*Ex: Orlando FUN Signature (Heritage, 1/2009), lot 294, which realized \$17,250. NGC ID# 2273, PCGS# 1995*

## FLYING EAGLE CENT

1858 Small Letters Cent, MS66  
Tied for Numerically Finest Graded

- 3714** 1858 Small Letters MS66 NGC. Low Leaves Reverse. Golden-tan surfaces show brilliant luster that verges on the cartwheel sort, unusually strong, and the surfaces are impeccably preserved and boldly struck, making this piece among the few finest survivors of the issue. The 1858 Small Letters Flying Eagle cent is an important and sought-after *Guide Book* variety. Census: 15 in 66 (1 in 66 ★), 0 finer (1/14). NGC ID# 2279, PCGS# 2020

## PROOF FLYING EAGLE CENTS

1856 Snow-9 Flying Eagle Cent  
Proof, Mint Sharpness

- 3715** 1856 — Reverse Repaired — ANACS. PR60 Details. Snow-9. The Snow-9 variety is associated with proof restrikes from the late 1850s. Many S-9 specimens, such as the present piece, are fully struck and display field reflectivity. The glossy surfaces are toned apricot-gold, sea-green, and plum-mauve. The strike-through at the reverse center, between the EN in CENT, is present on a number of S-9 cents, such as lot 5006 in our 2014 February New York Signature. The strike-through is accompanied by minor smoothing.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 227A, PCGS# 2037*

1856 Flying Eagle Cent, PR62  
Snow-9, Proof Striking

**3716 1856 PR62 PCGS. Snow-9.** A lovely chocolate-brown representative of the famous introductory small cent, the rarest and lowest mintage date of the denomination. The Snow-9 variety was struck in the late 1850s and unofficially sold by the Mint to meet the growing demand from collectors. Profits went to improve the Mint cabinet, currently part of the Smithsonian collection. The present chocolate-brown specimen has a good strike and a high grade obverse. The reverse has two hair-thin horizontal marks above the NE in ONE and a narrow mark below the N in CENT. A slender strike-through (as coined) is noted at the right pendant of the T in UNITED. This same strike-through is present on many other Snow-9 cents, such as lot 5131 in our January 2014 FUN Signature. NGC ID# 227A, PCGS# 2037

1856 Flying Eagle Cent, PR64  
Snow-9, Fully Struck

**3717 1856 PR64 PCGS. Snow-9.** A fully struck walnut-brown near-Gem that shows glimpses of deeper gunmetal toning on the right-side borders. Evaluation beneath a lens fails to locate any consequential detractors. The 1856 Flying Eagle cent ranks as one of the most numismatically significant issues. Once collectors realized its rarity, there was a clamor to obtain examples, and many joined the hobby specifically to acquire the low mintage date. The Snow-3 originals from 1856 were insufficient to meet demand, and restrikes from Snow-9 dies were struck in the late 1850s for unofficial sale, along with such delicacies as 12-piece 1858 sets of pattern cents. NGC ID# 227A, PCGS# 2037

## INDIAN CENTS

### 1860 Pointed Bust Cent, MS67 Fantastic First-Year Coin

- 3718 1860 Pointed Bust MS67 PCGS.** The 1860 Indian cents began the brief five-issue run of Oak Wreath reverse cents with copper-nickel alloy. As one might expect, Superb Gem Mint State examples are exceedingly elusive regardless of their specific date. This first-year Pointed Bust representative has excellent detail, including four complete diamonds on Liberty's ribbon. Luster is largely peach-gold with elements of lighter apricot. Aside from a flyspeck on the lowest feather there are few flaws to be found. PCGS has certified only two Pointed Bust coins as MS67 and none finer (1/14). PCGS# 2056

### 1873 Doubled LIBERTY Cent, XF45 Key Snow-1 Variety

- 3719 1873 Doubled LIBERTY, Closed 3 XF45 PCGS. Snow-1, FS-101.** Always a high-demand variety among Indian Head cent specialists, the Snow-1 Doubled LIBERTY shows strong die doubling not only on LIBERTY, but also on other design elements including Liberty's eye and profile. This is a rich, walnut-brown example of the variety. The doubling is clearly displayed and dramatic. It is generally acknowledged the Snow-1 trails only the 1888/7 variety in value, and it is second to none in visual impact. Population: 15 in 45, 59 finer (1/14). PCGS# 2115

### 1877 Cent, MS63 Brown Mark-Free Surfaces

- 3720 1877 MS63 Brown PCGS. CAC.** A generous amount of red appears on this near-Gem, key-date cent, which otherwise shows nice, attractive medium-brown coloration with purplish highlights. There are no mentionable contact marks, and the strike is strong with only a bit of softness on a few of the headdress feather tips. This is the shallow N variety, which often displays a more noticeably weak N, but here it is decently brought up. Population: 51 in 63 Brown, 40 finer (1/14). NGC ID# 2284, PCGS# 2127

### 1877 Indian Cent, Patinated MS65 Brown Virtually Unobtainable Any Finer

- 3721 1877 MS65 Brown PCGS. CAC.** Lavender, reddish-gold, and orange patination dominates this Gem key-date example. The design elements are well-struck except for the typical softness in the first three feather tips and the second diamond from the bottom. The reverse devices are fully struck. Neither side reveals mentionable contact marks, though a few minor carbon flecks are visible in the central reverse. The 1877 is very difficult to acquire in MS65 Brown and is virtually unobtainable any finer. Population: 12 in 65 Brown, 0 finer (1/14). NGC ID# 2284, PCGS# 2127

**1888 Cent, MS66 Red  
Condition Rarity**

- 3722 1888 MS66 Red PCGS.** This coin has uncommonly fiery luster for its time with a mix of copper-gold, orange, and peach hues. The deepest color appears in a patch at the lower left reverse between rim and wreath. Four clear diamonds appear on Liberty's ribbon, though the hair detail is a trifle soft, and only a few minuscule flyspecks and minor marks account for the Red Premium Gem designation. While the 1888 cent enjoys a generous mintage of almost 37.5 million pieces, it is a clear condition rarity at the MS66 Red level. Population: 13 in 66 (1 in 66+) Red, 1 finer (1/14). NGC ID# 228G, PCGS# 2168

**1909-S Indian Cent, MS65+ Red**

- 3723 1909-S MS65+ Red PCGS.** This impressive Gem exhibits frosty and fully brilliant golden mint luster with a splash of coppery-orange at the upper feather tips. The alloy used at San Francisco during the first two years of cent production has a lighter hue than found in later years, or other mints. This piece has better eye appeal than the typical "woodgrained" examples that are the norm for the issue. PCGS has only certified 18 finer Red examples (1/14). NGC ID# 2298, PCGS# 2240

**PROOF INDIAN CENT**

**1868 Indian Cent, PR65 Red Cameo  
Nearly Inverted Reverse**

- 3724 1868 PR65 Red Cameo PCGS.** Many 1868 proof Indian cents have medal alignment, with the reverse inverted from the usual coin alignment. This example has about 330 degree alignment. Stated another way, the shield is located at 5 o'clock, rather than 12 o'clock, when the coin is turned normally. This Gem has exceptional orange mint color with fully mirrored fields and outstanding contrast. Population: 4 in 65 Cameo, 2 finer (1/14). PCGS# 82293

## LINCOLN CENTS

### 1909-S VDB Lincoln Cent, MS66 Red First-Year Series Key

**3725 1909-S VDB MS66 Red PCGS. CAC.** The iconic Lincoln design appeared on the cent for the first time in 1909 and examples released on August 2 of that year included the designer's initials (VDB for Victor D. Brenner) in tiny print on the reverse at 6 o'clock. Although many engravers signed their designs in various ways in both earlier and later years, there was much controversy about this particular display. Secretary of the Treasury Franklin Mac Veagh soon ordered production of the Lincoln cent halted until new dies could be prepared without the offending initials. Only 484,000 cents were struck with the VDB initials at the San Francisco Mint, and the issue has been the most sought-after coin in the series ever since.

The well-preserved original red surfaces of this delightful Premium Gem show no visible signs of carbon. The design elements are sharply detailed and vibrant mint luster radiates from both sides. Eye appeal is terrific. PCGS has graded 11 numerically finer examples (1/14). NGC ID# 22B2, PCGS# 2428

*Dedication of the Lincoln Memorial on Memorial Day,  
May 30, 1922 (National Archives)*

---

1909-S VDB Cent, MS67 Red  
Perfectly Preserved Surfaces

**3726 1909-S VDB MS67 Red PCGS Secure.** The 1909-S VDB was produced to the extent of only 484,000 coins, an amount about one-fourth that of the 1909-S cents that followed. Garrett and Guth rank the 1909-S VDB as number 14 in their listing of the *Top 100 U.S. Coins*. Garrett and Guth make the obvious point for the 1909-S VDB is a coin in huge demand:

"The 1909-S V.D.B. cent has long been considered one of the key dates in the series, filling the dreams of collectors young and old. While the mintage of 484,000 may seem high compared to many other American rarities, one must understand that there are millions of people who collect Lincoln Head Cents. There are simply not enough 1909-S VDB Cents to satisfy all of the collector demand, making this coin a perennial favorite and earning it a place on our list of America's 100 Greatest Coins. Of the Top 100 coins listed thus far, this is the first that is generally available today on a widespread basis."

The 1909-S VDB cent has several attractions, among them its status as the rarest of the four first-year business strike Lincoln cents and its position (along with the 1909 VDB) as a first-year type and a one-year subtype. A complete year set of 1909-dated cents, however, would also include the two Indian Head issues, the 1909 and 1909-S. Some collectors enjoy assembling sets of the six 1909-dated cent issues, a set that can be assembled (given sufficient funds) in nearly any grade desired. This is one the most amazing S-VDB cents we have ever had the pleasure of offering. It is essentially "as struck." The mint luster is bright, even red with no trace of mellowing. The strike is strong throughout and we see no traces of carbon or objectionable contact marks. None are finer at either service. Population: 11 in 67 Red, 0 finer (1/14). NGC ID# 22B2, PCGS# 2428

---

**1922 No D Lincoln Cent, AU55**  
**Glossy, Strong Reverse**

- 3727** 1922 No D Strong Reverse AU55 PCGS. CAC. FS-401. Die Pair 2. This pleasing, chocolate-brown example of the No D variety in Choice AU condition is a large improvement over the typical VF to XF coins usually available for this issue. Less than 4% of the 1922 No D cents certified by PCGS have qualified for the AU55 grade level or finer (1/14). It is customary to grade this variety by the reverse only, since the obverse is always weakly struck due to die wear. Virtually unabraded and glossy on both sides, this outstanding candidate will fit a high-grade set without the premium for a fully Mint State example. NGC ID# 22C9, PCGS# 3285

---

**1927 Lincoln Cent, MS67+ Red**  
**The Finest Certified**

- 3728** 1927 MS67+ Red PCGS. An impressive Superb Gem, and rarely encountered so fine. The addition of the Plus designation means this example is the single finest 1927 Lincoln cent that PCGS has certified. Both sides have frosty luster with light golden-tan surfaces, the obverse adding rich orange toning. Population: 39 in 67 (1 in 67+) Red, 0 finer (1/14). NGC ID# 22CM, PCGS# 2578

---

**1933-D Cent, MS67 Red**  
**Important Depression-Era Issue**

- 3729** 1933-D MS67 Red PCGS. CAC. The nation was in the midst of the Great Depression when this coin was struck, and even one cent was important to the average family. For that reason, few of these were saved, and today high grade pieces are rare. This gorgeous Superb Gem has brilliant orange luster with a trace of delicate blue-green and violet toning on the reverse. Population: 22 in 67 Red, 0 finer (1/14). NGC ID# 22D8, PCGS# 2632

---

**1936-S Lincoln Cent, MS67 Red**  
**None Certified Finer**

- 3730** 1936-S MS67 Red PCGS. Vivid, red-orange surfaces display uninterrupted mint luster on this boldly struck cent. Although not a high-mintage date for the post-Depression era, more than 29 million were struck and many nice examples exist. None are finer than this Superb Gem, however, by either service. Two or three reverse specks of varying size are visible with a glass and keep this vibrant cent from an even higher grade. Population: 40 in 67 Red, 0 finer (1/14). NGC ID# 22DG, PCGS# 2656

---

**1955 Doubled Die Cent, MS64 Red**  
**All-Time Collector Favorite**

- 3731** 1955 Doubled Die Obverse MS64 Red PCGS Secure. FS-101. Red examples of the 1955 Doubled Die cent are always the subject of strong pursuit among the legions of Lincoln cent collectors. Not only are they rare in their own right with Red surfaces, they enjoy a sentimental niche among "old-time collectors" as one of the historic 1950s-1960s issues that helped popularize modern-day variety collecting. This near-Gem primarily displays consistent orange-red on the obverse with some deeper red on the reverse, and the strike is about average. A couple of tiny field ticks account for the grade, but carbon is conspicuously absent, and this bold "naked eye" variety looks just as startling as ever. PCGS has graded only 18 Red coins finer (1/14). NGC ID# 22FG, PCGS# 2827

---

**1962 Lincoln Cent, MS67+ Red  
Finest PCGS Certified Example**

- 3732 1962 MS67+ Red PCGS.** It is sometimes difficult to remember that the Lincoln Memorial cent design is now more than half a century old. Despite massive mintages, these coins were not saved and are now condition rarities. With the Plus designation, this example is the finest 1962 Lincoln cent that PCGS has certified. The surfaces are brilliant and frosty with rich orange mint color. Marks and spots are absent on this Superb Gem. Population: 10 in 67 (1 in 67+) Red, 0 finer (1/14). NGC ID# 22G3, PCGS# 2878

---

**1982 Bronze Cent, MS67+ Red  
The Finest Certified Small Date**

- 3733 1982 Bronze, Small Date MS67+ Red PCGS.** 1982 was the transitional year for the small cents, when the composition was changed from copper alloy to copper-plated zinc. Both mints issued Small Date and Large Date varieties. A complete set consists of seven business strikes and the proof-only S-Mint issue. The obverse has rich violet toning over its bright orange luster, while the reverse is brilliant orange as struck. Population: 3 in 67 (1 in 67+) Red, 0 finer (1/14). PCGS# 146020

---

**1992-D Cent, MS65 Red  
Very Rare Close AM Subtype  
FS-901, Guide Book Variety**

- 3734 1992-D Close AM MS65 Red PCGS. FS-901.** A transitional variety that has the reverse of 1993. The design subtype is identified by a close AM in AMERICA and distant FG initials from the Lincoln Memorial, and was used on all proof and business strikes for 1993. Apparently, a single reverse die intended to be paired with a 1993-D obverse instead was used to strike 1992-D cents, likely shortly prior to the date transition. Extremely rare, the PCGS website states "about 15 known" though others presumably rest in obscure penny jars, perhaps never to be identified. The present peach-gold Gem is pristine, without carbon or contact, and appears as struck with minor incompleteness of strike on the peripheral legends and a slightly matte appearance from microscopic gas bubbles beneath the copper plate. Population: 2 in 65 Red, none finer (1/14). PCGS# 83101
-

## PROOF LINCOLN CENTS

1912 Lincoln Cent  
PR66 Red and Brown

3735 1912 PR66 Red and Brown PCGS. Although designated Red and Brown, this Premium Gem is better described as orange and blue, with nearly full original mint color, showing only a few trivial, scattered spots on each side. Population: 15 in 66 (2 in 66+) Red and Brown, 0 finer (1/14). NGC ID# 22KV, PCGS# 3313

1990 No S Lincoln Cent, PR69 Deep Cameo  
None Certified Finer

3736 1990 No S PR69 Deep Cameo PCGS. FS-101. The 1990 No S proof Lincoln cent is the last major missing-mintmark variety in the U.S. proof series. Estimates of the surviving population range from 100 to 250 pieces and the issue is the key to the proof Lincoln Memorial series. This magnificent PR69 specimen offers virtually perfect original red surfaces, with deeply mirrored fields that contrast profoundly with the fully detailed and richly frosted design elements. This coin is a "must-have" for Registry Set enthusiasts, as none have been certified finer by either of the leading grading services. Population: 26 in 69 Deep Cameo, 0 finer (1/14). NGC ID# 274B, PCGS# 93506

## TWO CENT PIECE

1866 Two Cent, Razor-Sharp MS66 Red  
A Significant Condition Rarity

3737 1866 MS66 Red PCGS. The 1866 two cent piece, despite a fairly large mintage that exceeds 3.1 million pieces, is a significant condition rarity in Premium Gem in all three color designations. PCGS and NGC combined have graded just 16 MS66 Red coins, including the present offering, and none are finer. Both sides are awash with reddish- and yellow-gold luster and each exhibits razor-sharp design elements. Close examination reveals no significant abrasions. A few minuscule peripheral toning flecks are noted, more so on the reverse. This piece exudes highly pleasing eye appeal. Population: 8 in 66 Red, 0 finer (1/14). NGC ID# 274R, PCGS# 3590

## PROOF TWO CENT PIECES

### 1871 Two Cent, PR66 Red

- 3738 1871 PR66 Red PCGS.** The motto IN GOD WE TRUST is die doubled on this 1871 proof two cent piece, as it always is on proof strikes of two different varieties. This Premium Gem has brilliant, pale orange mint color with fully mirrored fields behind lustrous devices, imparting slight cameo contrast. Population: 14 in 66 Red, 0 finer (1/14). NGC ID# 22NH, PCGS# 3647

### 1873 Closed 3 Two Cent, PR66 Red and Brown Colorful and Carbon-Free

- 3739 1873 Closed 3 PR66 Red and Brown NGC.** One of the nicest Red and Brown examples of this final-year two cent issue. This piece offers intermingled remaining mint red with lavender and rose hues, far nicer than the "brown" implies. The surfaces are well-stuck and carbon-free. Census: 38 in 66 (1 in 66 ★) Red and Brown, 2 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2753, PCGS# 3652*

## THREE CENT SILVER

### 1870 Three Cent Silver, MS65 Prooflike Surfaces

- 3740 1870 MS65 NGC.** Delicate gold toning is concentrated near the borders of this amazing brilliant Gem 1870 three cent silver piece. Both sides have mirrored fields around lustrous devices, imparting light cameo contrast. The strike is sharp, although not full, on this lovely business strike. Census: 10 in 65, 5 finer (1/14). NGC ID# 22ZL, PCGS# 3691

## PROOF THREE CENT SILVER

### 1858 Three Cent Silver, PR66 Seldom-Seen Early Odd-Denomination Type

- 3741 1858 PR66 PCGS.** Proofs of the earlier three cent silver issues, from 1854 through 1857, are fairly rare; the year 1858 was the first in which the Mint began publicly advertising proof sets for sale, and the first for which some sources estimate a proof mintage for the trime, at 210 pieces in the *Guide Book*. Under a loupe the rather dark patina resolves into pretty, pastel lavender hues, with a golden accent in the central reverse. Die striations run diagonally though the obverse, as made and as usually seen, and there is some weakness on the denomination in the center reverse, but this piece is mighty attractive, appealing, and rare, a nice example of this odd denomination for a type set. Population: 11 in 66, 1 finer (1/14). NGC ID# 27C5, PCGS# 3705

### 1858 Three Cent Silver, PR66 Colorful and Fully Struck

- 3742 1858 PR66 PCGS.** This glittering Premium Gem proof of the Type Two subtype comes from the first year that the Mint stopped striking proofs "under the table" for the well-connected and began what we think of today as mass marketing. The *Guide Book* gives an "italic guess" estimate of 210 proofs for this issue. Die striations running diagonally are as noted in the Breen proof reference, and the third I joins the leaf tip above, also diagnostic of proofs. This is a lovely, fully struck piece with aqua to pinkish toning on both sides, an impressive example of this important issue. Population: 11 in 66, 1 finer (1/14). NGC ID# 27C5, PCGS# 3705

1863/2 Three Cent Silver, PR63  
Distinctively Toned

- 3743 1863/2 PR63 PCGS. This proof-only issue is the subject of some dispute as to whether it is an overdate or repunched date. The 2014 *Guide Book* refers to the variety as the “So-called 3 Over 2,” though the debate continues. In any case this is a pleasing Select proof of the variety, dusky blue-violet at the outer margins with interiors that are deep peach on the obverse and pale gold-gray on the reverse. Population: 11 in 63, 17 finer (1/14). NGC ID# 22ZP, PCGS# 3713

1871 Three Cent Silver, PR67 ★  
Multicolor Concentric Toning

- 3744 1871 PR67 ★ NGC. This crisply struck and impeccably preserved Superb Gem proof displays an array of gorgeous toning. Variegated cobalt-blue, lavender, golden-brown, and light green patina graces the obverse, while the reverse features peripheral cobalt-blue changing to lavender and then to golden-brown at the center. A small mark on the upright of the first I in III is mentioned for pedigree purposes. Census: 10 in 67 (1 in 67 ★), 1 finer (1/14). Ex: *FUN Signature* (Heritage, 1/2008), lot 596. NGC ID# 27CG, PCGS# 3722

1872 Three Cent Silver, Colorful PR68 ★

- 3745 1872 PR68 ★ NGC. The 1872 proof three cent silver has a mintage of 950 pieces and enjoys relatively high demand from date collectors, as only 1,000 circulation strikes were coined and most were melted after the denomination was discontinued in 1873. Proofs are available through the Gem level of preservation, after which the certified population tapers off. This PR68 ★ coin has attractive emerald, aqua, indigo, and violet patina across flashy fields and devices that supply a hint of contrast. Marvelously appealing in all respects and a true prize. Census: 3 in 68 (3 in 68 ★), 0 finer (1/14). Ex: *Baltimore Signature* (Heritage, 3/2009), lot 409. NGC ID# 27CH, PCGS# 3723

## PROOF THREE CENT NICKELS

### 1875 Three Cent, PR66 Cameo Tied for Finest Certified

- 3746 1875 PR66 Cameo PCGS.** The proof 1875 three cent nickel does not go down in the record books as one of the best-produced in Mint history. This PR66 Cameo specimen is decidedly above-average with its appreciably contrasted and blue-tinged surfaces. The obverse presents well, albeit with softness of strike on Liberty's hair, though the reverse has prominent field polishing lines diagonally and up (as struck) and three circular dots of milky toning just to the left of the ribbon loop inside the wreath. PCGS has certified just four coins as PR66 Cameo and none finer in the contrast category (1/14). PCGS# 83771

### 1879 Three Cent Nickel, PR68 ★ Brilliant With Frost on the Devices

- 3747 1879 PR68 ★ NGC.** This gorgeous specimen displays razor-sharp striking definition throughout, and slight incompleteness on a few of the lower reverse design elements is merely the result of overzealous die polish. The untuned silver-gray surfaces are flashy and pristine, with glassy reflectivity in the fields and intense mint frost on the devices. A great proof example that is the only PR68 ★ coin at NGC, with none finer (1/14).  
*Ex: Central States Signature (Heritage, 4/2009), lot 1352, which realized \$4,600. NGC ID# 275Z, PCGS# 3775*

### 1879 Three Cent Nickel, PR68 Cameo Black-and-White Contrast

- 3748 1879 PR68 Cameo PCGS.** Both sides of this amazing Superb Gem Cameo proof are fully brilliant and untuned with bold design motifs as expected. The fields are fully and deeply mirrored behind lustrous devices with impressive field-to-device contrast. Population: 1 in 68 Cameo, 0 finer (1/14). PCGS# 83775

### 1881 Three Cent Nickel, PR67 Deep Cameo Top-Graded Example With CAC Approval

- 3749 1881 PR67 Deep Cameo PCGS. CAC.** The sparkling silver-white surfaces show superlative field-device contrast and top-notch preservation, putting this late-series proof issue into a small minority of the finest survivors with the Deep Cameo designation, one of only two such submissions at PCGS (1/14). By the time this piece was struck the three cent nickel series was clearly on the downtrend, but the circulation strike pieces dated 1881 would see one last great, dying gasp, a mintage exceeding 1 million coins, while the proofs of the year would see a rather nominal mintage of 3,575 coins. Few of them rank as high as the present coin, of course: We offered what is apparently the only other PCGS example in this grade at our Central States Signature (Heritage, 4/2013), lot 4149, and that coin brought \$10,575 while lacking the CAC approval of the present piece. PCGS# 93777

## SHIELD NICKEL

### 1871 Shield Nickel, MS66+, Underrated Date

- 3750 1871 MS66+ PCGS.** The 1871 Shield nickel in higher Mint State grades is considerably rarer than most collectors realize, although specialists in the series fully understand the rarity of these coins. This example is remarkable with a bold strike and pristine surfaces, showing satin luster beneath delicate gold toning. A single small spot is noted on the reverse above the S in CENTS, mentioned for identification purposes. This example is tied with a few others for the finest certified. Population: 12 in 66 (1 in 66+), 0 finer (1/14). NGC ID# 22P5, PCGS# 3798

## PROOF SHIELD NICKELS

### 1867 Shield Nickel, PR65 Rare Short-Lived Rays Design Only Three Finer Coins at PCGS

3751 1867 Rays PR65 PCGS. Reverse Die State c. A Gem example of the most famous rarity of the Shield nickel series, the proof 1867 Rays has a listed *Guide Book* mintage of 25+ pieces. Recent research by John Dannreuther has discovered that perhaps 20 to 30 originals were struck, plus a small but unknown quantity of restrikes for collectors. John Dannreuther has written extensively on this issue, and as of 2007 had identified three different obverse dies in six distinct stages of the single Rays reverse, used with all three obverses.

The present specimen shows the Dannreuther-2 obverse:

- The left base of the 1 is over the left part of a dentil;
- Die polish appears in the lower part of the shield;
- The top-right olive leaf is fully detached;
- The inner bar of the W in WE is weak;
- The inner-right berries are not recut;
- The left arrow feathers are complete; and
- There is no lump on the “ball” ornament above the date;

Dannreuther believes that the 1867 With Rays proofs struck using Obverses 2 and 3 are restrikes, or second striking, although some of the Dannreuther-2 coins could have been struck in 1867. Such coins, if struck in 1867, would technically be originals, but they were struck after the Dannreuther-1 coins, as the progressive stages of the sole reverse die employed show. Dannreuther wrote in an earlier 2003-dated article that many of the restrikes “were likely struck for collectors in the years 1868-78.”

The reverse of this lovely Gem proof shows these Die State c attributes:

- The two rays beneath the second T of STATES are thinned out from die polishing; and
- The rays beneath the first S in STATES are still full and complete (these latter rays would not weaken until Reverse Die State d, so far known only in conjunction with the Dannreuther-3 obverse, which shows a lump on the ball above the date).

Housed in a green label holder, this Gem displays gorgeous toning, particularly on the obverse. The shield exhibits bright cherry-red color, with areas of orange at the peripheries. Elsewhere the patina includes shades of yellow and gold along with a splash of lime-green. Those hues appear on the reverse as well, but they intermingle to a greater degree. The surfaces display shimmering luster and the expected sharp proof strike. Population: 13 in 65, 3 finer (1/14). NGC ID# 276H, PCGS# 3818

---

**1882 Shield Nickel, PR67 Deep Cameo**  
**Remarkable Contrast**

- 3752** 1882 PR67 Deep Cameo PCGS. CAC. The second 8 and the 2 are filled on this Superb Gem Deep Cameo proof, with a die abnormality below the first 8. The fields are deeply mirrored, and no toning is evident on either side of this remarkably contrasted beauty. Population: 2 in 67 (1 in 67+) Deep Cameo, 0 finer (1/14). PCGS# 93837

---

**LIBERTY NICKELS**

---

**1884 Liberty Nickel, MS66+**  
**Bold Strike**

- 3753** 1884 MS66+ PCGS. Peripheral die cracks are noted on both sides of this Premium Gem business strike, with bold design motifs. The ear of corn at the lower left side of the wreath is almost fully detailed, and that alone testifies to the quality of the strike. Pale lavender and blue toning appear at the right obverse, with delicate orange toning splashes on the reverse. Population: 26 in 66 (4 in 66+), 0 finer (1/14). NGC ID# 22PJ, PCGS# 3845

---

**1910 Liberty Nickel, MS66**  
**Exceptional Strike**

- 3754** 1910 MS66 PCGS. This satiny Premium Gem exhibits pale gray luster with delicate peripheral gold toning on each side. The strike is exceptional with full stars on the obverse and bold ears of corn on the reverse. PCGS and NGC have each certified a single numerically finer example. Population: 14 in 66 (3 in 66+), 1 finer (1/14). NGC ID# 277L, PCGS# 3871

---

**PROOF LIBERTY NICKELS**

---

**1883 No Cents Nickel, PR67 Cameo**  
**Untoned and Deeply Contrasted**

- 3755** 1883 No Cents PR67 Cameo PCGS. The 1883 Liberty nickel omitting CENTS from the lower reverse was a short-lived type that is sometimes called the "racketeer nickel" since miscreants gold-plated examples and tried to pawn them off as five dollar gold pieces. This Superb Gem proof is essentially untoned and deeply contrasted, creating a great white-on-black appearance. The sharp proof strike and impeccable preservation put this piece far ahead of the pack. Population: 14 in 67 Cameo, 0 finer (1/14). PCGS# 83878

---

**1884 Nickel, PR66+ Deep Cameo**  
**Profoundly Contrasted and Sharply Struck**

- 3756** 1884 PR66+ Deep Cameo PCGS. CAC. This second-year proof mintage of the Liberty nickel was a nominal 3,942 pieces, nonetheless down quite a bit from the first-year 1883 production. This PR66+ Deep Cameo PCGS example shows a sharp proof strike throughout both sides, including the problematic lower-left ear of corn on the reverse. The surfaces are largely untoned and profoundly contrasted, creating the desired white-on-black appearance. There are no mentionable marks of any consequence. Population: 6 in 66 (2 in 66+) Deep Cameo, 1 finer (1/14). PCGS# 93882

---

**1885 Liberty Nickel, PR67**

- 3757** 1885 PR67 PCGS. CAC. This lovely Superb Gem proof has reflective fields and boldly defined devices, with brilliant satin luster that shines through splendid champagne, blue, and violet toning. An extraordinary example and rarely found finer. Population: 15 in 67 (1 in 67+), 1 finer (1/14). NGC ID# 277T, PCGS# 3883

---

**1885 Liberty Nickel, PR67+  
One Graded Finer at PCGS**

- 3758 1885 PR67+ PCGS. CAC.** The key-date issue within the Liberty nickel series, the 1885 is avidly collected in both proof and circulation-strike formats. This impeccable PR67+ coin shows pale lavender interiors framed by an arc of warm sunset-orange on each side, with scattered smoky accents and a full proof strike throughout. Close to the finest graded, and with the CAC approval as well. Population: 15 in 67 (1 in 67+), 1 finer (1/14). NGC ID# 277T, PCGS# 3883

---

**1889 Five Cent, PR67  
Brilliant Mirrored Surfaces**

- 3759 1889 PR67 PCGS. CAC.** An amazing, full strike renders all details of this Superb Gem proof to their fullest advantage. The stars are deeply struck and detailed, as is Liberty's hair. The wreath is sharp everywhere including the ear of corn to the left of the bow, where every kernel is present and accounted for. Although not fully Cameo, light mint frost appears on the devices for pleasing contrast with the mirrored fields. The coin is brilliant, untoned, and pristine. Just one numerically finer proof exists — a PR68 example by NGC (1/14). NGC ID# 277X, PCGS# 3887

---

**1909 Nickel, PR67+ Cameo  
Nearly Deep Contrast**

- 3760 1909 PR67+ Cameo PCGS. CAC.** Delicate gold toning appears on both sides of this brilliant nickel-gray Superb Gem Cameo proof. The fields are pristine with amazing depth of the mirrors, and the boldly detailed devices are brilliant and highly lustrous. This example is a borders on Deep Cameo contrast. Population: 18 in 67 (2 in 67+) Cameo, 1 finer (1/14). PCGS# 83907

---

**BUFFALO NICKELS**

---

**1916 Buffalo Nickel, MS67  
Vivid Colorful Surfaces, Fully Struck Devices**

- 3761 1916 MS67 NGC.** The 1916 Buffalo nickel was a well-produced issue and high-grade circulation-strike coins are often confused with matte proofs. This stunning Superb Gem exhibits fully struck design elements and vibrant mint luster under vivid shades of ice-blue and greenish-gold toning. Census: 11 in 67 (1 in 67 ★), 1 finer (1/14). NGC ID# 22RA, PCGS# 3930

---

**1917-D Nickel, MS66  
Only One Finer at PCGS**

- 3762 1917-D MS66 PCGS.** Nearly 10 million Buffalo nickels were struck in Denver throughout 1917, and survivors are plentiful in lower Mint State grades. However, Premium Gem or finer examples are extremely rare. This example has satiny nickel-gray luster with lemon-yellow and pale blue toning. Population: 17 in 66, 1 finer (1/14). NGC ID# 22RE, PCGS# 3935

1920-S Nickel, Richly Toned MS65  
Great Series Condition Rarity

**3763 1920-S MS65 NGC.** Despite a mintage of nearly 9.7 million pieces, the 1920-S nickel is a great condition rarity at the Gem level and virtually unavailable any finer. The issue for the most part was poorly produced and little-saved, making attractive examples a tiny minority. This luminous example offers rich green-gold, tan, and magenta hues draping smooth fields and devices that are soft on the high points but far better-defined than the norm. The holder permits examination of the edge, which shows beveling in places, particularly at the upper obverse. Census: 16 in 65 (1 in 65 ★), 3 finer (1/14). NGC ID# 22RS, PCGS# 3946

1923-S Buffalo Nickel, MS65  
Conditionally Rare in Higher Grades

**3764 1923-S MS65 PCGS. CAC.** From a mintage of 6.1 million pieces, the 1923-S Buffalo nickel is an available issue in circulated grades, but Mint State examples are scarce. The 1923-S is a prime condition rarity in grades above the Gem level. Like most examples seen, this coin exhibits sharply detailed design elements, with just a touch of softness on the hair above the braid. Vibrant satiny mint luster radiates from the well-preserved surfaces on both sides, and no mentionable distractions are evident. Accents of ice-blue and pale gold toning add to the outstanding eye appeal. Population: 44 in 65 (2 in 65+), 3 finer (1/14). NGC ID# 22RW, PCGS# 3950

---

1924-D Nickel, Lustrous MS65

**3765** 1924-D MS65 PCGS. CAC. The lustrous surfaces of this Gem display whispers of golden-gray toning. The design elements are well-struck, except for the usual weakness in the hair on the bison's head. The braid, horn, and tail are sharp, however. Minute flecks are scattered over each side. NGC ID# 22RY, PCGS# 3952

---

1925-S Buffalo Nickel, MS64+  
Above-Average Luster and Strike

**3766** 1925-S MS64+ PCGS. CAC. The 1925-S Buffalo nickel is known for its generally dull luster and weak striking details. The present high-end near-Gem offering displays above-average luster imbued with light reddish-gold and tan patina. Some of the usual softness is seen on the bottoms of the 1 and 9 in the date, the tops of the letters in LIBERTY, and in the hair of the bison's head. The braid is fairly strong, however, as is the horn and all of the reverse lettering. Both sides are nicely preserved. NGC ID# 22S4, PCGS# 3956

---

1926-S Buffalo Nickel, MS64+  
Far-Better Strike Than Normal

**3767** 1926-S MS64+ PCGS. CAC. The 1926-S Buffalo nickel has a well-deserved reputation among the most conditionally elusive S-mint (and overall) issues in this well-loved series, a reputation that is due to its memorably low mintage of 970,000 pieces as well as the difficulty of finding nice-for-the-grade examples. This piece is ever so close to the Gem category (where the prices for an example are quite high), showing surfaces that are silver-gray with a light accent of amber-gold approaching the rims. This piece shows a far-better strike than usual for the issue, with a bold horn and partial split tail on the bison, and it is perhaps only a couple of tiny facial ticks that preclude the Gem grade. This piece is nonetheless quite high-end and a compelling value proposition at this grade level with the CAC approval. Population: 2 in 64+, 14 finer (1/14). NGC ID# 22S7, PCGS# 3959

---

---

**1929-D Nickel, MS66+**  
**Sharp Strike and Pristine Preservation**

- 3768** 1929-D MS66+ PCGS. CAC. This is a top-end certified survivor of this moderate-mintage Buffalo nickel issue. The strike is uniformly sharp throughout both sides, which show rich luster and a light pinkish patina. As expected, marks are simply not a factor at this grade level. Population: 51 in 66 (2 in 66+), 1 finer (1/14). NGC ID# 22SF, PCGS# 3967

---

**1929-S Nickel, MS67**  
**Richly Toned With Light Patina**

- 3769** 1929-S MS67 PCGS. Among the few finest known of the issue, this 1929-S nickel certified MS67 by PCGS boasts a razor-sharp strike and thick mint bloom over surfaces lightly patinated in shades of gold, pink, and pale ice-blue. A top-notch example and a Registry Set essential. Population: 7 in 67, 0 finer (1/14). NGC ID# 22SG, PCGS# 3968

---

**1938-D/S Buffalo Nickel, Toned MS67+**

- 3770** 1938-D/S MS67+ PCGS. CAC. FS-511. The 1938-D/S Buffalo nickel boasts a low estimated mintage of 400,000 pieces. The undermintmark S is within the interior of the Denver mintmark. Soft violet and gold patination bathes the lustrous surfaces of this high-end Superb Gem. The design elements are generally well-struck, though the hair on the bison's head is soft. Immaculately preserved throughout. NGC ID# 22T3, PCGS# 3985

---

**PROOF BUFFALO NICKELS**

---

**1913 Buffalo Nickel, PR67**  
**Type One Reverse**

- 3771** 1913 Type One PR67 PCGS. An extraordinary Type One Buffalo nickel, this Superb Gem matte proof has bold design motifs with satiny gray luster that shines through lovely gold, blue, and violet toning. The obverse is especially gorgeous. Population: 50 in 67 (3 in 67+), 3 finer (1/14). NGC ID# 278R, PCGS# 3988

---

**1914 Buffalo Nickel, PR67**  
**Only 1,275 Pieces Minted**

- 3772** 1914 PR67 PCGS. This nearly flawless Superb Gem proof has a solitary spot below the 4 in the date that identifies this specimen from all others. The obverse has delicate gold toning and the reverse has bands of champagne and pale blue. Both sides exhibit crisp design definition and brilliant satin luster. Population: 73 in 67 (2 in 67+), 11 finer (1/14). NGC ID# 278T, PCGS# 3991

---

**1914 Buffalo Nickel, PR67**  
**Top-Notch Quality, Pale Pastel Toning**

- 3773** 1914 PR67 PCGS. CAC. A beautiful coin for aficionados of the Buffalo nickel series or of colorful type coins, this Superb Gem proof 1914 features a pastel overlay of pale violet, gold, and ice-blue on surfaces that show an essentially full strike throughout. A single dark fleck appears on the buffalo's midsection but is inconsequential. A top-notch example of the issue. Population: 73 in 67 (2 in 67+), 11 finer (1/14). NGC ID# 278T, PCGS# 3991

---

**1936 Type Two, Brilliant Finish Nickel, PR67+  
Attractively Toned and Boldly Struck**

- 3774 1936 Type Two — Brilliant Finish PR67+ PCGS. CAC.** Faint splashes of ice-blue and lavender toning visit the light gold, luminous surfaces of this high-end Buffalo nickel proof, concentrated in the Indian's hair and in the rear portion of the bison. Boldly struck design elements and impeccable preservation complement the attractive patination. Brilliant Finish specimens such as the present coin account for approximately one-third of the 4,420-piece mintage of 1936 proof Buffalo nickels. NGC ID# 278Y, PCGS# 3995

---

**1937 Buffalo Nickel, PR68  
Chromelike Reflectivity**

- 3775 1937 PR68 NGC.** The strike is bold and meticulous on this incredibly mirrored proof nickel. Just one other example grades numerically higher by either service from 5,739 proofs produced (1/14), and it may not be the equal of this untuned, silverlike Superb Gem. Every nuance of the Indian and the majestic bison are captured in lightly frosted relief on fathomless fields. The eye appeal is outstanding. NGC ID# 278Z, PCGS# 3996

---

**1937 Buffalo Nickel, PR68  
Tied for Finest at NGC**

- 3776 1937 PR68 NGC.** This incredible second-year brilliant proof Buffalo nickel exhibits bright gray surfaces with deeply mirrored fields and boldly defined devices, showing a hint of cameo contrast. This piece is tied for the finest that NGC has certified, with only one finer PR69 example graded at PCGS. Census: 46 in 68 (4 in 68 ★), 0 finer (1/14). NGC ID# 278Z, PCGS# 3996

---

**1937 Buffalo Nickel, PR65 Cameo  
Brilliant and Deeply Mirrored**

- 3777 1937 PR65 Cameo NGC. CAC.** Second and final year of the brilliant finish proof Buffalo nickels. This is an exceptional proof that is brilliant throughout. The fields are deeply reflective with noticeable contrast against the devices. We see nothing to keep this coin from an even higher designation. An interesting sidenote: On the left side of the obverse is a long, meandering impression of a thread that was struck into the coin at the time of manufacture. Census: 2 in 65 Cameo, 4 finer (1/14). PCGS# 83996

---

**JEFFERSON NICKELS**

---

**1938-S Nickel, MS67 Full Steps  
Lower-Mintage Semikey Issue**

- 3778 1938-S MS67 Full Steps PCGS.** The 1938-S is one of the better-known scarcities among early Jefferson nickels with only 4.1 million struck. This brilliant example exhibits thick, frosted mint luster and there are virtually no abrasions present, certainly none that merit mention. Population: 6 in 67 Full Steps, 0 finer (12/13). NGC ID# 22T6, PCGS# 84002

1939 Reverse of 1940 Nickel  
MS68 Full Steps, a Registry Trump

**3779 1939 Reverse of 1940 MS68 Full Steps PCGS.** The Reverse of 1940 Jefferson nickels dated 1939 are noted for their strong, straight steps, though usually they are not *this* strong and straight. For that matter, the preservation on this example is unprecedented, as neither NGC nor PCGS has acknowledged another MS68 Full Steps example of this issue (1/14). Captivating colors, among them ice-blue, violet, peach, and gold, enrich softly lustrous surfaces that exhibit a degree of die flow near the rims. While a collector looking for marks under a glass will find them, only a couple of tiny reverse disturbances are visible to the unaided eye. PCGS# 894003

1944-D Nickel, MS68 Full Steps  
The Ultimate War Nickel

**3780 1944-D MS68 Full Steps PCGS.** The steps leading to the porch of Monticello are intact on this Wartime Jefferson nickel. PCGS has certified eight silver nickels in MS68 Full Steps, with none finer (1/14). Those eight include 1943-P, 1943-D (3), 1944-D (3), and 1945-D. This is the first PCGS example at this grade level that we have ever offered, an exceptional opportunity for the advanced Registry collector. The present piece has five bold steps on the reverse. Both sides have exceptional, frosty silver luster with delicate champagne toning, displaying accents of lilac and powder-blue toning. NGC ID# 22TV, PCGS# 84023

---

1951 Jefferson Nickel, MS67 Full Steps  
Single Finest Certified Example

**3781 1951 MS67 Full Steps PCGS.** The coin market was coming out of a slump in 1951 and the popular practice of saving rolls of high-grade coins was at a low point. As a result, the 1951 Jefferson nickel is an elusive issue in high-grade condition, especially with Full Steps.

The present coin is the single finest certified 1951 Jefferson nickel with the Full Steps designation. The design elements exhibit pinpoint definition throughout and the well-preserved surfaces are brightly lustrous, with no mentionable signs of contact. Attractive shades of ice-blue and champagne-gold toning add to the terrific eye appeal. Population: 1 in 67 Full Steps, 0 finer (1/14). NGC ID# 22UG, PCGS# 84043

---

---

EARLY HALF DIMES

1792 Half Disme, Judd-7, Fine 15 Details  
First United States Regular-Issue Coinage

**3782 1792 Half Disme, Judd-7, Pollock-7, R.4 — Scratched, Cleaned — ANACS. Fine 15 Details.** Traditionally collected with the pattern series, the 1792 half disme is more properly considered a regular-issue. The dies were probably engraved by Robert Birch. At least 1,500 examples were struck in Samuel Harper's cellar, before the U.S. Mint officially opened. Approximately 300 specimens survive today and collectors prize examples in all grades and conditions.

The present coin offers evenly worn surfaces that retain significant amounts of mint luster, despite the noted cleaning. Attractive shades of cerulean-blue and golden-brown toning enhance the considerable eye appeal of this piece. A few deep scratches on the reverse constitute the noted damage.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 11020*

---

**1794 Flowing Hair Half Dime, XF45**  
**Three Inner Berries Beneath Wing**  
**V-4, LM-4, Sharp and Original**

**3783** 1794 XF45 PCGS. V-4, LM-4, R.4. The most common variety for the first-year Flowing Hair half dime design, it is nevertheless a very scarce and desirable example as are all 1794 survivors of this denomination. The variety is characterized by a low date on the obverse and three inner berries (with no outer berries) beneath the left (facing) wing. Apparently it is an early die state, with none of the obverse cracks described by Logan and McCloskey. The prominent reverse crack running from the rim through the D of UNITED to the eagle's breast is light and barely visible.

There are no significant abrasions to mention on this golden-gray example — the fields are remarkably clean and the devices undisturbed. Just light wear defines the grade, with strong detail remaining on Liberty's hair and the eagle's wings. A Choice example of the grade with some claims to AU. Population: 10 in 45, 87 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 22ZT, PCGS# 4250*

**1795 Flowing Hair Half Dime, XF45**  
**Popular V-5, LM-8 Variety**

**3784** 1795 XF45 NGC. V-5, LM-8, R.3. The LM-8 variety is recognized by the position of star 1 between curl 2 and 3, the letters L and B in LIBERTY spaced apart, and the branch showing no berries under the left wing. This attractive Choice XF specimen retains much interior detail on the devices, with the hair above the neck and forehead well-defined. The lightly marked surfaces are blanketed in shades of lavender-gray toning. NGC ID# 22ZV, PCGS# 4251

**1796 Draped Bust Half Dime, VF30**  
**V-1, LM-1, LIKERTY Variety**

**3785** 1796 VF30 NGC. V-1, LM-1, R.3. The date touches Liberty's curls and LI are close at the base to define this variety. Commonly described as the LIKERTY variety, the letter B is defective at the top and bottom and weakened further by die lapping — although both the LM-1 and LM-2 varieties have a defective B to one extent or another. This example is pleasantly toned in silver-gray with golden and rose accents. The eagle retains surprising detail, while the obverse is more typically worn for the assigned grade. Census: 4 in 30, 59 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 22ZW, PCGS# 4254*

**1797 Half Dime, VF30**  
**15 Stars, V-2, LM-1**

**3786** 1797 15 Stars VF30 NGC. V-2, LM-1, R.3. LM-1 is the only die pairing with the 15-Stars obverse, and it is always found with the reverse featuring an outer berry between NI of UNITED. Typical weakness of strike combined with wear have limited some of Liberty's hair detail, but the lower tresses are well-defined. Attractive, old-silver toning with charcoal gray at the margins attest to the coin's original appeal. Details on the small-eagle reverse are soft at the centers as often seen, but the strike is strong at the margins. This is an attractive, early half dime without any post-mint problems typical of those found on many mid-grade examples of this date. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 22ZZ, PCGS# 4258*

**1800 Draped Bust Half Dime, AU58  
LIBEKTY, V-2, LM-3 Variety**

**3787 1800 LIBEKTY AU58 PCGS. V-2, LM-3, R.4.** The 1800 Draped Bust half dime claims a mintage of 40,000 pieces, with four different die varieties known for the date. This coin represents the scarce LM-4 variety, with the incomplete R in the obverse legend (LIBEKTY) and the leaf joined to the left upright of the second A in AMERICA. The obverse die was used again to strike the LM-4 variety, while the reverse was used previously to coin the LM-1 and LM-2 varieties.

The present coin retains much of its original design detail, showing just a trace of actual wear. The reverse strike is typical of the issue, with some incompleteness on the central stars. The slate-gray and blue-steel surfaces are lightly abraded and traces of mint luster shine through the patina on both sides. Population: 5 in 58 (+), 14 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2326, PCGS# 4265*

**1801 Half Dime, XF40  
V-1, LM-2 Variety, Sharp Strike**

**3788 1801 XF40 PCGS. V-1, LM-2, R.4.** This LM-2 example is struck with an early state of the dies, without the massive cracks and crumbling obverse die that characterize later die states. All 1801 half dimes are scarce, yet the date is not fully appreciated for its scarcity compared to others in the series. This example is glossy and well-struck on both sides of the coin. Vestiges of a full strike are visible in Liberty's hair and especially in and around the eagle's wings on the reverse. The surfaces are glossy and reflective, richly toned with bronzelike hues, apple-green, and golden highlights. Population: 1 in 40, 18 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2327, PCGS# 4267*

**1803 Half Dime, AU50  
V-1, LM-2, Leaf Joined to C  
Large 8 Variety**

**3789 1803 Large 8 AU50 PCGS. V-1, LM-2, R.4.** While scarce, the LM-2 variety is the second-most available die pair of the date — less common than LM-3 with the leaf distant from the C in AMERICA, but more obtainable than the small 8 LM-1 rarity. This example displays colorful blue and orange-gold highlights over silver-gray surfaces, with ample hints of remaining mint luster. Light wear on the high points does not disturb a sharp strike on the devices. With a comparatively large mintage of 37,850 pieces, the 1803 half dime is a popular date for type collectors needing an example of the Draped Bust/Heraldic Eagle design.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2329, PCGS# 4269*

1805 V-1, LM-1 Half Dime, VF25  
Scarce, Final Year of the Design

**3790** 1805 VF25 PCGS. V-1, LM-1, R.4. LM-1 is the sole die marriage for this challenging early date. A low mintage of just 15,600 pieces was produced, making this the second-rarest Draped Bust half dime behind the ultra-rare 1802 issue. This moderately circulated example is well-detailed for the grade, except for reverse weakness above the eagle's right (facing) wing. The legend, clouds, and field stars are typically soft, as is Liberty's bust truncation on the opposite side of the coin. Attractive, golden-gray toning enhances silver centers. The 1805 Heraldic Eagle issue was the last appearance of a half dime until it resumed in 1829 with the Capped Bust design. Population: 3 in 25, 30 finer (1/14).

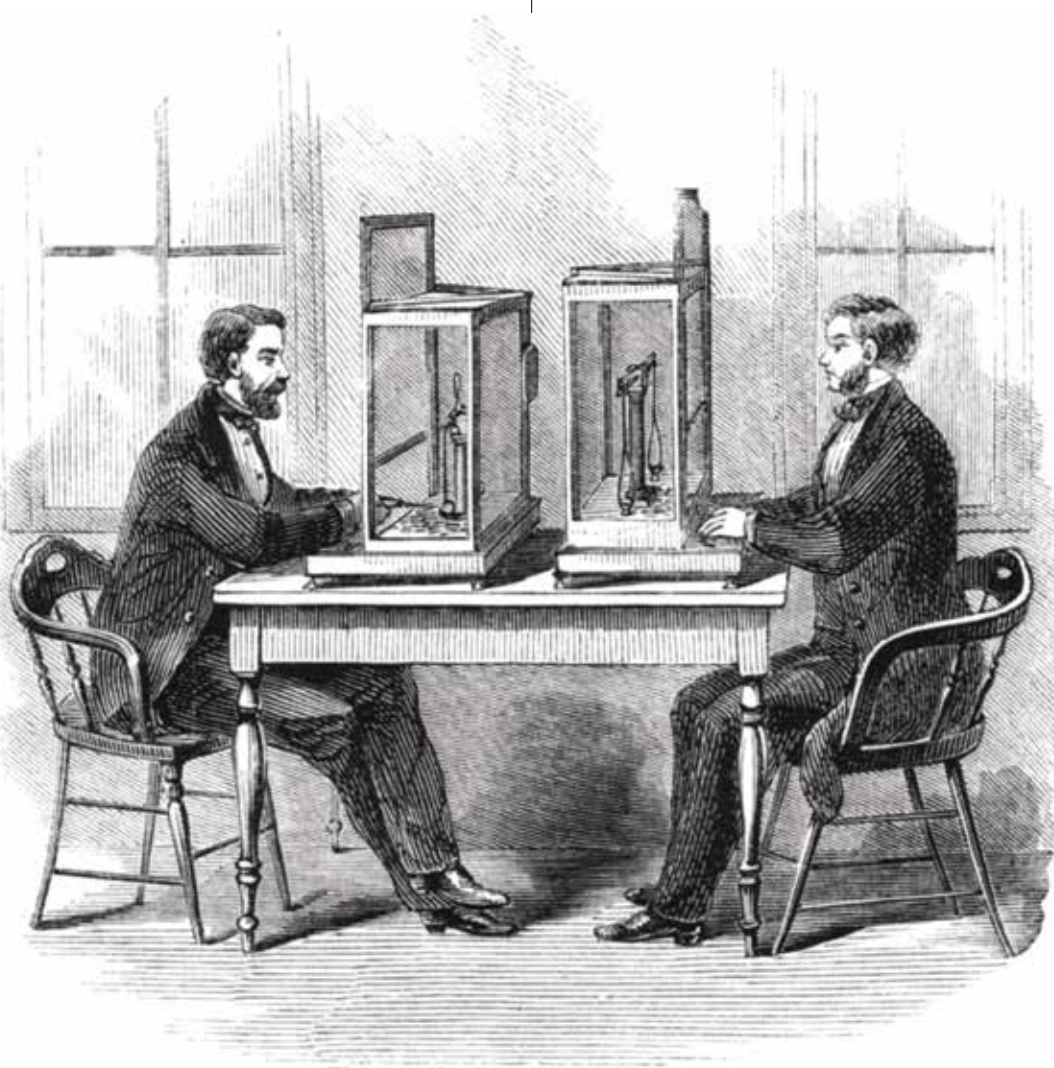

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 232A, PCGS# 4272*

BUST HALF DIME

1830 Half Dime, MS66  
V-10, LM-1.1, Scarce Die Pair

**3791** 1830 MS66 NGC. V-10, LM-1.1, R.4. Logan-McCloskey describe this early die state of the V-10 die pair as: "A scarce marriage with examples above AU difficult to locate." Although this book was written many years ago, the authors were unaware of any example of the LM-1.1 finer than AU58. We sold an MS64 coin in 2005 and another MS64 in 2010, but it appears this prooflike Premium Gem may be the finest LM-1.1 known. The fields are deeply reflective boldly mirrored. Vivid orange-gold centers merge into sky-blue margins. The strike is bold with mint frost coating the eagle's head, neck, and shield. A few tiny marks are hidden in the toning but they are neither significant nor bothersome. An incredible jewelike half dime, with few graded finer of any variety. Census: 31 in 66, 5 finer (1/14). NGC ID# 232C, PCGS# 4277

## PROOF BUST HALF DIME

### 1836 Capped Bust Half Dime, PR66 Tied for Finest Among Only Three Known Proofs V-5, LM-1, Ex: Eliasberg

**3792** 1836 PR66 NGC. V-5, LM-1, R.5. Ex: Eliasberg. Scarce as a die marriage, and extremely rare as a proof. This present piece was mentioned in Breen's *Proof Encyclopedia* (1977) as #2 within the V-5 roster. Only two other proof 1836 half dimes (of any variety) have been certified, a PR65 NGC, this NGC PR66, and a single PR66 PCGS. This splendid Premium Gem is beautifully toned in aquamarine, plum, and russet freckles. The devices are lightly frosted, and the fields exhibit strong mirrored flash. The left shield border and Liberty's forehead curls are incompletely defined, but the strike is complete elsewhere, particularly on the stars. Obverse dentils have a stretched and high relief appearance, which suggests two blows were delivered to bring up the design. This proof was struck after a quantity of business strikes, since a thread-like vertical die crack crosses the portrait, and bolder cracks bookend ED in UNITED. Later business strikes from these dies display a retained cud in this area. A seven-point list of the progression of die cracks seen on V-5 half dimes is listed in the Eliasberg catalog, and we refer interested readers to refer to that auction for more detailed information.  
Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 934, which realized \$4,400; Long Beach Connoisseur Collection (Bowers and Merena, 8/1999), lot 82; which realized \$14,950; Benson Collection Part II (Ira and Larry Goldberg, 2/2002), lot 358, which realized \$23,172; FUN Signature (Heritage, 1/2007), lot 849. NGC ID# 27CS, PCGS# 4299

## SEATED HALF DIMES

### 1838-O No Stars Half Dime, Lightly Toned MS64 Among the Few Finest Graded

**3793** 1838-O No Stars MS64 NGC. The open, cameolike design motif of the No Stars half dimes, such as this 1838-O No Stars, makes them a favorite of many numismatists, including the present cataloger. For the debut of the new silver half dimes and dimes of 1837-38, Mint Assistant Engraver Christian Gobrecht chose an uncluttered design of the new Seated Liberty motif to fill the obverse of these tiny pieces. Stars around the obverse rim were added shortly afterward on both denominations, to the detriment of the design, and the reverse of the half dime reworked. New Orleans made the No Stars half dimes only in 1838 before switching to the Stars Obverse motif in 1839, making the 1838-O a first-year branch mint type issue that has been perennially popular with collectors ever since. The 1838-O half dime mintage was only 70,000 pieces, far fewer than the 1838-O dimes at 406,000-plus coins.

This near-Gem 1838-O No Stars half dime is among the few finest survivors of this classic coinage design, tied with three other submissions each in this grade at NGC and PCGS, and only one MS66 at PCGS and one MS65 at NGC are finer (1/14). The surfaces show few contact marks on surfaces that are lightly toned pinkish-gold in the centers, ceding to pale rose, lilac, and violet near the rims with some light smoke-gray accents intermingled. A thin diagonal mark above the A in HALF is of no consequence but helps pedigree this beautiful coin.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 232N, PCGS# 4314*

### 1844 Normal Date Half Dime, Lustrous MS67 Rarer Than the Repunched Date

**3794** 1844 Normal Date MS67 PCGS. The exact population of this Normal Date variety is not known, but it is clearly much rarer than the Repunched Date version. This Superb Gem example shows radiant mint luster and crisply struck design elements throughout. The surfaces display lovely silver and light-gold toning, and a brief darker streak (grease stain, as struck) at 5:30 in the lower-right reverse quadrant. Both sides are impeccably preserved. Just 12 examples of the 1844 half dime have been graded MS67 by NGC and PCGS combined, with none finer. Population: 11 in 67, 0 finer (1/14). *Ex: Phoenix (ANA) Signature (Heritage Auctions, 3/2008), lot 366. NGC ID# 2335, PCGS# 4333*

**1844-O Half Dime, MS63  
Scarcer Medium O, V-1 Variety**

**3795 1844-O MS63 PCGS. CAC.** The 1844-O Seated Liberty half dime is one of the key issues in the series, from a mintage of 220,000 pieces. Two die varieties are known for the date, with this coin representing the scarcer V-1 variety, with a Medium O mintmark. In his series reference, Al Blythe rates the Medium O variety R.6 in Mint State.

The present coin is a delightful Select example with an unusually sharp strike for a New Orleans issue. All star centrils are complete. Attractive shades of bluish-gray, amber, and champagne-gold patina enhance the outstanding eye appeal. The pleasing surfaces show prooflike reflectivity in many areas, with only minor signs of contact. Population: 1 in 63, 4 finer (1/14). NGC ID# 2336, PCGS# 4334

**1846 Half Dime, Patinated AU53  
Seldom Seen in Any Grade**

**3796 1846 AU53 PCGS.** From a mintage of just 27,000 pieces, the 1846 Seated Liberty half dime is seldom encountered in any grade. PCGS has certified only 86 examples in all levels of preservation. Violet, electric-blue, and yellow-gold patination is slightly deeper on the obverse of this AU53 well-defined specimen. A faint, horizontal pinscratch from the shield to the left (facing) leg will help to pedigree the coin. Population: 4 in 53, 5 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2338, PCGS# 4336*

**1851 Half Dime, MS67  
Brilliant, Frosted-White Surfaces**

**3797 1851 MS67 PCGS.** An excellent coin for type collectors needing a high-grade example of the Type Two design — one that is seldom available in this Superb Gem condition. A modest mintage of 781,000 pieces has yielded just one piece with a numerically finer grade by PCGS and NGC combined (1/14). This exceptional half dime is extremely frosty and bold. It appears freshly minted and pure-white, with strong luster lurking beneath the thick mint frost. NGC ID# 233H, PCGS# 4347

**1860 Transitional Half Dime, Judd-267, MS65  
'Coin Without a Country'**

**3798 1860 Transitional MS65 NGC. Judd-267, Pollock-315, R.4.** This "nationless" coin was one of two mule types struck under Mint Director James Ross Snowden as trading material to enhance the Mint Collection. It combines the Stars Obverse design of 1859 with the reverse die from 1860, at the time that UNITED STATES OF AMERICA was being moved to the obverse — hence, "coin without a country." This silver-white, untoned Gem example is free of singular marks but softly struck on some of the upper obverse stars and Liberty's head on the obverse, and correspondingly on portions of the lower reverse wreath. Census: 15 in 65, 12 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2346, PCGS# 4373*

## PROOF SEATED HALF DIMES

### 1838 No Drapery Half Dime, PR63 Only Three Known Proofs

**3799 1838 No Drapery PR63 NGC.** There are only three known examples of the extremely rare 1838 proof half dime, as recorded below, although past estimates have suggested as many as five or six are known. This Select proof has lovely golden-violet toning over both sides, with the expected bold design motifs and fully mirrored fields. Slight weakness of the leaves below the first S in STATES is noted on this piece, and similar weakness appears on the finest known Eliasberg-Kaufman specimen. Faint hairlines and contact marks are present on this example, preventing a higher numerical grade. Our updated roster includes three distinct specimens, with two additional auction appearances.

**1. PR66 ★ NGC.** The Philip Kaufman specimen. Matthew A. Stickney (Henry Chapman, 6/1907); John M. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 5/1996), lot 943; Philip Kaufman (Heritage, 1/2008), lot 3016; FUN Signature (Heritage, 1/2014), lot 5181.

**2. PR65.** David Bullowa (5/1952), lot 1032; John Jay Pittman (David Akers, 10/1997), lot 455.

**3. PR63 NGC.** The present specimen with no prior provenance known, although see our comments at B, below.

#### Additional Appearances

**A. Proof.** Adolph Friedman, 1946 American Numismatic Association (Numismatic Gallery, 8/1946), lot 52, \$11. "With stars. No Drapery. Gem steel-blue proof. Rare." Not plated. This is possibly the Pittman Collection coin, number 2 in the roster above.

**B. Proof.** Abner Kreisberg and Hans M.F. Schulman (2/1960), lot 1110. This coin is described in the catalog as "Gem Proof, very rare" with no further details or photo. This is possibly the specimen offered here, number 3 in our roster above. PCGS# 4408

---

1844 Half Dime, Toned PR67  
The Finest Known  
Ex: Pittman-Kaufman

**3800 1844 PR67 NGC.** The 1844 proof half dime from the Phil Kaufman collection remains the finest certified specimen certified by NGC or PCGS. It is pedigreed to the John Jay Pittman Collection sold by David Akers Numismatics, Inc., October 21-23, 1997.

The Pittman coin was part of an 1844 proof set "in the original case of issue." In his description of the piece, Akers says: "In Proof, this issue is a great rarity; only 6-8 proofs are known to exist." NGC and PCGS have certified a total of 13 specimens (of course, some of these are likely resubmissions). The former service has seen a PR63, four PR64s, one PR65s, and a PR67, the Pittman-Kaufman piece *finest certified*. PCGS has graded two PR62 coins, a PR63, a PR64, one PR65 Cameo, and two PR66 pieces. Out of 14 certified submissions, we are only able to track down five different coins that have been graded by these two services.

The fully mirrored fields of this remarkable Superb Gem yield impressive contrast with the mildly frosted motifs, especially when the coin is rotated under a light. Beautiful cobalt-blue and reddish-gold toning adorns both sides, and the strike is complete throughout. The surfaces are impeccably preserved, heightening even more the coin's outstanding beauty. A tiny as-made planchet depression beneath the I in DIME and a faint linear mark between the stem and the last A in AMERICA serve to identify this particular piece. A simply amazing example of this rare proof.

Ex: Numismatic Gallery (4/1948); John Jay Pittman (David Akers, 10/1997), lot 833; Philip Kaufman. Part of Pittman's 1844 proof set; FUN Signature (Heritage, 1/2008), lot 3023. NGC ID# 235C, PCGS# 4420

---

**1850 Seated Half Dime, PR65**  
**Tied for Finest Known of This Rare Date**  
**Only Four Proofs Confirmed in All Grades**

**3801 1850 PR65 NGC.** This 1850 proof half dime, a wonderful Gem from the John Jay Pittman Collection, is an important rarity, one of only four or five known to exist. Mintage estimates range from seven to ten pieces, but just three 1850 proof half dimes have been certified, all by NGC — a PR64, the Kaufman PR65, and one other PR65.

Most known proof half dimes of the year are examples of Valentine-2, considered a proof-only variety by students of the series. Writing about this variety, Valentine notes that the 18 and 5 touch the base of the rock under Liberty. Walter Breen was apparently the first to note that examples are only known as proofs, as discussed in his supplement to the Valentine reference, published in 1958 as a closing issue of Wayne Raymond's *The Coin Collector's Journal*.

The following roster is based on the auction appearances of 1850 proof half dimes known to us:

1. **PR65 NGC.** David Bullowa (5/1952); John Jay Pittman (David Akers, 10/1997), lot 484; The Phil Kaufman Collection of Early Seated Proof Sets, Part Two / FUN Signature (Heritage, 1/2008), lot 3033. **The present coin.**
2. **PR65 NGC.** Orlando Sale (Stack's, 1/2009), lot 217.
3. **Gem Brilliant Proof, Uncertified.** Virgil Brand; New Netherlands Coin Co. (52nd Sale, 12/1958), lot 379; Goldberg Coins (2/2003), lot 303; Stack's (6/2004), lot 4194. The cataloger for New Netherlands notes the variety was unknown to Valentine, identified by the numerous parallel die scratches below and right of the date: "The only one we have seen from these dies, though about four or five other proofs are known from the dies of V-2."
4. **Proof.** Will W. Neil (B. Max Mehl, 6/1947), lot 1628; Stack's (6/1998), lot 1148.
5. **Proof.** Stack's (11/1995), lot 1162.

**Additional Appearances:**

- A. **Proof.** Valentine plate. Only the obverse is plated in Valentine.
- B. **Proof.** Heman Ely (W. Elliot Woodward, 1/1884), lot 959; John Work Garrett; Johns Hopkins University (Stack's, 3/1976), lot 109.
- C. **Proof.** Golden I (Kreisberg Schulman, 2/1962), lot 910
- D. **Proof.** Numisma (7/1954)
- E. **Proof.** NN34: 463, impaired.

Extraordinary cobalt-blue, beige-gold, and violet toning graces each side of this impressive Gem, and the strike is strong, including complete separation between Liberty's foot and the sandal. The fields are well-mirrored, and yield noticeable contrast with the motifs when the piece is tilted under a light. Nicely preserved surfaces reveal a clash mark within the M of DIME, and numerous die polish lies are visible in the fields, along with a few unobtrusive hairlines. The only identifiers we can locate are a couple of tiny marks below the cap and another to the right of Liberty's neck. An extremely rare issue, examples of which do not frequently become available for sale. PCGS# 4426

**1856 Half Dime, Richly Toned PR66  
Tied for Finest Known**

**3802 1856 PR66 NGC.** The splendid Kaufman Premium Gem ranks among the finest survivors, second best of those certified by NGC. Between 35 and 50 pieces are thought to survive today, indicative of advanced mintages in 1856 that approached 100 coins, although the exact mintage was not recorded.

The date is slightly right of center with the shield point entirely left of the 1 and the skirt pendant over the right tip of the 5. That digit is upright and weaker than the others, typical of these proofs.

Rich sea-green toning in the fields surround reddish-gold devices with specks of silver color on both sides. The strike is full with lustrous devices and deep mirrored fields under the deep toning. Census: 5 in 66, 0 finer (1/14).

Ex: Phil Kaufman Collection of Early Proof Sets, Part One / ANA Signature (Heritage, 8/2007), lot 1793. NGC ID# 235L, PCGS# 4434

**1859 Seated Liberty Half Dime, PR67  
None Finer at PCGS**

**3803 1859 PR67 PCGS. CAC.** Only 800 proof Seated Liberty half dimes were struck in 1859. A new obverse hub was used, with larger stars, according to Daniel Valentine. Valentine identified two die varieties for the 1859 half dime, with the proofs struck from the V-1 dies. Valentine's V-1 showed repunching on the numerals 1, 5, and 9 in the date. Al Blythe later noted two more varieties for the date and reclassified the V-1 variety as V-3. Walter Breen followed Valentine's nomenclature in his *Encyclopedia of United States and Colonial Proof Coins*, but he noted that proofs were also struck from the V-2 dies.

The present coin represents the V-1 variety (Blythe's V-3), with repunching on three numerals in the date. The repunching is most evident on the 1, with the 9 fainter, and the 5 barely detectible. The design elements are sharply detailed and the well-preserved fields are deeply reflective. Vivid shades of greenish-gold and cobalt-blue toning add to the exceptional eye appeal. Population: 4 in 67, 0 finer (1/14). NGC ID# 235P, PCGS# 4438

1868 Half Dime, PR66+ Deep Cameo  
Sole Finest at PCGS

- 3804** 1868 PR66+ Deep Cameo PCGS. CAC. This glittering little jewel of a half dime show untuned surfaces with a needle-sharp proof strike throughout. The deep field-device contrast creates the desired silver-on-black appearance as the coin is rotated under a light. A total of 600 proofs were struck of this issue, but this piece is the single finest-graded example. Population: 3 in 66 (1 in 66+) Deep Cameo, 0 finer (1/14). PCGS# 94451

1873 Half Dime, PR67  
Final Year of Issue

- 3805** 1873 PR67 PCGS. Half dimes were discontinued in 1873 as the Shield nickels took their place. The proof mintage was a mere 600 coins. This Superb Gem is tied for the finest non-cameo example that PCGS has certified, along with a single PR67 Cameo example (1/14). None have been graded numerically finer. This example has gorgeous blue and iridescent toning over deeply mirrored fields with masked cameo contrast. Population: 5 in 67, 0 finer (1/14). NGC ID# 236A, PCGS# 4456

EARLY DIMES

1796 JR-4 Dime, AU53  
Traces of Luster Remaining

- 3806** 1796 AU53 PCGS. CAC. JR-4, R.4. The TY in LIBERTY touch at the peak of the letters, and the first star is distant from the curls. A pair of berries below the upright of the E in UNITED further confirms this scarce die marriage.

Whispers of purple, electric-blue, and golden-brown patina concentrate at the margins of this AU53 example with CAC approval, somewhat more extensive and deeper in hue on the reverse. The central reverse is silvery, while the obverse reveals traces of light tan. Liberty's hair and drapery exhibit sharp definition, as do most of the eagle's wing and tail feathers. The design features are well-centered on the planchet, and all of the dentilation shows on both sides. The surfaces retain traces of luster in the recesses and are only lightly marked.

Ex: FUN Signature (Heritage, 1/2009), lot 3671.

From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236B, PCGS# 4461

1797 Draped Bust Dime, XF40  
JR-1, 16 Stars Variety

- 3807 1797 16 Stars XF40 NGC. JR-1, R.4.** Only two die varieties of 1797 Dimes are known, both are rare. The 16 obverse stars was the first struck; mint officials apparently decided that it was unwieldy to represent each state in the growing Union with a star, and reverted to 13 obverse stars for the later JR-2 strikings. Deeply toned in olive-brown and gunmetal-gray colors, traces of golden mint luster remain. The underlying surfaces have old-silver appeal and are moderately but not heavily marked. A popular collector grade that is difficult to locate with the eye appeal of this coin. Census: 3 in 40, 33 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236C, PCGS# 4462*

1797 Draped Bust Dime, XF40  
Elusive 13 Stars, JR-2 Variety

- 3808 1797 13 Stars XF40 PCGS. CAC. JR-2, R.4.** The 1797 Draped Bust dime is an underrated issue, much more difficult to locate than its mintage of 25,261 pieces would suggest. Researchers believe 10,244 pieces of the reported mintage were actually dated 1796, explaining the relative scarcity of the 1797 issue. The 1796 and 1797 Draped Bust dimes represent a short-lived design type, as they are the only dates to feature the Small Eagle reverse. Two die varieties are known for the date. This coin represents the scarcer JR-2 variety, with 13 obverse stars instead of the 16 star motif used on JR-1.  
The present coin is an attractive XF specimen that retains much of its original design detail and mint luster. The lightly abraded surfaces are blanketed in shades of champagne-gold and lavender-blue patina, with outstanding eye appeal. The 1797 Draped Bust dime is especially elusive in high grade. Population: 1 in 40, 9 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236D, PCGS# 4463*

1798/97 Draped Bust Dime, MS63  
Popular 16 Stars Reverse, JR-1 Variety

**3809** 1798/97 16 Stars on Reverse MS63 NGC. JR-1. R.3. The 1798 Draped Bust dime is the first date to feature the Heraldic Eagle reverse, an important consideration for type collectors. A respectable mintage of 27,550 dimes was achieved in 1798, with four die varieties known for the date. This coin represents the popular *Guide Book* overdate variety, JR-1, with 16 stars on the reverse.

The present coin is a delightful Select specimen, with well-detailed design elements that show a touch of the typical softness on the centers. The pleasing surfaces display an attractive mix of golden-brown and lavender-gray toning and only scattered signs of contact are evident. Census: 9 in 63, 13 finer (1/14).

From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236F, PCGS# 4468

1800 Draped Bust Dime, AU58  
Very Scarce JR-1 Variety

**3810** 1800 AU58 PCGS. JR-1, R.4. The 1800 is a much better Heraldic Eagle date with only two die marriages, both of which are very scarce to rare. JR-1 usually has a slender cud that joins the left (facing) wingtip to the rim, which distinguishes it from JR-2. An example with considerable mint luster is a prize, since a majority of dimes from this era are well circulated. The present coin is also intricately struck, without any softness on the stars above the eagle. Liberty's cheek and shoulder display light wear, and the only remotely mentionable mark is a brief thin line above the branch stem. Moderately toned in gunmetal-gray shades that deepen slightly across the borders. Population: 5 in 58, 8 finer (1/14).

Ex: Orlando FUN Signature (Heritage, 1/2009), lot 2124.

From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236H, PCGS# 4470

**1804 Draped Bust Dime, AU Details  
14 Stars Reverse, JR-2**

- 3811 1804 14 Stars on Reverse — Stained — NGC Details. AU. JR-2, R.5** The 14 Stars reverse and the 13 Stars reverse were both used for 1804 dimes and quarter eagles. Both varieties of dime and the 13 Stars quarter eagle are rarities, and even the 14 Stars quarter eagle is elusive, regardless of grade. This example has modest surface roughness with unusual brown and gray coloration that suggests it may have once been buried. However, it is extremely sharp for an 1804 dime, and would rank high in the Condition Census if the surfaces were smooth and original. Here is an extremely important opportunity for the early dime collector, as few have an 1804 dime in any grade.  
*Ex: Chicago Platinum Night (Heritage, 8/2011), lot 7071, which realized \$18,400.*  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**BUST DIMES**

**1809 Capped Bust Dime, JR-1, MS64  
Few Available Finer**

- 3812 1809 MS64 NGC. JR-1, R.4.** The 1809, 1811, and 1822 Capped Bust dimes have the lowest reported mintages of the series and are generally considered the most difficult to find, especially in Select or better Uncirculated grades. Of these, the 1809 has the lowest mintage with 44,710 pieces delivered in 1809 and an additional 6,355 pieces in 1810 for a total of 51,065 for the date. It is arguably as rare in near-Gem and Gem conditions as the 1822 dime and is rarer than the 1811 issue or the 1807 Draped Bust dime in high Mint State grades.

This example is a brilliant, frosted coin with plentiful mint luster and a touch of golden-gray toning near the rims. Known for a strong strike in the centers, the 1809 is often found weak on the stars and dentils on the obverse and with peripheral weakness at UNITED on the reverse. The current example is boldly struck in these areas. Only minor flatness exists in a few of the stars and UNITED is bold — an important attribute when considering this condition rarity. Census: 4 in 64, 4 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236U, PCGS# 4486*

**1811/09 Dime, MS64  
JR-1, Brilliant and Frosted  
Late Die State**

- 3813 1811/09 MS64 NGC. JR-1, R.3.** The only dies for this scarce date. Well-struck save for the first four stars and surprisingly devoid of marks. Both sides offer impressive luster, with that of the reverse slightly more powerful. Struck from a late die state with bold clash marks, a reverse rim break at 2:30, and a network of fine die cracks across the eagle from the shattered reverse die. Census: 4 in 64, 7 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 236V, PCGS# 4487*

---

### 1823/2 Capped Bust Dime, MS64

JR-1, Small Es Variety  
Vivid Toning Accents

- 3814** 1823/2 Small Es MS64 NGC. JR-1, R.3. Three varieties of 1823 Dimes are known, and all are from overdated 1822 obverse dies. This is the easily identified Small Es variety, now a listed *Guide Book* variety (as is the Large Es type). Rose, neon-blue, and a touch of forest-green colors illuminate this sharply struck Bust Dime. The lustrous fields are surprisingly unmarked, and only a wispy vertical abrasion on the portrait and some mint-made roughness on the chin preclude a higher grade. The obverse fields display considerable prooflike flash. Census: 20 in 64 (1 in 64+), 11 finer (1/14). From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2372, PCGS# 4498

---

### 1827 JR-12 Dime, MS64

- 3815** 1827 MS64 PCGS. CAC. JR-12, R.1. This plentiful variety is encountered from time-to-time in higher grades, so the present example is an excellent candidate for a date or type collection. Both sides of this Choice Mint State piece have light champagne toning at the center, changing to gold, violet, and blue at the borders. A lovely example with satiny silver luster shining through the toning. Population: 53 in 64 (1 in 64+), 17 finer (1/14), for all 1827 varieties. NGC ID# 2375, PCGS# 4504

---

### SEATED DIMES

1846 Dime, Toned AU50  
Low-Mintage Issue

- 3816** 1846 AU50 PCGS. The 1846 dime is the lowest-mintage Stars Obverse Seated dime (31,300 circulation strikes), considerably less than its more famous 1844 relative, the "Little Orphan Annie." The 1846 is rare in XF and finer, and Mint State pieces are virtually unobtainable. Grayish-lavender and russet toning runs over the remarkably clean surfaces of this AU50 example. The design elements are well-defined, including Liberty's head, a feature that is often weak. Population: 5 in 50, 11 finer (1/14). From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 238D, PCGS# 4588

---

1857-O Dime, MS66  
Needle-Sharp Strike, Top-Notch Example

- 3817** 1857-O MS66 PCGS. A blush of pale rose and ice-blue patina touches the obverse of this Premium Gem 1857-O half dime, while the reverse shows no more than a trace of color. The strike is needle-sharp, producing full centrils on all the radial stars and good detail on Liberty's profile and gown. A top-notch example of this large dime mintage of more than 1.5 million pieces. Population: 8 in 66 (1 in 66+), 2 finer (1/14). NGC ID# 238Y, PCGS# 4615

---

1873-CC Arrows Dime, Fine 12  
Key Seated Dime Issue

- 3818** 1873-CC Arrows Fine 12 NGC. A key issue in the Seated dime series, the 1873-CC is always actively sought with problem-free surfaces in any grade. This Fine 12 example is such a coin, free of major marks and merely showing extensive wear consistent with the grade. The surfaces range from charcoal-gray in the fields to lighter silver-gray on the devices, and the major types are all clear and well-impressed, including the arrows at the date and the crucial mintmark. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23BH, PCGS# 4666

## PROOF SEATED DIME

1865 Seated Dime, Fortin-102  
PR66 Cameo

- 3819** 1865 PR66 Cameo NGC. Fortin-102. A die scratch above the shield and die rust in the lower part of the shield and drapery identify this proof Seated dime die. Collectors seeking an 1865 dime with a high numerical grade will want to consider a proof example, as business strikes are elusive. This Premium Gem Cameo proof has delicate peripheral blue and iridescent toning with excellent field-to-device contrast. Census: 2 in 66 Cameo, 3 finer (1/14). PCGS# 84758

## BARBER DIME

1895-O Barber Dime Error, MS64  
Spectacular Obverse Die Cap

- 3820** 1895-O — Obverse Die Cap — MS64 PCGS. The 1895-O is the lowest mintage issue in the entire Barber dime series, except for the essentially uncollectible 1894-S. Because of its early date and its stingy production run, the 1895-O is rare in Mint State, and only a few dozen pieces are certified as such. But it is certain that no other Uncirculated 1895-O resembles the present piece. After its initial and normal strike, the piece stuck to the obverse die. The press continued to operate, and planchets were fed in one after another, with each piece struck between the reverse die and the present die cap. Heaven knows where those brockages are today, but none can be identified as an 1895-O, because the obverse design was blocked by the die cap. The additional strikes this die cap received caused the obverse to wrap around the die. The portrait is razor-sharp, while the denticles are transformed into a blurry series of lines. The reverse design is spread but remains clear, and this includes the all-important New Orleans mintmark. The cap is several millimeters high, and if it were any higher, it would not fit within the standard PCGS holder. The piece is evenly toned in dappled sea-green, plum-mauve, and golden-brown shades. Faint clash marks appear near Liberty's chin, but there are no post-strike abrasions, and in fact one wonders why the piece failed to receive an even finer grade. Fortunately for posterity, the press operator took the time to carefully remove the die cap, and its succession of owners gave equal care to its storage and handling. Any undamaged Barber dime cap in Mint State would be a major error find, and nearly impossible to duplicate. But for an essentially pristine die cap to exist on an 1895-O is a remarkable occurrence, and will surely be the talk of the Barber collector community.  
*Ex: Orlando Signature (Heritage, 1/2007), lot 880.*

---

## PROOF BARBER DIME

---

1896 Dime, PR68 Ultra Cameo  
Excellent All-Around Quality

- 3821** 1896 PR68 Ultra Cameo NGC. Excellent contrast between amply frosted central devices and the gleaming silver of the surrounding fields. This minimally contrasted Ultra Cameo coin is among the best dime survivors from one of the most-praised years for proof production, 1896. Census: 1 in 68 Ultra Cameo, 0 finer (1/14). PCGS# 94880
- 

## MERCURY DIMES

---

1916-D Mercury Dime, XF40  
First-Year Series Key

- 3822** 1916-D XF40 NGC. The 1916-D Mercury dime is a low-mintage key from the first year of the design. This attractive XF40 example shows light wear on the diagonal bands, but the braids and hair before the ear remain visible. The lightly abraded surfaces display shades of pale blue and green toning. NGC ID# 23GY, PCGS# 4906
- 

---

1916-D Mercury Dime, AU50 Details  
Sought-After Low-Mintage Key

- 3823** 1916-D — Cleaned — ANACS. AU50 Details. Delicate shades of pink and pale gold patina blanket the lightly abraded surfaces of this still-attractive key Mercury dime. The design elements are lightly worn but the mint luster is subdued, due to the effects of cleaning. From a tiny mintage of 264,000 pieces.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*
- 

1916-D Mercury Dime, AU55  
Great Luster and Eye Appeal

- 3824** 1916-D AU55 PCGS. This Choice AU example of the perennially popular 1916-D offers many of the attributes of a Mint State piece at a more reasonable price. Essentially all of the mint luster remains in the fields on this snow-white, frosty, untuned piece, although a touch of rub is visible, as expected, over the high points of each side. There is no sign of mentionable contact, save for one curving mark on Liberty's cheek; otherwise, just a few scattered, insignificant ticks appear. A bold strike complements great eye appeal. NGC ID# 23GY, PCGS# 4906
-

**1916-D Dime, AU58 Full Bands  
Richly Toned and Lustrous**

**3825 1916-D AU58 Full Bands PCGS. CAC.** Though modestly rubbed, this 1916-D dime retains considerable luster beneath attractive indigo, peach, and silver-gray patina. It also has clear separation of the bands across the fasces. While the Denver Mint struck eight figures' worth of cents and nickels in 1916, only quarters received a multi-million mintage there that year. The Walking Liberty half dollar saw an output of only 1,014,400 pieces, while the 1916-D Mercury dime, which did not go into production until November, has become a famous key date for its mintage of a mere 264,000 coins. NGC ID# 23GY, PCGS# 4907

**1917-D Mercury Dime, MS65 Full Bands  
Pastel Toning Accents**

**3826 1917-D MS65 Full Bands PCGS. CAC.** Scarce in this Gem Uncirculated condition from a low mintage of 9.4 million pieces, this early-date Mercury dime displays exceptional eye appeal and a bold strike including Full Bands. There are no significant abrasions to distract from the lustrous turquoise and golden-rose toning. Population: 38 in 65 Full Bands, 8 finer (1/14). NGC ID# 23H3, PCGS# 4913

**1920-S Dime, MS66 Full Bands  
Conditionally Elusive Issue**

**3827 1920-S MS66 Full Bands PCGS. CAC.** The obverse of this Premium Gem Full Bands 1920-S dime is largely untoned, although there are some subliminal accents of the palest pink and ice-blue present under magnification and a good light. The reverse shows slightly deeper pinkish-gray and smoky color with a dab of medium blue. Both sides are essentially free of marks and quite well-struck, the crucial central bands showing both bold separation and rounding. One of the elusive semikey issues in the Mercury dime series. This appears to be the first example we have handled in this grade with the added CAC approval. Population: 8 in 66 Full Bands, 3 finer (1/14). NGC ID# 23HD, PCGS# 4933

**1929-S Dime, MS67 Full Bands  
None Finer at PCGS**

**3828 1929-S MS67 Full Bands PCGS.** The surfaces on each side are essentially untuned and virtually free of abrasions, putting this piece into a small minority of the issue of more than 4.7 million coins. PCGS has seen a few dozen submissions, including duplications, and none are finer than the present MS67 Full Bands example (1/14). NGC ID# 23J4, PCGS# 4977

---

**1929-S Dime, MS67 Full Bands  
Excellent Eye Appeal**

- 3829 1929-S MS67 Full Bands PCGS. CAC.** The 1929-S Mercury dime can be located in most grades through Gem, even with Full Bands. Premium Gems are scarce, however, and MS67s are rare. The lustrous, silver-white surfaces of this Superb Gem are impeccably preserved. A solid strike transcends the Full Bands to yield bold definition on all the design elements. Excellent eye appeal, appropriately recognized by CAC. Population: 41 in 67 Full Bands, 0 finer (1/14). NGC ID# 23J4, PCGS# 4977

---

**1934 Dime, MS68+ Full Bands  
Single Finest Certified at PCGS**

- 3830 1934 MS68+ Full Bands PCGS.** The 1934 Mercury dime issue is somewhat similar to its Lincoln cent counterpart, made in generous quantity but a rarity in the higher Mint State grades. More than 24 million business strikes were produced, but this MS68+ Full Bands example is currently the sole finest graded at PCGS. The surfaces on this piece are sharply struck and impeccably preserved, as expected; a light wash of gold and pale ice-blue appears under a loupe and a good light, but this coin basically presents as untoned. The weakness on the 4 in the date is die fatigue and does not affect either the eye appeal or the technical grade. Close to perfection. Population: 21 in 68 (1 in 68+) Full Bands, 0 finer (1/14). NGC ID# 23JA, PCGS# 4989

---

**1940 Mercury Dime, MS68+ Full Bands  
Finest Certified at PCGS**

- 3831 1940 MS68+ Full Bands PCGS. CAC.** With a large quantity of dimes produced in 1940, one might expect a similar large number of high-grade coins to be known today. However, 27 pieces (minus resubmissions) is not a large number compared to the more than 65 million coins produced. Many were struck with obvious signs of die failure, and large numbers were produced with the dies set too far apart, thus producing weak strikes. This example shows neither of those often-seen problems. In addition to the wonderful mint luster, each side is covered in deep multicolored shadings that greatly enhance the appearance of this dime. For those seeking the ultimate toned Mercury dime for type purposes, this would fit nicely. Population: 27 in 68 (2 in 68+) Full Bands, 0 finer (1/14). NGC ID# 23JU, PCGS# 5023

---

**1942/1 Dime, Well-Struck MS64**

- 3832 1942/1 MS64 PCGS. FS-101.** Among the keys to the series, this hubbing error is recognized by the overlapping last numerals in the date. Soft champagne-gold patina makes occasional visits to the lustrous surfaces of this near-Gem. The design elements are well-struck, including the middle bands that are a tad short of full. Population: 20 in 64, 10 finer (1/14). NGC ID# 23K4, PCGS# 5036

---

**PROOF MERCURY DIME**

---

**1937 Mercury Dime, PR68  
All-Brilliant Finish**

- 3833 1937 PR68 PCGS.** Only 5,756 proof Mercury dimes were struck in 1937, the second year of the Mint's renewed proof offerings. The present coin is a magnificent PR68 specimen, with pinpoint definition on all design elements and a reflective, all-brilliant finish. A few wisps of pale green and ice-blue toning accent the surfaces. Population: 27 in 68, 0 finer (1/14). NGC ID# 27DH, PCGS# 5072

## ROOSEVELT DIME

1963 Dime, MS67+ Full Bands  
Lightly Toned and Impeccably Preserved

- 3834 1963 MS67+ Full Bands PCGS.** The mintage of the 1963 Roosevelt dime was an enormous 123 million-plus pieces, but most certified examples are no better than Gem condition due to small surface marks, as a rule. This MS67+ PCGS piece is tied for the finest at that service with one other, showing impeccable preservation on surfaces that show lovely pale blue and lilac patina on each side. Population: 5 in 67 (2 in 67+) Full Bands, 0 finer (1/14). NGC ID# 23LY, PCGS# 85126

## PROOF TWENTY CENT PIECES

1877 Twenty Cent Piece  
Sharply Struck PR63 Cameo  
Proof-Only Date

- 3835 1877 PR63 Cameo NGC.** From a proof-only mintage of 510 pieces, the 1877 twenty cent piece is difficult to acquire with a Cameo designation. The mirrored fields of this Select specimen highlight the design elements, all of which exhibit a sharp strike. Neither side reveals mentionable contact marks. Very pleasing eye appeal for the designated numerical grade. Census: 10 in 63 Cameo, 54 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 85305*

1878 Twenty Cent, Boldly Struck PR63 Cameo

- 3836 1878 PR63 Cameo NGC.** The mint struck only 600 proof twenty cent pieces in 1878, the last year of the denomination and a proof-only issue. The design features are boldly struck and appear to float over the mirrored, glassy fields. Both sides are essentially untuned and nicely preserved. Census: 9 in 63 Cameo, 42 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 85306*

## EARLY QUARTERS

1796 Quarter, VG Sharpness  
Better B-1 Variety

- 3837 1796 — Damage — PCGS Genuine. VG Details. B-1, R.4.** The rarer of the two die marriages known for this challenging type coin. 1796 is the only quarter date with a Small Eagle design, and ranks as one of the most desirable silver types, along with its half dollar counterpart. Deeply iridescent lavender-red, apple-green, and powder-blue patina blanket the present example. The peripheral stars and letters are mostly bold though UNI and the top of OF have faded. Designated by PCGS as Damage, but collectors may decide that the abrasions near the 17 in the date, along with a few other scattered tiny digs, are acceptable for the VG level. NGC ID# 23RA, PCGS# 5310

**1796 B-2 Quarter Dollar, Well-Defined VF30  
An Important One-Year Type Coin**

**3838 1796 VF30 PCGS. B-2, R.3.** The B-2 variety shows star 15 slightly farther away from the bust than on the B-1. Also, the 6 in the date is high and nearly touches the bust, and the upper-left serif of the Y in LIBERTY is slightly above the upper-right serif of the T. The 1796 quarter dollar is an important coin for several reasons. First, it is the first year in which the quarter denomination was minted. Second, it is the only year that the Draped Bust Small Eagle design was used on the denomination, making it an important one-year type coin. And third, it claims a relatively low mintage of 6,146 pieces.

This VF30 offering displays a medley of reddish-brown, lavender, and yellow-gold patination. Relatively strong definition is apparent on the design elements, including Liberty's hair strands, eye, and ear, most of the eagle's wing and tail plumage and the talons on the right (facing) leg, and the clouds. The surfaces are fairly clean for a coin that has seen moderate circulation. A planchet depression through NIT of UNITED will help to pedigree the coin.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23RA, PCGS# 5310*

**1804 Draped Bust Quarter, VF25  
Key Date, B-1 Variety**

**3839 1804 VF25 PCGS. B-1, R.3.** The more available of two 1804 quarter varieties for the year, distinguished by an obverse that shows a gap between the 4 in the date and the truncation of the bust. A die gouge is also visible between stars 8 and 9.

After a seven-year hiatus, quarter production resumed in 1804, this time with a Heraldic Eagle reverse. With only 6,738 coins struck, 1804 is the key-date of this four-year series.

Light silver-gray patina in the central areas transitions to deep electric-blue and lavender at the margins of this VF25 example. The design elements are better defined than ordinarily seen on the type, particularly the rims and shield, features that are usually weak. Both sides are pleasing for the grade, though some diagonal marks on the upper part of the eagle are mentioned for complete accuracy. Population: 15 in 25, 34 finer (1/14).

*Ex: FUN Signature (Heritage, 1/2009), lot 3709.*

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23RB, PCGS# 5312*

1807 Draped Bust Quarter, MS63  
B-1 Variety, Stars 1 and 2 Distant

**3840** 1807 MS63 PCGS. B-1, R.2. The obverse of this B-1 variety quarter shows none of the die cracks or die lapping of later die states, so this coin is considered struck from a perfect state of the dies. More than 220,000 pieces were produced in two die pairings, with this die pair slightly more common than the B-2 variety.

Toning on the coin is outstanding. Pastel hues of lilac, aqua, pink, and lavender mix with gold on the obverse. The reverse displays a luminous golden sheen with green, lilac, and silver-gray margins. Soft mint luster gleams from the surfaces beneath the attractive toning. A typical uneven strike results in a touch of weakness at the centers on Liberty's hair and on a few of the reverse field stars, but the strike is strong in all other areas. Nominal abrasions are widely scattered and visible only with a glass. This attractive, Select Mint State early quarter ranks among the top 15 or so known of the B-1 variety. Housed in an earlier generation green label holder. Population (both varieties combined): 15 in 63, 14 finer (1/14). NGC ID# 23RE, PCGS# 5316

BUST QUARTERS

1821 Capped Bust Quarter Dollar, B-3, MS64  
Condition Census for Variety

**3841** 1821 MS64 NGC. B-3, R.3. Die State a. Deep purple, golden-brown and apple-green toning blankets this intricately struck representative. The obverse fields are distinctly prooflike. Prominent die lines near stars 2 and 3 are as made, and diagnostic evidence of die clash is confirmed by bars at the ear. Light marks beneath the eye will be missed by most. Struck from lightly rusted reverse dies between 2 and leaves. This example is the sixth finest 1821 B-3 quarter, according to the Rea-Koenings-Haroutunian Census published in *Early Quarter Dollars of the United States Mint*. NGC ID# 23RM, PCGS# 5331

**1823/2 Bust Quarter, Good Details  
B-1 Variety, Census Plate Coin  
Rea-Tompkins-Davis-Logan Census**

- 3842 1823/2 — Damaged, Whizzed — ANACS. Good 4 Details. B-1, R.6.** A succinct summary from the comprehensive reference, *Early Quarter Dollars Of The United States Mint*, by Rory R. Rea, Dr. Glenn Peterson, Bradley S. Karoleff, and John J. Kovach, Jr. says it all about the rarity of the 1823/2 quarter: "The Mint records a mintage of 17,800 quarters for the year. Most are either dated with previous years or were melted, contributing to the rarity of the issue. There appears to be fewer than 35 known in all grades, making this one of the most desirable examples in the entire quarter series. Only the most advanced collections [sic] can hope to include one in their personal cabinets."

While not a high-grade piece, the present example is a known Census coin ranking 27th out of 30 listed. It is plated in the Rea et al. reference on page 178 of that comprehensive, helpfully illustrated roster. Steel-gray toning appears natural and pleasing, although the coin was once whizzed (but not excessively so). The ANACS holder notes damage, which consists of two small, semicircular obverse marks sequentially applied, one shallow and the other somewhat deeper.

Specialists of the Capped Bust quarter series always take note when an example of the 1823/2 is available. Because altered-date examples exist, certification and pedigree are important even for lower-grade pieces. The current example has an impressive pedigree, including Rich Uhrich, Larry Blackwelder, Jim O'Donnell, and dealer Jonathan Kern. It came out of Stack's Robison auction in February 1982 as lot 1280.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23RP, PCGS# 5334*

**1824/2 B-1 Capped Bust Quarter, XF40  
Lightly Toned, Nice Eye Appeal**

- 3843 1824/2 XF40 PCGS. CAC. B-1, R.3.** The B-1 variety is the result of a single die pairing for the 1824 quarter. As a result, all examples display the overdate, with the bottom loop of a 2 showing below the foot of the 4. In addition, both loops of the 8 in the date are repunched. This example is lightly toned with silver-gray surfaces, golden-gray color near the rims, and sharply struck devices. Traces of mint luster remain. An attractive quarter from the mid-1820s overdate sequence, CAC-Approved for quality and eye appeal. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23RR, PCGS# 5335*

**1828 B-4 Quarter  
MS62 Prooflike**

- 3844 1828 MS62 Prooflike NGC. B-4, R.3.** Most easily attributable by the low F in OF. The B-4 is scarce and proofs were struck from these dies. Thus, one may assume that after the proofs were produced it took a number of strikings for the heavy die polish to wear off, which resulted in the finish seen on this coin. The fields are extraordinarily deep and well-matched from side to side. The obverse shows rich peripheral rose and royal blue toning, while the reverse is much lighter in hue. Sharply defined throughout. NGC ID# 23RV, PCGS# 5342

**1828 Quarter, MS62 Prooflike  
Deep-Mirrored Fields**

- 3845 1828 MS62 Prooflike NGC. B-1, R.1.** Scarce in any Mint State grade from a mintage of 102,000 pieces, the 1828 quarter is seldom seen with prooflike qualities and NGC has certified just two others in prooflike format (1/14). Luminous, almond-gold toning covers the mirrored surfaces of this sharply struck quarter. The coin is minimally abraded with no significant marks or distractions for the grade. It is the B-1 variety, defined by the closeness of star 1 to Liberty's bust and several repunched obverse stars. A curled 2 is diagnostic as part of the denomination. NGC ID# 23RV, PCGS# 5342

**1828 B-4 Quarter, MS63 Prooflike**  
**Ex: Jules Reiver Collection**

- 3846 1828 MS63 Prooflike NGC. B-4, R.3.** Although this is not a particularly rare coin, it is remarkable for its exceptional quality. The variety is quite rare in any Mint State grade, and only two or three prooflike examples exist. In addition, perhaps eight or nine Proofs are known. Although the surfaces have a few faint hairlines, and the reverse has a few tiny nicks, this is a lovely coin with exceptional aesthetic appeal. It should prove to be a treat to the connoisseur. It is sharply struck and has fully mirrored fields surrounding all the devices. The junction between fields and devices is precisely defined. Both surfaces have light ivory color at the centers, with vivid blue and green toning near the borders. Some who have viewed this coin have questioned why it is not a proof. In fact, it meets nearly all of our qualifications for an early proof coin, although others are known to show this similar reflective mirror field surface on the obverse and reverse. Great quality regardless of the actual minting status.

*Ex: Windsor Collection (Quality Sales, 11/1981), lot 979; Jules Reiver (Heritage, 1/2006), lot 22417. NGC ID# 23RV, PCGS# 5342*

**1831 B-1 Bust Quarter, MS64**  
**Maximum Quality for the Grade**

- 3847 1831 Small Letters MS64 PCGS. B-1, R.3.** The first year for a smaller, thicker planchet, the 1831 issue had a Mint production of 398,000 pieces. This example is the B-1 variety, Die State a, with the date positioned to the left away from Liberty's lowest curl and the eagle without a tongue. It is a glowing, near-Gem coin with outstanding, multicolor toning and impressive mint luster. Copper-gold base toning is complex and beautiful with magenta and green overtones on the obverse. Flashy orange-gold reverse toning displays olive, magenta, and blue accents. A sharp strike boldly renders the eagle and Liberty's curls. This is a high-end MS64 example with virtually no distractions — a borderline Gem. Housed in a previous generation, green-label holder. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23RW, PCGS# 5348*

**1838 B-1 Quarter, MS64**  
**End of Capped Bust Type**

- 3848 1838 MS64 NGC. B-1, R.1.** The final die variety before replacement by the Seated type. The dusky obverse has a tan-brown and silver-gray center framed by forest-green and lilac-red. The reverse is flashy and lightly toned despite peripheral peach patina. A well preserved and satiny near-Gem. Census: 18 in 64 (1 in 64+), 6 finer (1/14).

*Ex: New York Signature (Heritage, 7/2002), lot 7790; Fred Miller Collection (Heritage, 3/2004), lot 5631. NGC ID# 23S5, PCGS# 5357*

**SEATED QUARTERS**

**1846 Quarter Dollar, Conditionally Rare MS64**

- 3849 1846 MS64 PCGS. Briggs 2-D.** Recutting shows south of the original date on the 46, with the knob of the undertype 6 filling the space between the knob of the subsequent 6 and its inner top circle. The obverse also shows several peripheral die cracks that are diagnostic of this variety, as well as heavy die polish lines from the upper-right side of the shield into the gown. On the reverse a long, a spindly die crack runs through ITED STAT, to the top of E(S), to the base of OF AMER, upward through ICA to terminate at the rim above the last A.

The 1846 quarter is scarce through About Uncirculated and rare in Mint State. Indeed, Briggs rates Uncirculated coins R.6. This near-Gem exhibits sharply struck design elements and lustrous lightly toned surfaces. A couple of indents that are visible in the upper-central part of the reverse shield will help identify the coin. Population: 1 in 64, 3 finer (1/14). NGC ID# 23SW, PCGS# 5409

---

**1851-O Quarter, MS61**  
**Low-Mintage, Heavily Melted Issue**

- 3850 1851-O MS61 NGC.** An issue that is seldom offered in any grade, the 1851-O is a low-mintage (88,000 pieces), pre-1853 quarter that saw widespread melting during the California Gold Rush era. This is the only NGC-certified coin in this grade, and only two are finer (1/14). This interestingly toned example is colored in competing cobalt-blue, pink, and antique-gold shades with a few swaths of silver-brilliance interspersed on the reverse. The strike is (typically) not full, but every major feature is well-detailed. This is a semiprooflike example with well-concealed, grade-limiting bagmarks sprinkled over both sides.  
*Ex: ANA Signature (Heritage, 8/2001), lot 5882.*  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23T7, PCGS# 5418*

---

**1853-O Seated Liberty Quarter, AU58**  
**One-Year Arrows and Rays Type**

- 3851 1853-O Arrows and Rays AU58 PCGS.** An attractive near-Mint representative of the one-year Arrows and Rays design, this coin shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces are brightly lustrous, with a few areas of prooflike reflectivity around the date. Population: 5 in 58, 10 finer (1/14). NGC ID# 23U5, PCGS# 5428

---

**1860 Seated Liberty Quarter, MS65**  
**Extremely Rare Any Finer**

- 3852 1860 MS65 PCGS.** The 1860 Seated Liberty quarter claims a respectable business-strike mintage of 804,400 pieces, but few examples were saved by contemporary collectors and the date is very rare in high grade. This delightful Gem exhibits well-detailed design elements and vibrant mint luster with hints of golden-tan and lavender-gray toning. Population: 9 in 65, 2 finer (1/14). NGC ID# 23TP, PCGS# 5451

---

**1860-S Quarter, AU Details**  
**Rarest No Motto San Francisco Issue**

- 3853 1860-S — Improperly Cleaned — NCS Genuine.** In our opinion, this coin has the details of an AU specimen that has been cleaned. The 1860-S is the rarest S-mint quarter, even though the mintage of 56,000 pieces exceeds that of several San Francisco successors. For example, the 1864-S has a mintage of 20,000 pieces, but NGC has certified 36 '64-S quarters and only 17 '60-S quarters. Most survivors are well circulated, but the present coin shows only slight wear. The slate-gray surfaces are unmarked though moderately subdued.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23TS, PCGS# 5453*

---

1865-S Quarter, MS66+  
Outstanding Quality

**3854 1865-S MS66+ PCGS. CAC.** The 1865-S quarter had a mintage of just 41,000 coins, nearly all of which entered circulation in California and surrounding states at a time when silver coins were in extremely short supply. A short distance to the east, the Comstock Lode and other Nevada silver mines were responsible for most of the expanding silver supply in the United States, but much of the newly mined silver was shipped east to replenish the supply diminished by the end of the Civil War. The West was awash in precious metal, yet precious little of it stayed in the area to become minor coinage.

The typical surviving 1865-S quarter is well worn, with an average certified grade of just 40.1. The example offered here is far finer and is the sole finest PCGS representative, edging out a single MS66 coin (1/14). PCGS has graded a mere 11 examples in all Mint State grades and NGC adds another 16 pieces to the combined certified population. The two grading services have seen a mere 98 coins in all grades and the issue seldom appears in auctions, including Heritage's.

This magnificent MS66+ coin has gorgeous cartwheel luster and bold design motifs showing only slight weakness among a few stars. The surfaces have thickly frosted luster with delicate champagne and iridescent toning on the obverse and brilliant ivory luster on the reverse. Population: 2 in 66 (1 in 66+), 0 finer (1/14).

*Ex: Goldberg Coins (1/2011), lot 1363, which realized \$57,500. NGC ID# 23U3, PCGS# 5462*

**1870-CC Quarter, VG8 Details  
Interesting Extra Strikes on Reverse**

- 3855 1870-CC — Damaged — NGC Details. VG.** The 1870-CC quarter is an important issue within the Seated Liberty series, the first of the denomination from the historic Carson City Mint. This piece shows a decent amount of detail remaining on the reverse in particular, but that side also shows a trio of curved strikes in the upper portion, apparently from another overlying coin or planchet. Was this created at the mint, or after? A coin that will appeal to both Seated quarter collectors and possibly error specialists. We are not sure that the so-called “caveat” does not increase the appeal here. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

**1872-S Quarter, Rarest S-Mint, VF25  
Original, Problem-Free Example**

- 3856 1872-S VF25 PCGS.** The 1872-S Seated quarter saw a rather meager mintage of 83,000 pieces, and series expert Larry Briggs calls the issue the rarest S-mint coin in the series. The average survivor today is well-circulated, usually in the Very Fine range. This VF25 PCGS example shows silver-gray centers that darken to charcoal- and smoke-gray at the peripheries on each side, an original appearance on a problem-free coin. Population: 4 in 25, 15 finer (1/14). NGC ID# 23UT, PCGS# 5483

**1873 Seated Quarter, MS65  
Open 3, No Arrows**

- 3857 1873 Open 3 MS65 PCGS. CAC.** Produced prior to the weight change, this issue is actually scarcer than the more highly regarded With Arrows issue. Appealing satin luster and faintly toned surfaces provide this piece with a strong degree of eye appeal. The toning includes hues of red-orange, olive-green, and tan. Light clash marks are present on both sides. Population: 2 in 65, 4 finer (1/14). NGC ID# 23UV, PCGS# 5485

**1873-CC Seated Quarter, AU55 Details  
Low-Mintage Arrows Type**

- 3858 1873-CC Arrows — Repaired and Plugged — ANACS. AU55 Details.** Only 12,462 Seated Liberty quarters with the short-lived Arrows design were struck at the Carson City Mint in 1873. Some evidence of repair can be seen on Liberty's head but the design elements retain almost all of their original detail. The surfaces are blanketed in shades of greenish-gold and magenta toning and the overall presentation is quite attractive. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 23VV, PCGS# 5492

**1874-S Arrows Quarter, MS66  
Top-Notch Eye Appeal**

- 3859 1874-S Arrows MS66 PCGS.** This is a great-looking S-mint example of the 1873-74 Arrows subtype. The 1874-S Arrows quarters were struck in a quantity of 392,000 pieces — more than twice that of the 1873-S — and examples are available up to the Premium Gem level of the present coin but seldom finer. This piece offers light pinkish-gray patina with rich luster and minimal marks, all producing top-notch eye appeal. NGC ID# 23VY, PCGS# 5495

**1874-S Arrows Quarter, Vibrant MS66  
Very Rare Any Finer**

- 3860 1874-S Arrows MS66 PCGS.** Despite a paltry production of 392,000 pieces, the 1874-S quarter dollar is available through Extremely Fine grade due to a hoard of 80 to 100 pieces discovered in a west coast bank in 1949. The issue is scarce through Premium Gem and very rare any finer. This MS66 specimen is essentially untuned with vibrant luster and slightly granular, well-preserved surfaces. A die crack connects the letters of QUAR. DOL. Population: 32 in 66, 4 finer (1/14). Ex: Dallas Signature (Heritage Auctions, 2007), lot 640. NGC ID# 23VY, PCGS# 5495

---

### 1889 Seated Quarter, Richly Toned MS67

- 3861** 1889 MS67 PCGS. CAC. The low mintage (12,000 business strikes) 1889 is typically encountered in MS63-MS65 grades. While circulated survivors are well known for their rarity, advanced collectors should realize that relatively few extant representatives have obtained a Superb Gem grade. This sharply struck example boasts strong detail on Liberty's gown lines, the star centers, and eagle's feathers. Portions of Liberty's hair detail are a tad soft. Lustrous surfaces reveal cobalt-blue patina, mostly around the borders, which frames lilac-mauve centers. A couple of minute marks on Liberty's cheek and right arm are noted, but overall the surfaces are well preserved. Population: 30 in 67 (5 in 67+), 2 finer (1/14). Ex: *FUN Signature* (Heritage, 1/2005), lot 6446; *Central States Signature* (Heritage, 4/2008), lot 831. NGC ID# 23VM, PCGS# 5522

---

## PROOF SEATED QUARTERS

### 1865 Quarter, PR66 Cameo Boldly Struck

- 3862** 1865 PR66 Cameo PCGS. Only 500 proof Seated Liberty quarters were struck in 1865, the relatively small mintage probably due to the financial uncertainties of the last year of the Civil War. The frosty motifs of this Premium Gem stand out sharply against the fields that display deep russet toning. All devices are razor sharp and neither side reveals mentionable marks. Population: 5 in 66 Cameo, 1 finer (1/14). PCGS# 85561

---

### 1886 Seated Liberty Quarter, PR68 Cameo Single Finest Certified

- 3863** 1886 PR68 Cameo NGC. Briggs 2-B. Ex: P. Kaufman. There must have been a problem with either the obverse die itself or the position in which the die was installed into the press because the proof 1886 quarter rarely shows more than a trace of definition on the obverse star centrils. Other than these features, every design element on the present coin is fully detailed. The surface preservation is no less impressive with a smooth, distraction-free sheen in evidence from rim to rim. Both sides are untoned, or essentially so, and boldly contrasted in finish. The 1886 is among the rarest P-mint quarters in the Seated series. A mere 5,000 business strikes were coined, along with 886 proofs. The difficulty collectors meet when searching for an attractive business strike has placed considerable date pressure on the extant proofs. Of course, with surfaces that more than justify the PR68 Cameo designation, this specimen is a rare and desirable coin in its own right. This is the single finest certified proof 1886 Seated quarter with the Cameo designation (1/14). Ex: *Long Beach Signature* (Heritage, 9/2002), lot 6535. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 85587
-

## BARBER QUARTERS

1892 Quarter Dollar, MS67  
Type Two Reverse

- 3864 1892 MS67 PCGS.** Type Two Reverse. An amazing Superb Gem example of the opening Barber quarter issue, this specimen having the wing cover nearly all of the E in UNITED. This example is housed in a green-label PCGS holder. Both sides have intensely brilliant mint frost with lovely gold and iridescent toning. Population: 27 in 67 (1 in 67+), 3 finer (1/14). NGC ID# 23XT, PCGS# 5601

1897-S Quarter, Multicolor MS65

- 3865 1897-S MS65 NGC.** The 1897-S is a better date in all grades. A majority of PCGS-graded examples are in AG3 to Good 6 holders, but this is a precisely struck, lustrous, and mark-free Gem. Both sides are patinated in mottled plum-red, navy-blue, and peach-gold shades. Census: 10 in 65, 4 finer (1/14). NGC ID# 23YC, PCGS# 5618

1898 Barber Quarter Error, MS62  
Capped Die Brockage

- 3866 1898 — Obverse Die Cap and Brockage — MS62 PCGS.** A capped die is created when after striking, the struck coin sticks to the upper die and covers the face of that upper die. The reverse of this initial coin then becomes a new “die” that is repeatedly struck against more blank planchets that are fed into the press, causing an increased depth from the upper die, and an expanded image from the lower die.

A brockage is created when a struck coins remains on the lower die when a new planchet is fed on top of it, and both pieces are struck together. The brockage has a normal image of the obverse, and a reverse, incused image of the obverse in place of the normal reverse design.

This piece is a remarkable combination of both errors in one piece. A brockage was created first, then the brockage stuck to the upper die, becoming a capped die piece. As further planchets were introduced, one after another, the capped die became deeper, and the brockage image of the reverse expanded.

*Ex: Orlando FUN Signature (Heritage, 1/2007), lot 1168.*

**1901-S Barber Quarter, VG10  
Rarest of the Big Three**

**3867 1901-S VG10 PCGS.** The classic key-date Barber quarter, the 1901-S is one of the “Big Three” in that series alongside the 1896-S and 1913-S quarters. Although a small number of Mint State examples survive, the typical 1901-S is well-worn, with little remaining detail. PCGS and NGC have combined to certified 1,012 submissions, with an average certified grade of just below 9. Only 126 of those submissions grade finer than the present piece, including just 87 finer examples at PCGS (1/14). This attractive pewter-gray example has hints of magenta in the fields, and lighter silver-gray devices. An old scratch in the right obverse field is toned over, but the surfaces are generally exceptional for the grade, showing only trivial imperfections. NGC ID# 23YR, PCGS# 5630

**1913-S Quarter, Fine 15  
Elusive Grade**

**3868 1913-S Fine 15 PCGS. CAC.** One of the Big Three Barber quarters, the 1913-S had the lowest mintage of the series at just 40,000 coins. This middle circulated grade example has excellent eye appeal with a tri-toned appearance. The devices are grayish-tan, with pewter-gray fields, and steel peripheries. NGC ID# 23ZW, PCGS# 5666

**1914-D Quarter, MS67  
Green-Newman Pedigree**

**3869 1914-D MS67 NGC.** Ex: “Col.” E.H.R. Green. This is an uncommon coin in several ways. While the 1914-D is considered a common date among the later Barber issues, it barely exists in Superb Gem condition. This is a magnificently lustrous example, that displays even gray-golden toning over each side. The strike is strong overall and, of course, no abrasions can be seen. Census: 1 in 67, 0 finer (1/14).  
Ex: “Colonel” E.H.R. Green; Eric P. Newman Numismatic Education Society. NGC ID# 23ZY, PCGS# 5668

**PROOF BARBER QUARTERS**

**1892 Quarter, PR67 Cameo  
Well-Contrasted First-Year Issue**

**3870 1892 PR67 Cameo PCGS.** Type Two Reverse. Light amber-gold and cinnamon patina rings the rims of this first-year Barber quarter proof, while the interiors remain largely untuned and deeply contrasted, seemingly on the verge of a Deep Cameo designation. Few examples exceed this Superb Gem proof, either numerically or aesthetically. Population: 11 in 67 Cameo, 2 finer (1/14). PCGS# 85678

**1901 Quarter, Colorfully Toned PR68**

**3871 1901 PR68 NGC.** This colorfully toned Superb Gem proof offers immaculate surface preservation with untuned silver areas alternating with pinkish-rose, violet, blue, and charcoal hues, all with deep reflectivity. The top-right shield corner show some strike softness but that is a minor quibble that does not detract from the grade or the eye appeal. Census: 8 in 68 (2 in 68 ★), 0 finer (1/14). NGC ID# 242G, PCGS# 5687

**1903 Quarter, PR67+ Cameo  
Rare Contrasted Proof**

- 3872 1903 PR67+ Cameo PCGS. CAC.** A sensational Superb Gem Cameo proof example from the early 20th century, minted at a time when few coins exhibited such contrast. The central obverse is brilliant white, within a frame of gold, violet, and blue. The reverse is entirely toned sea-green and magenta. Population: 17 in 67 (3 in 67+) Cameo, 5 finer (1/14). PCGS# 85689

**STANDING LIBERTY QUARTERS**

**1916 Standing Liberty Quarter, XF40  
Major Bidding Opportunity for Type-Series Fans**

- 3873 1916 XF40 PCGS.** This Extremely Fine 1916 Standing Liberty quarter should pose a major bidding opportunity for type or series collectors, as it retains much of the detail of a far higher-graded piece at a more reasonable price. Pale pinkish-gold patina covers each side, and the scattered marks are inconsequential. The most recent problem-free offering in this grade and service was a piece in a Stack's Bowers auction in November 2013 that brought \$9,400. NGC ID# 242Y, PCGS# 5704

**1916 Quarter, XF45 Details  
Key to the Series**

- 3874 1916 — Cleaned — ANACS. XF45 Details.** The 1916 Standing Liberty quarter, from a mintage of 52,000 pieces, is a popular key date, and examples in any grade are prized by collectors. In fact, examples with light or moderate impairments are quite collectible. Both sides of this XF45 Details coin are retoning light golden-brown and lavender, and the design elements are appropriately defined. The only marks worthy of note occur over the O in GOD and between star 1 and the eagle's wing. These are not serious, and are mentioned only as possible pedigree markers. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter, Near-Mint  
Excellent Eye Appeal**

- 3875 1916 AU58 PCGS.** The February 2007 edition of the magazine *Coins* contains the article "Rare Beauty," by Tom LaMarre, which offers a brief but well-written introduction to the Standing Liberty quarter series:

"The Mint struck Standing Liberty quarters from 1916-1930. Many collectors consider the design an artistic masterpiece. But it was difficult to strike and did not hold up very well in circulation. So the Mint replaced the Standing Liberty quarter with the Washington quarter in 1932. By then, collectors already prized the rare, first-year 1916 Standing Liberty quarter."

Collectors still do so today, especially high-quality pieces such as this one. This is an unquestionably original example that shows variegated medium to darker gray toning over each side and pale blue toning also across the reverse. Just the slightest touch of friction is seen over the high points. An excellent representative of this scarce and valuable first-year issue.

*Ex: FUN Signature (Heritage, 1/2010), lot 2526.* NGC ID# 242Y, PCGS# 5704

**1916 Quarter, MS63 Full Head  
First Standing Liberty Issue**

**3876 1916 MS63 Full Head PCGS.** The coinage redesign program that President Theodore Roosevelt initiated a decade earlier culminated in new designs for the three current silver denominations in 1916. The Mercury Dime, Standing Liberty quarter, and Walking Liberty half dollar all debuted in 1916. While the dime and half dollar are plentiful today, the quarter is elusive. Only 52,000 of these coins were minted, and few have survived. The present brilliant Select Mint State example has the eye appeal of a higher grade. Close inspection reveals a few minuscule marks on Liberty's head that limit the numerical grade level. Hints of champagne toning appear on both sides of this frosty and highly lustrous example. NGC ID# 242Y, PCGS# 5705

**1918 Quarter, MS66 Full Head  
Sharply Struck Head and Hair Details**

**3877 1918 MS66 Full Head PCGS.** Despite the large mintage of 14.2 million coins, most survivors of this issue lack Full Head details, and many show softness at the digit tops in the date. This piece shows full separation of the hair all the way from the forehead to the rear curls, and there is a separation at the cheekbone. The date is full, although the first 1 is a bit soft. Minimal marks and attractive silver-pink patina put this piece into a small minority. Population: 38 in 66 (1 in 66+) Full Head, 12 finer (1/14). NGC ID# 2437, PCGS# 5721

**1918-S Quarter, MS65+ Full Head  
Great Strike Rarity in the Series**

**3878 1918-S MS65+ Full Head PCGS.** The 1918-S Standing Liberty quarter is among the great strike rarities in the series, most examples falling far short of the requirements for Full Head status and for the most part abysmally struck. This MS65+ Full Head example is a pleasing exception at the upper end of certified examples, a coin that will not easily be improved upon technically or aesthetically. Three olive sprigs, an earhole, and complete hairline along the forehead are present, even though a few of the shield rivets are weak, as expected (we suspect there was never a fully struck example of this issue produced). The satiny silver surfaces show scattered accents of gold and rose, with minimal marks. A superlative example of this conditional rarity. Population: 35 in 65 (1 in 65+) Full Head, 7 finer (1/14). NGC ID# 2439, PCGS# 5725

**1918/7-S Quarter, VF35**  
**A Wealth of Detail Remaining**

- 3879** 1918/7-S VF35 PCGS. CAC. FS-101. Although Heritage is fortunate enough to see quite a few examples per year of the overdate 1918/7-S Standing Liberty quarter is higher grades, the present Choice Very Fine example is about typical of certified survivors, which average about halfway between this grade and XF40. The all-important overdate details are bold on this piece, which shows light pink, gold, and charcoal patina with great eye appeal and a wealth of detail remaining on problem-free surfaces. NGC ID# 243A, PCGS# 5726

**1918/7-S Standing Liberty Quarter, AU Details**  
**Rare Wartime Overdate**

- 3880** 1918/7-S — Improperly Cleaned — NCS. AU Details. FS-101. The diagonal of the undertype 7 is clearly visible below the primary digit. This important series-key is a rare wartime overdate that was caused by a hubbing error when the dies were prepared. This lightly circulated example is still attractive, despite an unnatural sheen and subdued luster that indicates an improper cleaning. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 243A, PCGS# 5726

**1918/7-S Quarter, AU53**  
**Key Wartime Hubbing Error**

- 3881** 1918/7-S AU53 NGC. FS-101. A lightly circulated example of this famous hubbing error, with the undertype 7 clearly visible inside the lower loop of the 8. The present key date example retains much of its original design detail along with ample satin luster. The obverse has medium olive-gold and pearl-gray toning while the reverse displays similar but deeper shades. NGC ID# 243A, PCGS# 5726

**1920 Standing Liberty Quarter, MS67**  
**Vivid Peripheral Toning**

- 3882** 1920 MS67 PCGS. The brilliant silver centers of this spectacular Superb Gem are surrounded by vivid shades of greenish-gold and magenta on the obverse, while the reverse shows burnt-orange, magenta, and amber at the peripheries. The shield rivets are all present and vibrant mint luster radiates from both sides. Population: 6 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 243E, PCGS# 5734

**1920 Standing Liberty Quarter, MS67**  
**Spectacular Multicolor Toning**

- 3883** 1920 MS67 PCGS. This incredible Superb Gem displays brilliant silver centers surrounded by stunning shades of greenish-gold and magenta toning. The well-preserved surfaces radiate vibrant mint luster and the design elements are sharply detailed, with all rivets in the shield intact. Population: 6 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 243E, PCGS# 5734

**1920 Quarter, MS67+  
Bold Outer Toning**

- 3884 1920 MS67+ PCGS.** Dramatically toned with intense blue-violet, sage, orange, and gold peripheral toning yielding abruptly to bright silver centers that show a touch of frost. Liberty's head is just an olive leaf away from warranting Full Head status and the rivets of the shield are far sharper than usual. Add in the impressive preservation that has virtually no marks visible to the unaided eye and this 1920 quarter is a true "super coin" that will do a great service to any Standing Liberty quarter Registry set that includes it. Population: 6 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 243E, PCGS# 5734

**1921 Quarter, MS64 Full Head  
Early Low-Mintage Issue**

- 3885 1921 MS64 Full Head PCGS.** The low-mintage 1921 is prized even in well-worn condition, but likely provides greater value in quality Mint State. This is a lustrous near-Gem with an uncommonly sharp strike on Liberty's head, shield, and waist. Virtually brilliant aside from blushes of deep patina at 4:30 on the obverse and at 12 and 2 o'clock on the reverse. Encapsulated in an old green label holder. NGC ID# 243H, PCGS# 5741

**1923 Quarter, MS66 Full Head  
Rich Mint Frost and a Bold Strike**

- 3886 1923 MS66 Full Head PCGS.** Thick, rich mint frost and an extremely bold strike are the hallmarks of this alluring Premium Gem Full Head 1923 quarter. The reel-and-bead border, the shield rivets (which are present, unusually so), the well-sculpted head details and eagle feathers, all put this piece into a small minority. The obverse is silver-gray while the reverse displays light pinkish-gold patina, and marks are at an absolute minimum. This date "comes nice," but this is the most attractive example we have seen in quite a while. Population: 31 in 66 (3 in 66+) Full Head, 2 finer (1/14). NGC ID# 243J, PCGS# 5743

**1924-D Standing Liberty Quarter  
MS66 Full Head Strike Rarity**

- 3887 1924-D MS66 Full Head PCGS. CAC.** The 1924-D quarter with Full Head is a well-known strike rarity, with PCGS and NGC combined certifying just 24 pieces in MS66 Full Head condition, with four examples certified numerically finer (1/14). This lightly toned Premium Gem is sharply struck on the head and shield, with all rivets and the central shield detail bold. A bit of diagnostic weakness at the date is evident on the 1 and 4 but nothing severe. Pleasing orange-gold and light-blue overtones enhance lustrous, silver surfaces. Few abrasions are visible even under magnification. An original and attractive Standing Liberty quarter. NGC ID# 243M, PCGS# 5749

**1928-D Quarter, MS67  
Lustrous, Mark-Free Surfaces**

- 3888 1928-D MS67 PCGS. CAC.** A lovely, highly lustrous Superb Gem with virtually mark-free surfaces. Touches of golden patina near the margins enhance the splendid eye appeal of the piece. Few examples of this Denver mint issue have survived in such a magnificent state of preservation. More than 1.6 million were originally produced, but only 14 of those coins have been graded at MS67 by the two major services combined, and none are currently known any finer as of (1/14). NGC ID# 243Y, PCGS# 5768

## WASHINGTON QUARTERS

### 1932-S Washington Quarter, MS65 Only Four Numerically Finer Coins at PCGS

- 3889** 1932-S MS65 PCGS. CAC. Thick mint frost glows through the rich layerings of golden, brown, and rose toning that covers each side. A solid Gem with no surface disturbances. One of the finest examples of this key issue that we have handled in some time. Housed in a green label holder. PCGS has graded four numerically finer examples (1/14). NGC ID# 2449, PCGS# 5792

### 1934 Light Motto Quarter, MS67 Widely Collected *Guide Book* Variety

- 3890** 1934 Light Motto MS67 PCGS. FS-401. The 1934 Light and Heavy Motto Washington quarters are not only Registry Set essentials, they are also *Guide Book* varieties, helping to increase their popularity and collectibility. This richly frosted Superb Gem is basically untuned with just the slightest suggestion of golden and ice-blue color, unmarked throughout and extremely attractive. Population: 18 in 67 (2 in 67+), 0 finer (1/14). NGC ID# 244A, PCGS# 5794

### 1934-D Heavy Motto Quarter, MS67 Registry Set Essential, Tied for Finest

- 3891** 1934-D Heavy Motto MS67 PCGS. We are surprised that neither the *Guide Book*, nor yet the *Cherrypickers' Guide*, lists the Heavy Motto 1934-D Washington quarters, but the many collectors of the PCGS "major variety" Registry Sets require an example. This piece is only the fourth such graded in this top level by PCGS, an important variety from this Denver Mint issue in the second year (third calendar year) of the series. This top-notch piece shows amber-gold accents near the rims complementing mostly silver surfaces that are well-struck and virtually unmarked. Population: 4 in 67, 0 finer (1/14). PCGS# 85796

### 1937-S Washington Quarter, MS67 Outstanding, Brightly Lustrous Example

- 3892** 1937-S MS67 PCGS. CAC. An outstanding example of this early Washington issue, with splendidly bright satiny luster and well-preserved surfaces that are virtually free of even the smallest distraction. A slight degree of mottling is noted on each side, but is faint enough that the piece still appears to be essentially brilliant. A lovely Superb Gem. Population: 29 in 67 (2 in 67+), 0 finer (1/14).  
*Ex: Dallas Signature (Heritage, 10/2006), lot 1075. NGC ID# 244M, PCGS# 5805*

**1943-D Quarter Dollar, Boldly Struck MS68  
The Finest Seen at PCGS**

- 3893 1943-D MS68 PCGS.** The 1943-D Washington quarter claims a mintage of just over 16 million pieces, and the issue was not heavily saved by contemporary collectors. Certainly none of the known survivors can match the quality and appeal of the coin offered here. Vibrant luster invigorates this spectacular MS68 specimen and a bold strike leaves razor-sharp definition on the design elements. Crimson, forest-green, and yellow-gold patination is much deeper and more extensive on the obverse. Immaculately preserved throughout. Population: 1 in 68, 0 finer (1/14). NGC ID# 2456, PCGS# 5821

**1950-D/S Quarter, MS66  
FS-601 Overmintmark Variety**

- 3894 1950-D/S MS66 PCGS. CAC. FS-601.** The phenomenal success of the Statehood quarter series, followed by the America the Beautiful quarters, has encouraged legions of fans to go back and begin collecting the early Washington silver and clad quarters as well. Besides two first-year “stoppers,” many mintmarked semikeys, and conditional rarities, the field is also rich with varieties, such as this 1950-D/S overmintmark error. (There is also a 1950-S/D variety.) The curve of an S shows under the D, which is die-doubled. This is a great-looking, untoned example with no visible marks and top-notch eye appeal.

**Registry Set Note**

The PCGS Washington Quarters with Major Varieties (1932-64) Registry Set assigns a “base value” of nine points to the 1950-D/S — more than any other variety, and the same value as the 1932-S — while the 1950-S/D gets seven points, and the 1932-D key comes in at 10 points. NGC ID# 245U, PCGS# 5843

**1963 Quarter, MS67+  
Exceptional Toning**

- 3895 1963 MS67+ PCGS.** Type A Reverse. A beautifully toned Superb Gem. Jade-green, golden-brown, powder-blue, and plum-red endow this lustrous and well preserved silver type coin. The present example is the single finest certified by PCGS, and provides an important competitive advantage for the determined Registry Set specialist. Population: 12 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 246S, PCGS# 5874

## EARLY HALF DOLLARS

### 1794 O-104 Half Dollar, AU Details

- 3896** 1794 — Obverse Planchet Flaw, Improperly Cleaned — NCS. AU Details. O-104, R.5. A scarce die marriage, particularly in lesser worn grades, that is attributed by its reverse, which has 9 berries on the left side of the wreath, and 10 berries on the right side. Heavy clash marks are evident at Liberty's nose. A prominent obverse planchet lamination extends from the forehead through the T in LIBERTY to the border on this lightly cleaned but still attractive 1794 half dollar. Both sides retain some luster with light gray centers and peripheral iridescence. The natural light blue and gold toning provides heightened eye appeal. Minor reverse adjustment marks are evident. PCGS# 6051

### 1795 O-125 Half Dollar, Unc Details Condition Census

- 3897** 1795 2 Leaves — Questionable Color — PCGS Genuine. Unc. Details. O-125, R.4. Both sides exhibit light clash marks. Although the fourth edition of the Overton reference lists two XF40 coins as the finest known, there are about half a dozen Mint State coins known, including the present example that likely ranks at the low end of the condition census. The obverse is light silver gray at the centers, changing to rings of blue and iridescent toning. The reverse is magenta within a ring of vibrant sea-green. A few hidden scratches are noted on each side. Although PCGS questions the color of this piece, there is no question about its eye appeal.

### 1806/5 O-103 Draped Bust Half, AU58 Colorful Toning Accents Few Are Finer

- 3898** 1806/5 AU58 NGC. CAC. O-103, R.2. The eye appeal of this near-Mint, early half dollar is outstanding, with silver-gray centers surrounded by areas of vivid, rainbow toning. The coin is struck from an early state of the dies, without any of the die cracks seen on later states. Liberty shows strong detail on the hair softened by a touch of rub on the high points of the curls and at the drapery folds. The eagle's wings are fully feathered and lustrous. Some strike weakness is seen on the clouds, scroll, and the field stars in-between. The central toning is light and enhanced by remaining mint luster, with a few abrasions only visible under magnification. Census: 12 in 58, 6 finer (1/14). NGC ID# 24EK, PCGS# 6077

### 1807 Draped Bust Half Dollar O-108, Well Struck MS61

- 3899** 1807 Draped Bust MS61 NGC. O-108, R.3. Star 7 points above the base of L. Star 8 points well above the base of Y and nearly touches star 9. The reverse is missing the right base of the F in OF, five berries all have thick stems, a leaf points to the extreme right of the I in AMERICA, AM is joined at the base and A is joined to the third feather, and the beak comes down on the upper side of the star point. A crack runs from the upper right point of star 3 into the field. The silvery surfaces of this MS61 example display well-struck design elements and retain a good amount of luster. A few faint marks show up under magnification.  
Ex: Summer FUN (Heritage, 7/2009), lot 583. NGC ID# 24EM, PCGS# 6079

## BUST HALF DOLLARS

### 1813 O-101 Half Dollar, MS62 50C over UNI Reverse

- 3900** 1813 50C Over UNI MS62 PCGS. O-101, R.2. Although undesignated on the PCGS label, this is the 50 C over UNI variety, in an intermediate die state with the misplaced UNI weak but still visible. The “ear bars” of late die states are not present on this example. This example displays satin luster with attractive iridescent toning. NGC ID# 24F2, PCGS# 6104

### 1825 O-116 Half Dollar MS64 Prooflike

- 3901** 1825 MS64 Prooflike NGC. O-116, R.3. The O-116 die pair exists in proof format, and this piece was probably struck immediately after the proofs, before the dies lost their mirrored finish. Delicate splashes of magenta and blue toning appear in the silver-gray surfaces of this splendid prooflike half dollar. The mirrored surfaces exhibit faint hairlines that limit the grade. However, the fields provide a nice backdrop for the satin devices. Sharply defined and highly attractive. NGC ID# 24FL, PCGS# 6142

### 1825 Half Dollar, MS64 O-114, Multicolor Toning

- 3902** 1825 MS64 PCGS. CAC. O-114, R.1. A slightly more challenging date in the Bust half series although not priced as one, with a mintage of 2.9 million pieces. This example displays spectacular, pastel toning enhanced by strong, underlying luster. Vivid aqua-blue frames the central devices, with lime-green and orange-gold toning extending to the margins. The portrait is bold as are most of the stars — unusual for this variety, where the stars are often drawn to the edges. The surfaces are virtually without abrasions. Only a bit of weakness at the eagle’s talons and at the nearby leaves and arrow fletchings prevent an even higher grade. NGC ID# 24FL, PCGS# 6142

### 1826 Capped Bust Half Dollar, MS64+ O-101a, Brilliant and Lustrous

- 3903** 1826 MS64+ PCGS. O-101a, R.2. An nearly untoned, brilliant Bust half with plentiful mint luster that appears fresh and undisturbed. The frosted devices are fully struck, and the coin displays prooflike flash at the obverse margins. The reverse is almost entirely prooflike and brilliantly reflective. The O-101a variety notes die breaks beneath the date and above RICA, traveling along the rim to beneath the denomination, which are confirmed on this example. Only a few small abrasions are seen on the coin. The portrait is sharply doubled, as often seen on Bust halves of this period. NGC ID# 24FM, PCGS# 6143

**1829 O-115 Capped Bust Half  
Target-Toned Gem**

- 3904** 1829 Small Letters MS65 PCGS. CAC. O-115, R.1. This MS65 example is among the finest known of the variety with pleasing, turquoise-blue margins merging into reddish-gold hues and silver-gold centers on both sides of the coin. Clean, unabraded fields surround well-struck central devices, with the eagle especially bold and Liberty's hair fully defined.

The O-115 variety is identified by sharp stars cut close to the milling and by Star 7 pointing to the lower-half junction of the curl and headband. On the reverse, the shield extends into arrow feathers at the bottom and the lower-most arrowhead is recut near the shaft. Population: 17 in 65, 3 finer (1/14). NGC ID# 24FS, PCGS# 6154

**SEATED HALF DOLLARS**

**1842 Seated Half, Medium Tripled Date, MS65  
FS-301 Variety, R.7, Possibly the Finest Known**

- 3905** 1842 Medium Date, Large Letters MS65 PCGS. WB-105, FS-301, R.7 in Mint State. Tripled 842, visible especially at the bottom of the 8. This variety seems usually, as here, to appear with a horizontal die crack running from the right side of the 2 on the obverse to the nearby denticles. This popular variety is rated R.7 or exceedingly rare by Wiley and Bugert, and this Gem PCGS-certified example must surely be among the finest known, given that only two pieces of *the issue* — not the variety — rate this high at that service, and only a single example is finer, an MS66 (1/14). Deep golden-brown and pinkish hues appear on each side of this well-struck and delightful Gem example. Other die cracks run through much of the reverse periphery. NGC ID# 27ST, PCGS# 6239

**1853 Arrows and Rays Half, MS64  
Important Type Coin**

- 3906** 1853 Arrows and Rays MS64 PCGS. The 1853-55 Arrows issues somehow seem more important to collectors (in this cataloger's opinion), as they were the first to employ such a motif to signify altered metal content. The 1873-74 issues seem imitative in comparison. The 1853 Arrows and Rays issues are one-year types that did *not* repeat in 1873-74. This near-Gem 1853 half dollar boasts a sharp strike over attractive gold and rose-pink surfaces. The next grade level up is much more elusive. PCGS has seen only 23 submissions in all finer grades (1/14). An important type-coin offering. NGC ID# 24JJ, PCGS# 6275

## CONFEDERATE STATES OF AMERICA

1861-Dated Scott Confederate Restrike, AU55  
One of 500 Struck in 1879

**3907 1861 Scott CSA Restrike AU55 PCGS.** In 1879, the enterprising coin and stamp dealer J.W. Scott purchased the original (and somewhat rusted) C.S.A. reverse half dollar die from Ebenezer Locke Mason, Jr., who had obtained it from B.F. Taylor, a former Chief Coiner of the New Orleans Mint. In 1879 — after striking a few test pieces on regular 1861-O half dollars — Scott realized he would have to plane off the existing reverse from Federal half dollars for a suitable strike of the Confederate reverse. He accomplished the task through a combination of drill and lathe work. Approximately 500 half dollars were then struck on the blank side with the Confederate reverse.

This Scott C.S.A. restrike is one of the 500 coins produced. Despite being struck in a collar with a soft brass underlay, the Federal obverse was flattened slightly by the screw press used to strike the reverse. A bronze-toned example, this restrike is smooth and slightly reflective on the Confederate side. The Federal side is similarly toned. PCGS# 340402

## SEATED HALF DOLLARS

1870-CC Half Dollar, Well-Defined XF40  
An Important Condition rarity

**3908 1870-CC XF40 NGC. WB-101.** The 1870-CC Seated Liberty half dollar is a low-availability first-year issue from the Carson City mint. NGC and PCGS have certified about 180 specimens in all grades, making the issue rare in Fine and higher grades. This XF example displays moderately toned yellow-gold, lavender, and violet surfaces. The design elements are better struck than ordinarily encountered; all letters in LIBERTY are bold, including BER that are typically weak. Both sides reveal light circulation marks. Census: 4 in 40, 18 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24K2, PCGS# 6328*

1876-CC Half Dollar, MS65  
8 in Dentils, Medium CC Variant

**3909 1876-CC MS65 NGC. WB-103, Die Pair WB-36, R.4.** Ex: "Col." E.H.R. Green. This interesting variety has the top of an 8 previously punched in the dentils below the date. The upper loop of the 8 shows plainly in the dentils. The reverse die shows extensive die cracks, notably through the legend and there is a radial die line from the dentils to the (D)O(L).

In the top grades (MS65 to MS68), NGC has certified only 18 1876-CC half dollars. This half dollar has wonderfully attractive steel-blue and amber toning over highly lustrous surfaces. The strike is strong throughout and the fields and devices are remarkably abrasion-free. An impressive and desirable Gem Carson City half dollar.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$5.00; Eric P. Newman Numismatic Education Society; Newman II Collection (Heritage, 11/2013), lot 33745. NGC ID# 24KH, PCGS# 6353

1885 Half Dollar, Toned MS67  
The Finest at NGC

**3910 1885 MS67 NGC.** Only 5,200 business-strike Liberty Seated half dollars were struck in 1885. Colorful cobalt-blue, lavender, and orange-gold patination resides on the lustrous surfaces of this Superb Gem. Well-struck devices and impeccable preservation complement these attributes. Census: 1 in 67, 0 finer (1/14). NGC ID# 24KY, PCGS# 6367

**1887 Seated Liberty Half, MS67  
Conditionally Rare**

- 3911 1887 MS67 NGC.** From a paltry original mintage of 5,000 business strikes, this impressive example is one of just four specimens currently designated at the MS67 level by NGC. PCGS has only certified five coins at that same lofty grade, and neither service has seen any finer (1/14). The flawlessly preserved surfaces display gorgeous layers of electric-blue and rose patina, and Christian Gobrecht's elegant design is sharply rendered throughout. A beautiful Superb Gem representative of this later issue in the Seated Liberty half dollar series, and one which will please even the most demanding specialist. NGC ID# 24L2, PCGS# 6369

**1889 Half Dollar, MS66  
Tied for Finest at PCGS**

- 3912 1889 MS66 PCGS.** This late Seated Liberty half dollar survives from a business strike mintage of 12,000 coins. Both sides of this Premium Gem exhibit frosty silver luster and bold design motifs with faint champagne toning, although most observers would say that this piece is untoned. Population: 11 in 66, 0 finer (1/14). NGC ID# 24L4, PCGS# 6371

**1890 Half Dollar, MS65  
Scarce High-Grade Example**

- 3913 1890 MS65 PCGS. Gold CAC.** This is a beautifully preserved and conditionally scarce Gem, from the penultimate date in the Liberty Seated half dollar series. Well-struck, with smooth, satiny surfaces and lovely original toning. Coins from this era are challenging in such superior condition. This piece is encapsulated in an old green PCGS holder, with a rare gold CAC sticker attached, making it even more attractive to the discerning specialist. NGC ID# 24L5, PCGS# 6372

**PROOF SEATED HALF DOLLARS**

**1872 Liberty Seated Half, PR65 Cameo  
Deeply Mirrored, Boldly Contrasted**

- 3914 1872 PR65 Cameo PCGS.** Remarkably few distractions are seen on the silver-mirrored fields of this Gem proof half dollar. Deep aqua and auburn-red toning encircles the central devices, which are thickly covered in mint frost. A loupe reveals a few delicate hairlines, but none are visible without magnification nor do they disturb the watery-deep mirrors. A full strike shows no weakness on the devices. 950 proofs were made but it is likely not all were distributed based on the certification data, and Breen reports an unknown number of unsold proofs were melted in 1873. Population: 6 in 65 (1 in 65+) Cameo, 2 finer (1/14). PCGS# 86430

**1873 No Arrows, Closed 3 Half, PR66  
Top-Notch Eye Appeal**

- 3915 1873 No Arrows, Closed 3 PR66 PCGS.** Nearly all of the No Arrows issue of 600 proofs have a Closed 3, struck before the Arrows format was adopted later in the year. This Premium Gem proof shows intermingled silver, blue, gold, and pinkish patina on sharply struck surfaces that boast no mentionable marks and top-notch eye appeal. A great example for type collectors. NGC ID# 27U8, PCGS# 6431

**1873 No Arrows, Closed 3 Half, PR65+ Cameo  
Beautifully Patinated**

- 3916 1873 No Arrows, Closed 3 PR65+ Cameo PCGS.** The 1873 No Arrows proof half dollars were struck in the amount of 600 pieces, mostly of the Closed 3 style although Wiley and Bugert note that at least one Open 3 proof is known. This beautiful PR65+ Cameo shows bluish rim patina on each side, more prominent on the reverse, complementing dusky amber-gold and pinkish patina in the centers, all amid good field-device contrast. The proof strike is sharp throughout both sides. Population: 5 in 65 (1 in 65+), 3 finer (1/14). PCGS# 86431

**1877 Half Dollar, PR66 Cameo  
Closed Bud Reverse**

- 3917 1877 PR66 Cameo PCGS.** Type Two. This is the usual Closed Bud reverse hub, with no split in the lower berry (bud) over the H in HALF. A stunning Premium Gem Cameo proof, this example has central brilliance within a frame of delicate reddish-gold and pale blue peripheral toning. The strike is bold, enhancing the exceptional eye appeal. Both sides have deeply mirrored fields that provide a wonderful backdrop for the frosty and highly lustrous devices. This piece borders on the Deep Cameo designation and will prove a wonderful addition to an advanced collection. Population: 6 in 66 Cameo, 0 finer (1/14). PCGS# 86438

**1882 Half Dollar, PR67  
Tied for Finest at PCGS**

- 3918 1882 PR67 PCGS.** This amazing Superb Gem proof exhibits gorgeous gold and iridescent toning on both sides, with obvious cameo contrast despite lacking a designation. The fields are fully and deeply mirrored beneath the toning, with satin mint luster on the bold devices. Population: 2 in 67, 0 finer (1/14). NGC ID# 27UH, PCGS# 6443

**1888 Seated Half, PR66 Cameo  
Thin Rings of Peripheral Color**

- 3919 1888 PR66 Cameo NGC.** Ex: "Col." E.H.R. Green. Unlike most of the other dates in this low-mintage decade, where only one pair of dies was used for both circulation strikes and proofs, one other die is known for 1888. This bright, flashy proof shows the mirrored fields one would expect from a high-grade proof striking. The brilliant centers are encircled by thin rings of golden-brown and deep blue around the margins.  
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$7.50; Eric P. Newman Numismatic Education Society; Newman II Collection (Heritage, 11/2013), lot 33796. PCGS# 86449

## BARBER HALF DOLLARS

1905-S Half Dollar, MS66  
Richly Toned  
Among the Finest Known

**3920 1905-S MS66 PCGS.** Ex: Dale Friend Collection. While the 1905-S half falls short of the rarity levels of earlier branch mint Barber half dollars, Gem and finer pieces are still quite elusive. The Friend specimen is finer than the Pryor coin, and just below the Eliasberg-Hugon and Price specimens.

This Premium Gem is deeply toned with satiny luster beneath heather, sea-green, russet, and gold toning. It is boldly defined on both sides, even through the fine roller striae on the obverse. Population: 3 in 66, 3 finer (1/14).

Ex: Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars / FUN Signature (Heritage, 1/2009), lot 3897 NGC ID# 24MT, PCGS# 6503

1906-O Barber Half Dollar, MS65  
Seldom-Seen Issue in High Grades

**3921 1906-O MS65 PCGS. CAC.** The Gem grade designation of this impressive example by PCGS, and confirmed by CAC, makes this coin one of the top two dozen or so survivors, out of nearly 2.5 million pieces originally produced. Vibrant luster shines through a light coating of mottled original patina on both sides, and the well-preserved surfaces are distraction-free. Population: 7 in 65, 9 finer (1/14). NGC ID# 24MW, PCGS# 6506

1909-O Half Dollar, MS65  
Final New Orleans Issue

**3922 1909-O MS65 PCGS.** The New Orleans Mint coined dimes, quarters, half dollars, and half eagles in 1909, and then closed their doors. The total output for the year was just under 4 million coins with a total face value of slightly more than 1 million dollars. Among the coinage was 925,400 half dollars. One of those is this Gem, a fully brilliant, lustrous, and sharply defined example with delicate champagne toning on the obverse. The reverse is nearly untuned with a trace of iridescence along the border at the right. Scattered marks are consistent with the grade. Population: 9 in 65, 4 finer (1/14). NGC ID# 24N9, PCGS# 6517

1911 Half Dollar, MS66  
Underrated Date

**3923 1911 MS66 PCGS.** This stunning Barber half dollar exhibits fully brilliant and frosty silver luster with delicate champagne toning and splashes of steel-gray on the reverse. This is a scarce date, moreso than generally believed, and the present example is tied for the finest that PCGS has certified. Population: 10 in 66, 0 finer (1/14). NGC ID# 24ND, PCGS# 6521

---

#### 1912-D Half Dollar, Patinated MS66

- 3924 1912-D MS66 PCGS. CAC.** Medium-intensity orange-gold, yellow-gold, and grayish-lavender visit the lustrous surfaces of this wonderful Premium Gem. The design features are sharply impressed except for the usual weakness on the upper-right shield corner. Excellent eye appeal, affirmed by the CAC sticker. Population: 15 in 66 (1 in 66+), 0 finer (1/14). NGC ID# 24NH, PCGS# 6525

---

#### 1915 Barber Half Dollar, MS65+ Only Four Finer Coins at PCGS

- 3925 1915 MS65+ PCGS.** The 1915 Barber half dollar claims a small mintage of 138,000 pieces, making the date rare in high grade. This high-end Gem is sharply detailed except for the right tip of the shield, which is typically. The well-preserved surfaces display vibrant mint luster under shades of lavender-gray, ice-blue, and greenish-gold patina. Population: 24 in 65 (1 in 65+), 4 finer (1/14). NGC ID# 24NR, PCGS# 6532

---

#### 1915-S Barber Half, MS66 Frosted, Silver-White Example

- 3926 1915-S MS66 PCGS.** The softly but thoroughly frosted surfaces on this late-series S-mint Barber half are silver-white and untoned, showing off the good luster and excellent preservation to maximum effect. The 1915-S issue was a fairly large one at more than 1.6 million coins, but few examples survive today as nice as this one. The Duckor Collection coin was an MS67 PCGS coin, at the time the only one so graded at that service (one other has since been certified). The last non-CAC example in this grade and service that we offered was in our Long Beach Signature (Heritage, 2/2013), lot 3827, a piece that realized \$8,225. Population: 7 in 66, 2 finer (1/14). NGC ID# 24NT, PCGS# 6534

---

#### PROOF BARBER HALF DOLLARS

---

##### 1893 Barber Half Dollar, PR67 Cameo Concentrically Toned, Thickly Frosted

- 3927 1893 PR67 Cameo PCGS.** Few proof examples exist any finer than this amazingly toned Superb Gem, with PCGS and NGC combined reporting just two proofs certified in a higher numeric grade (1/14). Neon blue encircles the rims, with gradations of lavender and reddish-gold meeting at the highly contrasted central devices. The mirrored fields are unmarked and reveal none of the hairlines often present on even high-grade proofs of this era. The strike is mostly bold except at the top right corner of the shield and the adjacent eagle's wing, likely keeping this early Barber half proof from an even higher grade. PCGS# 86540
-

**1897 Half Dollar, Magnificently Toned PR68 Cameo  
A 'Must Have' Coin for Barber Proof Aficionados**

- 3928 1897 PR68 Cameo PCGS.** The Mint produced 731 proof Barber half dollars in 1897. PCGS has certified nearly 300 specimens, while NGC has seen almost 320 pieces. A mere 11 of these have been designated as PR68 Cameos by the two services, with none finer. A melange of variegated deep gunmetal-blue, reddish-gold, orange, ice-blue, and yellow-gold toning adorns both sides of this magnificent example, and crisply defined design features complement the highly attractive color palette. Additionally, immaculately preserved surfaces round out the coin's outstanding eye appeal. This is a "must have" coin for the connoisseur of toned Barber proof coinage. Population: 3 in 68 Cameo, 0 finer (1/14). PCGS# 86544

**1900 Barber Half, PR67 Cameo  
Top-Notch Eye Appeal**

- 3929 1900 PR67 Cameo PCGS. CAC.** Beautiful toning and top-notch preservation make this 1900 Superb Gem proof Barber half among the few finest survivors. A light covering of rose-pink and lavender patina gives way to medium sky-blue near the margins, and considerable field-device contrast make the surfaces "pop" for the viewer. As expected at this grade level, no marks or impairments of any kind appear, and in fact the surfaces seem high-end for the assigned grade. There is light strike weakness on the upper-right shield corner, but the eye appeal and collectibility of this piece are top-notch. Population: 6 in 67 Cameo, 0 finer (1/14). PCGS# 86547

**1901 Half Dollar, Attractively Toned PR67**

- 3930 1901 PR67 NGC.** Splashes of violet, yellow-gold, orange, and soft russet cascade over the luminous surfaces of this Superb Gem half dollar proof. Sharply struck design elements complement the attractive color palette. Both sides have been well-cared for. Census: 23 in 67 (1 in 67 ★), 7 finer (1/14). NGC ID# 24P5, PCGS# 6548

**1913 Half Dollar, PR66 Cameo  
Elusive Barber Issue**

- 3931 1913 PR66 Cameo PCGS. CAC.** The rarity of business strikes enhances the demand for proof 1913 Barber half dollars. This Premium Gem Cameo proof has fully mirrored fields that frame the lustrous and boldly defined design motifs on both sides. Splendid multi-colored toning enhances the eye appeal of this beauty. Population: 3 in 66 Cameo, 4 finer (1/14). PCGS# 86560

**WALKING LIBERTY HALF DOLLARS**

**1920-S Half Dollar, MS65  
Rare in Better Grades**

- 3932 1920-S MS65 PCGS.** Pale silver overall with hints of golden-tan color appearing mostly at the margins. Detail on Liberty's head is above-average and the thumb on the branch hand is distinct, if not fully rounded. A faint wire rim appears at the top of the obverse. While the 1920-S is not one of the extremely low-mintage issues in the Walking Liberty half dollar series, having as it does a mintage in excess of 4.6 million representatives, it is scarce nonetheless at the Gem level and a clear condition rarity any better. PCGS has certified a mere five representatives as MS66 or finer (1/14). NGC ID# 24R5, PCGS# 6582

**1921 Half Dollar, Toned AU58  
Key Early Walker**

- 3933 1921 AU58 NGC. CAC.** The 1921 is a famously low-mintage issue among Walker halves, with fewer than a quarter of a million pieces struck. This richly toned example has satiny, essentially complete luster in the fields beneath rich coffee, antique-gold, and violet-gray patina. Just a touch of rub on the well-defined devices precludes an even finer designation.  
Ex: *Houston Signature (Heritage, 12/2009)*, lot 814. NGC ID# 24R6, PCGS# 6583

**1921-D Half Dollar, AU55  
Popular Collector Grade**

- 3934 1921-D AU55 NGC.** The early Walking Liberty half dollars are in strong demand at this Choice AU grade level, providing collectors with attractive coins and reasonable prices compared to Mint State coins. Often, these AU55 coins are equally attractive as seen here. This piece has brilliant mint frost with a trace of high-point rub. A hint of lavender toning is noted along the upper obverse rim. NGC ID# 24R7, PCGS# 6584

**1921-D Walking Liberty Half Dollar, AU58  
Lightly Circulated With Subtle Toning**

- 3935 1921-D AU58 PCGS.** The 1921-D Walking Liberty half dollar claims the lowest mintage of the series, at 208,000 pieces. This attractive near-Mint example shows clear separation between Liberty's thumb and finger, and the eagle's leg shows emerging detail in the feathers. The lightly abraded surfaces retain considerable amounts of mint luster, under shades of greenish-gold and lavender patina. NGC ID# 24R7, PCGS# 6584

**1921-D Half Dollar, AU58  
Scarce, Early Denver Issue**

- 3936 1921-D AU58 PCGS. CAC.** A briefly circulated example of this notable Walking Liberty key, one of several in the series. The luster is broadly intact, silver-gray and subtly swirling with hints of rose. Liberty's head shows significant detail, as does the thumb of the branch hand. This coin would fit well in an otherwise Mint State set of halves. NGC ID# 24R7, PCGS# 6584

**1921-D Half Dollar, Well-Struck MS63  
In-Demand in All Grades**

- 3937 1921-D MS63 PCGS.** The 1921-D has the lowest mintage of any circulation-strike Walking Liberty half dollar (208,000 pieces). As a low-mintage, key-date issue it is subject to strong demand in all levels of preservation. PCGS and NGC population data indicate that the 1921-D is found mostly in grades Very Good to Very Fine, after which the numbers drop sharply. Mint State specimens are scarce through near-Gem, rare in Gem, and virtually unobtainable any finer.

This Select offering displays lustrous surfaces that are lightly toned in golden-tan. The design elements are sharply struck, including Liberty's branch hand that shows virtually complete delineation of the thumb. Liberty's skirt lines and facial features are also fairly well struck, as are the eagle's breast feathers. Minor marks in the right obverse field and on some letters in TRUST are all that prevent a finer grade. NGC ID# 24R7, PCGS# 6584

**1938-D Half Dollar, MS67  
Low-Mintage Key Issue**

- 3938 1938-D MS67 PCGS.** The "short set" key is the 1938-D, the low mintage issue that is always in demand. The Denver Mint coined 491,600 half dollars in 1938, and that was the third lowest mintage in the entire series of Walking Liberty half dollars. This Superb Gem is tied for the finest certified at PCGS and NGC. Both sides are frosty and brilliant with untuned silver surfaces and excellent design definition. Population: 38 in 67 (2 in 67+), 0 finer (1/14). NGC ID# 24RV, PCGS# 6605

**1938-D Walker, MS67  
Satiny and Untoned, Tied for Finest**

- 3939 1938-D MS67 PCGS.** The 1938-D Walking Liberty half wins the low-mintage prize among the short set issues, struck to the extent of a meager 491,600 coins. This Superb Gem is at the top of the pack, an untuned, satiny silver-white example with a sharp strike and lots of eye appeal. Only trivial scattered marks appear on either side, away from the focal points. Population: 38 in 67 (2 in 67+), 0 finer (1/14). NGC ID# 24RV, PCGS# 6605

**1943-S Half Dollar, MS67  
Frosty and Well-Defined**

- 3940 1943-S MS67 PCGS.** The 1943-S Walking Liberty half dollar holds a key place among later-series issues in high grade, one of the most challenging to find with a decent strike and good preservation. This frosty Superb Gem is better-defined than most, even though some high-point weakness appears. The surfaces show just a light tinge of pinkish color but present as largely untuned. The few scattered ticks are inconsequential. Population: 35 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 24SB, PCGS# 6620

---

**1943-S Half Dollar, MS67  
Tied for Finest Certified**

- 3941 1943-S MS67 PCGS.** The central design motifs are a trifle weak as usual on the late San Francisco Mint Walkers. This Superb Gem makes up for that shortcoming with amazing mint frosty and pristine surfaces that exhibit a trace of peripheral iridescence. Population: 36 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 24SB, PCGS# 6620

---

**MS67 1945-S Half Dollar  
Conditionally Elusive**

- 3942 1945-S MS67 PCGS.** Knob S. Luster emerges beneath the patina on this Superb Gem example. The obverse includes splashes of toning, primarily at the outer edges. Among the colors present are dark purple, forest-green, and rich green-blue. The reverse exhibits champagne color overall, with splashes of gold, peach, and golden-orange also appearing. The design elements display nice detail. Population: 20 in 67, 0 finer (1/14). NGC ID# 24SH, PCGS# 6626

---

**1947-D Half Dollar, Lustrous MS67**

- 3943 1947-D MS67 PCGS.** Whispers of soft golden toning adhere to the highly lustrous surfaces of this Superb Gem D-mint half. Though not fully struck, the design elements exhibit relatively strong definition, including the central areas. This is a nicely preserved example. Population: 18 in 67, 0 finer (1/14). NGC ID# 24SN, PCGS# 6631

---

**PROOF WALKING LIBERTY HALF DOLLAR**

**1939 Walking Liberty Half Dollar, PR68  
None Certified Finer at PCGS**

- 3944 1939 PR68 PCGS.** A virtually perfect specimen with razor-sharp definition on the design elements and reflective surfaces with attractive shades of greenish-gold and powder-blue toning. No visible flaws are present and eye appeal is terrific. Housed in a green label holder. Population: 31 in 68, 0 finer (1/14). NGC ID# 27V7, PCGS# 6639

---

**FRANKLIN HALF DOLLAR**

**1952 Half, MS67 Full Bell Lines  
Rich Obverse Toning**

- 3945 1952 MS67 Full Bell Lines PCGS. CAC.** An attractive Superb Gem example exhibiting Full Bell Lines, the obverse displays rich toning. Among the colors present are lime-green, orange, red, yellow, and golden-brown. The reverse displays a largely brilliant center, with light toning confined largely to the periphery. Population: 12 in 67 Full Bell Lines, 0 finer (1/14). NGC ID# 24T3, PCGS# 86661

## PROOF FRANKLIN HALF DOLLAR

1950 Franklin Half, PR66 Cameo  
Dramatic White-On-Black Contrast

- 3946** 1950 PR66 Cameo PCGS. CAC. An overhead view of this example provides the best vantage to witness the contrast between mirrored fields and frosted devices. The reflective fields are deep and liquid. A full strike expresses the simple beauty of the Franklin half design. Very few delicate hairlines can be seen under magnification — too few to mention, suggesting the assigned grade might be conservative for this appealing Premium Gem Cameo half. Population: 31 in 66 Cameo, 9 finer (1/14). NGC ID# 27VA, PCGS# 86691

## EARLY DOLLARS

1795 Flowing Hair Dollar, AU Details  
Three Leaves, B-6, BB-25

- 3947** 1795 Flowing Hair, Three Leaves — Obverse Scratched — NGC Details. AU. B-6, BB-25, R.3. A slender scratch extends between star 6 and the 9 in the date, passing through the shoulder curl. Otherwise, this is an impressive Flowing Hair type coin with substantial glimmers of luster over pleasing olive-green and ocean-blue surfaces. The obverse border displays occasional faint adjustment marks, as made. NGC ID# 24WZ, PCGS# 6852

1795 Three Leaves Flowing Hair Dollar  
AU Sharpness, B-6, BB-25

- 3948** 1795 Flowing Hair, Three Leaves — Reverse Tooled — NGC Details. AU. B-6, BB-25, R.3. Upon initial evaluation, this is an impressive scarcer variety Flowing Hair dollar, partly lustrous and toned light cream-gray and almond-gold. The strike is crisp, and wear is minor and generally limited to Liberty's cheek and the eagle's breast. Close inspection reveals that the central reverse field has been smoothed, above and below the eagle's head, and beneath both wings. Nonetheless, a desirable example that has nearly complete design detail.  
Ex: *Central States Signature* (Heritage, 4-5/2010), lot 2140. NGC ID# 24WZ, PCGS# 6852

**1795 B-4, BB-14 Silver Plug Dollar, XF40  
Bowers Plate Coin**

**3949** 1795 Flowing Hair, Two Leaves, Silver Plug XF40 PCGS Secure. B-4, BB-14, R.3. The outline of the Mint inserted silver plug is clearly visible on the reverse of this Flowing Hair dollar. The existence of a 1795 B-4, BB-14 dollar struck over a 1794 dollar, a coin that we sold in August 2004, suggests that this variety was one of the earliest 1795 Flowing Hair dollar varieties, minted early in 1795.

This example is plated *The Encyclopedia of United States Silver Dollars 1794-1804*, by Q. David Bowers. A few trivial scratches and circulation marks are present on this antique gray example, showing delicate splashes of gold toning. Population: 6 in 40, 21 finer (1/14), for all 1795 Silver Plug dollars.

Ex: Hesselgesser Collection (Goldberg Coins, 6/2011), lot 870. PCGS# 6854

**1795 Three Leaves Dollar, AU Details  
B-7, BB-18, Mint Inserted Silver Plug**

**3950** 1795 Flowing Hair, Silver Plug — Improperly Cleaned — NCS. AU Details. B-7, BB-18, R.3. Bowers Die State I, with two short extensions from the end of the left ribbon. A circular area of slightly darker toning on both sides points to the experimental mint inserted silver plug. The experimental procedure was intended to adjust the weight of the planchet at the time of striking. No adjustment marks are evident on the present piece, indicating that the experimental plug was intended to increase the weight of an undersized planchet. This example is sharply detailed with pale gray-gold toning. PCGS# 6854

**1795 Draped Bust Dollar, XF45  
Centered Bust, B-15, BB-52  
First-Year Type Coin**

**3951** 1795 Draped Bust, Centered XF45 PCGS. B-15, BB-52, R.2. Only 42,738 Draped Bust dollars were coined in 1795, and most examples seen are in lower circulated grades. The issue is quite scarce in XF40 condition, as PCGS has certified only 43 examples at this level, with 84 finer (1/14). Two varieties of Draped Bust dollars are known for the year. The present coin represents the less available BB-52 variety, with the portrait of Liberty well centered, and the highest wave of hair located under the E of LIBERTY. On the reverse, there are six berries on the olive branch, and there is a leaf under the A of STATES.

The present coin displays mostly brilliant surfaces, with the faintest trace of pale reddish patina around the margins. This specimen is sharply defined overall, with a little softness on the forefront of the hair curls and the center of the eagle's breast. No mentionable abrasions are present, but a number of shallow adjustment marks are scattered around the reverse rim.

Ex: Central States Signature (Heritage, 4-5/2010), lot 2146. NGC ID# 24X2, PCGS# 6858

1796 B-5, BB-65 Dollar, XF45 Details  
Early Die State

- 3952** 1796 Large Date, Small Letters — Edge Damaged — ANACS. XF45 Details. B-5, BB-65, R.2. Bowers Die State II, the earliest known die state with the reverse die break covering the right serif of the I, but not joining the adjacent C. The holder states that the edge is damaged, although there are no visible signs on the obverse or reverse. The actual edge of the coin is entirely hidden. This attractive light gray and pale gold toned example retains traces of luster with trivial marks. PCGS# 6861

1797 B-1, BB-73 Dollar, XF40  
9x7 Stars, Large Letters

- 3953** 1797 9x7 Stars, Large Letters XF40 NGC. B-1, BB-73, R.3. A nicely detailed, silver-gray example of this early dollar with clear-gold highlights. Despite a reported mintage of just 7,776 dollars dated 1797, it is thought many more were actually produced — perhaps as many as 60,000 pieces — most of which may have been struck in 1798 although dated as the previous year. Yellow fever caused the Mint to close from August to late November, 1797, stopping production of dollars during the calendar year.

This example is well-struck and attractive, with a bit of remaining mint luster among the stars, date, and Liberty's hair strands as well as to a lesser extent within the reverse legend. Some breast feather detail remains on the eagle, with the wings showing wear on the high spots. Liberty's hair is soft at the forehead but is otherwise detailed, as are the drapery folds. This attractive coin is well-centered with wide, sharply denticled rims. NGC has certified 74 examples of the 9x7 large letters variety as XF40 (1/14). NGC ID# 24X4, PCGS# 6863

1798 Draped Bust Dollar, VF30  
B-1, BB-82, Small Eagle, 13 Stars Variety

- 3954** 1798 Small Eagle, 13 Stars VF30 PCGS. B-1, BB-82, R.3. A classic variety in the early dollar series, this 1798 Draped Bust example is the only variety with 13 obverse stars coupled with the Small Eagle reverse. The remarkably unabraded surfaces and unmarked rims display lilac hues over silver surfaces, with pleasing gold highlights. Glimpses of mint luster still remain in sheltered areas. Boldness of the devices suggests a strong strike on all but the eagle's breast, which is still adequately rendered given its exposed position on the coin and the VF30 designation. An exceptional early dollar in a popular collector grade. NGC ID# 24X5, PCGS# 6867

1798 Large Eagle Dollar, XF45  
B-27, BB-113, Some Mint Luster Remains

- 3955** 1798 Large Eagle, Pointed 9, Close Date XF45 PCGS. B-27, BB-113, R.2. Lilac and gold accents bolster light-gray toning of this attractive, sharply detailed Draped Bust dollar, which shows remaining mint luster over the essentially unmarked surfaces. This example is the B-27, BB-113 variety, Die State II, with a series of light die cracks around the legend on the reverse and a very faint one passing through the 9 in the date. It is a relatively common variety of the pointed 9, heraldic-eagle design, and therefore a good choice for type. NGC ID# 24X6, PCGS# 6873

**1798 Draped Bust Dollar, AU55  
B-27, BB-113, Pointed 9, Close Date**

- 3956 1798 Large Eagle, Pointed 9, Close Date, AU55 NGC. B-27, BB-113, R.2.** Mint luster emanates from Liberty's hair strands and glows from the colorfully toned peripheries of this boldly detailed Draped Bust dollar. Silver-gray centers merge into gold and aqua margins characteristic of dollars stored in cardboard albums many years ago, acquiring a concentric patina much-valued today. This is a nice example of the 1798 date with the Heraldic Eagle reverse, showing little wear and no significant marks from what must have been a very short time in circulation. PCGS# 40030

**1799/8 Draped Bust Dollar, XF45  
Attractive, Old-Silver Example  
15 Stars Reverse**

- 3957 1799/8 15 Stars Reverse XF45 PCGS. B-3, BB-141, R.3.** Delightful, original toning and a bold strike make this overdate early dollar an excellent candidate for type or date collectors. Mint luster remains in Liberty's hair strands and around the field stars. This is the 15-star reverse, where 13 of the stars are fully visible but two are hidden by oversized clouds. Rich, old-silver toning is thick on the surfaces, framed by colorful gold and olive-green accents. The strike is well-centered within wide, denticled rims, and the overdate is clearly visible without a glass. A Choice XF early dollar. NGC ID# 24X8, PCGS# 6883

**1799 Silver Dollar, AU Details  
Scarce B-6, BB-162 Die Pair**

- 3958 1799 7x6 Stars — Improperly Cleaned — NGC Details. AU. B-6, BB-162, R.4** Bowers-Borckardt Die State IV with many slender peripheral die cracks. Delicate tan-brown, powder-blue, and lime-green toning graces this partly lustrous and splendidly detailed Draped Bust dollar. Slightly glossy, but marks are minimal, and the eye appeal is substantial. A desirable addition to any early silver type set. NGC ID# 24X7, PCGS# 6878

**1800 Silver Dollar, AU Details  
Early Die State B-12, BB-184**

- 3959 1800 — Whizzed — NCS Details. AU. B-12, BB-184, R.3.** Bowers Die State I. The usual state without die cracks. The doubled R in LIBERTY instantly identifies the obverse die that was used with three different reverse dies. The B-12 is the most plentiful of those three varieties. This example, described as whizzed, has bright silver surfaces with a few minor scratches. The treated surfaces exhibit unnatural luster. NGC ID# 24X9, PCGS# 6887

**1801 Draped Bust Dollar, XF40**  
**Popular B-1, BB-211 Variety**

- 3960** 1801 XF40 PCGS. B-1, BB-211, R.3. Bowers-Borckardt Die State III. The 1801 Draped Bust dollar is the most elusive date of the Heraldic Eagle type, with four die varieties known for the date. This coin represents the BB-211 variety, with the 1 in the date away from the curl and the closest arrowhead under U in UNITED. This attractive XF example retains much interior design detail in the drapery and hair. The surfaces show only minor ticks and abrasions, with no sign of planchet adjustment marks. Pleasing shades of lavender-gray and champagne-gold toning enliven the surfaces. NGC ID# 24XA, PCGS# 6893

**1802 Narrow Date Dollar, AU Details**  
**B-6, BB-241**

- 3961** 1802 Narrow Date — Improperly Cleaned — NGC Details. AU. B-6, BB-241, R.1. Light to medium golden-brown throughout except for a blush of navy-blue and plum-red along the lower left obverse margin. Faintly hairlined, but the eye appeal is excellent when viewed only with the unaided eye. Sharply struck and partly lustrous.

**1803 Draped Bust Dollar, AU55**  
**Small 3, B-5, BB-252**

- 3962** 1803 Small 3 AU55 PCGS. B-5, BB-252, R.3. From a reported mintage of 85,634 pieces, the 1803 Draped Bust dollar is the last collectible date of the series. Six die varieties are known for the date, including the BB-252 variety, recognized by the high, thin topped 3 in the date. The BB-252 is rare in Mint State, and perhaps only 10-20 specimens are extant in AU grades.  
 The present coin is a pleasing Choice AU piece, with sharply detailed centers and just a touch of softness on the left obverse stars. The surfaces display attractive silver-gray patina, with highlights of gold. The surfaces exhibit remarkably few abrasions for a coin from this era. Population: 13 in 55, 16 finer (1/14). NGC ID# 24XD, PCGS# 6900

**1803 B-6, BB-255 Dollar, XF45**  
**Large 3 in Date**

- 3963** 1803 Large 3 XF45 PCGS. B-6, BB-255, R.2. Bowers Die State III, the scarce terminal die state, with a delicate die crack (actually cracks) connecting the stars on the right. Aside from two old scratches below the chin that are now entirely toned over, this lovely Choice XF dollar is problem-free, with rich blue and iridescent toning on the obverse, and lighter gray toning on the reverse. PCGS# 6901

## GOBRECHT DOLLARS

1836 Gobrecht Dollar, PR35  
Judd-60 Original, Die Alignment I  
Remarkably Attractive Mid-Grade Coin

- 3964** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR35 PCGS. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (coin turn, center of Liberty's head opposite DO in DOLLAR). Struck during the early period of Originals, prior to die clashing that produced a diagonal clash mark on the upper reverse. Records indicate that 400 pieces were produced of these early strikings and many were distributed in the channels of commerce. This is an exceptionally attractive coin that shows only light gray patina over each side, not the often-seen deep toning. Slight high-point friction is seen over the devices, but the surfaces are remarkably free from the abrasions that often accompany these coins. PCGS# 11225

1836 Die Alignment I Gobrecht Dollar  
Judd-60, XF Details

- 3965** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Repaired, Rim Filing, Scratches — NGC Details. Proof XF. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (coin turn, center of Liberty's head opposite DO in DOLLAR). This early striking lacks any trace of the diagonal die clash mark above the eagle's wing (indicative of later strikes). Unevenness in the fields, especially below the eagle, explains the repair mentioned on the insert. The rim shows filing at 3 o'clock on the obverse, and several shallow scratches are placed in the fields on each side, but are mostly seen on the reverse. Deeply toned with contrasting brilliance over the high points of the design. PCGS# 11225

## SEATED DOLLARS

1841 Seated Dollar, Sharply Struck MS63

- 3966** 1841 MS63 PCGS. Reddish-gold, lavender, violet, and yellow-gold toning runs over the lustrous surfaces of this MS63 dollar. Sharply struck design features show over both sides, including Liberty's hair and gown lines and the eagle's plumage. The few minute marks do not detract. Population: 15 in 63 (1 in 63+), 5 finer (1/14). NGC ID# 24YB, PCGS# 6927

**1841 Seated Liberty Dollar, MS64  
Only Two Finer Coins at PCGS**

- 3967 1841 MS64 PCGS. CAC.** Even in circulated grades, the 1841 Seated Liberty dollar is more elusive than its mintage of 173,000 pieces would suggest, and the issue is quite rare in all Mint State grades. Apparently, all of the coins were released into circulation at the time of issue and none were held back by the Treasury Department. This impressive Choice example is sharply detailed in most areas, but a touch of softness shows on the stars. The surfaces display vibrant mint luster under speckled shades of greenish-gold and lavender toning. Only a few minor contact marks are evident and the overall presentation is most attractive. Population: 3 in 64, 2 finer (1/14). NGC ID# 24YB, PCGS# 6927

**1854 Silver Dollar, XF45  
Low Survival Rate**

- 3968 1854 XF45 NGC.** The Mint Act of February 1853 reduced the rate of subsidiary silver coins to promote circulation, but left the silver dollars at the old weight. As a result, mintages were low and the coins were hoarded and then melted. Few survivors are left for today's collectors. One of those is this Choice XF example with tinges of gold on the light to medium gray surfaces. Census: 6 in 45, 36 finer (1/14). NGC ID# 24YT, PCGS# 6942

**1859 Seated Liberty Dollar, MS63  
Heavily Exported Issue**

- 3969 1859 MS63 NGC.** The 1859 Seated Liberty dollar was heavily exported in the China trade. Despite the substantial mintage of 255,700 pieces, the issue is quite rare in high grade today. This impressive Select example displays sharply detailed design elements and vibrant mint luster, with lightly marked surfaces that show accents of pale gold toning. Census: 8 in 63, 15 finer (1/14). NGC ID# 24YX, PCGS# 6946

**1871 Silver Dollar, MS64  
Excellent Seated Liberty Type Coin**

- 3970 1871 MS64 PCGS.** An attractive Choice example of this popular Seated Liberty type coin, with well-detailed design elements that show a touch of softness on the stars. The well-preserved surfaces are brightly lustrous and display pleasing hints of greenish-gold toning. Population: 35 in 64 (1 in 64+), 6 finer (1/14). NGC ID# 24ZG, PCGS# 6966

**1871-CC Seated Liberty Dollar, F12  
Lowest-Mintage Carson City Dollar**

- 3971 1871-CC Fine 12 NGC.** The Carson City Mint wasn't fully up to speed in 1871, having just survived its inaugural year in 1870. Only 1,376 silver dollars were produced for the year, with nearly all released into circulation. Although the 1873-CC silver dollar is considered more rare, the 1871-CC is hot on its heels and highly prized in any grade. This example has nice detail for the grade. Full and partial letters of LIBERTY are seen on the high-point shield, with the reverse detail on the eagle that of a higher grade. Dove-gray toning with light-silver highlights cover smooth fields. The rims are wide and bold. Census: 2 in 12, 43 finer (1/14). NGC ID# 24ZH, PCGS# 6967

**1871-CC Dollar, Fine Details  
Lowest Mintage CC-Mint Dollar**

- 3972 1871-CC — Improperly Cleaned — NGC Details. Fine.** The Carson City Mint concentrated on half dollar production in 1871. The silver dollar mintage at the facility was a mere 1,376 pieces. Nonetheless, few if any were set aside by numismatists until many years later, and locals who wanted a type souvenir typically settled for an 1870-CC. As one might expect, the 1871-CC is rare in all grades. The present slate-gray example displays four and a half letters in LIBERTY. Both sides are subdued and a moderately granular streak is noted near the eagle's beak. Marks are minor aside from a cluster on Liberty's neck.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**1872-CC Dollar, VF20  
A Popular CC Date**

- 3973 1872-CC VF20 PCGS.** The 1872-CC Seated Liberty dollar is in demand whenever it is offered owing to the popularity of the CC mintmark and its low mintage of 3,150 pieces. The design elements are well-defined except that the BE in LIBERTY is worn away, as typical for the designated grade. Soft gray-lilac patina dominates, imbued with traces of lavender and reddish-gold on the reverse. A few light marks are in concert with the grade.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24ZK, PCGS# 6969*

**1872-CC Seated Dollar, AU50  
Great Eye Appeal**

- 3974 1872-CC AU50 PCGS.** The 1872-CC Seated dollars were struck in the meager quantity of 3,150 pieces, and demand was great for circulating coinage in Nevada and the West during this time, shortly after the Carson City Mint commenced operations. The average certified 1872-CC dollar — without a doubt the top end of the total survivors — is just about VF35. The present piece, in AU50 PCGS, is one of 15 such at that service with 36 finer (1/14). The dove-gray surfaces show a fairly sharp strike and the expected light circulation wear; a patch of small marks appears around stars 6 and 7 on the obverse, not overly distracting. This coin offers great eye appeal.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 24ZK, PCGS# 6969*

**1873 Seated Dollar, MS64  
Important Condition Rarity**

- 3975 1873 MS64 PCGS.** The final Seated Liberty silver dollar issued during the transitional year that saw the start of Trade dollar production. Housed in a green-label PCGS holder, this Choice Mint State piece has frosty and fully brilliant silver surfaces with a small mark near the stars in the right obverse field. Population: 18 in 64, 7 finer (1/14). NGC ID# 24ZM, PCGS# 6971

## PROOF SEATED DOLLARS

1851 Silver Dollar, PR60  
Original, High Date  
Only Proof Certified

- 3976 1851 Original PR60 NGC.** The date is entered high relative to Liberty's rock, diagnostic for distinguishing originals from restrikes. Business strikes are from the original dies, and nearly all proofs are restrikes with a centered date. NGC and PCGS have certified a total of 38 proofs, and among those, only the present lot is designated as Original by either service. It is an attractive specimen with lemon-gold borders and powder-blue centers. The strike is good, though Liberty's hair shows minor incompleteness. Contact marks are only cursory. Rotation beneath a loupe displays hairlines customary for the grade.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2523, PCGS# 6992*

1852 Silver Dollar, PR60  
Restrike, Reverse of 1859

- 3977 1852 Restrike PR60 NGC.** Researchers agree that all proof 1852 Seated dollars were struck from the same obverse die. More than one reverse is known. Possibly, all proofs are restrikes, struck after 1852. This was the opinion of David Akers, though Breen believed that some proofs were originals. The present lot is struck from the same reverse die as the proof 1859 dollar, and was probably coined circa-1859, contemporary with the Snow-9 1856 Flying Eagle cents and other unofficial restrike activity at the Mint. This is a fully struck and lightly toned specimen with a glimpse of peach-gold and navy-blue at the left obverse margin. A loupe reveals only minor hairlines and a hair-thin mark on the field near the dentils at 4 o'clock on the reverse.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2525, PCGS# 6995*

1858 Silver Dollar, Proof Details  
Rare Proof-Only Date

- 3978 1858 — Scratches — NGC Details. Proof.** The 1858 is a rare proof-only date with a *Guide Book* mintage of 300 pieces. The variety with a die lump on the base of the L in DOL. The reverse die was also used to strike some 1856 and 1857 proofs, per Duncan Lee. The present specimen is well struck and mostly brilliant with faint hairlines. A pinscratch extends from the right shield tip toward star 10. On the reverse, a pinscratch extends from the left shield tip through the eagle's neck to the rim at 12:30. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.

1869 Seated Dollar, PR63 Deep Cameo  
Optimal White-on-Black Contrast

- 3979 1869 PR63 Deep Cameo PCGS.** Snow-white devices contrasting against deeply mirrored, reflective fields produce an optimal white-on-black contrast on this Select proof 1869 Seated dollar. The proof strike has fully brought up the details throughout both sides, including notably all the star radials on the obverse periphery and all of the intricate details on Liberty's hair, ribbon, and cap. The grade determinant is likely a few scattered hairlines and some contact marks of no consequence, but there is eye appeal to spare on this attractive proof Seated dollar, a nice entry point to the series for the right bidder. Population: 4 in 63 Deep Cameo, 14 finer (1/14). PCGS# 97017

PROOF TRADE DOLLARS

1877 Trade Dollar, PR64 Cameo  
Starkly Contrasted

- 3980 1877 PR64 Cameo PCGS. CAC.** Ice-white devices provide blatant contrast against the darkly mirrored fields. This fully struck specimen has only the slightest field imperfections. A meager 510 proofs were struck, and many survivors undoubtedly lack the eye appeal and distinct white-on-black contrast of this piece. Population: 16 in 64 (2 in 64+) Cameo, 7 finer (1/14). Ex: *Summer FUN Signature* (Heritage, 7/2009), lot 798. PCGS# 87057

1879 Trade Dollar, PR66 ★ Cameo  
Colorful and Gorgeous

- 3981 1879 PR66 ★ Cameo NGC.** From 1879 to the end of the series, the Trade dollar was a proof-only denomination. (While the 1878 Philadelphia issue also was proof-only, business strikes had been produced in Carson City and San Francisco.) This PR66 ★ Cameo example of the 1879 Trade dollar is one of the most beautiful survivors known. The obverse has a bold cameo effect on the interior with blue and green toning around, while the reverse has more extensive color and additional peach elements. Census: 23 in 66 Cameo (1 in 66+ Cameo, 3 in 66 ★ Cameo), 27 finer (1/14). Ex: *The Joseph C. Thomas Collection, Part Two / Long Beach Signature* (Heritage, 5/2009), lot 985. PCGS# 87059

**1881 Trade Dollar, PR65 Cameo  
Ideal Proof-Only Issue**

- 3982 1881 PR65 Cameo NGC.** This extraordinary Gem Cameo proof has brilliant silver surfaces with no evidence of toning on either side. The surfaces have exceptional mirrored fields with frosty, lustrous devices, displaying outstanding contrast. Census: 21 in 65 Cameo (1 in 65 ★ Cameo), 33 finer (1/14). PCGS# 87061

**1883 Trade Dollar, PR65 Cameo  
Final Collectible Issue**

- 3983 1883 PR65 Cameo PCGS.** The final collectible Trade dollar had a mintage of 979 coins, all in proof format. This gorgeous survivor exhibits brilliant silver surfaces with wispy champagne toning. Both sides have deeply mirrored fields around satiny silver devices. Population: 13 in 65 Cameo, 12 finer (1/14). PCGS# 87063

**MORGAN DOLLARS**

**1878 8 Tailfeathers Morgan, MS66 VAM-17  
Untoned Example, Seldom Seen Finer**

- 3984 1878 8TF MS66 PCGS. CAC. VAM-17.** The 8 Tailfeathers Morgan dollar variety was the first struck, before the design was modified to the 7 Tailfeathers type. The 8 Tailfeathers dollars are eagerly sought by series fans. This Premium Gem example displays softly frosted mint luster over untoned silver surfaces with a bold strike and minimal signs of contact. Seldom seen finer. Population: 39 in 66 (2 in 66+), 2 finer (1/14). NGC ID# 253H, PCGS# 7072

**1879-CC Dollar, Mostly Brilliant MS60  
Scarce Carson City Dollar**

- 3985 1879-CC MS60 NGC.** Whispers of light tan-gold color hug the rims of this Carson City issue, framing the color-free centers. The design elements are generally well impressed, though minor softness is apparent on the hair over Liberty's ear. Minute marks and luster grazes are scattered over lustrous surfaces. Actually, a nice coin for the grade designation. David Bowers (2006) writes: "In any grade, the 1879-CC is highly desired, and stands 2nd only to the 1889-CC in terms of rarity among Carson City issues." Ex: *Summer FUN (Heritage, 7/2007)*, lot 1257. NGC ID# 253T, PCGS# 7086

**1879-CC Dollar, MS60  
Bright, Semiprooflike Fields**

- 3986 1879-CC MS60 PCGS.** This semiprooflike dollar displays excellent luster and a good strike. The portrait is peppered with tiny marks, and the eagle's breast shows a vertical shallow graze. Light golden toning contributes to the eye appeal. The 1879-CC is the key to the Carson City Morgan dollars during their first era of production (1878 to 1885). Ex: *Dallas Signature (Heritage, 11/2007)*, lot 1014. NGC ID# 253T, PCGS# 7086

**1879-CC Silver Dollar, MS63  
Normal Mintmark**

- 3987 1879-CC MS63 PCGS.** Light almond-gold toning visits this shimmering and suitably struck key date Carson City dollar. The few light to moderate marks are less than usual for the grade, and the eye appeal is attractive. The legendary GSA hoard contained a number of 1879-CC dollars, but these were insufficient to satisfy the enormous collector demand. NGC ID# 253T, PCGS# 7086

**1879-CC Morgan Dollar, MS63**  
Essentially Brilliant Surfaces

- 3988 1879-CC MS63 PCGS.** Normal Mintmark. Shimmering mint frost and lightly marked surfaces are found on each side of this boldly struck example. An important key issue, and the second-rarest of the Carson City dollars, behind the 1889-CC. This piece is essentially brilliant and has an attractive appearance which will draw the attention of many Morgan dollar specialists. NGC ID# 253T, PCGS# 7086

**1879-CC Dollar, MS64**  
Conditionally Scarce

- 3989 1879-CC MS64 NGC.** Pale champagne and golden-tan accents appear at the edges of this key Carson City dollar. A few trivial abrasions occur on the cheek and neck, and in the the obverse fields. The luster is full and frosty. The reverse is well-preserved, and only shows a handful of minor flaws. A boldly detailed example of this important, highly popular issue. NGC ID# 253T, PCGS# 7086

**1879-CC Morgan Dollar, MS64**  
Highly Lustrous Surfaces

- 3990 1879-CC MS64 PCGS.** Clear CC. Honey-gold freckles adorn the margins of this key-date Carson City dollar. A few wispy grazes appear on the cheek and neck, but the fields are clean and the luster is bright and frosted. The reverse is well-preserved, despite a hidden mark on the right (facing) claw. Nicely struck and widely collected. Ex: *Long Beach Signature* (Heritage, 5/2009), lot 1008. NGC ID# 253T, PCGS# 7086

**1879-CC Dollar, MS65**  
Rare in Higher Grades

- 3991 1879-CC MS65 NGC.** Although the U.S. Treasury releases of the early 1960s made available a number of 1879-CC Morgan dollars, demand is far in excess of supply and the vast majority are in the lower range of Uncirculated. Few survivors can approach the quality of this Gem. On the obverse the portrait is amply frosted and the surrounding fields have a mix of cartwheel luster and mirrors. The reverse has a similar, albeit less contrasted appearance. Only the faintest hints of blue and gold overlay visit each side. Ex: *Long Beach Signature* (Heritage, 2/2006), lot 1781. NGC ID# 253T, PCGS# 7086

**1879-CC Dollar MS62 Prooflike VAM-4**  
Deeply Reflective Fields

- 3992 1879-CC MS62 Prooflike PCGS. VAM-4.** Ex: Diamond Head. Although designated as Prooflike, the present piece has claims to Deep Mirror Prooflike status, since the mirrored fields lack cartwheel luster, and the frosty devices provide ready contrast. A die chip near the 9 in the date adds interest to the piece for the Morgan dollar specialist. On its own, the reverse appears Gem, but the grade is decided by marks on Liberty's neck. Ex: *ANA Signature* (Heritage, 8/2007), lot 2216. NGC ID# 253T, PCGS# 7087

**MS64 Prooflike 1879-CC Dollar  
Sharply Contrasted**

**3993 1879-CC MS64 Prooflike PCGS.** Normal Mintmark. The semikey 1879-CC dollar is an especially desirable coin with prooflike fields. And at the MS64 level, this is the final grade this date and mintmark can be located with any regularity.

This is a lovely, well-preserved 1879-CC dollar. The centers are sharply struck, and the surfaces overall are minimally abraded with small abrasions scattered across the obverse but virtually none on the reverse. Brilliant throughout, the fields are nicely reflective and well-balanced from side-to-side. The devices are noticeably frosted and present a strong contrast on both obverse and reverse. An important coin for the Carson City collector. Population: 77 in 64 (2 in 64+) Prooflike, 9 finer (1/14).

Ex: *Summer FUN* (Heritage, 7/2007), lot 1261. NGC ID# 253T, PCGS# 7087

**1879-CC Dollar, MS64 Prooflike  
Rare Any Finer**

**3994 1879-CC MS64 Prooflike PCGS.** The 1879-CC dollar is among the more elusive Carson City dates during that Mint's first run of operations, particularly in unworn condition. Fully Prooflike pieces pose an even greater challenge. This coin offers clear reflectivity and contrast between faintly toned fields and well-frosted devices. Only a few light, scattered marks keep this near-Gem from an even finer grade. Population: 77 in 64 (2 in 64+) Prooflike, 9 finer (1/14).

Ex: *Long Beach Signature* (Heritage, 2/2005), lot 9934; *Denver Signature* (Heritage, 8/2006), lot 5345; *Houston Signature* (Heritage, 11/2007), lot 61066. NGC ID# 253T, PCGS# 7087

**1879-CC Dollar, MS63 Deep Mirror Prooflike  
Strikingly Contrasted**

**3995 1879-CC MS63 Deep Mirror Prooflike PCGS.** This is a stunning 1879-CC dollar and collectors should not let the fact that it is “only” a Select coin discourage aggressive bidding on this rarity. The fields are deeply mirrored on each side and the thick mint frost that Carson City dollars are known for provides stark white-on-black contrast. The strike, though not perfect, is above-average. Modest pale gray toning with gold and blue accents appears at certain angles to the light. Population: 18 in 63 Deep Mirror Prooflike, 21 finer (1/14). Ex: *Dallas Signature* (Heritage, 4/2007), lot 1006. NGC ID# 253T, PCGS# 97087

**1879-CC Dollar, MS64 Deep Mirror Prooflike  
Important and Elusive Date**

**3996 1879-CC MS64 Deep Mirror Prooflike PCGS.** Among the pre-1886 Carson City Morgan dollar dates, the 1879-CC was the least-represented in the Treasury holdings and so is the most elusive in Mint State condition. This example is not only a near-Gem, it also has Deep Mirror Prooflike reflectivity through the fields. Both sides are faintly toned gold-gray with ample frost across the well-defined devices. A shallow stuttering scrape to the left of Liberty's forehead contributes to the grade but there are few other flaws of any seriousness. Housed in a green label holder. Population: 19 in 64 Deep Mirror Prooflike, 2 finer (1/14). NGC ID# 253T, PCGS# 97087

---

**'Capped' 1879-CC Dollar, Lightly Toned MS60**

- 3997** 1879-CC Capped Die MS60 PCGS. VAM-3. A Top 100 Variety. Whispers of grayish-gold patination gravitate to the margins of this CC Morgan. The design elements exhibit relatively strong definition, though the hair over Liberty's ear and the eagle's breast feathers are not full. Scattered abrasions and grazes determine the grade. NGC ID# 253T, PCGS# 7088

---

**1879-CC Morgan Dollar, 'Capped Die,' MS64  
Semikey Series Issue**

- 3998** 1879-CC Capped Die MS64 PCGS Secure. VAM-3. A Top 100 Variety. The scarcer of the two *Guide Book* varieties for the semikey 1879-CC. The "Capped Die" feature is a Medium over Small Mintmark variety with die chips from an attempt by the die maker to conceal the mint blunder. Moderate roller marks (as struck) are noted at the centers, but the fields display minimal contact and Liberty's cheek and neck exhibit only wispy grazes. NGC ID# 253T, PCGS# 7088

---

**1879-CC Morgan Dollar, MS64+  
Capped Die Overmintmark Variety**

- 3999** 1879-CC Capped Die MS64+ PCGS. CAC. VAM-3. A Top 100 Variety. The overmintmark "Large CC over Small CC" is plainly evident on this near-Gem example of the VAM-3, Capped Die variety. Original surfaces display areas of burnt-orange toning among the stars on the obverse, while the reverse shows prevalent golden-gray and sky-blue colors. Some softness in the hair over the ear reveals the presence of diagonal roller marks, visible with a glass across the ear and portrait.

The overmintmark is listed in the 2014 *Guide Book* as simply CC over CC, which understates the dramatic characteristics of this popular variety. It is perhaps three times rarer than the Perfect CC variety, with the remnants of a much smaller mintmark under a normal-sized CC readily apparent. A rarity in full Gem Mint State, this MS64 example with the PCGS Plus designation is a borderline Gem — especially significant considering the huge price jump between MS64 and MS65 grades. PCGS has certified just 11 pieces finer than this example (1/14). NGC ID# 253T, PCGS# 7088

---

---

**1879-O Morgan Dollar, MS65+**

**4000 1879-O MS65+ PCGS.** This scarce issue is usually found in lower Mint State grades, as the average certified grade of 61 suggests. This Gem exhibits frosty silver luster and above average design definition with brilliant and untuned surfaces. PCGS has only certified 14 finer examples (1/14). NGC ID# 253V, PCGS# 7090

---

**1879-O Dollar, MS65  
Elusive in Finer Grades**

**4001 1879-O MS65 PCGS. CAC.** Bright mint luster radiates from the satiny surfaces of this Gem 1879-O dollar, showing untuned silver centers with a thin ring of rose accents near the border of each side. Although the 1879-O is obtainable up to the Gem grade, finer examples are few and far between. The strike is a bit above-average, despite moderate softness on the hair above the ear, and there are no singular marks save for one linear scrape below TES on the reverse. Die fatigue shows on each side in the form of peripheral die cracks through the legends. PCGS has seen only 14 finer (1/14). NGC ID# 253V, PCGS# 7090

---

**1879-S Morgan Silver Dollar, MS68  
None Certified Numerically Finer**

**4002 1879-S MS68 PCGS.** Sharply struck with brilliant, reflective fields and lightly frosted devices, this exceptional dollar is brightly lustrous and nearly perfect in its execution by the San Francisco Mint. This is the more common Third Reverse variety, but it is anything but common in this nearly flawless, untuned, Superb Gem condition. Population: 91 in 68 (3 in 68+), 0 finer (1/14). NGC ID# 253X, PCGS# 7092

---

**1881-CC Morgan Dollar, MS67  
Fully Struck**

**4003 1881-CC MS67 PCGS.** It is a rare occasion, indeed, that we can describe a Morgan dollar as fully struck, but this example shows every hair strand over Liberty's ear, and full breast feathers on the eagle. Both sides exhibit satiny silver luster with no evidence of toning on the reflective fields. The devices are lustrous, presenting light field-to-device contrast. PCGS has only certified four finer examples (1/14). NGC ID# 2547, PCGS# 7126

---

**1882-O Dollar, MS66  
Colorfully Toned Obverse**

**4004 1882-O MS66 PCGS.** The lustrous surfaces of this Premium Gem are bathed in a melange of yellow-gold, orange-gold, powder-blue, lavender, aqua-blue, and lime-green, while the reverse displays frosty mint brilliance. The design features are fairly well-struck, including partial definition in the hair over Liberty's ear and the eagle's breast feathers. Both sides have been well cared for. Population: 27 in 66 (2 in 66+), 4 finer (1/14). NGC ID# 254C, PCGS# 7136

---

**1882-O Morgan Dollar, MS66 Prooflike  
Conditionally Rare**

**4005 1882-O MS66 Prooflike PCGS.** The icy-white surfaces of this dazzling Premium Gem exhibit intensely frosted design motifs and glassy, highly reflective fields. Exquisitely preserved and free of distractions, this coin is rare, both as a fully struck Morgan dollar from the New Orleans Mint, and as a fully Prooflike specimen at this lofty grade level. The advanced collector may search far and wide without ever locating another 1882-O dollar as fine as this one. Population: 2 in 66 Prooflike, 0 finer (1/14). NGC ID# 254C, PCGS# 7137

**1882-O Morgan Dollar**  
**Brilliant MS65 Deep Mirror Prooflike**

- 4006 1882-O MS65 Deep Mirror Prooflike PCGS. CAC.** An older green-label PCGS holder houses this brilliant Gem. The date is conditionally rare with Deep Mirror Prooflike surfaces. This deeply reflective example resembles a proof at first glance, with splashes of delicate gold toning on each side. Population: 20 in 65 Deep Mirror Prooflike, 1 finer (1/14).  
*Ex: Long Beach Signature (Heritage, 5/2009), lot 1056. NGC ID# 254C, PCGS# 97137*

**1883-S Dollar, MS64**  
**Exceptional Quality for the Grade**

- 4007 1883-S MS64 PCGS.** A wonderful example with satiny silver surfaces, reflective fields, and light gold toning. The design elements are boldly detailed, even at the centers, with full hair details over the ear and full breast feathers on the reverse. The few scattered marks are consistent with the grade. It is exceptional quality for the grade. PCGS has only certified 18 finer examples (1/14).  
*Ex: Orlando (FUN) Signature, (Heritage, 1/2010), lot 2889. NGC ID# 254K, PCGS# 7148*

**1883-S Dollar, Well-Struck MS64**  
**Rare Any Finer**

- 4008 1883-S MS64 PCGS.** The 1883-S Morgan dollar boasts a large mintage of 6.2 million pieces, but the date is difficult to locate in the higher grades of Mint State, primarily because bagmarks pose a significant problem. Examples of this issue must have been stored and handled roughly. The lustrous surfaces of this near-Gem exhibit well-struck design elements, including strong detail in the hair over Liberty's ear. Were it not for a few minute marks and a grease stain on Liberty's cheek this piece would have attained Gem classification. PCGS and NGC each have graded fewer than 20 pieces finer (1/14). NGC ID# 254K, PCGS# 7148

**1883-S Morgan, MS64**  
**Attractive Near-Gem Example**

- 4009 1883-S MS64 PCGS. CAC.** While the S-mint Morgan coins of the preceding three years are readily available in Mint State, the 1883-S is far less accessible, becoming a condition rarity at the Gem level. This is an attractive near-Gem representative, boldly lustrous with a few dots of milky patina and a small scrape into the frost on Liberty's cheek. PCGS has certified 18 submissions numerically finer (1/14). NGC ID# 254K, PCGS# 7148

**1884-S Morgan Dollar, MS61**  
**Classic Mint State Rarity**

- 4010 1884-S MS61 NGC.** Professional graders are careful about assigning Mint State grades to this issue given the large number of near-Mint, About Uncirculated sliders that abound and make repeated trips to the certification services. This is an unquestioned, Mint State example with abundant silver mint luster beneath golden-gray toning and blue-gray highlights. A strong strike for the issue reveals sharp details and few abrasions for the assigned grade. Original and pleasing. NGC ID# 254P, PCGS# 7156

**1884-S Morgan Dollar, MS61**  
**Pleasing Lightly Abraded Surfaces**

- 4011 1884-S MS61 PCGS. Ex: M.J.O.** Unlike their 1878-S to 1882-S predecessors, the 1883-S and 1884-S Morgan dollars were largely released into circulation near the time of issue. The 1884-S is particularly scarce in Mint State grades today. This unusually smooth MS61 example shows only minor signs of contact. A hint of gold toning enlivens the pleasing surfaces, and the high points of the devices show no indication of friction. Cartwheel mint luster is prominent on the reverse, while the obverse has a subdued satin appearance.  
*Ex: Long Beach Signature (Heritage, 2/2006), lot 1975. NGC ID# 254P, PCGS# 7156*

**1884-S Morgan Dollar, MS62**  
Seldom Seen in Finer Grades

- 4012 1884-S MS62 NGC.** The MS62 grade level is the highest for this semikey S-mint Morgan dollar issue before the certified population data begin to plummet rather precipitously; the numbers in all finer grades at NGC and PCGS are each about half of the MS62 populations. This MS62 NGC-graded example offers satiny surfaces that are largely untuned silver-white, accented by light areas of sandy color. Although Liberty's cheek and chin show a couple of minor marks, there are no major signs of contact on either side. The strike is fairly sharp overall, despite minor softness in the hair over Liberty's ear. NGC ID# 254P, PCGS# 7156

**1884-S Silver Dollar, MS61 Prooflike**  
Elusive Condition Rarity

- 4013 1884-S MS61 Prooflike NGC.** The 1884-S Morgan dollar is only the want lists of many a collector along with the 1883-S, the first two S-mint entries in the series that are conditionally elusive in any Mint State grade. This fully brilliant Mint State 1884-S boasts extraordinary luster and excellent eye appeal. Both sides are entirely untuned and exhibit only minor signs of contact, a high-end appearance for the assigned grade. The fields are fully mirrored while the devices have a light coat of mint frost. This piece may spell an important bidding opportunity for the right collector. Census: 3 in 61 Prooflike, 3 in 62 Prooflike (1/14).  
*Ex: Long Beach Signature (Heritage, 2/2007), lot 5501. NGC ID# 254P, PCGS# 7157*

1885-O Dollar, MS66 Deep Mirror Prooflike  
Great Eye Appeal

- 4014** 1885-O MS66 Deep Mirror Prooflike PCGS. CAC. The 1885-O Morgan dollar saw a large mintage approaching 10 million pieces. Moreover, it was heavily represented in the Treasury releases of the 1960s. These factors have resulted in tens of thousands being certified through Premium Gem. Deep Mirror Cameos, especially in Gem and better grades, are another matter entirely. Both sides of this Premium Gem DMPL display pleasing field-motif contrast, and each exhibits sharply struck design features and nicely preserved surfaces. This coin possesses truly breathtaking eye appeal which is aptly recognized by CAC. Population: 38 in 66 Deep Mirror Prooflike, 1 finer (1/14). NGC ID# 254T, PCGS# 97163

1887/6-O Dollar, MS64  
Scarce New Orleans Overdate

- 4015** 1887/6-O MS64 PCGS. CAC. VAM-2. A Top 100 Variety. Traces of the curve of a base of an underdigit 6 are present on both sides of the bottom of the 7. This lustrous Choice overdate is brilliant aside from a wisp of golden patina near the rims. The centers display moderate blending of impression typical for a New Orleans issue. NGC ID# 2553, PCGS# 7178

1888 Dollar, MS67  
Lustrous and Sharply Struck

- 4016** 1888 MS67 PCGS. Vibrant luster emanates from the essentially untuned surfaces of this Superb Gem Morgan dollar (though a small splash of orange-gold resides on the lower obverse near the rim). The hair above Liberty's ear and the eagle's breast feathers exhibit relatively strong definition. Population: 29 in 67, 0 finer (1/14). NGC ID# 2555, PCGS# 7182

1888-O 'Scarface' Dollar, MS62  
VAM-1B4, Late Die State

- 4017** 1888-O Scarface MS62 PCGS. VAM-1B4. A Top 100 Variety. The VAMworld.com site says it perfectly, the late (VAM-1B3) to very late (VAM-1B4) die states of this popular variety are the true "Scarface" VAMs, and command significant premiums over the earlier die states. Here the die break starts at the rim and runs through the dot, downward onto the cheek and touching the lower hair, but the lowest part of the "scar" is not yet quite as heavy as on the very late die state, even though it certainly runs all the way across the cheek and neck. This is a lustrous representative with a dusky silver-gray obverse. The reverse displays blushes of rose-red and sea-green. As usual for the popular variety, the centers are lightly brought up. Ex: Chicago Central States (Heritage, 4/2012), lot 5591, which realized \$12,650. PCGS# 133918

**1888-O 'Scarface' Silver Dollar, MS62  
Terminal Die State, VAM-1B4**

- 4018 1888-O Scarface MS62 PCGS. VAM-1B4.** A Top 100 Variety. The final and most dramatic die state with the diagonal break complete and bold across Liberty's cheek and neck. Two "wart" die breaks, one small and one fairly large, are located on the nose along the crack. A "Bearded Eagle" reverse with prominent clash marks beneath the beak. One of the most popular VAM varieties of the Morgan series. This lustrous representative is mostly brilliant but each side has a pleasing peripheral band of orange-gold, apple-green, and rose-red. The reverse is well preserved. The obverse shows scattered faint grazes appropriate for the grade. The hair above the ear shows blending typical for New Orleans strikes of the era. PCGS# 133918

**1889-CC Dollar, XF45  
Pearl-Gray and Chestnut-Gold Surfaces**

- 4019 1889-CC XF45 PCGS. CAC.** The Carson City Mint had been closed more than four years when coinage resumed in late 1889. The local economy apparently absorbed the issue, since the typical survivor is a cleaned VF. Examples exist in Mint State, but they are few relative to other CC-mint Morgan issues. The present pearl-gray and chestnut-gold Choice XF dollar displays ample remaining luster and problem-free surfaces.  
*Ex: Long Beach Signature (Heritage, 6/2010), lot 1123. NGC ID# 2559, PCGS# 7190*

**1889-CC Morgan, AU55  
Rarest Carson City Issue**

- 4020 1889-CC AU55 PCGS.** A key to the Morgan dollar series and by far the rarest of the Carson City issues with only 350,000 pieces minted, this brilliant, lightly abraded dollar displays a pleasing amount of remaining mint luster. The coin is white with some field reflectivity, especially near the margins. The assigned grade is the result of many frictionlike abrasions primarily in the obverse fields and on the portrait. Always a sought-after issue in AU condition with full Mint State examples so expensive. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar, AU55  
Good Luster Remains**

- 4021 1889-CC AU55 PCGS. CAC.** The 1889-CC is the rarest Carson City dollar by a wide margin and always in demand. This untoned example exceeds expectations with some remaining prooflikeness at the margins and ample remaining luster. Friction and numerous light marks appear primarily in the obverse fields, but there are no major abrasions or distractions as confirmed by the CAC Approval. A key issue, well-struck and minimally circulated. NGC ID# 2559, PCGS# 7190

**1889-O Silver Dollar, MS65**  
**Challenging in This Condition**

- 4022 1889-O MS65 PCGS.** A popular New Orleans issue that belies its mintage of nearly 12 million pieces with its scarcity in Gem or better condition. The surfaces of this vibrant MS65 example are intensely lustrous and appealing. The strike is sharp but not full — still, better than normal for this New Orleans issue, which often demonstrates weakness of strike. The clean fields and compelling luster are suggestive of an even higher grade. Just 17 pieces are graded numerically higher by PCGS and NGC combined (1/14). NGC ID# 255A, PCGS# 7192

**1889-O Dollar, MS65**  
**Conditionally Scarce**

- 4023 1889-O MS65 PCGS.** The 1889-O is plentiful in circulated grades, but Gems are surprisingly difficult to obtain. The present piece exhibits a degree of central striking softness but is otherwise outstanding. Creamy luster shows a hint of gold against the pale pearl-gray that forms the base. PCGS has certified just 10 numerically finer examples (1/14).  
*Ex: Dallas Signature (Heritage, 11/2006), lot 1331. NGC ID# 255A, PCGS# 7192*

**1889-O Morgan, Conditionally Elusive MS65**

- 4024 1889-O MS65 PCGS.** The 1889-O Morgan dollar saw a generous mintage approaching 12 million pieces, making it quite available in lower Mint State grades. Gems are scarce, however, and finer pieces are seldom seen. The lustrous surfaces of this MS65 specimen display whispers of light gold color. While the design elements are not fully struck, they exhibit better definition than usually seen on this New Orleans issue. The hair over Liberty's ear, for example, shows above-average detail. The few light marks are within the parameters of the designated grade. PCGS has seen only 10 coins finer (1/14). NGC ID# 255A, PCGS# 7192

**1889-O Dollar, MS65**  
**Seldom Seen Finer**

- 4025 1889-O MS65 PCGS. CAC.** This silver-white Gem displays intense luster over both sides. The design features on both sides show partial definition in the central areas, often found very weak. Close examination reveals few marks, that in combination with the above attributes results in fabulous overall eye appeal. The 1889-O is rarely found better than Gem. Housed in a green label holder. NGC ID# 255A, PCGS# 7192

**1891 Morgan Dollar, MS65**  
**Only Three Finer Coins at PCGS**

- 4026 1891 MS65 PCGS.** Despite the large mintage of nearly 9 million coins — the Sherman Silver Purchase Act of 1890 spurred the Mint to produce even-larger gluts of Morgan dollars — the 1891 issue is seldom seen above the Gem grade; bagmarks are, expectedly, the usual culprit. This relatively unmarked, untuned Gem boasts frosty surfaces and a clean cheek on Liberty. A couple of small hits on the eagle are in context with the grade. PCGS has seen only three numerically finer pieces (1/14). NGC ID# 255G, PCGS# 7204

### 1891 Dollar, Toned MS65

- 4027 1891 MS65 PCGS.** The 1891 Morgan dollar, claiming a plentiful mintage approaching 8.7 million pieces, is readily available through near-Gem. The population drops precipitously at the MS65 level, and higher-grade examples are virtually unobtainable. Aqua-blue and lavender toning gravitates to the margins, being more extensive on the obverse. This color palette generally cedes to reddish-gold and golden-tan through the centers. The design features are better-struck than typically encountered on surviving examples. Even the hair above Liberty's ear displays some definition, which would probably be even greater were it not for some light roller marks. The few minute ticks are within the confines of the grade designation, and a few minuscule specks of grease-stain in the hair below the ear might help to identify the coin. This is a great piece for the Morgan dollar specialist who is unlikely to come across a finer specimen. In fact, PCGS has seen just three finer and NGC a mere two better (1/14). NGC ID# 255G, PCGS# 7204

### 1891-CC Morgan, MS65 Vividly Toned Example

- 4028 1891-CC MS65 PCGS.** Vivid multicolor toning throughout the obverse and in a ring around the reverse will make this a piece hotly contested at auction. The palette includes emerald, blue, hot pink, and gold in profusion. There are few mentionable marks seen on this Gem late Carson City issue. PCGS has certified only 29 numerically finer (1/14). NGC ID# 255H, PCGS# 7206

### 1891-CC Dollar, Exceptional MS65 "Spitting Eagle"

- 4029 1891-CC MS65 PCGS. VAM-3.** A Top 100 Variety. The "Spitting Eagle" variety, so-named because of the die gouge below the eagle's beak that resembles saliva. The silvery surfaces of this Gem exhibit pleasing luster and are well-struck, evidenced by relatively strong detail in the hair above Liberty's ear and the eagle's breast feathers. Scattered light marks and grazes on Liberty's cheek and neck might well be the only factors that preclude an even higher grade. PCGS and NGC combined have graded fewer than 40 pieces finer (1/14). NGC ID# 255H, PCGS# 7206

### 1891-CC Dollar, MS65+ Lustrous and Well-Struck

- 4030 1891-CC MS65+ PCGS. CAC.** Most 1891-CC Morgan dollars are extensively bagmarked from being roughly handled. This keeps most Mint State examples from grading no better than near-Gem. Gems are considerably more difficult to acquire, and higher-grade specimens are elusive. The present offering is one of only 13 pieces of the 547 Gems graded by PCGS with the Plus designation (1/14). Its essentially untuned surfaces display intense luster and are devoid of significant marks. The design elements are sharply struck, including relatively strong detail in the center areas. NGC ID# 255H, PCGS# 7206

### 1891-CC Dollar, MS65 Prooflike Lovely Cameo Contrast

- 4031 1891-CC MS65 Prooflike PCGS.** The first-generation PCGS holder has an incorrect coin number. This amazing Gem is fully brilliant with nary a trace of toning on either side. The fields are fully mirrored around satiny white devices, imparting excellent contrast. Population: 15 in 65 Prooflike, 2 finer (1/14). NGC ID# 255H, PCGS# 7207

### 1892-CC Morgan Dollar, MS64+

- 4032 1892-CC MS64+ PCGS. CAC.** Although the 1892-CC Morgan dollar is not particularly rare, examples are infrequently located in finer grades than this one. Both sides are highly lustrous with frosty silver surfaces showing no evidence of toning. The strike is typical with weakness at the centers, preventing a higher grade. NGC ID# 255M, PCGS# 7214

---

**1892-CC Dollar, Lustrous MS65**

- 4033 1892-CC MS65 PCGS.** The 1892-CC Morgan dollar saw extensive circulation and therefore has a lower number of survivors in Mint State. That said, examples can still be had through MS64 with searching and patience. Gems become more difficult to acquire, and finer specimens are quite rare. Occasional whispers of light gold visit the highly lustrous surfaces of this MS65 offering. Well-struck design elements include relatively strong definition in the hair over Liberty's ear and on the eagle's breast feathers. Light marks are in concert with the designated grade. PCGS has graded fewer than 30 coins finer (1/14). NGC ID# 255M, PCGS# 7214

---

**1892-CC Dollar, MS65  
Border-Toned Beauty**

- 4034 1892-CC MS65 PCGS.** The 1892-CC dollar was the last issue made over the course of a full year at the Carson City Mint, as the start of Grover Cleveland's second presidency saw its coining operations shuttered for good. The closure from 1885 to 1889, Cleveland's first term, had been temporary, but the second was permanent. This Gem from the penultimate Carson City dollar issue has strong gold and navy peripheral toning around largely silver centers. Strong cartwheel luster enhances the eye appeal and the subtly frosted cheek is smooth. PCGS has graded only 28 examples as MS66 or finer (1/14).  
Ex: *Long Beach Signature* (Heritage, 5/2009), lot 1148. NGC ID# 255M, PCGS# 7214

---

**1892-O Morgan Dollar, MS65  
Conditionally Scarce**

- 4035 1892-O MS65 PCGS.** Typically soft in the centers, but otherwise well-defined throughout, this untoned coin has an attractive appearance enhanced by lovely, soft mint luster. The minimal surface marks are grade-consistent, and confirm the conditionally scarce Gem status of this New Orleans Mint product. Only five examples have been graded finer by PCGS (1/14). NGC ID# 255N, PCGS# 7216

---

**1893-CC Dollar, MS62  
Well-Struck and Intensely Lustrous**

- 4036 1893-CC MS62 NGC.** A well-struck, intensely lustrous example of this final-year Carson City mint product. A brilliant-white coin with a pleasingly bright appearance and a few of the usual bagmarks that characterize this relatively scarce issue, third-rarest among Carson City Morgan dollars. NGC ID# 255S, PCGS# 7222

---

**1893-CC Dollar, Flashy and Brilliant MS62**

- 4037 1893-CC MS62 PCGS.** The fields are clearly prooflike, particularly on the reverse, although PCGS has not designated the piece as such. This flashy rare date CC-mint dollar is brilliant save for a hint of golden toning along the border near the date. The centers are typically impressed, but the reverse is clean and no obverse marks singularly distract.  
Ex: *Long Beach Signature* (Heritage, 6/2006), lot 2598. NGC ID# 255S, PCGS# 7222

---

1893-CC Dollar, Sharply Struck MS62

**4038 1893-CC MS62 PCGS.** David Bowers, in his 2004 *A Guide Book of Morgan Silver Dollars*, writes of the 1893-CC, the last of the Carson City dollars, that "Mint State 1893-CC dollars are well known for being extensively bagmarked, some actually appearing quite abused. Accordingly, the majority of Mint State pieces are in lower MS grades." Bright, untoned surfaces on this MS62 specimen display sharply impressed design elements, and lack the heavy abrasions that usually plague the issue. We mention some relatively unobtrusive luster grazes and hairlines on the obverse. Housed in a green-label holder.

Ex: Summer FUN (Heritage, 7/2007), lot 1595. NGC ID# 255S, PCGS# 7222

---

1893-CC Morgan Dollar, MS64  
Minimally Marked and Well-Struck

**4039 1893-CC MS64 PCGS.** The majority of surviving examples of the 1893-CC Morgan dollar are heavily bagmarked. Consequently, Mint State specimens are concentrated in the lower levels. Indeed, Bowers (2007) states: "A really choice 1893-CC in any grade from MS63 upward will be a find." The near-Gem in this lot is just such a coin. The few light marks it possesses are within the parameters of the grade designation. Moreover, the design elements exhibit an above-average strike for the issue, evidenced by relatively strong definition in the hair over Liberty's ear and the eagle's breast feathers. Both sides yield pleasing luster and show very light gold color. NGC ID# 255S, PCGS# 7222

---

1893-CC Dollar, MS64  
Rare Any Finer

**4040 1893-CC MS64 PCGS.** The return of Grover Cleveland to the Presidency was an ill omen for the Carson City Mint, as his 1885 arrival in the White House had closed the coining facility in 1885 and only Benjamin Harrison's victory in the 1888 election had revived its fortunes. Only a couple of months into 1893, the Carson City branch shut down again, this time for good. This faintly gold-tinged near-Gem from that final year of production has ample cartwheel luster with a bright silver base. While the 1893-CC dollar remains available for a price in MS64, anything finer is a condition rarity. PCGS has graded only 12 examples as MS65 or finer (1/14). NGC ID# 255S, PCGS# 7222

---

**1893-CC Morgan Dollar, MS64+  
Key Carson City Date**

- 4041 1893-CC MS64+ PCGS. CAC.** This was the final year of coinage production at the famed Carson City mint, and the CC Morgan dollars of 1893 had an exceptionally low mintage of just 350,000 pieces. Both of these factors contribute to the overall desirability and status of the 1893-CC dollar. This piece is brilliant and highly lustrous, with a radiant frosted sheen and nicely preserved surfaces that only show a few shallow bagmarks. Very close to Gem condition, as attested to by the MS64+ designation by PCGS. A visually attractive coin that will be of interest to serious Morgan dollar specialists. NGC ID# 255S, PCGS# 7222

**1893-S Dollar, VF25  
Lightly Toned**

- 4042 1893-S VF25 PCGS.** The bright silvery surfaces of this key date representative display dapples of light-blue, lavender, and gold-brown patina along portions of the obverse periphery, and retain traces of luster in some of the recessed areas. Distributed marks are in line with light to moderate circulation.  
*Ex: FUN Signature (Heritage, 1/2010), lot 3010. NGC ID# 255U, PCGS# 7226*

**1893-S Morgan Dollar, XF40  
Pleasing and Well-Struck**

- 4043 1893-S XF40 PCGS.** A pleasing, midgrade example of this important key date. This San Francisco Mint issue is usually seen in lower circulated grades, most often in VF. The devices are well-struck, and the originally preserved surfaces exhibit touches of green, ruby, and gold-tan border toning. Only a few minor marks are found on either side. Morgan dollar specialists will recognize this offering as a significant opportunity to acquire an example of the lowest-mintage issue in the entire series.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255U, PCGS# 7226*

**1894 Morgan Dollar, MS63  
Scarce Low-Mintage Issue**

- 4044 1894 MS63 NGC.** The low-mintage 1894 dollar, with just 110,000 business strikes originally produced, is a highly desirable item at any grade level. This Select Mint State representative rises much higher on the roster of graded coins than all but a fraction of the surviving population for this Philadelphia Mint issue. Lustrous and carefully preserved, with lovely untuned surfaces and boldly struck design motifs.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228*

**1894 Dollar, MS63  
Challenging in Mint Condition**

- 4045 1894 MS63 PCGS.** Due to its low mintage, the 1894 is sought after in all grades. The scarce issue perhaps provides the most value in the MS63 grade, since an MS64 will set back the buyer an additional \$3,000 to \$4,000. The present example is untuned and lustrous with an above average strike. Faint obverse marks limit the grade, but not the eye appeal.  
*Ex: Long Beach Signature (Heritage, 2/2010), lot 679. NGC ID# 255V, PCGS# 7228*

**1894 Dollar, Well-Struck MS64  
Rare Any Finer**

- 4046 1894 MS64 NGC.** Near-Gem is the highest grade most collectors can expect to acquire of the 1894 Morgan dollar as finer examples are highly elusive. Both sides display pleasing luster and are color-free save for occasional traces of reddish-gold at the right margins. The design elements are well-struck, including the hair over Liberty's ear and the eagle's breast feathers. The few minute marks are within the parameters of the grade designation, and an occasional grease stain does not unduly detract. NCG has seen only four pieces finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228*

**1894 Morgan Dollar, MS64  
Seldom Located Finer  
Ex: Casper Collection**

- 4047 1894 MS64 PCGS.** Ex: Casper II. Except for the 1895 issues, the 1894 Philadelphia Mint dollars have the lowest mintage of any from that mint. The 1894 is an important, high-visibility issue in the Morgan dollar series as only 110,972 pieces were produced. This low mintage is undoubtedly responsible for much of the issue's charm and attraction to collectors. However, it is also an unquestioned condition rarity as well as an absolute rarity with high-grade pieces seldom offered. The devices show razor-sharp definition with complete hair detail over Liberty's ear and full feathers on the eagle's breast. The fields are somewhat reflective and the only marks of note are a small cluster between the eagle's right (facing) wing and the wreath. Lightly and evenly toned over each side.  
*Ex: Michael Casper Collection, Part Two (Heritage, 1/2006), lot 3336. NGC ID# 255V, PCGS# 7228*

**1895-O Morgan Dollar, MS60  
Seldom Encountered in Mint State**

- 4048 1895-O MS60 ANACS.** The 1895-O Morgan dollar claims a small mintage of 450,000 pieces and the issue was not well-represented in the Treasury releases of the 1960s. Most of the coins seem to have circulated for a short time, as the typical example grades in the XF-AU range, but the 1895-O is very scarce in Mint State.  
The present coin is an attractive Mint State specimen with a much better-than-average strike that shows some detail on the hair above the ear. Vibrant cartwheel mint luster is present on both sides and the surfaces are lightly marked for the grade. Hints of champagne-gold toning enhance the considerable eye appeal.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255Y, PCGS# 7236*

**1895-S Morgan Dollar, MS62  
Low-Mintage Issue**

- 4049 1895-S MS62 PCGS.** From a mintage of 400,000 pieces, small in the context of the series, the 1895-S Morgan dollar is a much better issue. Most examples seen are in lower Mint State grades, with the present coin typical in many aspects. The surfaces show good luster for an MS62 coin with slight semireflectivity in the fields, and eye appeal is above average for the issue. The strike shows slight softness on Liberty's hair, and an abrasion on Liberty's jawline explains the grade.  
*Ex: Central States Signature (Heritage, 4-5/2010), lot 1402. NGC ID# 255Z, PCGS# 7238*

**1895-S Dollar, MS65  
Semiprooflike Fields**

- 4050 1895-S MS65 NGC.** Most examples of the 1895-S dollar show extensive bagmarks and other abrasions, but this is a relatively mark-free Gem that is particularly smooth on Liberty's cheek. Just as important are this coin's rather unusual surfaces. The typical 1895-S, like many of its predecessors, shows thick mint frost that liberally coats the devices. Not so this semiprooflike piece, minimally toned save for a glimmer of green-gold at the margins. The strike is excellent, as usually seen. An important condition rarity in addition to the overall scarcity that comes from a mintage of only 400,000 pieces. Census: 10 in 65, 4 finer (1/14). Ex: Long Beach Signature (Heritage, 5/2009), lot 1200; Los Angeles Signature (Heritage, 8/2009), lot 1178; New York Signature (Heritage, 11/2013), lot 3738. NGC ID# 255Z, PCGS# 7238

**1896-O Morgan Dollar, MS63  
Scarce Issue in Better Grades**

- 4051 1896-O MS63 PCGS.** The strike on this conditionally challenging O-mint is well above-average and satiny, monochromatic surfaces reveal only the slightest hint of yellow-gold patina at the margins. The present example represents about the nicest quality one can reasonably expect to find (or afford) for the issue. Ex: ANA Signature (Heritage, 8/2007), lot 2457. NGC ID# 2563, PCGS# 7242

**1897 Silver Dollar, MS66 Prooflike  
Rare Mirrored-Finish Example**

- 4052 1897 MS66 Prooflike PCGS. CAC.** Mirrored-finish 1897 dollars are elusive, and no PCGS submissions have received a finer grade. That service as certified nine as MS66 Prooflike and two as MS66 Deep Mirror Prooflike (1/14). This brilliant example has fully mirrored fields and obvious cameo contrast with no evidence of toning on either side. NGC ID# 2565, PCGS# 7247

**1902-S Silver Dollar, MS66  
Elusive in Finer Grades**

- 4053 1902-S MS66 PCGS.** This Premium Gem is an outstanding example with pristine silver surfaces and strong design details, showing only slight weakness of Liberty's ear as usual. Both sides are frosty and fully lustrous with untuned mint brilliant. Population: 36 in 66 (1 in 66+), 4 finer (1/14). NGC ID# 256P, PCGS# 7282

1904 Silver Dollar, MS66  
None Finer at PCGS

**4054 1904 MS66 PCGS Secure.** Ex: Bella. For more than a decade, the 1904 was the “last of the silver dollars” made at Philadelphia, before the Peace dollar (and the 1921 Morgan dollars introduced out of necessity when the aforementioned design was not ready on time) intervened. Fewer than 2.8 million examples were struck and they were not saved with much purpose, so better-than-Gem pieces are condition rarities. This MS66 example is richly toned with narrow green-gold outer bands that fade through blue and violet, ending in broad rose-gray centers. Population: 18 in 66, 0 finer (1/14). NGC ID# 256U, PCGS# 7290

1904-S Dollar, MS65+  
Lightly Toned Beauty

**4055 1904-S MS65+ PCGS.** The 1904-S was meant to be the end of the San Francisco silver dollar issues, but the denomination’s revival — plus the delay in readying the Peace dollar design — removed it from not only the post of last S-mint silver dollar but that of the final S-mint Morgan as well. This MS65+ representative is important because any coin numerically finer is a clear condition rarity. This piece has faint blue overtones on medium-silver surfaces and generous all-around eye appeal. Only a few small marks scattered through the fields preclude full Premium Gem status. PCGS has graded only 11 examples as MS66 or better (1/14). NGC ID# 256W, PCGS# 7294

---

1921-D Morgan, MS66+  
Satin and Untoned

- 4056** 1921-D MS66+ PCGS. CAC. Satiny surfaces are untoned and show generous eye appeal on this high-end example of an issue that decades ago was disregarded. The mintmarked 1921 Morgans are now hotly pursued, and seldom seen in so fine a grade as the present piece. Population: 17 in 66+, 7 finer (1/14). NGC ID# 256Y, PCGS# 7298

---

1921-S Morgan Dollar, MS66  
Richly Patinated Example

- 4057** 1921-S MS66 PCGS. The 1921-S Morgan dollar enjoys great popularity as a mintmark type coin. This impressive Premium Gem is richly patinated in shades of greenish-gold and lavender-gray, with vibrant mint luster under the patina. The design elements are well-detailed and no mentionable surface flaws are evident. Population: 49 in 66 (2 in 66+), 0 finer (1/14). NGC ID# 256Z, PCGS# 7300

---

PROOF MORGAN DOLLARS

---

1878 Reverse of 1878 Morgan, PR64 Cameo  
High-End and Blatantly Contrasted

- 4058** 1878 7TF Reverse of 1878 PR64 Cameo PCGS. CAC. Flat eagle's breast, parallel arrow feathers. The blatant silver-on-black contrast between thickly frosted devices and reflective, deeply mirrored fields, to our eyes, verges on the Deep Cameo level. At the right angles a light pinkish tinge appears, but the surfaces are basically untoned, helping to bring out both the good contrast and exceptional eye appeal. The Reverse of 1878 7TF proofs are estimated to have been struck in a quantity perhaps half that of the 1878 8TF proofs, 250 pieces versus 500, according to Bowers' series *Guide Book*. This piece is high-end for the assigned grade, despite the presence of a few light field hairlines and contact marks on the reverse. Population: 9 in 64 Cameo, 5 finer (1/14). PCGS# 87312

**1879 Morgan Dollar, PR65  
Intense Cameo Contrast**

**4059 1879 PR65 Cameo NGC.** A generous proof mintage of 1,100 Morgan dollars was produced in 1879, the second year of the design. This well-detailed Gem displays intense Cameo contrast between the deeply mirrored fields and richly frosted devices. Hints of greenish-gold toning visit the peripheries. Census: 9 in 65 Cameo, 40 finer (1/14). PCGS# 87314

**1889 Morgan Dollar, PR65 Cameo  
Startling Field-Device Contrast**

**4061 1889 PR65 Cameo PCGS.** The design elements of this delightful Gem display razor-sharp definition in all areas and the rich mint frost of the devices contrasts boldly with the deeply mirrored fields to produce a startling black-on-white flash when the coin is tilted in the light. Population: 11 in 65 (1 in 65+) Cameo, 7 finer (1/14). PCGS# 87324

**1881 Morgan, PR65  
Multihued Chromatic Toning**

**4060 1881 PR65 NGC.** Even the most devout toning enthusiast might consider this Proof dollar over-the-edge. The obverse has only glimpses of the deep silver mirrors, which are covered rim-to-rim by a progression of electric colors — blue, purple, violet, magenta, fire-orange, olive-gold, and ruddy-brown. The reverse colors are simpler but no less dramatic: vibrant cyan-blue with bronze-gold rims. This Gem proof is fully struck and memorable. Census: 28 in 65, 42 finer (1/14). NGC ID# 27Z5, PCGS# 7316

---

## 1895 Morgan Dollar, PR64 Cameo CAC-Approved, High-End for the Grade

**4062 1895 PR64 Cameo PCGS Secure. CAC.** Bowers *Encyclopedia* Obverse Die No. 2: 1 in date centered over a denticle, ball of 5 over right edge of a denticle, bottom of 9 is frosted.

There are many types of collectors, a surety of which we at Heritage Auctions are keenly aware. As in many collecting disciplines, the *drive to completion* is especially strong among numismatists of many stripes. There is, perhaps, no more apt demonstration of the effects of that drive than that provided by the 1895 Morgan dollar. Series specialists are well aware that no circulation strike — not a single one — has ever been recorded, despite conflicting and confusing Mint records that seem to indicate that 12,000 of the coins were struck. Some numismatists such as Roger Burdette have delved extensively into this situation, yet the results are inconclusive.

Of course, it does not help researchers that the only concrete, tangible evidence may have been melted. Many millions of Morgan dollars were consigned to the Pittman Act furnaces in the years after 1918, and the mythical business-strike 1895 Morgans — if any — may well have been among them.

Fortunately for collectors, however, the Mint also struck 880 proof examples of the 1895 Morgan. We have made a couple of points before concerning proof Morgan dollars, namely that any Gem proof Morgan is a condition rarity, given their overall low mintages and rather careless preservation, and that the 1895 proof Morgan is not, in and of itself, any more or less rare in a significant way than other proof issues in the series.

But supply is not the issue; *demand* is. Since no business strikes exist (at least, none are known), collectors fill that empty slot in the circulation strikes set with the nicest proof example they can afford. And given that circulation-strike Morgan dollars are among the most popular series in American numismatics, the proof 1895 occupies a prime spot on the want lists of far more collectors than those who actually possess one.

The Registry Set phenomenon has served only to redouble the drive to *completion* among the many fans of the Morgan dollar series, by combining it with the element of *competition*. This master stroke of the grading services allows collectors not only to compare and compete, but to showcase their prizes via photographs and Grade Point Averages and to compete for top bragging rights.

This near-Gem proof Cameo PCGS example of the 1895 Morgan, with the added CAC approval, is certain to be contested by multiple bidders, as always in our auctions. A PR64 Cameo NGC-CAC example in our August Signature auction (Heritage, 8/2013), lot brought \$52,875, contested by eight different bidders. Looking a bit further back in our Permanent Auction Archives, an 1895 Morgan in PR64 Cameo PCGS, *without* the CAC approval, brought \$54,625 in our Long Beach Signature (Heritage, 2/2011), lot 4031, after bids from 18 different bidders.

We are struck by how few offerings of this coveted proof issue there are that occupy the vastly collectible middle ground of this piece, comfortably between the lofty top grades of PR67-PR68 and the lower proof grades, as well as between non-Cameo and Deep Cameo contrast levels. Generous field-device contrast is the hallmark of this lovely near-Gem, which shows surfaces that are largely untuned save for light accents of amber-gold appearing sporadically around the rims on each side. The eye appeal is high-end for the grade, and we see no marks worthy of singling out; in fact, we see no marks of any import, only some scattered, light field hairlines. This is an excellent representative of this in-demand proof issue, one that could set a new price record for the grade. Population: 26 in 64 Cameo, 25 finer (1/14). PCGS# 87330

**1901 Morgan Dollar, PR66+ Cameo  
Alternative for Mint State Collectors**

- 4063 1901 PR66+ Cameo NGC. CAC.** The 1901 proof Morgan dollars are highly popular with collectors due to the rarity of high grade business strikes. Proofs with contrast are seldom encountered for coins issued from 1901 through 1904, and especially for 1902 through 1904 silver dollars. In the case of the 1901, only 10% of all NGC submissions are designated as Cameo proofs. This amazing Premium Gem exhibits brilliant silver surfaces that combine lustrous devices with fully mirrored fields, all inside a frame of delicate gold and iridescent toning. Census: 7 in 66 Cameo (1 in 66+ Cameo), 4 finer (1/14). PCGS# 87336

**PEACE DOLLARS**

**1921 Peace Dollar, Lustrous MS66  
The Sole Silver Dollar Struck in High Relief**

- 4064 1921 MS66 PCGS.** The 1921 Peace dollar remains a collector favorite in good markets and bad ones. It is distinctive as it was struck in high relief, the only silver dollar to have been so produced. Plus, just over a million pieces were produced. This high-grade representative shows the thick, coruscating mint frost associated with the 1921. The centers of each side are better struck than normally seen also, and the coin is brilliant throughout. NGC ID# 2U4E, PCGS# 7356

**1921 Peace Dollar, Satiny MS66  
Sharply Defined in the Centers**

- 4065 1921 MS66 PCGS. CAC.** This piece has a beautiful satiny quality to the surfaces front and back, showing just the faintest traces of pale ice-blue and gold. The strike through the central and crucial hair is a bit above-average, and the remarkable lack of mentionable abrasions puts this piece far above most of its cohort. A great-looking example of the issue. PCGS has certified only seven in MS67 (1/14). NGC ID# 2U4E, PCGS# 7356

**1925 Peace Dollar, MS67  
Perfect Type Coin**

- 4066 1925 MS67 NGC. CAC.** Over 10 million examples of this date were struck, and today it is considered one of the three most common of all Peace dollars. That was not always the case, however, for prior to the mid-1950s, this date was considered to be quite scarce, and among the rarest of all P-Mint Peace dollars. In fact, collectors today might be surprised to learn that, in 1945, the two rarest issues of the Philadelphia Mint were 1923 and 1925. That situation soon changed, as pointed out by Dave Bowers in his *Silver Dollar Encyclopedia*: "By the mid to late 1950s, the 1925 Peace dollar was so common that specimens were a nuisance for dealers searching for rare dates." This Superb Gem example is an amazing coin, with brilliant, untuned silver surfaces and satiny luster. It is essentially mark-free, save for a few of the most trivial nicks hidden in the devices, and it is also exceptionally well struck. Census: 71 in 67 (1 in 67 ★), 1 finer (1/14).  
Ex: *Jack Lee Collection, III / 2005 Dallas Auction (Heritage, 11/2005)*, lot 3750. NGC ID# 257L, PCGS# 7365

**1925 Peace Dollar, MS67 ★  
Second Finest NGC-Certified**

- 4067 1925 MS67 ★ NGC. CAC.** The present lot is the sole 1925 Peace dollar graded MS67 ★ by NGC. Since none (as of 1/14) are MS67+, and only a single MS68 has been certified by that service, we conclude that this Star Superb Gem is the second finest NGC-graded. It displays rich lemon-gold toning with glimpses of ice-blue near the rims. Well-struck and impressively preserved. NGC ID# 257L, PCGS# 7365

**Lustrous MS65+ 1927 Peace Dollar**

- 4068 1927 MS65+ PCGS. CAC.** The 1927 Peace dollar becomes scarce in Gem and very rare any finer. Pleasing luster visits both sides and each exhibits well-struck design elements, including the hair over Liberty's ear. The scattered small marks are in concert with the grade designation. NGC ID# 257S, PCGS# 7370

**1934-S Silver Dollar, Lustrous MS64**

- 4069 1934-S MS64 PCGS.** Lustrous surfaces display dappled golden-brown patination on the obverse ceding to light freckles of gold and violet on the reverse. The design features are generally well-impressed, including better than usual detail in the centers. Gem status is precluded by a few inconsequential marks. The key to the Peace dollar issue in Mint State.  
Ex: *Houston Signature (Heritage, 12/2009)*, lot 1181. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS64  
In-Demand Series Key**

- 4070 1934-S MS64 PCGS. CAC.** The 1934-S Peace dollar is a low-mintage key in the series, always in demand in high grade. This attractive Choice example exhibits sharply detailed design elements and vibrant mint luster, with lightly marked brilliant surfaces. Eye appeal is outstanding. Housed in a green label holder. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS64**

- 4071 1934-S MS64 PCGS. CAC.** The 1934-S is an acknowledged key-date Peace dollar, elusive in all Mint State grades. There are other Peace dollars that are rare above a certain grade, but the 1934-S is always in demand. This frosty near-Gem has brilliant silver luster with splashes of gold and iridescent toning on both sides. NGC ID# 257Z, PCGS# 7377

### 1935-S Peace Dollar, MS66

- 4072 1935-S MS66 PCGS. CAC.** This lovely Premium Gem has brilliant silver luster with delicate champagne toning on both sides. An exceptional example, this beauty represents the final year of issue for the Peace dollar series until such time as a 1964-D makes its appearance. PCGS has only certified two finer examples (1/14). NGC ID# 2583, PCGS# 7379

## GOLD DOLLARS

### 1855 Gold Dollar, MS63 Type Two Design

- 4073 1855 MS63 PCGS.** The 1855 gold dollar is scarcer than its 1854 predecessor despite a similar mintage of 758,269 pieces. Both dates are targeted by type collectors as the most affordable examples of this brief, 3-year design series. With minimal evidence of die clashing (confined to the reverse) and a strong strike for the issue, this yellow-gold Select example is a lustrous and pleasing representative of the type. NGC ID# 25C4, PCGS# 7532

### 1869 Gold Dollar, MS66 Low-Mintage, Condition Rarity

- 4074 1869 MS66 PCGS. CAC.** Only 5,900 business-strike gold dollars were produced in 1869, making this date scarce-to-rare in all grades. This is a frosty, remarkably unbothered Premium Gem that exhibits fully struck design elements and well-preserved, yellow-gold surfaces. Vibrant mint luster is unbroken on both sides. Eye appeal is outstanding. Population: 2 in 66, 12 finer (1/14). NGC ID# 25D5, PCGS# 7568

## PROOF GOLD DOLLARS

### 1888 Gold Dollar, PR66+ Cameo Deeply Mirrored, Highly Contrasted

- 4075 1888 PR66+ Cameo NGC.** With a proof mintage of 1,079 pieces, this issue is one of the more available Type Three proofs and it is often a popular choice for type. First-strike business strikes are sometimes confused with proofs for this date, although there can be no doubt about this example's proof format.

Extremely deep mirrors surround thickly frosted devices of this rich, orange-gold dollar. The strike is full and detailed and appears in strong relief against the mirrored fields. A tiny tick on the cheek is the only mentionable contact mark on this Premium Gem example, which was awarded NGC's Plus designation for outstanding eye appeal (the only one of its grade to receive the distinction). Census: 15 in 66 Cameo (1 in 66+ Cameo), 8 finer (1/14). NGC ID# 25EY, PCGS# 87638

### 1889 Gold Dollar, PR65 Cameo Light Reddish-Orange Color

- 4076 1889 PR65 Cameo NGC.** The last-year gold dollar issue, the 1889 saw a proof mintage of 1,779 pieces. This Gem Cameo NGC example offers light reddish-orange patina with much field-device contrast and excellent eye appeal. The sharply struck surfaces show a couple of thin marks in the obverse field that account for the grade, but this is a delightful coin. Census: 3 in 65 Cameo, 7 finer (1/14). NGC ID# 25EZ, PCGS# 87639

## EARLY QUARTER EAGLE

1804 BD-2 Quarter Eagle, AU58  
14 Stars Reverse  
Double Denomination Die

- 4077** 1804 14 Star Reverse AU58 PCGS. BD-2, R.4. Bass-Dannreuther Die State a/a, as nearly always for this variety. After produced a couple thousand quarter eagles, the reverse die was combined with an 1804-dated obverse die to produce a similar number of JR-2 dimes. Aside from a few rare patterns, the Draped Bust dimes and quarter eagles were the only coins to share reverse dies between different denominations. When we offered the Ed Price Collection in 2008, we identified seven reverse dies from 1797 to 1807 that were used on both denominations. This near-Mint example has a trivial marks as expected, with satiny light yellow luster and hints of green color. A highly attractive example. Population: 20 in 58, 15 finer (1/14). NGC ID# 25F8, PCGS# 7652

## CLASSIC QUARTER EAGLE

1839 Quarter Eagle, AU55  
Breen-6148, Variety 21

- 4078** 1839 AU55 PCGS. Breen-6148, Variety 21, R.3. The sole dies for the year and a scarce coin regardless of condition. Yellow-gold surfaces generally are radiant with only minor wear visiting the high points of the design. A shallow cut is visible just to the left of Liberty's nose, contributing to the grade. Population: 18 in 55, 10 finer (1/14). NGC ID# 25G2, PCGS# 7698

## LIBERTY QUARTER EAGLES

1840-D Quarter Eagle, Choice VF  
Just 3,532 Pieces Struck

- 4079** 1840-D VF35 NGC. Variety 1-A. A rare Dahlonga issue from a mintage of only 3,532 pieces. The khaki-gold surfaces are only lightly abraded. Much of the eagle is softly impressed, but actual wear is moderate and luster resides within the legends. Lengthy radial die cracks on each side increase specialist interest. NGC ID# 25GC, PCGS# 7719

**1843-O Two and a Half, MS62**  
**Elusive Large Date, Plain 4 Variety**  
**Tied for Finest at PCGS**

**4080** 1843-O Large Date, Plain 4 MS62 PCGS. CAC. Variety 1. The Large Date, Plain 4 1843-O quarter eagles are far scarcer than their Small Date, Crosslet 4 counterparts, and their conditional rarity increases with grade levels. Their scarcity is confirmed by the presence of only a single die pairing known for the Large Date, Plain 4 type, while five die marriages are known for the Small Date, Crosslet 4s. Winter calls the 1843-O Large Date the second rarest O-mint quarter eagle overall, and all examples of this variety have a repunched O mintmark on the reverse. The present MS62 PCGS piece shows an early state of the reverse die, with the incipient cud above F in OF just beginning to form. This piece is tied for the finest known at PCGS with four other submissions, although NGC shows a trio finer — two in MS63 and one in MS64 (1/14). This yellow-gold piece shows a fairly sharp strike with good luster, the usual broad rims the issue is known for, and a few scattered, grade-consistent marks. NGC ID# 25GS, PCGS# 7732

**1848 CAL. Quarter Eagle**  
**America's First Commemorative Coin**  
**Classic California Gold Rush Rarity**

**4081** 1848 CAL. — Genuine — Cleaned — ANACS. We have determined that this piece has AU Details and has been Cleaned. This coin nevertheless poses a marvelous bidding opportunity for some fortunate collector to own an important piece of American numismatic history from the California Gold Rush. The 1848 CAL. quarter eagles were all hand-stamped with the CAL. on reverse to signify they were the first U.S. coins struck from the newly mined gold brought back to Philadelphia for analysis.

It is absolutely correct to say that these coins, probably more so than any other, were the impetus both for the foundation of the provisional branch mint in the form of the U.S. Assay Office of Gold under the auspices of Moffat & Co., as well as for the later establishment of the San Francisco Mint in 1854.

The 1848 CAL. quarter eagles are considered by most numismatists including the present cataloger to be the nation's first commemorative coins, although they are not the first *custom-designed* commemorative issue. Needless to say, this piece, which we have determined has AU Details, is a coin with an immense amount of "meat on the bones" despite a light cleaning at some time in the past. The surfaces are an attractive medium orange-gold with light high-point wear; a thin scrape shows just below Liberty's eye, running across the profile, and another thin mark is at the lower bust truncation. Other scattered marks are consistent with our AU Details assessment.

The reverse is relatively free of singular marks, and the CAL. shows boldly beneath TES. The strike throughout both sides is bold. An exciting bidding opportunity.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

---

**1849-C Quarter Eagle, Bright AU55**

- 4082 1849-C AU55 PCGS. Variety 1.** The 1849-C is a scarcer C-mint quarter eagle with a mintage of 10,220 pieces. Doug Winter estimates between 125 and 150 pieces are known in all grades, approximately a third of which may grade AU. This is a bright yellow-gold example that shows a few small to medium-sized abrasions on each side. A bit softly struck in the centers. Population: 10 in 55, 9 finer (1/14). NGC ID# 25HE, PCGS# 7753

---

**1851-O Two and a Half, MS61  
Rich Green-Gold Toning**

- 4083 1851-O MS61 NGC. Variety 1.** A lovely and original green-gold quarter eagle. Void of any noticeable marks. Portions of the devices show softness usual for the antebellum New Orleans issue. The date was initially entered too far left with a pronounced downward slant. The date was partially lapped from the die, then entered a second time with level positioning. All four digits from the first date impression remain partially visible. Census: 23 in 61, 16 finer (1/14). NGC ID# 25HP, PCGS# 7762

---

**1854-C Quarter Eagle, AU53  
Low-Mintage Charlotte Issue**

- 4084 1854-C AU53 PCGS. Variety 1.** From the skimpy mintage of 7,295 pieces, this AU53 example is at the lower end of the considerable number of AU pieces certified at each service. The surfaces show only light wear but the central reverse devices on the eagle are incompletely struck up, as usual for the issue. Areas of yellow and orange patina are accented with some smoke-gray accents, indicative of bag storage at one time. Population: 8 in 53, 25 finer (1/14). NGC ID# 25HY, PCGS# 7770

---

**1857-D Two and a Half, MS61  
Well-Struck and Flashy**

- 4085 1857-D MS61 NGC. Variety 21-N (formerly 20-M).** A mintage of only 2,364 pieces ensures the rarity of the 1857-D. Nonetheless, the present coin is an excellent candidate for an advanced Dahlonge type collection, since it is sharply struck and has semiprooflike fields. Primarily radiant canary-gold though faint freckles of rose toning visit the obverse margin. The penultimate quarter eagle issue from the facility, since the Georgian gold fields were mostly played out by the late 1850s, and California bullion was by then coined at San Francisco. Census: 8 in 61, 5 finer (1/14). NGC ID# 25JD, PCGS# 7783

---

**1861 Quarter Eagle, MS65  
Type Two Reverse**

- 4086 1861 New Reverse, Type 2 MS65 PCGS.** The new reverse hub was first introduced in 1859, and enjoyed an extended transitional period. The primary diagnostic is slender, well-separated arrowheads. This clashed dies example has brilliant and frosty yellow luster with pristine surfaces and bold design definition. Population: 27 in 65, 11 finer (1/14). NGC ID# 25JX, PCGS# 7794

---

**1873 Liberty Quarter Eagle, MS65  
Scarcer Closed 3 Variant**

**4087 1873 Closed 3 MS65 PCGS.** From a mintage of 55,200 pieces, this 1873 Liberty quarter eagle was struck early in the year, before the Closed 3 was replaced by the Open 3 in the date. This delightful Gem is well-detailed, with just a touch of softness on the eagle's leg. The lustrous rose-gold surfaces show no mentionable distractions. Population: 8 in 65, 3 finer (1/14). NGC ID# 25KM, PCGS# 7818

---

**1885 Quarter Eagle, MS61  
Minimal Marks for the Grade**

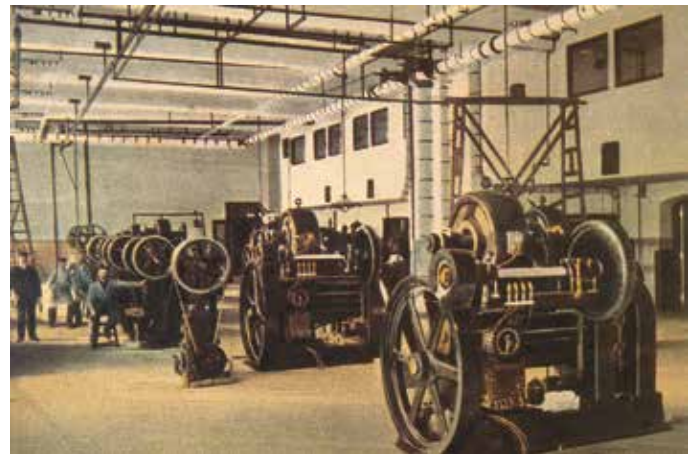

**4088 1885 MS61 PCGS.** The 1885 quarter eagle is a member of the "Sub-1,000" club, a select group of U.S. gold coin issues whose mintages were below 1,000 circulation strikes. In this case, the mintage of the 1885 quarter eagles was a paltry 800 business strikes. This Mint State example shows golden-orange surfaces with a few marks that are minimal for the grade, along with an excellent bold strike. Population: 5 in 61, 19 finer (1/14). NGC ID# 25L9, PCGS# 7837

---

**1906 Quarter Eagle, MS67  
Frosted Full Strike**

**4089 1906 MS67 PCGS.** A Superb Gem in every way, this highly lustrous quarter eagle possesses a full strike with devices that boldly rise above glowing, satiny fields. The rich, yellow-gold surfaces radiate lilac and orange hues when rotated under light, unhindered by abrasions or copper stains sometimes seen on this issue. A wonderful type coin, seldom available any finer. Population: 48 in 67, 2 finer (1/14). NGC ID# 25LX, PCGS# 7858

## PROOF LIBERTY QUARTER EAGLES

---

1845 Quarter Eagle, PR67 Ultra Cameo  
Finest of Three Confirmed  
The Trompeter Specimen

---

**4090 1845 PR67 Ultra Cameo NGC.** A magnificently preserved specimen of early (pre-1858) U.S. proof coinage, stunningly contrasted between sharply struck, thickly frosted devices and gleaming fields that shift between pale yellow and reflective “black” depending on the angle to the light. This piece shows several pedigree markers suggesting that it is the Trompeter coin (see rosters below): a small planchet flaw at star 11 on the obverse rim, a similar planchet flake in the space off the upper left (facing) corner of the eagle’s shield on the reverse, and the two small, straight lines under the second S in STATES that preclude an even finer designation.

At least four gold proof sets were struck by the U.S. Mint in 1845, though the reasons for striking and intended recipients are unknown. With an 1845 proof quarter eagle in the Mint Cabinet (later the National Numismatic Collection) and this piece being discovered along with the other coins in a gold proof set in England in the 1970s, there is appreciable evidence that at least one of the sets was meant for a diplomatic visitor, though such evidence is largely circumstantial.

Also unknown is the number of survivors. Based on the existence of at least four proof 1845 eagles and the fact that two of the three confirmed proof 1845 quarter eagles were found in complete proof sets (the third being the Mint Cabinet/National Numismatic Collection specimen), it is logical that a fourth (or possibly even fifth) proof 1845 quarter eagle might survive. Garrett and Guth (*Encyclopedia of U.S. Gold Coins*) and the PCGS *Population Report* both list “4 or 5” survivors, and indeed there are four certification events in the combined certified population, though the pattern of certification events (a PR67 Cameo and PR67 Ultra Cameo for NGC against a PR65 and PR65 Deep Cameo for PCGS) suggests crossover duplication. For now, though, here are three identified proof 1845 quarter eagles and their known histories.

#### **Roster of Known Proofs:**

1. **The present coin.** Part of a three-piece gold proof set. An “English bank vault,” stored for “more than a century” (per next source); Williams Collection Sale (Bowers and Ruddy, 9/1979), lot 1815; Ed Trompeter; Dennis Mendelson Collection Sale (Superior, 2/1991), lot 2595; Bowers and Merena (7/2004), lot 3024; ANA National Money Show (Heritage, 4/2006), lot 1689. Currently graded PR67 Ultra Cameo NGC; was PR66 Ultra Cameo NGC for past two auction appearances.

2. Mint Cabinet; National Numismatic Collection (Smithsonian Institution). Estimated as “PR66 Deep Cameo” in the *Encyclopedia of U.S. Gold Coins*.

3. Part of a three-piece gold proof set. Colonel E.H.R. Green; J.F. Bell; “A Memorable Sale of U.S. and Territorial Gold Coins” (Abe Kosoff, 3/1948), lot 105; John Jay Pittman (referred to as an “upstate N.Y. specialist collection” by Walter Breen); John Jay Pittman Collection, Part Two (David Akers, 5/1998), lot 1711; Minning Collection Sale (Bowers and Merena, 8/1999), lot 2149. Graded PR65 NGC in 1999.

#### **Additional Possible Examples:**

A. Lorin G. Parmelee; William H. Woodin; Waldo Newcomer; Burdette G. Johnson. Linked with entry 1 by Bowers and Merena cataloger.

B. Rumored B. Max Mehl. Breen (in his *Proof Encyclopedia*, 1977) reports the late Floyd Starr telling about Mehl handling an example, though skepticism is warranted. NGC ID# 2878, PCGS# 97871

**1881 Quarter Eagle, PR64 Deep Cameo  
Only 51 Proofs Produced**

**4091 1881 PR64 Deep Cameo PCGS.** The 1881 has the lowest business-strike mintage, only 640 pieces, which puts great pressure on proof examples of the issue as well. As a proof, the issue had a remarkably low production of only 51 pieces. Only 43 proof certification events have been recorded at both major services, giving credence to the estimate by Garrett-Guth of “20 or so” surviving examples in proof format. The vast majority of the proofs known are either non-Cameo or Cameo.

It is surprising for an issue with such a limited mintage that only 16 pieces have been certified with Deep Cameo contrast by both services combined. This example has deep, even reddish-gold surfaces over each side. A few grade-limiting contact marks appear on Liberty’s face and in the right obverse field. Population: 3 in 64 Deep Cameo, 4 finer (1/14).

Ex: Orlando FUN Signature (Heritage, 1/2012), lot 4773, which realized \$14,950. NGC ID# 2884, PCGS# 97907

**1899 Quarter Eagle, PR62  
Deep Orange-Gold Color**

**4092 1899 PR62 PCGS.** The remarkably clean appearance of this visually appealing specimen is only impacted slightly by the presence of some wispy marks on the lower obverse and on the right reverse field, beneath the right (facing) wing. A sharply struck proof with deep orange-gold coloration across the nicely preserved surfaces. Just 150 pieces were originally minted, and perhaps half of that number still survive. NGC ID# 288N, PCGS# 7925

**INDIAN QUARTER EAGLES**

**1911-D Strong D Quarter Eagle, AU55  
Nice Key-Date Specimen**

**4093 1911-D AU55 PCGS. Strong D.** The Strong D mintmark is so-indicated on the holder. The apricot-gold and yellow-gold surfaces of this Choice AU specimen are imbued with traces of lavender. The design elements are sharply defined, save for some high-point wear, such as on the eagle’s shoulder. The few minuscule marks in the open upper-right reverse field do not detract. A nice key-date representative. NGC ID# 2894, PCGS# 7943

**1911-D Indian Quarter Eagle, AU58  
An Impressive Key Date Coin**

**4094 1911-D AU58 NGC.** An impressive near-Mint representative of the key date 1911-D quarter eagle. The light orange-tan surfaces reveal boldly defined motifs, and faint high-point wear across the Indian’s headdress and on the eagle’s head and shoulder areas. Wispy hairlines in the fields, and two or three trivial marks on the reverse are noted but do not seriously detract from the coin’s favorable appearance. NGC ID# 2894, PCGS# 7943

---

1914 Indian Quarter Eagle, MS64  
Low-Mintage Issue

- 4095 1914 MS64 PCGS. The 1914 Indian quarter eagle claims a low mintage of 240,000 pieces. This impressive Choice example displays sharply detailed design elements and vibrant mint luster throughout. The well-preserved orange-gold surfaces are free of large or distracting flaws and eye appeal is outstanding. NGC ID# 2898, PCGS# 7946

---

1914 Quarter Eagle, MS64+  
Elusive in Finer Grades

- 4096 1914 MS64+ PCGS. CAC. The 1914 quarter eagle is an important condition rarity in the short series, with Gem specimens nearly impossible to locate. This near-Gem specimen would fit nicely in an otherwise Gem collection of these coins. Both sides are sharply detailed with frosty pinkish-gold luster and trivial, grade-consistent marks. PCGS has only certified 56 finer examples (1/14). NGC ID# 2898, PCGS# 7946

---

1914-D Indian Quarter Eagle, MS65  
Premier Condition Rarity in Higher Grades

- 4097 1914-D MS65 PCGS. In grades at or above the Gem level, the 1914-D Indian quarter eagle is a prime condition rarity in the series, from a reported mintage of 448,000 pieces. Lower Mint State examples can be found with patience, but the typical example has too many surfaces marks to qualify for a really high grade, and many have weak strikes as well. The 1914-D is definitely an underrated issue in higher grades and even specialists sometimes fail to recognize its elusive nature at the Premium Gem level.

This delightful Registry Set candidate offers sharply detailed design elements and vibrant mint luster throughout. The well-preserved yellow-gold surfaces show a few hints of rose, with outstanding eye appeal. No mentionable distractions are evident. Population: 45 in 65, 0 finer (1/14). NGC ID# 2899, PCGS# 7947

## PROOF INDIAN QUARTER EAGLES

### 1911 Indian Quarter Eagle, PR64 Popular Matte Proof Issue

**4098 1911 PR64 NGC.** The 1911 Indian quarter eagle is not as rare as some other matte proof issues of the series, but it is more elusive than its mintage of 191 pieces would suggest. Contemporary collectors did not appreciate the virtues of the matte or Roman Gold finishes the Mint experimented with in the early 20th century and many coins undoubtedly went unsold, to be melted after the beginning of the year.

The 1911 proof quarter eagles have a finish similar to that used in 1908, but the surfaces are more fine-grained. This delightful Choice specimen features well-detailed design elements and olive-gold surfaces that show just a few shiny spots in the matte finish on both sides. Census: 16 in 64, 78 finer (1/14). NGC ID# 289K, PCGS# 7960

### 1912 Indian Quarter Eagle, PR65 Elusive Matte Proof Issue

**4099 1912 PR65 NGC.** The Mint varied the finish on proof gold coins almost every year from 1907 to 1915, in an effort to find a popular replacement for the brilliant finish of earlier years, which was not suitable for the new coinage designs of that era. A fine-grain matte texture was tried in 1912, with many microscopic facets that reflect the light. The coins are lighter in color than those of surrounding years, but collectors still preferred the earlier brilliant proofs, and many of the 197 pieces struck remained unsold at the end of the year. The 1912 Indian quarter eagle is the third rarest proof of the series in absolute terms.

The present coin is a sharply detailed Gem with light orange-gold surfaces that show a few hints of rose. A shallow scratch below the first S in STATES is the only mentionable flaw. Census: 9 in 65 (1 in 65+), 30 finer (1/14). NGC ID# 289L, PCGS# 7961

## THREE DOLLAR GOLD PIECES

### 1854-O Three Dollar, AU

- 4100 1854-O AU50 NGC. Variety 2. Ex: Manhattan Collection. A wheat-gold New Orleans type coin with moderate wear on the wreath and Liberty's hair. No strike-throughs are present. Smooth aside from marks near the IT in UNITED and beneath Liberty's eye. The usual die state with partially lapped ribbon loops on the wreath. NGC ID# 25M5, PCGS# 7971

### 1855-S Three Dollar, AU55 Seldom Seen Any Finer

- 4101 1855-S AU55 NGC. Ex Manhattan Collection. This issue is virtually unobtainable in Mint State grades — only five Uncirculated examples have been seen by PCGS and NGC combined — and better AU examples such as this are always in demand by collectors. Hints of prooflike reflectivity frame the devices, where glimpses of mint luster remain. Light abrasions are seen on both sides of the coin, yet none are severe or individually important. The yellow-gold surfaces display a sharp strike, now a bit softened by wear. Census: 17 in 55, 14 finer (1/14). NGC ID# 25M7, PCGS# 7973

### 1856 Three Dollar, MS64 Moderately Available Early Date

- 4102 1856 MS64 PCGS. Even though the Philadelphia Mint coined 26,010 three dollar gold pieces this year, the 1856 is markedly scarcer than the 1854 and 1855 in all Mint State grades. This piece has an above-average strike, although we note slight weakness on the U in UNITED. The surfaces are radiantly lustrous with a hint of orange patina over medium yellow-golden color. A notable opportunity for the gold specialist and a lightly marked, high-end example, at the near-Gem level of preservation. Seldom seen finer at either service. Population: 32 in 64, 4 finer (1/14). NGC ID# 25M8, PCGS# 7974

**1868 Three Dollar, MS62  
Rich Orange-Gold Color**

- 4103 1868 MS62 PCGS.** The 1868 three dollar gold issue saw a mintage of 4,850 pieces for circulation, a quantity that would be considered paltry in most series but is on the high side for the series at hand. Examples are available up through the Select Mint State level but become scarce in higher grades. This MS62 PCGS-certified coin offers rich luster on orange-gold surfaces with a few scattered marks that determine the grade, including one hit in the center of Liberty's cheek. Population: 42 in 62 (1 in 62+), 43 finer (1/14). NGC ID# 25MP, PCGS# 7989

**1870 Three Dollar Gold, MS62  
Important Low-Mintage Issue**

- 4104 1870 MS62 PCGS.** Seldom seen any finer, this reflective example displays a degree of prooflikeness on the obverse and a frosty reverse. Unusual and attractive toning accents appear on the coin, with orange, lavender, and magenta accents vying for attention. The surfaces are well-struck but lightly abraded, accounting for the assigned grade. Just 3,500 pieces were minted of this rare issue. Population: 15 in 62, 8 finer (1/14). NGC ID# 25MS, PCGS# 7991

**1878 Three Dollar, MS63  
In-Demand Type Issue**

- 4105 1878 MS63 PCGS.** The honey-gold surfaces of this Select Mint State coin are imbued with faint accents of rose coloration in the fields. The design motifs are boldly rendered, if typically incomplete on some of the high points. A readily available three dollar gold issue, extremely popular with type collectors. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS63  
Popular Type Coin**

- 4106 1878 MS63 PCGS.** The 1878 three dollar gold piece is one of the most available dates of the series, extremely popular as a type coin. This attractive Select specimen is well-detailed, with a touch of softness on the ribbon bow knot. The rich orange-gold surfaces display hints of lilac and vibrant mint luster. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, Appealing MS64**

- 4107 1878 MS64 PCGS. CAC.** A medley of reddish-gold, apricot, and yellow-gold patination covers the lustrous surfaces of this near-Gem three dollar piece. The design elements are sharply struck and both sides have been nicely cared for. These attributes add up to pleasing overall eye appeal, aptly recognized by CAC. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS64+  
Excellent Type Coin**

- 4108 1878 MS64+ PCGS. CAC.** The 1878 three dollar is one of the most available dates of the series. This factor, along with the highly lustrous yellow-gold and apricot surfaces that have been well cared for make this high-end near-Gem an excellent choice for a high-grade collection of U.S. type coins. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS65  
Appealing Antique-Gold Gem**

- 4109 1878 MS65 NGC.** The 1878 mintage of three dollar gold pieces, at more than 82,000 coins, was the last great yearly production total of the series, even though it would limp along for 11 more issues, through 1889, before ending in a whimper. The 1874 mintage was about half that number, at 41,800 coins, and both today are considered type issues. (The first-year 1854 is technically a one-year subtype with smaller denomination on the reverse, and the largest mintage of the series.) This Gem 1878 shows appealing antique-gold color with a sharp strike and no mentionable marks. A tiny dark fleck appears above the N in UNITED. NGC ID# 25MZ, PCGS# 8000

**EARLY HALF EAGLES**

**1796/5 Small Eagle Half Eagle, AU58  
BD-1, Only Dies for the Date  
Rare Issue in High Grade**

- 4110 1796/5 Small Eagle AU58 NGC. BD-1, High R.4.** Bass-Dannreuther Die State a/b. A small mintage of 6,196 Capped Bust Right half eagles was reported in 1796, but it seems likely that many of those coins were actually dated 1795. Only a single die variety is known with the 1796 date, compared to twelve Small Eagle varieties and three Large Eagle varieties dated 1795. The 1796 obverse is actually an overdate created by punching a 6 over the 5 in the date of an unused obverse die from the previous year. The reverse die was used in 1795, on the very rare BD-12 variety. John Dannreuther estimates the actual mintage of the 1796/5 at 1,057-2,000 pieces. Probably no more than 80-100 examples are still extant in all grades, and specimens in near-Mint condition are quite rare.

The 1796/5 half eagle was avidly collected by early numismatists, and the overdate was noticed at an early date. The cataloger of lot 871 of the Randall Collection (W. Elliot Woodward, 6/1885) described a coin in similar grade to the present piece as, "1796 Struck over 1795; barely circulated, extremely rare." Recent auction sales include the AU58 PCGS coin in lot 7501 of the Chicago Signature (Heritage, 8/2011) that realized \$80,615.

The coin offered here is a delightful high-grade example, with just a touch of actual wear on the design elements. The reverse die was lapped in its previous use in 1795, resulting in some lack of detail in areas like the wreath and peripheral letters, even though this coin appears to be well-struck. The attractive greenish-gold surfaces show prooflike reflectivity in sheltered areas, with only minor signs of contact. This single-variety date is always popular with early gold specialists and this lot represents an important opportunity for the discerning collector. Census: 7 in 58, 15 finer (1/14). NGC ID# 25NE, PCGS# 8067

**1805 BD-1 Half Eagle, MS61  
Ideal Type Candidate**

- 4111 1805 MS61 NGC. CAC. BD-1, High R.3.** Bass-Dannreuther Die State a/a, with no clash marks, die cracks, or signs of lapping. This variety is the most plentiful of five known die marriages for the date, with an estimated population of about 200 to 250 coins. That survival is approximately equal to the total survival of the other four varieties, combined. Date and type collectors will likely seek an example of BD-1 for their collection. This satiny Mint State piece has light abrasions that are expected for the grade, with reflective fields displaying brilliant yellow mint luster. NGC ID# 25P4, PCGS# 8088

---

1807 BD-6 Half Eagle, AU  
Bust Right, Late Die State

- 4112 1807 Bust Right AU50 PCGS. BD-6, High R.4.** Bass-Dannreuther Die State b/c. A butter-gold representative of the scarce BD-6 variety. The late die state with reduced detail on the shoulder curl and cloud 3 due to mint lapping. Luster is particularly extensive on the reverse. Minor adjustment marks, as made, are limited to the area near the eagle's right (facing) wingtip. The obverse field has wispy abrasions and we note a pair of small roundish marks above the cap. Housed in a former generation holder. NGC ID# 25P8, PCGS# 8092

---

1807 Bust Left Half Eagle, BD-8  
Uncirculated Sharpness

- 4113 1807 Bust Left — Reverse Improperly Cleaned — NGC Details. Unc. BD-8, R.2.** Careful rotation reveals faint hairlines on the field near the eagle's head, but most collectors would be delighted to own such a lustrous example of this coveted early gold type. The obverse displays minor adjustment marks (as made) on the denticles and upper cap, but neither side has any noticeable abrasions. Ex: *Summer FUN Signature* (Heritage, 7/2010), lot 4651. NGC ID# 25P9, PCGS# 8101

---

1807 Bust Left Five Dollar, BD-8, MS62

- 4114 1807 Bust Left MS62 NGC. BD-8, R.2.** The 5 in the denomination is high and left of the fletchings. The 1807 Bust Right (or Capped Bust, as opposed to the earlier Draped Bust/Bust Left) half eagle, designed by German immigrant and indentured servant John (Johann Matthias) Reich and introduced in this year, is by far the most available of the eight different varieties of both types known for the year — and the other Bust Right variety, BD-7, is ranked High R.5 or rare. This makes the present coin and others of its ilk prime territory for type collectors or early gold specialists. NGC ID# 25P9, PCGS# 8101
-

---

1826 Capped Head Half Eagle, MS65  
Rare Early Gold Issue, BD-1 Variety  
High Condition Census Example

---

**4115 1826 MS65 NGC. BD-1, R.5.** Bass-Dannreuther Die State a/c. The 1826 Capped Head half eagle is a rare issue from one of the most challenging series in American numismatics. Mint records indicate that 18,069 five dollar gold pieces were struck in 1826, a small mintage in absolute terms, but not unusually small in the context of the series. Both David Akers and PCGS estimate only 30-35 examples survive today in all grades. Even that tiny estimate may be too large, as NGC has certified only seven coins, all in Mint State grades, while PCGS has graded 12 total examples, ranging from AU55 to MS66 (1/14). Several coins are held in institutional collections, with one uncertified example in the Smithsonian Institution and another in the Connecticut State Library. Two proof specimens are listed in the literature, one in the Smithsonian and another, ex: Waldo Newcomer; Farouk, that is currently untraced. The finest Mint State example, the fabulous MS66 BD-2 specimen from the David and Sharon Akers Collection, sold in Heritage Auctions' January 2014 Fun Signature for a record \$763,750.

Two die varieties are known for the date, with this coin representing the rare BD-1 variety, identified by the low position of star 13 and the Large Letters reverse. Although the BD-1 is rare in today's market, it probably accounted for the majority of the reported mintage, as only three examples of the other variety (BD-2, Small Letters) are known. This was the only use of the obverse die, but the reverse was previously used to strike the 1820 BD-4, BD-5, and BD-7 varieties. The reverse die was lapped prior to its use in 1826, resulting in some loss of detail on the eagle's claws and leaves. A small die lump is located between the top branch and the second branch, and another is evident below the leaves, near the rim at 7 o'clock.

The 1826 Capped Head half eagle has been prized by collectors since the earliest days of the hobby. One early auction appearance was in lot 1650 of the Fifth Semi-Annual Sale (W. Elliot Woodward, 10/1864):

"1826 Splendid impression, nearly proof; exceedingly rare."

The lot realized \$35.00, a strong price at the time, to J.O. Emery, a New York collector and restaurateur. Because of the small mintage, many high-grade 1826 half eagles have prooflike surfaces, as noted in Woodward's description.

The present coin is a delightful Gem, probably the second or third-finest known example. The 1826 appears at auction about once per year on the average, and we believe this coin is the only MS65-certified example ever offered publicly. The MS66 Akers coin mentioned above is the only 1826 half eagle in higher numeric grade that has ever appeared at auction. This coin exhibits razor-sharp definition on most design elements, with full star radials and just some slight incompleteness, due to lapping, on the eagle's claws and leaves. The well-preserved greenish-gold surfaces show a few hints of reddish patina, with vibrant mint luster on both sides. No mentionable distractions are evident and eye appeal is terrific. This coin should find a home in the finest collection or Registry Set.

*Ex: Alex Shuford Collection (Abe Kosoff, 5/1968), lot 1958; Donald Carter; FUN Signature (Heritage, 1/1998), lot 7778, realized \$87,400; February Auction (Superior, 2/1999), lot 3186.*

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25R4, PCGS# 8135*

## CLASSIC HALF EAGLE

1834 Crosslet 4 Classic Head Half Eagle, AU55  
Important and Very Scarce Early Gold Variety

- 4116** 1834 Crosslet 4 AU55 NGC. Second Head, Breen-6503, McCloskey 5-D, R.4. The very scarce Crosslet 4 variety of 1834 Classic Head half eagle. Garrett and Guth call this "vastly rarer" than the Plain 4 version, by a factor of 10 to 1. This piece shows great eye appeal on orange-gold surfaces with some glints of rose around the protected device edges. The strike is fairly sharp, and a couple of small marks on the lower reverse do not detract from the significant eye appeal. An important early gold coin. Census: 17 in 55, 22 finer (1/14). PCGS# 8172

## LIBERTY HALF EAGLES

1841-C Half Eagle, AU55  
Bright and Well-Struck

- 4117** 1841-C AU55 NGC. Variety 1. Given the moderate mintage of 21,400 pieces the 1841-C is one of the more available early-date Charlotte half eagles, but in Doug Winter's third edition of *Gold Coins of the Charlotte Mint: 1838-1861* he notes that "it has become harder to find choice, original pieces than when I wrote the two earlier editions of this book." This Choice AU NGC example shows bright yellow-gold surfaces that give off a slight green cast and exhibit luster in the recessed areas. The strike is sharp throughout, usual for the issue. A few light contact marks are visible, but not to the extent usually seen on examples of this date. Census: 13 in 55, 21 finer (1/14).  
Ex: *Long Beach Signature* (Heritage, 6/2007), lot 2326. NGC ID# 25SP, PCGS# 8203

1852 Half Eagle, MS64  
Tied for Finest at PCGS

- 4118** 1852 MS64 PCGS. No Motto Liberty half eagles are rarely seen in grades finer than MS63. Even the most plentiful dates are elusive in higher grades. The 1852 is a prime example with a mintage that exceeded a half million coins, but with only 23 examples certified MS64 at NGC and PCGS, and with only three finer NGC coins. The average certified grade for this issue is less than AU55. This Choice Mint State specimen is boldly defined with nearly full star and hair detail on the obverse and only slight weakness on the claws and arrow feathers on the reverse. Both sides have brilliant yellow luster with frosty mint surfaces and exceptional eye appeal. Population: 11 in 64 (1 in 64+), 0 finer (1/14). NGC ID# 25UA, PCGS# 8250

1852-D Five Dollar Gold, AU58  
Affordable Dahlonega Half Eagle

- 4119** 1852-D AU58 NGC. CAC. Variety 32-V (formerly 27-U). Opportunities to acquire near-Mint Dahlonega gold are few, despite this being one of the more available issues. This minimally marked half eagle has only minor, scattered abrasions and is sharply struck except for the often-found weakness at the eagle's talons. The surfaces are lemon-gold with a touch of mint luster encircling the stars and legends. Not far from Mint State and much more affordable in this grade. Census: 37 in 58, 18 finer (1/14). NGC ID# 25UC, PCGS# 8252

**1861-D Half Eagle, AU50**  
**Attractive and Relatively Well-Defined Example**

- 4120 1861-D AU50 PCGS Secure. Variety 46-JJ.** The 1861-D five dollar, with its strong Civil War connection, is ranked first among the 26 Dahlonega issues in overall rarity, and second in high grade rarity, according to Doug Winter. The paltry mintage of 1,597 pieces ensures the scarcity of the 1861-D, and few were set aside with only 18-21 pieces believed extant in AU. The surfaces are lightly peppered with small abrasions, but none are of singular consequence. The strike is a bit soft in the centers, but not as weak as often seen. The yellow-gold color is accented by deeper reddish accents surrounding the devices. NGC ID# 25VM, PCGS# 8290

**1871-S Half Eagle, Sharply Struck AU58**

- 4121 1871-S AU58 NGC.** The 1871-S Liberty half eagle boasts a low mintage of 25,000 pieces and examples are scarce-to-rare in all grades. Sharply struck design features show on the yellow-gold and apricot surfaces of this near-Mint State specimen. Census: 18 in 58, 2 finer (1/14). NGC ID# 25WE, PCGS# 8324

**1875-CC Variety 1-B Half Eagle, XF45**  
**Doubled Reverse Die**

- 4122 1875-CC XF45 PCGS Secure. Variety 1-B.** This popular variety is more plentiful than most, and its popularity stems from the delicate die doubling noted at the lower reverse. The T and E of UNITED actually show evidence of a tripled die. This Choice XF example is ideal for collectors who seek an attractive example at an affordable price. Both sides combine honey-gold with faint blue-green peripheries, retaining a trace of luster on each side. Population: 13 in 45, 16 finer (1/14). NGC ID# 25WU, PCGS# 8337

**1876 Half Eagle, AU55**  
**A Popular, Infrequently Found Coin**

- 4123 1876 AU55 NGC.** The 1876 half eagle is a popular date owing to the very low mintage 1,432 circulation strikes. As might be expected, examples of this issue are seldom encountered in any grade. In this respect, it is worth noting that NGC and PCGS combined have graded just 45 specimens. Reddish-gold and yellow-gold patination runs over both sides of this Choice AU coin. The design elements are well-struck save for the usual softness on the hair at Liberty's temple and the eagle's breast. This is a choice, and infrequent, find for the half eagle collector. Census: 5 in 55, 10 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25WW, PCGS# 8339

**1876-CC Half Eagle, VF35**  
**Variety 1-A, The Only Die Pair**

- 4124 1876-CC VF35 PCGS. CAC. Variety 1-A.** The only known die variety for the 1876-CC half eagles, a single die pair that produced 6,887 coins. Few of those survive. The present piece is an attractive Choice VF example with pleasing wheat-gold surfaces. Population: 10 in 35, 34 finer (1/14). NGC ID# 25WX, PCGS# 8340

**1877-CC Five Dollar, AU55  
Far Finer Than Normally Seen**

- 4125 1877-CC AU55 NGC. Variety 1-B.** Only known dies for the issue, although another reverse may exist. The smallish mintage for the 1877-CC half eagle issue was 8,680 pieces, and the present Choice AU NGC-certified example is far finer than the average graded coin, which falls between VF35 and XF40. The lustrous surfaces on this attractive example show light orange-gold color with a sprinkling of small abrasions but no major contact. The strike is fairly sharp, producing good detail on the hair cords as well as the star centrils. NGC has seen only four examples numerically finer (1/14). NGC ID# 25X2, PCGS# 8343

**1896-S Half Eagle, MS63  
Brilliant and Attractive**

- 4126 1896-S MS63 PCGS.** A healthy mintage of 155,400 makes this an available San Francisco issue, but it becomes rare in Select Mint State or finer. Some chatter and minor abrasions in the left obverse field and on the portrait limit the grade of this boldly struck half eagle, which has splendid eye appeal and bountiful mint luster. Rich, honey-gold surfaces have a Mint-fresh quality. Rare this nice. Population: 5 in 63, 5 finer (1/14). NGC ID# 25YL, PCGS# 8393

**1902-S Liberty Half Eagle, MS66  
Exceptional Type Coin**

- 4127 1902-S MS66 PCGS.** The 1902-S Liberty half eagle was a well-produced issue and the date is reasonably available in high grade, making it a popular choice with type collectors. This spectacular Premium Gem is sharply detailed in most areas, with just a touch of softness on the lower-left stars. Vibrant mint luster and well-preserved orange-gold surfaces create outstanding eye appeal. Population: 25 in 66 (1 in 66+), 7 finer (1/14). NGC ID# 25YZ, PCGS# 8406

**1903 Half Eagle, Sharply Struck MS65+**

- 4128 1903 MS65+ NGC. CAC.** The 1903 half eagle can be located in the lower Mint State grades without too much difficulty. Near-Gems are scarce, however, and higher-grade examples are rare. The lustrous, yellow-gold surfaces of this high-end Gem are tinged with red, and the design elements are uniformly sharply struck. The CAC sticker affirms the coin's above-average eye appeal. Census: 21 in 65 (1 in 65+), 11 finer (1/14). NGC ID# 25Z2, PCGS# 8407

## INDIAN HALF EAGLES

1909-O Indian Head Half Eagle, XF40  
Scarce Final-Year New Orleans Issue

- 4129 1909-O XF40 ANACS.** Any example of this final-year issue from the New Orleans Mint will attract the interest of collectors. The 1909-O half eagle is the only Indian Head gold coin ever struck at the fabled Southern mint, making it an essential acquisition for New Orleans type specialists. This example shows largely smooth surfaces that exhibit trace amounts of surviving mint luster and attractive original coloration.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25ZK, PCGS# 8515*

1909-O Half Eagle, AU50  
Low-Mintage Series Key

- 4130 1909-O AU50 NGC.** The 1909-O half eagle is the last gold coin struck at the fading and decrepit — yet historic — New Orleans Mint, which would cease coinage operations in the same year this piece was produced. The low mintage of 34,200 pieces and its curious beginnings make the issue an in-demand favorite among collectors. This AU50 NGC-graded example boasts great eye appeal with orange-red surfaces that show light wear and minimal marks.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25ZK, PCGS# 8515*

1909-O Indian Half Eagle, AU55  
Only O-Mint Indian Five

- 4131 1909-O AU55 NGC.** The 1909 half eagle is the only coin of the Indian design struck at the New Orleans Mint, making it a must-have issue for type collectors. The 1909-O is also the final gold coin issued at the famous Southern facility, with a small mintage of 34,200 pieces. Although the issue is not too difficult to locate in lower circulated grades, it becomes quite rare at the Mint State level, and even well-worn specimens are always in demand.

This attractive Choice AU specimen shows a touch of wear on the well-detailed design elements but the bright yellow and rose-gold surfaces are free of large or distracting abrasions. Both sides retain considerable amounts of original mint luster. This coin will be a welcome addition to a fine collection of Southern gold or type set.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25ZK, PCGS# 8515*

---

1909-O Indian Half Eagle, MS61  
Ideal O-Mint Type Coin  
Low-Mintage Final-Year Issue

**4132 1909-O MS61 PCGS. CAC.** Though its half eagle and double eagle gold coins are plenty famous today, for much of its post-Civil War history, the U.S. Mint in New Orleans was the “Silver Dollar Mint.” Reopened in 1879 after the end of Reconstruction and closed in 1909, New Orleans saw its greatest use in striking the Morgan dollars mandated by the Bland-Allison Act. In fact, for the years 1880 to 1890, it coined the silver dollar denomination to the exclusion of all others. After that New Orleans added minor silver coinage and ten dollar gold eagles to its output, but the end of the Morgan dollar in 1904 and the outdated facilities made the New Orleans Mint less and less viable. Coinage ceased after the 1909 issues and did not resume before minting operations were decommissioned in 1911.

It is precisely because the half eagles and double eagles struck in post-Civil War New Orleans were such small afterthoughts that they are popular with modern collectors. One such issue is the 1909-O half eagle with its self-consciously modern sunken-relief design that suggests a future in which the antiquated New Orleans Mint had no place. Only 34,200 pieces were struck in the last year of operations, and its status as a one-year type coin makes it one of the most popular New Orleans issues of any denomination.

The present coin is a very scarce Mint State example, with well-detailed design elements and brightly lustrous surfaces that display mingled shades of green and orange-gold patina, with occasional highlights of rose. Scattered minor to moderate marks on each side explain the grade. Population: 24 in 61, 41 finer (1/14). NGC ID# 25ZK, PCGS# 8515

**1910-D Half Eagle, MS64**  
**Nicely Produced and Well-Preserved**

**4133 1910-D MS64 PCGS.** The 1910-D half eagle is available in near-Gem for a price, and generally well-struck and nicely produced when so found, as the present example demonstrates. The medium orange-gold surfaces show golden accents, and the high points are free of singular contact. Finer coins are seldom seen. Population: 54 in 64 (6 in 64+), 10 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 28DL, PCGS# 8518*

**1911 Indian Half Eagle, MS65**  
**Only One Numerically Finer at PCGS**

**4134 1911 MS65 PCGS.** From a mintage of 915,000 pieces, the 1911 Indian half eagle is a reasonably available issue, popular with series specialists and type collectors alike. Unfortunately, the 1911 was not a well-produced issue, and many examples are seen with soft strikes and lackluster surfaces. Surface marks are also a problem for many specimens. As a result, the 1911 is very scarce in MS65 condition, and prohibitively rare in finer grades.

The present coin is a delightful Gem, with sharply detailed design elements and vivid greenish-gold surfaces that show highlights of rose. Only a few minor contact marks are evident and eye appeal is outstanding. Population: 55 in 65 (2 in 65+), 1 finer (1/14). NGC ID# 28DP, PCGS# 8520

**1912 Indian Half Eagle, MS65**  
**None Finer at PCGS**

**4135 1912 MS65 PCGS.** The 1912 Indian half eagle boasts a reported mintage of 790,000 pieces, and the issue was produced to a high standard of quality. As a result, the 1912 is not too difficult to locate in high grade and often trades as a type coin. The 1912 is very scarce at the MS65 level, however, and finer specimens are virtually unobtainable. Although three MS66 coins are reflected in the NGC Census Report, none of them has ever been offered publicly.

The present coin is a delightful Gem, with pinpoint definition on all design elements. The well-preserved yellow-gold surfaces show attractive highlights of green, with vibrant mint luster on both sides. Eye appeal is outstanding. This coin is a prime Registry Set candidate. Population: 50 in 65, 0 finer (1/14). NGC ID# 28DS, PCGS# 8523

**1913 Indian Five, MS65  
Registry Set Candidate**

- 4136 1913 MS65 PCGS.** With a reported mintage of 915,901 pieces, the 1913 Indian half eagle is not too difficult to locate in high grade, making it a popular choice for both type and date collectors. The present coin exhibits razor-sharp definition on all design elements, with fine detail on the lower headdress feathers and other usual trouble spots. The well-preserved yellow and rose-gold surfaces radiate vibrant mint luster from both sides and no mentionable distractions are evident. Eye appeal is terrific and this coin is definitely a Registry Set candidate. Population: 51 in 65, 1 finer (1/14). NGC ID# 28DT, PCGS# 8525

**1916-S Half Eagle, Sharply Struck MS63**

- 4137 1916-S MS63 NGC.** The 1916-S Indian half eagle is reasonably available in lower Mint State grades, but becomes difficult to obtain in near-Gem. The lustrous, yellow-gold surfaces of this Select specimen are tinged with hints of red. The design elements are sharply struck, including the feathers on the eagle's shoulder. NGC ID# 28DY, PCGS# 8532

**1916-S Half Eagle, MS63  
Last Issue Until 1929**

- 4138 1916-S MS63 PCGS. CAC.** This is the final Indian half eagle of the decade, with only one other issue that was produced in 1929. The San Francisco Mint was the only facility to strike gold coins for commercial use in 1916. This boldly defined Select Mint State piece has brilliant light yellow surfaces with frosty luster and excellent eye appeal. NGC ID# 28DY, PCGS# 8532

---

1929 Indian Half Eagle, MS64  
Elusive Final Date of the Series  
Very Rare in Finer Grades

**4139 1929 MS64 PCGS.** A substantial mintage of 662,000 Indian half eagles was accomplished in 1929, but the issue is much more difficult to locate than that generous total would suggest. Apparently, the great majority of the mintage was held in banks and Treasury vaults at the time of issue, with a relatively small number of coins released into circulation. No half eagles were struck in the period from 1916 to 1929, and the Mint may have anticipated a large demand for the denomination when they produced the coins. Unfortunately, the onset of the Great Depression later in the year drastically reduced the need for cash in the shrinking economy and few people needed five dollar coins in the following years. Most of the 1929 half eagles were still languishing in the vaults when President Franklin Roosevelt issued his Gold Recall in 1933. The coins were easily rounded up and turned in to the government, to be melted into gold ingots and stored at Fort Knox in later years.

The 1929 Indian half eagle has always been an elusive date, and collectors began to take notice of the issue in the 1940s. In lot 345 of his April 1949 Charles W. Green Collection, B. Max Mehl noted the following:

**"1929 U.S. \$5.00 Gold.** Last year of issue. Extremely rare, far more so than is generally recognized. It was only in recent years that the rarity of this coin was recognized or discovered. In fact, as recently as only 1944, it cataloged at \$25.00, but in March of the same year, 1944, a specimen brought \$225.00 at auction. And in December of the same year, 1944, another specimen which appeared at auction, brought \$375.00. The next specimen to be offered was in 1946 when it brought \$475.00. The last specimen I offered was in my Sale of the Geiss Collection held in February of 1947 where it sold for \$365.00. It was not as choice as the specimen here offered. This coin is in absolutely uncirculated condition. One of the rarest of our Half-Eagles and a future really great rarity."

The lot realized \$365, the same total as the coin in the Geiss sale. Recent auction appearances include the MS64 PCGS coin in lot 4501 of the ANA Auction (Stack's Bowers, 8/2013) that realized \$70,500.

The coin offered here is an attractive Choice specimen with vivid orange-gold surfaces that show only minor signs of contact. The design elements are well-detailed and vibrant mint luster radiates from both sides. Eye appeal is outstanding. The 1929 is very rare in grades above the MS64 level and PCGS has graded only eight coins in higher numeric grades (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2800, PCGS# 8533*

## EARLY EAGLES

### 1795 Capped Bust Right Eagle, AU Details Small Eagle, 13 Leaves, Scarce BD-4 Variety First Year of Denomination

**4140** 1795 13 Leaves — Repaired — NGC Details. AU. BD-4, R.5. Bass-Dannreuther Die State b/b. Although the United States Mint was established in 1792, no gold coinage was issued until 1795. There were several reasons for the delay, including the high bonds Congress required several key employees to post and the lack of a dependable source of gold. Fortunately, Congress lowered the bonds required for the chief coiner and assayer in 1794, and enough gold was deposited by banks, merchants, and wealthy individuals in 1795 to make a small mintage of gold coins practical. Mint Director Henry William DeSaussure made gold coinage a priority after he took office in 1795, and the first delivery of half eagles was accomplished on July 31.

Ten dollar gold coinage followed in September, and a total of 5,583 eagles was struck in 1795, with five die varieties known for the date. This coin represents the scarce BD-4 variety, the only variety where the 5 in the date does not touch the bust. The BD-4 has a surviving population of just 60-80 examples in all grades and probably accounted for 850-1,500 pieces of the reported mintage. This was the only use of the obverse die but the reverse was also used to strike the 1795 BD-5 variety.

The present coin is sharply detailed in most areas, with just a touch of softness on the central reverse. Some light planchet adjustment marks are visible on the eagle's breast and in several locations around the reverse rim, but the only contact mark worth mentioning is a short scratch below the eagle's right (facing) wing. The antique-gold surfaces retain much original mint luster, but some signs of light cleaning are evident, and there is some evidence of tooling in the obverse field. This piece is still an attractive example, despite the noted flaws, and should find a home in a fine collection of early U.S. gold.

*From Christopher Bently's Nob Hill Collection.*

---

1796 Eagle, BD-1, AU55  
Very Scarce One-Year Small Eagle Subtype  
Stars 8x8 Obverse, 11 Leaves Reverse

**4141** 1796 AU55 NGC. BD-1, R.4. Bass-Dannreuther Die State d (early)/c (early). We can clearly place the striking of the 1796-dated eagles to an approximate timeframe, sometime after Tennessee was admitted to the Union on June 1, 1796, as all examples of these coins bear 16 stars, arranged 8 left, 8 right. Only a single die pair was employed, so the 16 Stars obverse is sufficient to attribute the 1796 BD-1 variety. The Small Eagle reverse was, however, also carried over to strike the 1797 Small Eagle coins (BD-1), the obverse with the unusual, awkward, but nifty arrangement of the stars placed 12 left, 4 right.

The mintage of 1796 eagles is given as 4,146 pieces, but some of the 1796-dated eagles could have been struck in calendar-year 1797, just as some of the 1795-dated eagles could have been struck in calendar-year 1796. Nonetheless, the 1796 and 1797 Small Eagle varieties, each struck from a single die pair, are far more elusive overall than the 1795 Small Eagle, which has five die marriages.

John Dannreuther makes an excellent point in his early gold reference that the 1796 and 1797 Small Eagle coins, in addition to being single-year varieties, are also distinct subtypes; the 1796, as mentioned, has the 8x8 star arrangement and the 1797 the 12x4 stars, and both years share the same Small Eagle reverse die in the 11 Leaves style, unique to those two years.

This Choice AU NGC-graded 1796 ten shows appealing yellow-gold color with a few minor marks but no major distractions, the surfaces original and retaining some buildup around the device edges. The vertical obverse die crack is perceptible from the field beneath E down to the bottom of the bust, but the vertical crack through the I of LIBERTY is in the early stages; so also is the reverse crack from the right side of O to the wreath.

These early gold pieces are always the subject of intense demand from numerous collector segments, and this attractive Choice AU example should attract a variety of eager bidders.

---

1797 Small Eagle Ten, BD-1, XF45  
R.5, Rarest Small Eagle Year

**4142** 1797 Small Eagle XF45 NGC. BD-1, R.5. Bass-Dannreuther Die State b/b. The 1797 Small Eagle ten dollar pieces are among the present cataloger's favorite varieties of early gold. What were they thinking? Even though both the 1796 and 1797 Small Eagle tens display 16 stars on the obverse, the 1796 type shows the stars arranged nicely and symmetrically, 8 left, 8 right. The 1797 Small Eagle tens show a bizarre, lopsided appearance that is unique in early American numismatics, 12 stars crowding the left periphery so much that star 1 collides with the date, while 4 stars line the right periphery, leaving much "white space" between the lowest star and the date.

The 1795 Small Eagle tens show the stars arranged 10 left, 5 right, but in mid-1796 Tennessee joined the Union as the 16th state, necessitating the 16 Star arrangement before the Mint wisely chose to revert to the "original 13" star layout for (most) subsequent coinage.

If one tries to visualize how the 1797 tens would appear without star 1 bumping into the date, the arrangement would not be so bad, but that lowest-left star ruins any attempt to escape strangeness.

As we mentioned on the 1796 Small Eagle from the same consignor, the 1796 and 1797 issues are both distinct subtypes in U.S. coinage; they share the same reverse, in fact, although it is of the 11 Leaves type rather than the 9 Leaves and 13 Leaves reverses seen on the 1795 Small Eagle issues.

This Choice XF NGC-certified piece shows attractive golden-orange color with some deeper brownish-gold areas around the rims. The branching die cracks below star 16 on the obverse are accompanied by a small patch of scratches in the field before Liberty's throat, with another small patch out from the chin near star 14. Neither patch is overt or overly distracting. The reverse displays a few scattered, small dark flecks, and diagonal planchet adjustment marks appear through the eagle's breast and left leg. Much original surface remains on both sides of this appealing and quite rare early gold eagle.

From Christopher Bently's Nob Hill Collection. NGC ID# 25ZX, PCGS# 8555

**1797 BD-2 Eagle, XF Details  
Heraldic Eagle Type**

- 4143** 1797 Large Eagle — Tooled — PCGS Genuine. XF Details. BD-2, R.4. Bass-Dannreuther Die State b/b, with a die crack through the second 7 in the date. This is the only known die state for the variety. Myriad fine scratches cover the obverse fields and portrait. The reverse has tooling evident among the stars, with fine scratches below the left facing wing. This coin warrants careful examination to determine the proper bidding level. NGC ID# 25ZY, PCGS# 8559

**1797 Heraldic Eagle Ten, Near-Mint  
BD-3, Large Beak Variety**

- 4144** 1797 Large Eagle AU58 NGC. BD-3, R.5. Bass-Dannreuther Die State d/b. Dannreuther estimates only 40 to 50 examples of BD-3 are known. The variety is identified by the large beak on the reverse eagle, distinct from the small beak seen on BD-2 and BD-4. BD-1 is the Small Eagle type with a less imposing depiction of the national bird. This BD-3 representative has minimally abraded wheat-gold surfaces. Luster fills the obverse periphery and dominates the reverse. The strike is sharp except on the the obverse border near 4 o'clock and opposite near 2 o'clock on the reverse. The later area retains portions of the planchet surface including parallel adjustment marks, as made.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25ZY, PCGS# 8559*

**1798/7 Ten Dollar 9x4 Stars, XF45 Details  
BD-1 Variety**

- 4145** 1798/7 9x4 Stars — Repaired, Cleaned — ANACS. XF45 Details. BD-1, High R.4. Somewhat bright from an old cleaning, this example displays rich golden coloration and numerous faint die polish lines in the fields. A round area of lavender discoloration appears on the cheek, and several instances of apparent repair may indicate that the piece is ex-jewelry. A few small marks are noted on each side, along with some wispy hairlines. According to Bass-Dannreuther (2006): "Only 80 to 100 examples of this variety are thought to exist, making it merely scarce among early eagles, although the strong overdate and 18th-century date make it immensely popular with collectors."  
*Ex: FUN Signature (Heritage, 1/2007), lot 3611.  
From Christopher Bently's Nob Hill Collection. NGC ID# 25ZZ, PCGS# 8560*

1799 BD-7 Eagle, Well-Defined AU Details  
An Excellent Type Coin

**4146** 1799 Small Stars Obverse — Cleaned — ANACS. AU Details. BD-7, R.3. Irregular Date. This relatively available variety of 1799 eagle, with the Small Stars obverse, is easily distinguished by the far-right-tilted 7 in the date and the second 9 nearly touching the bust bottom. Star 1 is close to the lowest curl and star 13 somewhat distant from the bust. The reverse displays the first S centered over a cloud and the upper and lower beaks separated from star 12.

The yellow-gold surfaces of this AU Details specimen display traces of reddish-apricot and exhibit well-defined design elements. Scattered, light marks testify to the coin having seen some circulation. Prospective bidders should not be dissuaded by the ANACS disclaimer as the cleaning is not all that bad. An excellent choice for a high-grade type collection.

*From Christopher Bently's Nob Hill Collection. PCGS# 98562*

1800 Eagle, BD-1, AU53  
Bright Yellow-Gold Example

**4147** 1800 AU53 PCGS. BD-1, High R.3. Bass-Dannreuther Die State b/c. The mintage of 1800 eagles was recorded at 5,999 pieces, but it is more available than that figure would indicate, and die-state evidence shows that some of the 1800-dated eagles were actually struck after the BD-1 variety of 1801. The 1800 BD-1 used a reverse die carried over from the 1799 BD-10 die marriage. The obverse here shows a couple of light die cracks — one from the rim to the top of the cap, a second heavier crack through LIBE — and the reverse displays a fine die crack through the olive leaves, berry, claw, and tail feathers at the lower right. The surfaces on this piece are bright yellow-gold primarily, with some lilac accents scattered about on the reverse. A few contact marks are also scattered and not overt, including a couple of straight, thin scrapes in the right obverse field just before Liberty's face, and small ticks on the 1 and 8 in the date.

*From Christopher Bently's Nob Hill Collection. NGC ID# 2626, PCGS# 8563*

1801 BD-2 Eagle, Unc Details  
Usual Early Die State

- 4148** 1801 — Improperly Cleaned — NGC Details. Unc. BD-2, R.2. Bass-Dannreuther Die State a/a, with no clash marks, die cracks, or lapping. The origin of widely spaced vertical spines in Liberty's cap remains a mystery. They purport to be clash marks from the vertical shield lines, but are too widely and evenly spaced. The quintessential type coin, this plentiful variety is seen more often than any other early eagle. Considerable luster remains on the satiny light yellow surfaces, subdued only by faint hairlines that suggests it was once cleaned.  
*From Christopher Bently's Nob Hill Collection.*

---

1803 Extra Star Eagle, BD-5, MS62  
'14th Star Reverse' Discovery by Harry W. Bass, Jr.

**4149 1803 Extra Star MS62 NGC. BD-5, High R.4.** Ex: Ashland City. Bass-Dannreuther Die State g/b. Only a single obverse dated 1803 was used for all of the eagles struck in this year (or dated 1803, more accurately), but there were six distinct reverse dies used to create the six die pairings known for the year.

The Bass-Dannreuther early gold reference calls this BD-5 variety "1803 Large Reverse Stars, Extra Star" to point that it is one of several Large Reverse Stars die marriages. For all the 1803 eagles, there are four Small Reverse Stars die marriages, BD-1 through BD-4, and two Large Reverse Stars pairings, the BD-5 and BD-6.

PCGS calls this variety, more elegantly, simply "1803 Extra Star." The NGC tag label reads "1803 14-Star Reverse." In any case, this is an intriguing and puzzling variety. John Dannreuther points out in his early gold reference work that the BD-5 die variety was known previously, but "the curious 14th star seems to have been discovered by Harry Bass."

How this strange variety was created is anyone's guess, but it could be simply a misplaced star punch, or one that was simply dropped onto the die by accident. The star is entirely contained within the borders of the last star on the right, and as such, apparently remained unnoticed until it was spotted by the sharp eyes of Harry W. Bass, Jr.

This MS62 NGC-certified example shows a strike that is exceptionally bold overall, save for faint softness showing on the eagle's breast feathers just above the shield. A noticeable mark appears in the obverse field near Liberty's nose and a few faint adjustment marks on the reverse, with one scratch running from the arrows into the shield. Scattered light marks occur elsewhere on attractive orange-gold surfaces.

This piece is among the few finest survivors of this scarce variety, a coin that should be contested by multiple bidders when it crosses the auction block. Census: 9 in 62, 6 finer (1/14).

Ex: FUN Signature (Heritage, 1/1999), lot 8173; FUN Signature (Heritage, 1/2004), lot 3063.

1804 Crosslet 4 Eagle, BD-1, AU55  
Last Circulation-Strike Eagle of the Type

**4150 1804 Crosslet 4 AU55 PCGS. BD-1, High R.4.** Bass-Dannreuther Die State obverse unlisted (late)/b. The Crosslet 4 date characteristic is sufficient to identify the Bass-Dannreuther die variety, as the Plain 4 eagles dated 1804 were struck in 1834 or early 1835 for inclusion in the famous presentation proof sets that went to foreign dignitaries. Those sets, including the King of Siam and Muscat of Oman proof sets, famously included the “King of American Coins,” the 1804 Original silver dollars.

The association with the 1804 dollars has made the 1804-dated eagles — both Crosslet 4 and Plain 4 varieties — justly famous, but they certainly stand on their own merits as well. The 1804 eagles, save for the Plain 4 exception already noted, were the last of the denomination (at least, when one is looking at date order) struck for circulation until the series resumed with a reduced gold content in 1838. President Thomas Jefferson ordered that the Mint cease the striking of gold eagles and silver dollars as of year-end 1804.

Regardless, the Mint, true to character, paid no heed to the *dates* stamped into serviceable dies, and die-state evidence shows that some 1803-dated eagles were struck after the 1804 Crosslet 4 coins. The obverse of the BD-1 1804 Crosslet 4 is a new die, of course, but the reverse was a carryover from the exceedingly rare 1803 BD-6 die variety, of which but a handful of survivors are known today.

The reverse die shows the first A in AMERICA free of the eagle’s wing, light repunching on the base of the first T in STATES, and a Mint-made repair on the inner-right serif of the adjacent A.

In the die state of the present Choice AU PCGS-certified piece, light die cracks run through UNIT and from U to the tail and the last A in AMERICA; on the obverse, a crack runs from star 1 to 18 in the date, and another joins stars 11-13 to the bust tip (unlisted in Bass-Dannreuther). This piece shows golden-yellow and orange-yellow patina with a few scattered, light abrasions, nothing overt. Some fairly light planchet adjustment marks run diagonally through the shield and the left-side clouds on the reverse, and the strike is weak on the lower-left claw, arrow shafts, and shield border nearby. The strike is sharp on the lower-left obverse stars and the rear hair curls which are generously detailed, but somewhat soft on the forward tresses and the eye and facial features, opposite the adjustment marks on the reverse. A beautiful example of this historic eagle issue, one that will not be improved upon without much effort. Population: 6 in 55, 14 finer (1/14).

From Christopher Bently’s *Nob Hill Collection*. NGC ID# 262C, PCGS# 8566

## LIBERTY EAGLES

1838 Eagle, AU Sharpness,  
Two-Year Subtype

**4151** 1838 — Obverse Scratched — NGC Details. AU. After a lengthy hiatus, the ten dollar denomination resumed production for circulation in 1838, bearing new designs by Chief Engraver Gobrecht. The subtype only lasted through mid-1839, when changes were made to the portrait and reverse letters. The present wheat-gold example shows only minor wear. The strike is good except on the lower stars. The head of Liberty and the eagle are outlined with pinscratches added during an idle hour long ago. NGC ID# 262D, PCGS# 8575

1838 Ten Dollar, AU50  
Attractive Example of This Scarce Subtype

**4152** 1838 AU50 NGC. The 1838 eagles were the first of the denomination struck since the ten dollar gold pieces were discontinued in 1804 after a small mintage. The 1838s were the first of Mint Assistant Engraver Christian Gobrecht's Liberty Head design, premiering in the same year that his so-called Gobrecht silver dollars debuted — a series that had gone unseen since 1803. The 1838 eagles are a one-year subtype, showing the sharp, ungainly rear truncation on Liberty's lower portrait, mollified in the following year. Only 7,200 examples of the 1838 eagle were struck. The present AU50 NGC example displays crusty sandy-gold to rose-gold surfaces with great eye appeal and originality. A few stray, small marks are completely within the context of the grade. A great type coin. Census: 13 in 50, 23 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 262D, PCGS# 8575*

1839 Ten Dollar, Type of 1838, AU58  
Eye-Appealing Second-Year Issue

- 4153** 1839 Type of 1838, Large Letters AU58 NGC. The Type of 1838, also known as Large Letters, shows the sharply arcing, pointed-rear truncation on the bust of Liberty, and star 9 is between the folds of the hair bun with star 13 beneath the point. On the Type of 1839, star 10 is between the folds of the hair bun, and star 13 is about even with the (smoother) point. This scarcely circulated second-year issue shows deep orange-gold luster over surfaces that show a scattering of inconsequential abrasions. The strike falls short of full but is nonetheless quite sharp, and the eye appeal is excellent. Census: 25 in 58, 15 finer (1/14).  
From Christopher Bently's *Nob Hill Collection*. NGC ID# 262E, PCGS# 8576

1839 Eagle, Type of 1840, AU58  
Prooflike Reflectivity Remaining

- 4154** 1839 Type of 1840, Small Letters AU58 NGC. The redesigned Type of 1840 Liberty Head can be distinguished by the less-pointed rear on the bust truncation, and star 10 appearing between the folds of the hair bun, rather than star 9 as on the Type of 1838, also called Large Letters. The Philadelphia Mint made about twice as many Type of 1838 eagles in 1839 as of the later Type of 1840, which saw only 12,447 pieces reported struck. Most examples seem to have circulated rather heavily, making this near-Mint coin a standout example. Light field chatter covers both sides of this medium-gold piece, but there are no singular marks, and generous luster yields to some prooflike reflectivity remaining in the protected areas. The strike is quite well-executed throughout both sides. Census: 6 in 58, 1 finer (1/14).  
From Christopher Bently's *Nob Hill Collection*. NGC ID# 262F, PCGS# 8580

**1841 Ten Dollar, AU58**  
**Conditionally Rare Any Finer**

- 4155 1841 AU58 NGC.** A conditionally challenging ten dollar gold issue that is extremely scarce in Mint State. This example is well-struck, save for minor weakness on some of the obverse stars, and the pale gold surfaces exhibit noticeable remnants of original mint luster. Lightly worn on the high points, with scattered small marks across each side, and a couple of shallow rim dents noted on the lower obverse. Census: 17 in 58, 14 finer (1/14). NGC ID# 262H, PCGS# 8582

**1841 Ten Dollar, AU58**  
**Crisp Struck Early-Series Type Candidate**

- 4156 1841 AU58 NGC.** The 1841 eagle saw a substantial production exceeding 63,000 circulation strikes (three proofs are also known), but it is nonetheless scarce today and seldom seen in the near-Mint State grade of this piece. Most certified examples reside in XF40 to AU55 holders. This piece shows substantial mint luster remaining, and as such is among a small minority. The strike is crisp, aside from the centers of the first two stars. The surfaces are clean, bright, and occasionally minutely granular. A great early-series example for type purposes. Census: 17 in 58, 14 finer (1/14). Ex: *Denver Signature (Heritage, 8/2006)*, lot 1966, which sold for \$3,881.25. From Christopher Bently's *Nob Hill Collection*. NGC ID# 262H, PCGS# 8582

**1841 Coronet Eagle, MS61**  
**Conditionally Challenging**

- 4157 1841 MS61 NGC.** This is a generally well-struck coin that only displays partial incompleteness on the left obverse stars. Pleasing honey-gold coloration and soft, shimmering luster are uniform over both sides. Like all early Coronet eagles, the 1841 issue is conditionally rare in Mint State. Census: 6 in 61, 2 finer (1/14). NGC ID# 262H, PCGS# 8582

**1841-O Eagle, AU50**  
**Eye-Appealing Example of the First O-Mint Ten**

- 4158 1841-O AU50 NGC.** The New Orleans Mint eagles are a rewarding series to collect, particularly those that predate the Civil War, which are far more elusive than the later issues. The 1841-O issue was the first O-mint eagle coinage, a meager 2,500 pieces. Examples are rare in all grades, usually seen in no better than XF condition, and the issue is the second-rarest O-mint eagle overall, behind the ultralow-mintage 1883-O (800 pieces struck). This eye-appealing AU example boasts yellow-gold surfaces that show a fairly sharp strike and a scattering of mostly small marks on each side, although two thin, straight scrapes appear on the reverse under the eagle's left wing. Census: 8 in 50, 13 finer (1/14). From Christopher Bently's *Nob Hill Collection*. NGC ID# 262J, PCGS# 8583

**1842 Small Date Eagle, AU58  
A Low-Mintage Issue**

- 4159 1842 Small Date AU58 NGC.** The Small Date has a Plain 4, and has a much lower mintage and is rarer than its Large Date counterpart. Yellow-gold and reddish-gold patina adorns this near-Mint State specimen, and the design elements are well-impressed. A few scattered marks testify to the coin having seen brief circulation. Census: 17 in 58, 9 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 262L, PCGS# 8585*

**1842 Eagle, Lustrous AU58  
Small Date Variant**

- 4160 1842 Small Date AU58 NGC.** One of the nicer 1842 Small Date eagles we have offered, this example is notable for bright yellow-gold surfaces and excellent sharpness in virtually all areas. A lengthy die crack across the left side of the reverse has been seen on other late die state pieces. Although a bit less rare than its Large Date counterpart despite similar populations (both varieties were once grouped under the Large Date number), the 1842 Small Date is particularly scarce in grades approaching Mint State. Census: 17 in 58, 9 finer (1/14). NGC ID# 262L, PCGS# 8585

**1842 Small Date Eagle, AU58  
Underrated Issue**

- 4161 1842 Small Date AU58 PCGS.** Numerous denominations at different mints in 1842 saw variations in the size of the peripheral lettering and/or date, including the quarter, half dollar, half eagle, and eagle, resulting in the Small Date, Medium/Large Date, and Small Letters/Large Letters varieties. The 1842 Small Date eagle is an underrated issue produced in an amount only 30% that of its Large Date counterpart. This is a highly lustrous golden-orange example of the Small Date that shows much reflectivity in the fields. There are few marks of any significance and lots of eye appeal. The strike is bold throughout save for the bottom two stars, adding to the obvious allure. Population: 3 in 58, 3 finer (1/14).  
*Ex: Long Beach Signature (Heritage, 6/2010), lot 1717. NGC ID# 262L, PCGS# 8585*

**1844 Eagle, AU55  
Low-Mintage Issue**

- 4162 1844 AU55 NGC.** The 1844 Philadelphia eagles were struck to the extent of a meager 6,361 pieces for circulation (and three proofs are known). For the year, the Philadelphia Mint made generous numbers of large cents and several silver denominations, but among gold coins only the half eagles saw a plentiful mintage. This Choice AU eagle shows attractive yellow-orange color with good eye appeal, a sharp strike, and only a few scattered marks. Census: 6 in 55, 7 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 262S, PCGS# 8590*

**1846 Ten Dollar, AU55  
Eye-Appealing Example, Elusive Any Finer**

- 4163 1846 AU55 NGC.** The 1846 eagles are seldom seen at this grade level, understandably, given the mintage of a tad more than 20,000 pieces, most of which are well-circulated. This Choice AU example boasts considerable eye appeal via a sharp strike and light field chatter rather than mentionable marks. Census: 13 in 55, 8 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 262W, PCGS# 8594*

**1851-O Eagle, MS61  
Mintmarked Type Coin**

- 4164 1851-O MS61 NGC. Variety 2.** The generous mintage of 263,000 pieces ensures that the 1851-O eagle is available even today, although most appear well-circulated. This Mint State example certified by NGC offers medium yellow-gold surfaces that show full mint luster and mostly scattered minor marks, although we note a series of small scrapes in the right obverse field down to star 13. Nonetheless, this piece is quite appealing and collectible, a good choice for a mintmarked type collection.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 263B, PCGS# 8607*

---

**1852-O Ten Dollar, Sharply Struck AU53**

- 4165 1852-O AU53 NGC. Variety 1.** Struck to the extent of 18,000 pieces, this early O-mint eagle issue nonetheless survives to a degree disproportionately large to the original mintage. This AU53 NGC-certified piece offers good eye appeal on orange-gold, well-struck surfaces that are lightly sprinkled with minor marks, appearing choice for the assigned grade. Census: 18 in 53, 32 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 263D, PCGS# 8609*

---

**1853-O Ten Dollar, AU58 Prooflike  
The Only Prooflike Designated of This Issue**

- 4166 1853-O AU58 Prooflike NGC. Variety 1.** Glowing luster dominates the margins and LIBERTY. This scarce date example lacks identifying marks, and is well-struck except for the centers of a few stars. As of (1/14), NGC has certified only seven No Motto O-mint eagles as Prooflike, and the present piece is the sole 1853-O with a Prooflike designation from NGC.  
*Ex: Charlotte National Money Show Auction (Heritage, 3/2007), lot 2051. NGC ID# 263F, PCGS# 8612*

---

**1855-O Eagle, AU55  
Boldly Struck Orange-Gold Example**

- 4167 1855-O AU55 NGC. Slanted 5s.** The 1855-O eagle mintage is reported exactly the same as the 1852-O production, at 18,000 coins each. Coincidence? At any rate, one big difference between the two issues is that minor silver was again circulating by the time the 1855-O was struck, due to the lower-content Arrows coinage. This Choice AU 1855-O ten offers a bold strike over orange-gold surfaces that show no major marks and lots of eye appeal. Probably underrated at this level. Census: 15 in 55, 9 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 263M, PCGS# 8617*

---

**1855-S Ten Dollar, Great-Looking AU58  
Second-Year S-Mint Issue**

- 4168 1855-S AU58 NGC.** The second-year eagle issue from the newly opened San Francisco Mint was a meager 9,000 pieces, a tiny fraction of the debut tens' production, nearly 124,000 coins. As expected, most of these early S-mint gold pieces are found in well-circulated grades, usually VF to low XF. This near-Mint State example is a great-looking exception, clearly a coin that was snatched from circulation before it could acquire more than light field chatter on the well-struck yellow-gold surfaces. A small tick appearing at the corner of Liberty's mouth is the only singular mark. Census: 3 in 58, 0 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 263N, PCGS# 8618*

**1857-O Ten, AU55**  
**Sharply Defined Throughout**

- 4169 1857-O AU55 NGC.** The meager mintage of the 1857-O tens was only 5,500 pieces. This Choice AU example shows an extremely sharp strike on surfaces that show considerable luster and deep, attractive orange-gold color. The reverse details are particularly well-defined on the eagle. NGC shows 14 submissions at this grade level and nine finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 263U, PCGS# 8623*

**1858 Eagle, AU53**  
**Attractive, High-End Example**

- 4170 1858 AU53 PCGS.** The 1858 eagle issue is rare in any grade, understandably so, given the small mintage of 2,521 circulation strikes (three or four proofs are known, including one each in the Smithsonian and ANS). Any example such as the present piece, in AU53 certified by PCGS, is a true conditional rarity; PCGS has seen eight submissions in this grade with four finer (1/14), the highest-graded an incredible MS64 in the Simpson Collection. This example shows attractive blond-gold surfaces with rose accents and a good strike overall. A scattering of light marks appear, but none of them are of consequence. This is a coin that would not easily be improved upon.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 263W, PCGS# 8625*

**1859-O Ten Dollar, AU55**  
**One of the Foremost Rarities in the Series**

- 4171 1859-O AU55 NGC.** The 1859-O is the rarest O-mint No Motto eagle and is also one of the most elusive coins in the entire denomination from 1795 to 1933. Just 2,300 pieces were struck and surviving examples represent only about 2 percent of the original production. Only one Mint State piece has been certified, a single MS62 at NGC; otherwise the second highest grade is AU58 (only four of those have been graded between the two services). This piece is original and uncleaned with coppery patina outlining the devices. The surfaces on this Condition Census representative display only the normal scattered marks in the fields from circulation. The radial details on the stars are virtually all flat, but elsewhere the coin is well-defined, which seems to be characteristic of the few examples we have handled. A great opportunity for the collector of Southern gold. Census: 5 in 55, 2 finer (1/14).  
*Ex: Central States Signature (Heritage, 5/2004), lot 9737.  
 From Christopher Bently's Nob Hill Collection. NGC ID# 2642, PCGS# 8629*

**1859-S Eagle, Attractive AU50  
Low-Mintage S-Mint, Few Finer at PCGS**

- 4172 1859-S AU50 PCGS.** The 1859-S is one of a group of elusive, underrated, low-mintage S-mint eagle issues that bookend the Civil War, also including the 1860-S, 1864-S and 1865-S, and the 1866-S No Motto. The 1859-S saw a mintage of 7,000 pieces only a decade after the great California Gold Rush, and certified survivors today average only XF40. PCGS has never seen a Mint State example and estimates that only 40 to 60 pieces survive in all grades. This AU50 PCGS-graded piece shows the usual Large S mintmark on surfaces that are well-struck and only lightly abraded. Ample remaining luster and attractive orange-gold patina make this a compelling potential acquisition. Population: 5 in 50, 3 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2643, PCGS# 8630*

**1860-O Ten Dollar, AU58  
Sharp and Lustrous**

- 4173 1860-O AU58 NGC. Variety 2.** The New Orleans Mint struck the 1860-O eagles to the extent of only 11,100 pieces. An extremely sharp strike on the eagle and the high points of Liberty's profile are among the hallmarks of this lustrous orange-gold near-Mint State example, an extremely attractive candidate for type purposes. Census: 23 in 58, 4 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2645, PCGS# 98631*

**1861-S Eagle, Eye-Appealing AU50**

- 4174 1861-S AU50 NGC. Large S.** The branch mint in San Francisco turned out some 15,500 pieces of the 1861-S, the first Civil War-era issue from the facility; most circulated extensively, however, and Mint State pieces are virtually unknown. This AU50 NGC example offers minimally marked orange-gold surfaces that show grade-consistent wear and good overall eye appeal.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2648, PCGS# 8634*

**1863 Eagle, Sharply Struck XF45**  
**Tiny Mintage of 1,218 Business Strikes**

- 4175 1863 XF45 NGC.** Ex: Richmond Collection. The 1863 is another low-mintage issue from the darkest days of the Civil War; in fact, we would call it *extremely* low-mintage, given the production of 1,218 circulation strikes plus 30 proofs. The companion quarter eagle of this year was struck only in proof format, but the 1863 eagles were particularly hard-hit. This Choice XF example displays luster that is somewhat thinned in the fields consistent with the grade, but the devices are uniformly sharp throughout both sides. This piece is in about the average grade of certified survivors of this tiny production. Census: 8 in 45, 7 finer (1/14).  
 Ex: Richmond Collection (David Lawrence, 7/2004), lot 2071, which brought \$9,775.  
 From Christopher Bently's Nob Hill Collection. NGC ID# 264B, PCGS# 8637

**1863-S Eagle, AU53**  
**Seldom Seen Finer**

- 4176 1863-S AU53 PCGS.** Large S. The mintage of the San Francisco Mint 1863 eagle was about eight times that of its Philadelphia Mint counterpart, but the raging Civil War was also a great distance away from the West Coast, and there, these large-for-the-era gold coins circulated extensively. This issue is usually seen in Very Fine or Extra Fine grades, seldom in AU. This AU53 PCGS example is far finer than the norm, offering lightly marked and well-struck surfaces with deep orange-gold color and a high quotient of eye appeal. PCGS has seen but two submissions in AU53 with three finer: one each in AU58, MS60, and MS61 (1/14).  
 From Christopher Bently's Nob Hill Collection. NGC ID# 264C, PCGS# 8638

**1864 Ten, Sharply Struck, AU Details**  
**Rare in All Grades**

- 4177 1864 — Cleaned — ANACS. AU Details.** This scarce Philadelphia issue claims a minuscule circulation-strike mintage of 3,530 pieces, most of which were hoarded or exported during the Civil War. The 1864 ten dollar is rare in all grades. Yellow-gold coloration is imbued with traces of reddish-lavender on both sides of this AU Details specimen, each of which exhibits sharply struck design features. While lightly cleaned, the surfaces are devoid of serious abrasions.  
 From Christopher Bently's Nob Hill Collection. NGC ID# 264D, PCGS# 8639

---

1864-S Eagle, XF45  
Lowest-Mintage 1864 Gold Issue  
Extremely Rare Eagle, Unknown in Mint State

**4178 1864-S XF45 PCGS.** The 1864-S eagle is a marvelously rare issue in the long Liberty Head series, one that is far rarer even than the small mintage figure of 2,500 pieces would suggest. Of all the gold coins issued in this year, only the double eagles were struck in significant quantity, specifically in the hundreds of thousands of pieces each in Philadelphia and San Francisco.

If you see an 1864-dated gold coin of any other denomination than the double eagle, nab it if you possibly can. All are rarities. Philadelphia struck the gold dollar in the amount of 5,300 pieces for circulation, and the quarter eagle 2,824 coins. The three dollar gold and half eagle from Philadelphia saw coinages of 2,630 and 4,170 pieces for circulation, respectively, and the Philadelphia eagle was struck in the amount of 3,530 pieces.

In the case of the San Francisco Mint, it struck only the three largest gold denominations, from the half eagle through double eagle. As mentioned, the double eagle was a generous production of 793,660 pieces, but the 1864-S half eagle saw a mintage of 3,888 coins, and the 1864-S eagle 2,500 coins.

All of the foregoing makes the 1864-S eagle the lowest-mintage gold coin issue from the crucial Civil War year of 1864 — lower, even, than the three dollar gold issue, from a series widely renowned for its low mintages. Compounding the issue's rarity is that most example circulated extensively, to the point that the average certified survivor — of which there are few in any grade — is only VF35 or a tad better. Mint State examples are unknown, and AU coins are extremely elusive.

This is the *second* example of the 1864-S eagle to be offered in the Bently Collection. The first, an XF45 NGC-certified example, brought a staggering \$99,875 in our recently concluded FUN Signature (Heritage, 1/2014), lot 5490. This example, graded XF45 by PCGS, shows deep reddish patina with a bold, well-detailed strike on each side. Some scrapes appearing in the obverse field before Liberty's profile are the only mentionable marks, along with one just below the hair bun. The overall eye appeal is top-notch. Collectors are clearly realizing the potential of this important, low-mintage issue. Population: 6 in 45, 4 finer (1/14).

From Christopher Bently's *Nob Hill Collection*. NGC ID# 264E, PCGS# 8640

**1865 Eagle, AU50**  
**Low-Mintage Date, Original Surfaces**

- 4179 1865 AU50 NGC.** The 1865 has an expected low production run, in this case only 3,980 pieces were struck. A few pieces are known in mint condition, but generally AU is the best grade obtainable. This is an obviously original example that exhibits deep reddish-gold color over each side that deepens even more around the devices. Even wear is noted over the high points, and the abrasions present are small and in concert with the grade. Census: 5 in 50, 17 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 264F, PCGS# 8641*

**1865-S Ten, 865 Over Inverted 186, XF45**  
**Attractive, Bold Guide Book Variety**

- 4180 1865-S 865 Over Inverted 186 XF45 NGC.** An inverted three-digit logo punch is actually the culprit on this interesting variety, which was subsequently punched again right-side-up. This Choice XF example of this popular *Guide Book* variety offers attractive apricot-gold surfaces that deepens slightly near the rims and show bold evidence of the underdigits. Census: 7 in 45, 13 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 28ED, PCGS# 8643*

**1866 Motto Eagle, AU55**  
**Seldom Seen in Finer Grades**

- 4181 1866 AU55 PCGS.** All 1866 eagles struck were of the With Motto type with IN GOD WE TRUST added on a scroll on the reverse, but the production was a meager 3,750 pieces. Most of those circulated rather heavily, so that today the average certified survivor is only Choice XF or thereabouts. PCGS shows two examples or submissions in the AU55 grade of this piece and three in AU58, but none in Mint State; NGC shows two each in MS60 and MS61. This example boasts rich orange-red luster with scattered minor marks on each side that do little to negate the strong eye appeal. Auction offerings of finer-graded examples are infrequent; we count 11 in the past 15 years.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 264J, PCGS# 8649*

**1866-S Motto Ten Dollar, AU55**  
**Eye-Appealing Example, Elusive Any Finer**

- 4182 1866-S Motto AU55 NGC.** San Francisco made both No Motto and Motto tens in 1866, and both types were low-mintage then and rarities today. This Choice AU example is one of six such at NGC with two in AU58; PCGS shows one in AU55 and two in AU58, but the issue is apparently one that has never been certified at the Mint State level (1/14). Needless to say, the collector opportunity here is clear. This piece offers deep reddish-orange patina on surfaces that show scattered minor marks, none of consequence, and a fairly sharp strike. The eye appeal is top-notch for the issue and grade. *From Christopher Bently's Nob Hill Collection.* NGC ID# 264K, PCGS# 8650

**1867 Ten Dollar, AU55**  
**Mintage of 3,090 Pieces**

- 4183 1867 AU55 NGC.** The mintage of the 1867 eagle was uncommonly low at 3,090 business strikes, and today most graded survivors average XF45 to AU50. This Choice AU piece exhibits a fairly sharp strike, save for, curiously D STA on the reverse, and scattered minor marks on golden-yellow surfaces with some brownish accents. Census: 17 in 55 (1 in 55+★), 12 finer (1/14). *From Christopher Bently's Nob Hill Collection.* NGC ID# 264L, PCGS# 8651

**1867-S Eagle, AU50**  
**Seldom-Seen Issue**

- 4184 1867-S AU50 NGC.** Number of 1867-S eagles struck: 9,000. Number surviving in Uncirculated: 0. NGC shows three submissions in AU58 as the finest, and PCGS three in AU55 as the finest. This AU50 NGC example should be carefully considered among the Western gold specialists, as examples even at this grade level seldom appear. Scattered marks do not defeat the eye appeal on this orange-reddish example. It is curious to compare the tiny S mintmark with the gigantic ones of a decade or so earlier. Census: 6 in 50, 11 finer (1/14). *From Christopher Bently's Nob Hill Collection.* NGC ID# 264M, PCGS# 8652

**1868 Ten Dollar, AU58**  
**Only 10,630 Pieces Struck for Circulation**

- 4185 1868 AU58 NGC.** The numismatic rewards are many for collectors specializing in the long-running Liberty Head ten dollar series, including an extensive string of low-mintage Philadelphia issues such as the 1868, struck to the extent of only 10,630 pieces plus 25 proofs. Despite the low mintage, this date is more available than most of the 1860s eagles, although seldom seen in Mint State; NGC has certified two in MS60 and one in MS61, and PCGS shows one submission in MS62. This near-Mint State NGC example offers well-struck orange-gold surfaces that show light field chatter but no singular contact, consistent with a short spate in circulation. Census: 31 in 58 (1 in 58+), 2 finer (1/14). *From Christopher Bently's Nob Hill Collection.* NGC ID# 264N, PCGS# 8653

1869 Ten Dollar, AU55  
Only 1,830 Strikes for Circulation

- 4186 1869 AU55 NGC.** A mere 1,830 circulation strikes were produced of the 1869 ten dollar. This low mintage make this issue a compelling one for specialists. However, few high grade (AU or better) examples are known. Because of the low number produced, the initial die polish did not wear off, and all the coins we have seen show a prooflike finish. This is a bright coin whose semireflective finish is only subdued by slight handling and a few small abrasions. The strike is just a bit soft over the high points. Census: 8 in 55, 8 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 264R, PCGS# 8655*

1869-S Ten, AU55  
Low-Mintage S-Mint Issue, Few Finer

- 4187 1869-S AU55 NGC.** The low-mintage 1869-S ten dollar has minimal availability in all grades because of the widespread usage of gold and silver coins in the West. Only 6,430 pieces were struck, and a mere seven coins have been certified finer than this one at both services combined (1/14). The surfaces show original color with deeper reddish-gold around the devices and rims and rich lilac patina in the fields. The strike is sharp and there are minimal abrasions, the only exception a horizontal scrape at the front of the portrait of Liberty.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 264S, PCGS# 8656*

1870-CC Liberty Ten, XF40  
Rarest Carson City Eagle

- 4188 1870-CC XF40 NGC. Variety 1-B.** The 1870-CC Liberty double eagle claims a mintage of just 5,908 pieces, struck during the first year of operations at the Carson City Mint. The 1870-CC is the rarest ten dollar gold piece from the famous Western facility, both in absolute terms and with respect to high-grade rarity. The surviving population numbers approximately 35-45 specimens in all grades. Doug Winter considers the 1870-CC an underrated issue, curiously overlooked and undervalued.

The present coin shows some wear on Liberty's hair and the wingtips and neck of the eagle, but retains most of its original design detail. The pleasing orange and rose-gold surfaces display a few traces of mint luster and a scattering of minor contact marks. A short scratch near the point of the bust makes a good pedigree marker. Census: 5 in 40, 17 finer (1/14). NGC ID# 264U, PCGS# 8658

---

1870-CC Ten Dollar, AU50  
Rarest Carson City Eagle, Seldom Seen So Fine

**4189 1870-CC AU50 PCGS. Variety 1-B.** The second C in the mintmark is lower than the first. The 1870-CC eagle is, of course, the first issue from the Carson City Mint in the long-running Liberty Head eagle series. It was struck in the small amount of 5,908 coins, and it is generally considered to be the rarest eagle issue from Carson City.

The association with the fabled Carson City Mint and the cachet that comes along from that and its first-year status sustain the 1870-CC eagle and keep it perennially popular. Another factor that also works in its favor is the great rarity of and demand for its double eagle counterpart, struck to the extent of 3,789 pieces. Doug Winter writes of the 1870-CC eagle in his 2001 work, *Gold Coins of the Carson City Mint*:

“Six Carson City eagles have lower mintage figures than the 1870-CC, but this is still clearly the rarest eagle from this mint. It is also the rarest Carson City eagle in terms of high grade rarity. At one time, in fact, I regard this as the single rarest gold coin from this mint, eclipsing even the more famous (and considerably more expensive) 1870-CC double eagle. This coin’s indisputable rarity and its status as the first gold issue struck at the Carson City mint should make it one of the most desirable 19th century United States gold coins. Yet this is a curiously overlooked and, in my opinion, undervalued issue.”

This piece shows deep orange-gold color on surfaces that are fairly well-struck and rather lightly abraded, far nicer than most survivors of the issue. Areas of reflective, semiprooflike luster peek out here and there, around the protected areas of the devices. Auction offerings of this rare issue in so fine a grade are infrequent, and this piece should garner plenty of collector attention before and during the upcoming auction. Population: 4 in 50, 5 finer (1/14). From Christopher Bently's *Nob Hill Collection*. NGC ID# 264U, PCGS# 8658

1871 Eagle, AU58  
Among the Finest Known

- 4190 1871 AU58 PCGS.** The 1871 ten dollar has a remarkably low mintage of only 1,790 pieces. Predictably, almost all surviving examples show some degree of prooflikeness in the fields (as seen here), as the initial die polish never had a chance to diminish. This piece is tied for second finest with 10 others seen at both services combined, and only one Mint State coin is known. Each side displays rich reddish-gold color and numerous small abrasions are scattered about, none of which merit individual mention. The strike details are sharp throughout, if not quite complete.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 264W, PCGS# 8660*

1871-CC Eagle, AU53  
Above XF45 Average Grade

- 4191 1871-CC AU53 NGC. Variety 2-A.** A short die scratch on Liberty's shoulder just below the tip of the hanging curl identifies this variety. We have identified a handful of AU examples of this die pair. The 1871-CC eagle had a mintage of 8,085 coins, and few of those have survived. The typical example known today has a grade of XF40 to 45. This example has scattered marks that are consistent with the grade, with satin surfaces and traces of luster on each side. The combined population data reflects 11 examples at this grade level, and 19 finer. Only three of the finer coins grade Mint State. Census: 8 in 53, 19 finer (1/14). NGC ID# 264X, PCGS# 8661

1871-CC Liberty Eagle, AU55  
Low-Mintage Second-Year Issue

**4192 1871-CC AU55 NGC. Variety 1-A.** The '71-CC is a significant issue in the series of Carson City Eagles. Just 7,185 coins were produced in the facility's second year and there are expectantly few survivors. But even more importantly, the 1871-CC is generally found only in well circulated condition, with VFs and XFs being far more numerous than those at the AU level. This bright yellow-gold example, while generously abraded, displays strong definition over the highpoints and good remaining luster. Census: 8 in 55 (1 in 55+★), 11 finer (1/14).

*Ex: Long Beach Signature (Heritage, 9/2004), lot 7672.*

*From Christopher Bently's Nob Hill Collection. NGC ID# 264X, PCGS# 8661*

1871-S Ten, Choice AU  
Very Elusive in High Grades

**4193 1871-S AU55 NGC.** This auction provides the specialist a remarkable opportunity to choose from numerous scarce and rare Liberty tens. Only 16,500 pieces were struck of the 1871-S, and as usual with S-mint gold, attrition has greatly diminished the available number of survivors. This is also a condition rarity with only four coins certified finer (1/14). Originality seems to be one of the hallmarks of this remarkable collection, as seen on this coin. The surfaces show a lovely interplay between reddish-gold and lilac. Lightly abraded in general, the strike shows a bit of high-point softness on each side.

*From Christopher Bently's Nob Hill Collection. NGC ID# 264Y, PCGS# 8662*

1872 Ten Dollar, AU55  
Only 1,620 Pieces Struck for Circulation

- 4194 1872 AU55 PCGS.** The mintage of the 1872 ten dollar is impressively low with only 1,620 pieces struck for circulation. However, unlike many of the P-mint tens from the 1860s, several examples of this date are known in mint condition. Nevertheless, this Choice AU ranks at the lower end of the Condition Census with several others. As one would expect, the fields are prooflike. Each side is peppered with numerous small to medium-sized abrasions. One identifying feature for pedigree purposes is a small spot of grease that was struck into the planchet at the time of manufacture, adjacent to the nose of Liberty. Even deep orange-gold color covers both sides.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 264Z, PCGS# 8663*

1872-CC Eagle, AU50  
Beautiful Two-Toned Surfaces

- 4195 1872-CC AU50 NGC. Variety 1-B.** The second C in the mintmark is noticeably lower than the first, the more available die pairing compared to the Variety 1-A with second C about level. In any case, this piece is a condition rarity in this grade, given the meager mintage of 4,600 pieces for this issue, of which most circulated extensively. The average certified grade is only a touch over XF. This AU50 NGC piece shows primarily yellow-gold to orange-gold surfaces with accents of deeper reddish-orange around the device edges, a beautiful effect. Neither the few scattered marks nor light wear is overt. Census: 9 in 50, 13 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2652, PCGS# 8664*

1873 Closed 3 Eagle, XF45  
Mintage of 800 Circulation Strikes

- 4196 1873 Closed 3 XF45 NGC.** “1873 Closed 3” is actually redundant, as all the circulation-strike eagles of this issue are of this variety; the numismatic convention is used, however, because some denominations of the year have both Open 3 and Closed 3 date styles known. The mintage was remarkably low at 800 pieces, putting this issue in the company of only a select few sub-1,000-piece gold coin mintages for circulation in all of American numismatics. As Garrett and Guth write in their second edition, “When combined with an almost total lack of attention from collectors, this date literally disappeared into circulation.” Well, almost literally; estimates of the number of survivors vary widely, from less than a dozen to two or three dozen, and the clearly inflated certification data are no help. The finest certified are one MS60 at PCGS and four in AU58 at NGC. This Choice XF NGC piece shows distributed minor marks on each side amid satiny luster over surfaces that still display a tinge of semiprooflikeness. Census: 3 in 45, 13 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2654, PCGS# 8666*

1873 Closed 3 Ten, AU53  
Only 800 Business Strikes Minted

- 4197 1873 Closed 3 AU53 NGC.** Struck early in the year, this impressive eagle features the Closed 3 date logotype. In fact, the 800 business strikes and 25 proofs all have the Closed 3 date style. The exact number of survivors is unknown, although it is doubtless small. In all grades, NGC has certified 19 1873 eagles, and PCGS has certified 16 pieces, both figures including resubmissions (1/14). At both services, 14 of those coins grade finer than this example. The light yellow-gold surfaces exhibit myriad trivial abrasions, with faintly reflective fields that remain from the polished dies. Census: 3 in 53, 8 finer (1/14). NGC ID# 2654, PCGS# 8666

1873-CC Eagle, VF30  
Well-Struck and Lightly Abraded

**4198** 1873-CC VF30 NGC. **Variety 2-A.** The mintmark is well left of the arrow feather tips. This piece a survivor from the small mintage of 4,543 pieces, shows moderate wear consistent with the grade but no major marks on surfaces that are well-struck with attractive yellow-gold color.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2655, PCGS# 8667*

1873-CC Eagle, AU Details  
Fewer, Less Severe Marks Than Usually Seen

**4199** 1873-CC — Improperly Cleaned — NCS. **AU Details. Variety 1-A.** This variety is attributed by the high mintmark that is positioned entirely to the left of the arrow feathers. No more than 60-80 examples are thought to survive in all grades and most are seen no finer than VF. The 1873-CC is unknown in Mint State. Yellow-gold surfaces with hints of apricot are seen on this AU Details example, and the design elements are well-struck except for the usually seen minor softness in the hair around Liberty's face and neck. Scattered marks are visible on each side, but these are fewer and less severe than ordinarily encountered on this usually heavily abraded issue.

*From Christopher Bently's Nob Hill Collection. NGC ID# 2655, PCGS# 8667*

1874-CC Eagle, XF45  
Fifth Carson City Series Issue

**4200** 1874-CC XF45 NGC. **Variety 1-A.** Only a single die pair was required to strike off the 16,767 examples of this fifth-year Carson City issue, and certified pieces average only XF40 or so. This Choice XF example shows reddish-orange surfaces that host distributed marks and a combination of wear and a soft strike, but eye appeal remains. Census: 40 in 45, 51 finer (1/14).

*From Christopher Bently's Nob Hill Collection. NGC ID# 2658, PCGS# 8670*

---

1875 Liberty Eagle, AU50  
Classic Gold Rarity  
Possibly a Circulated Proof Example

---

**4201 1875 AU50 PCGS.** The 1875 Liberty eagle is a well-known — some might even say legendary — rarity in the ten dollar Coronet series. It is so rare that few collectors or dealers have ever seen one. Only 100 business strikes were originally produced plus 20 proofs. Although David Akers estimated only five or six business-strike examples survive in all grades, our roster below includes 14 different coins. Some pieces, including the present coin, may actually be circulated proofs.

Even though PCGS has certified this piece as an AU50, we believe it may be a circulated proof. The fields still retain a significant amount of reflectivity around the devices (although this by itself is certainly not evidence of its proof status). However, the left base of the 1 in the date is positioned over the left edge of a dentil; and on the reverse, the top of the second stripe is weak, two of Walter Breen's diagnostics for proofs. In an earlier appearance in the Four Landmark Collections, this coin was graded PR50 by Bowers and Merena. A planchet flake is seen on the upper portion of Liberty's neck and is mostly surrounded by a deeper coppery patina. The surfaces show the usual number of small abrasions and handling marks one expects from any coin that has seen 10 points of wear. The only mark of any significance is in the upper left obverse field, extending downward from the juncture of Liberty's forecurl and the bottom of the coronet. Rich red and lilac coloration is seen over each side. An extremely rare opportunity to acquire this seldom-seen 19th century gold issue. Population: 2 in 50, 2 finer (1/14).

#### **Roster of 1875 Liberty Eagles**

1. **AU55 NGC.** Richmond Collection, Part I (David Lawrence Rare Coins, 7/2004), lot 2102.
2. **AU53 NGC.** Margene Heathgate Collection (Superior, 6/1997), lot 1541; Atlanta Signature (Heritage, 8/2001), lot 7904; ANA Auction (Stack's Bowers, 8/2011), lot 7732, realized \$345,000.
3. **AU53 NGC.** Alto Collection (Stack's, 12/1970), lot 356; Harry W. Bass, Jr.; Bass Collection, Part II (Bowers and Merena, 10/1999), lot 1551; Jeff Garrett; Philadelphia Signature (Heritage, 8/2000), lot 7338; Pre-Long Beach Sale (Superior, 5/2001), lot 4139; Internet Only Auction (Heritage, 4/2002), lot 11458; Old Roswell Mill Collection; offered by John Hamrick in April 2008 at \$150,000; David Hall (Ellen D Collection); Simpson Collection via Legend Numismatics in May 2011.
4. **AU50 PCGS.** Four Landmark Collections (Bowers and Merena, 3/1989), lot 700; Long Beach Signature (Heritage, 10/1995), lot 6376; Boys Town and Mamiye Collections (Bowers and Merena, 3/1998), lot 2207; Baltimore Signature (Heritage, 7/2003), lot 10450; FUN Signature (Heritage, 1/2004), lot 2201; **the present coin.**
5. **XF45.** Possibly Eliasberg, Sr.; H.R. Lee Collection (Stack's, 10/1947), lot 1530; James and Margaret Carter Collection (Stack's, 1/1986), lot 270; Public Auction Sale (Stack's, 10/1988), lot 126; ANA Signature (Heritage, 7/1997), lot 5510.
6. **XF45.** William Cutler Atwater Collection (B. Max Mehl, 6/1946), lot 1453; Amon Carter, Sr.; Amon Carter, Jr.; Amon Carter Collection (Stack's, 1/1984), lot 772; Auction '87 (Superior, 8/1987), lot 1946.
7. **XF45.** St. Louis ANA Auction (New England Rare Coin Galleries, 7/1979), lot 313.
8. **XF40.** Col. E.H.R. Green; Davis-Graves Collection (Stack's, 4/1954), lot 955; Jeff Browning; Dallas Bank Collection (Sotheby's-Stack's, 10/2001), lot 474.
9. **VF35 PCGS.** FUN Signature (Heritage, 1/2006), lot 3536.
10. **VF30 PCGS.** Long Beach Signature (Heritage, 6/1997), lot 5548; FUN Signature (Heritage, 1/1998), lot 7966; ANA Signature (Heritage, 8/1998), lot 7771.
11. **VF30 PCGS.** Long Beach Signature (Heritage, 2/1994), lot 5441.
12. **G-VG.** Jacob Shapiro, a.k.a. J.F. Bell; J.F. Bell Collection (RARCOA, 4/1963), lot 392.
13. **Good.** Charles Williams; Adolphe Menjou Collection (Numismatic Gallery, 6/1950), lot 1616.
14. **XF45.** Smithsonian Institution.

#### **Additional Appearances**

- A. **Extremely Fine.** Jacob Shapiro, a.k.a. J.F. Bell; J.F. Bell Collection (Stack's, 12/1944), lot 639.
  - B. **Choice Very Fine.** Possibly Col. E.H.R. Green; Edwards Metcalf; Gilhousen Collection, Part I (Superior, 2/1973), lot 712.
  - C. **XF45 PCGS.** Cornerstone Sale (Mid-American Rare Coins, 8/1991), lot 758, catalog not available for comparison.
  - D. **XF40.** 1992 GNA Sale (Mid-American Rare Coins, 5/1992), lot 1435, catalog not available for comparison.
- From Christopher Bently's Nob Hill Collection. NGC ID# 265A, PCGS# 8672*

**1875-CC Eagle, XF45**  
**Light Yellow-Gold Surfaces**

- 4202 1875-CC XF45 NGC. Variety 2-B.** The two C's in the mintmark are more closely spaced than on the variety 1-A. The 1875-CC eagle issue saw a meager 7,715 pieces struck, less than half that of the 1874-CC mintage. This Choice XF example shows a fairly soft strike and grade-consistent wear over attractive yellow-gold surfaces. The interplay of colors will appeal to Carson City collectors. From Christopher Bently's *Nob Hill Collection*. NGC ID# 265B, PCGS# 8673

**1876-CC Eagle, Choice XF**  
**Rare Centennial Issue**

- 4204 1876-CC XF45 PCGS. Variety 1-A.** Carson City struck ten dollar pieces annually throughout the 1870s, but all issues are rare to very rare, except possibly the 1874-CC, which may qualify merely as very scarce. In the Centennial year, only 4,696 '76-CC tens were coined, and since none have been certified as Mint State, it is a safe bet that all went into Old West commerce instead of collector hands. This is a well defined peach-gold example with a count of small abrasions usual for the grade. Population: 28 in 45, 19 finer (1/14). NGC ID# 265D, PCGS# 8675

**1876 Eagle, AU53, Mintage of 687 Coins**  
**Underrated and Seldom Seem Finer, Ex: Richmond**

- 4203 1876 AU53 NGC. Ex: Richmond Collection.** The mintage of the Centennial eagle issue was surprisingly, puzzlingly low, 687 circulation strikes and 45 proofs; both formats are hotly contested at auction for those obvious reasons. The business-strike mintage makes the 1876 eagle the second-lowest-mintage gold issue of the year, behind the celebrated 1876 three dollar gold. The surfaces of this piece are brightly lustrous auburn-gold, showing no distractions and great eye appeal. The date is unknown in Mint State at NGC, although this piece is the **Plate Coin at NGC Coin Explorer**. PCGS claims one submission in MS60. Needless to say, with a survival of perhaps 40 or 50 pieces today, the issue is quite underrated. This offering marks a marvelous opportunity for astute bidding. Ex: *Richmond Collection, Part I* (David Lawrence, 7/2004), lot 2104, which brought \$13,225. From Christopher Bently's *Nob Hill Collection*. NGC ID# 265C, PCGS# 8674

**1876-CC Eagle, AU50**  
**Light Gold Surfaces**

- 4205 1876-CC AU50 NGC. Variety 1-A.** It understandably required only a single die pair to strike the 4,696 coins produced of this issue. Despite the small mintage, the 1876-CC survives to an abnormally large percentage approaching 4% of those pieces, according to Carson City coinage researcher-dealer Rusty Goe. The ample survival is likely due to the Centennial date, of course, although other unknown factors may also be at play. Light yellow-gold surfaces boast generous remaining luster and a smattering of light field chatter, but there are no major marks. The yellow-gold surfaces retain a light outline of red around the devices. An elusive issue in this grade and seldom seen finer. Census: 11 in 50, 16 finer (1/14). From Christopher Bently's *Nob Hill Collection*. NGC ID# 265D, PCGS# 8675

**1877 Eagle, AU50  
Only 797 Pieces Struck**

- 4206 1877 AU50 NGC.** The 1877 date carries a cachet that is unique to all dates in the 19th century. In the case of the ten dollar gold pieces struck this year, only 797 coins were struck, which further reinforces its desirability and collectibility. With such a low mintage, all coins are essentially first-strikes, and all will show die polish in the fields. This bright, prooflike example has even orange-gold color over each side with deeper accents surrounding the devices. Slight evidence of friction can be seen in the fields, as one would expect from the grade. Census: 3 in 50, 19 finer (1/14). From Christopher Bently's Nob Hill Collection. NGC ID# 265F, PCGS# 8677

**1877-CC Eagle, AU Details  
Minimally Abraded for Issue  
Rare in All Grades**

- 4207 1877-CC — Obverse Scratched — NGC Details. AU. Variety 1-A.** This variety is attributed by the date located closer to the denticles than to the base of Liberty's neck. The paltry mintage of 3,332 pieces helps to make the 1877-CC ten dollar rare in all grades. The PCGS Website suggests that 60 to 75 pieces are known in all levels of preservation. NGC and PCGS have graded only 82 specimens, with most concentrated in the XF grade level. The reddish-gold surfaces of this AU Details example are imbued with hints of apricot, and the design elements are well-struck, save for the usual softness in the hair above Liberty's ear and the eagle's neck feathers. Significantly, both sides are only lightly marked, a far cry from the heavily abraded surfaces that are typically seen on surviving examples of this issue. A shallow scratch is visible between stars 2 and 3. All in all, this is a nice example of this CC rarity. From Christopher Bently's Nob Hill Collection.

**1879-CC Eagle, XF Details  
Uncommon in All Grades**

- 4208 1879-CC — Improperly Cleaned — NCS. XF Details. Variety 1-A.** The only known variety. The 1879-CC has the lowest mintage (1,762 pieces) of any eagle from the Carson City Mint, and is rare in all grades. Only 45 to 60 coins are thought to be extant. Both sides of this XF Details specimen display bright yellow-gold surfaces that exhibit relatively well-defined devices. Only portions of Liberty's hair and the feathers on the eagle's neck reveal softness, a typical characteristic of this issue. A few light marks are not worthy of individual mention. From Christopher Bently's Nob Hill Collection. NGC ID# 265N, PCGS# 8684

**Carson City Mint, 1875**  
(Nevada Historical Society)

---

1883-O Eagle, AU55  
Rarest New Orleans Eagle, Standout Example

**4209 1883-O AU55 NGC.** The 1883-O eagle is the rarest New Orleans eagle, according to Doug Winter, who ranks it first in overall rarity as well as first in high-grade rarity in his series reference on New Orleans Mint gold coins (second edition, 2006). Of the 800 pieces originally struck, Winter estimates that today 35 to 45 pieces survive in all grades, and perhaps six to nine pieces in high grades (AU50 and above).

The certified population data for this issue must be viewed guardedly, as it is a virtual certainty that they are littered with resubmissions, crackouts, and duplicates. They are best viewed as merely another data point in determining the real rarity of the issue. For what it is worth, NGC shows three submissions in the AU55 grade of the present piece, with five finer (1/14). PCGS shows one in AU55 and four finer. The finest certified are four AU58 submissions at PCGS, and one MS61 at NGC.

A more telling data point is likely the frequency of auction appearances. Our most recent offering of an 1883-O eagle in AU55 was at our FUN Signature (Heritage, 1/2011), lot 5209, where another AU55 NGC example brought \$63,250. In March 2011, Stack's Bowers offered an AU53 NGC example, lot 6741, which brought \$67,333. Before our FUN Signature auction of three-plus years ago, our Permanent Auction Archives show that it was 1995 when we offered an AU58 PCGS example.

This AU55 NGC piece displays excellent eye appeal on surfaces that are well-struck overall, showing light field chatter but no singular marks. Some reflective prooflike texture remains in the protected areas around the device edges. Even in this Bently Collection consignment that is full of remarkable eagle rarities, this piece is a standout coin that will form a centerpiece in a fine collection.

*From Christopher Bently's Nob Hill Collection. NGC ID# 2668, PCGS# 8701*

**1884-CC Eagle, AU58  
Great Eye Appeal**

- 4210 1884-CC AU58 NGC. Variety 1-A.** Great eye appeal is the hallmark of this near-Mint State 1884-CC eagle, featuring a razor-sharp strike that has produced complete centrils on all the obverse stars and essentially full detail on the eagle's feathers and claws. Medium orange-yellow surfaces are notably problem-free and highly attractive. Census: 28 in 58, 8 finer (1/14). From Christopher Bently's *Nob Hill Collection*. NGC ID# 266B, PCGS# 8704

**1889 Eagle, Rare MS61  
Mintage of Only 4,440 Pieces**

- 4211 1889 MS61 PCGS. CAC.** The 1889 is the lowest mintage Philadelphia issue from the final 30 years of the series. Just 4,440 business pieces were struck, and PCGS has yet to certify any examples above MS62. The present sharply impressed sun-gold representative displays small marks appropriate for the grade along with one slender abrasion at the top of the eagle's left (facing) leg. Population: 18 in 61, 6 finer (1/14). NGC ID# 266N, PCGS# 8715

**1902-S Liberty Eagle, MS66  
Ideal High-Grade Type Coin**

- 4212 1902-S MS66 PCGS. CAC.** The 1902-S Liberty eagle is an available date and a popular type coin. The 1902-S is very rare in MS66 condition, however, and finer specimens are virtually unobtainable. This sharply detailed Premium Gem displays vibrant mint luster and pristine peach-gold surfaces, with terrific eye appeal. Population: 7 in 66, 1 finer (1/14). NGC ID# 267U, PCGS# 8751

**1903 Liberty Ten, MS65  
None Certified Finer at NGC**

- 4213 1903 MS65 NGC.** The 1903 Liberty eagle is not difficult to locate in lower Mint State grades, but it is a condition rarity in MS65 condition. This spectacular Gem exhibits pinpoint definition on all design elements and the well-preserved yellow and rose-gold surfaces show only minor signs of contact. Census: 11 in 65, 0 finer (1/14). NGC ID# 267V, PCGS# 8752

**1905 Ten Dollar, MS65  
Conditionally Scarce**

- 4214 1905 MS65 PCGS.** The strike definition is refreshingly bold on both sides of this visually attractive Gem, including sharp detail on Liberty's hair curls and on the eagle's talons, arrowheads, and wing feathers. The gold-orange toning is rich and uniform throughout. Minimal marks and shimmering mint luster make this coin a much better-than-average example for the issue. Population: 19 in 65, 10 finer (1/14). NGC ID# 2682, PCGS# 8757

**1906-D Eagle, MS65  
First Denver Issue**

- 4215 1906-D MS65 PCGS.** Housed in a green-label PCGS holder, this first year Denver Mint eagle has satiny yellow luster with excellent design definition. Trivial marks on each side are consistent with the grade of this eye appealing condition rarity. Population: 24 in 65, 3 finer (1/14). NGC ID# 2685, PCGS# 8760

## INDIAN EAGLES

### 1907 No Periods Eagle, MS65+ Great-Looking Type Coin

- 4216 1907 No Periods MS65+ PCGS.** The Charles Barber do-over of the Augustus Saint-Gaudens design is today a prominent type coin, as the first of the series to see mass circulation (and mass saving by collectors of the day). This MS65+ example displays the typical appealing characteristics of the issue, luminous luster over orange-gold surfaces, a sharp strike, and a lack of mentionable marks. A great-looking type coin. NGC ID# 28GF, PCGS# 8852

### 1907 No Periods Eagle, MS66 First-Year, No Motto Regular Issue

- 4217 1907 No Periods MS66 NGC.** After a limited production of the rare Wire and Rolled Rim "Periods" variants, the gold Eagle received a final design modification by Charles Barber resulting in the regular-issue No Periods design. 239,400 pieces were produced in late 1907. Although not a rare issue in circulated and lower Uncirculated grades, Gem or finer pieces are scarce and highly desired by type and date collectors.

This piece displays brilliant, yellow-gold mint luster and a bold strike for the issue, although Barber's modifications and the high, rolled edges resulted in some striking weakness on the Indian's feather vanes. The eagle is bold and fully feathered. A few tiny abrasions do not detract from the technical grade or the appeal of this radiant, Premium Gem ten dollar gold.

*From The Fidelis Collection.* NGC ID# 28GF, PCGS# 8852

### 1908 No Motto Ten Dollar Gold, MS66 Wonderful Toning Accents

- 4218 1908 No Motto MS66 PCGS. CAC.** Overshadowed by several other condition rarities in the Eagle series, this issue is rare in its own right when encountered in Premium Gem condition. From a low Mint production of just 33,500 business strikes, PCGS has certified just eight examples of the grade (including one MS66+ coin) and five pieces finer (1/14).

This Premium Gem example is resplendent with brilliant mint luster over smooth, yellow-gold surfaces. Outstanding orange and lime-green toning accentuates a bold strike on the portrait and eagle. This is a visually impressive ten dollar gold with exceptional eye appeal and no significant abrasions to compromise its lofty grade.

*From The Fidelis Collection.* NGC ID# 28GG, PCGS# 8853

**1908-D No Motto Ten Dollar, MS64  
Challenging and Undervalued Issue**

**4219 1908-D No Motto MS64 PCGS. CAC.** This is a challenging issue to find in Choice Mint State condition, partly from a low mintage of 210,000 pieces combined with what Garrett and Guth describe as “dull luster and weaker strikes so often encountered for this date.”

This borderline Gem example is an exception to the normal 1908-D No Motto eagle. Smooth fields surround boldly struck devices, with strong mint luster evident at every turn of the coin. Orange-gold surfaces combine with lilac and yellow-gold accents for a distinctive, multihued patina. The coin is remarkably unabraded and free of distractions. It is extremely scarce in this condition — a combination of near-Gem eye appeal and high technical quality. Population: 46 in 64 (4 in 64+), 8 finer (1/14).  
From *The Fidelis Collection*. NGC ID# 28GH, PCGS# 8854

**1908 Ten Dollar, MS65  
Bold Strike, With Motto**

**4220 1908 Motto MS65 NGC. CAC.** President Theodore Roosevelt was adamant that the use of the Deity's name on a coin was blasphemous, because the coinage might be used for all kinds of immoral and ungodlike purposes. Congress, however, insisted the Act of March 3, 1865 be enforced to return the Motto to the ten dollar gold piece. In 1908 the motto was placed to the left of the eagle.

The With Motto Indian Head eagle is a prime target for type collectors as a first-year example of the modified design, known for both for its availability and high-quality production. This Gem example displays a strong strike and lustrous, appealing yellow-gold surfaces. Plentiful mint luster radiates from the centers over smooth, virtually abrasion-free surfaces. Census: 66 in 65 (1 in 65+), 37 finer (1/14).

From *The Fidelis Collection*. NGC ID# 28GJ, PCGS# 8859

**1908-D Motto Indian Ten, MS63  
Bold Strike, Unblemished Appeal**

- 4221 1908-D Motto MS63 PCGS.** Sharply struck with softly swirling luster and attractively unmarked surfaces, this appealing ten is lightly toned in apricot and apple-green hues. One faint graze on the cheek determines the grade. The mintmark is lightly repunched east. Given its fairly generous mintage of 836,500 pieces, the 1908-D Motto is surprisingly difficult to find in MS63 or finer. Population: 96 in 63 (1 in 63+), 44 finer (1/14).  
From *The Fidelis Collection*. NGC ID# 28GK, PCGS# 8860

**1908-D With Motto Eagle, Well-Struck MS63**

- 4222 1908-D Motto MS63 PCGS.** The motto IN GOD WE TRUST was added to the reverse of these coins during the year. The honey-gold, lustrous surfaces of this Select specimen exhibit well-struck design features, including most of the Indian's headdress. The few light marks are in concert with the designated grade. Population: 96 in 63 (1 in 63+), 44 finer (1/14). NGC ID# 28GK, PCGS# 8860

**1908-S Indian Eagle, MS62+  
Popular Low-Mintage Issue**

- 4223 1908-S MS62+ NGC.** The 1908-S Indian eagle claims a low mintage of 59,850 pieces, but the issue can be located in Mint State grades with patience. This high-end MS62 specimen features well-detailed design elements and vibrant mint luster throughout and the pleasing yellow-gold surfaces show a few highlights of rose. Census: 35 in 62 (2 in 62+), 58 finer (1/14). NGC ID# 28GL, PCGS# 8861

**1909 Ten Dollar, Lustrous MS64  
Rare Any Finer**

- 4224 1909 MS64 NGC.** From a small mintage exceeding 184,000 pieces, the 1909 Indian eagle is a scarce issue in MS64 condition, and quite rare in higher grades. The lustrous, yellow-gold surfaces of this near-Gem display hints of red and apricot, and the design elements are relatively well-impressed though the hair below BE is a tad soft, as typical for this issue. Census: 47 in 64 (1 in 64+), 30 finer (1/14). NGC ID# 28GM, PCGS# 8862

**1909-S Eagle, MS62  
Scarce in Mint State**

- 4225 1909-S MS62 PCGS.** Despite a sizeable mintage of nearly 300,000 coins, the 1909-S eagle is scarce in Mint State grades, and the typical certified example falls a little below AU58. Reddish-gold and yellow-gold colors compete for territory on this MS62 S-mint eagle, especially on the obverse. Well-struck, with a few minute marks determining the grade. NGC ID# 28GP, PCGS# 8864

**1910 Ten Dollar, MS65  
Popular Philadelphia Issue**

- 4226 1910 MS65 PCGS. CAC.** This Philadelphia date is a favorite of type collectors because it is normally found with a sharp strike and attractive surfaces. Despite a low mintage of 318,500 pieces, the issue is available in conditions up to Gem grade without too much searching. This outstanding Gem example is a pleasing, yellow-gold color with orange and lemon-yellow highlights among well-struck devices. Population: 57 in 65 (2 in 65+), 26 finer (1/14).  
From *The Fidelis Collection*. NGC ID# 28GR, PCGS# 8865

---

**1910-D Eagle, MS65  
Outstanding Type Coin**

- 4227 1910-D MS65 PCGS. CAC.** As the third most available ten dollar Indian, the 1910-D usually makes an outstanding type coin. This piece shows superior luster over the mattelike surfaces, coupled with enchanting peach-gold patina. The boldly struck, pristine surfaces show only a few superficial marks on the upper reverse. Population: 83 in 65 (1 in 65+), 42 finer (1/14).  
*Ex: Atlanta ANA Signature (Heritage, 4/2006), lot 2077; Houston Signature (Heritage, 12/2009), lot 1825.*  
*From The Fidelis Collection. NGC ID# 28GS, PCGS# 8866*

---

**1910-S Ten Dollar Gold, MS63  
Cartwheel Mint Luster**

- 4228 1910-S MS63 PCGS.** A challenging issue to find in Select Mint State or finer. Although 811,000 pieces were produced, virtually all were melted in the 1930s and today no more than a few thousand exist in any grade — most of them in circulated condition. This Select example has a handful of light abrasions that define the MS63 grade, but the coin is visually pleasing with generous mint luster and sharp devices. Orange-gold surfaces display reddish-gold highlights amid vibrant, brilliant cartwheels. Population: 91 in 63, 31 finer (1/14).  
*From The Fidelis Collection. NGC ID# 268D, PCGS# 8867*

---

**1911 Indian Ten Dollar, MS66  
Splendid Quality for Type**

- 4229 1911 MS66 NGC. CAC.** A Premium Gem with few visible faults and with superior eye appeal. Garrett and Guth describe this issue as common in all grades including Gem, making it an excellent choice for type and date collectors. In any grade above Gem, however, no eagle is easily obtained, especially when it is a stunning example such as this gleaming coin.

A bold strike shows excellent detail on the Indian's hair and headdress including the troublesome vanes in the feathers. The surfaces are lightly textured and fully lustrous, with the well-struck devices standing out in strong relief against the fields. Brilliant, rich-gold color is all-encompassing and enhanced by vivid mint luster. Exceptional quality is confirmed by the CAC-Approved label. Census: 44 in 66 (2 in 66 ★), 12 finer (1/14).  
*From The Fidelis Collection. NGC ID# 28GT, PCGS# 8868*

---

**1911 Ten Dollar Gold, MS66+  
Remarkable, High-Quality Example**

**4230 1911 MS66+ PCGS. CAC.** Of all the issues in this short series, the 1911 is well known for its quality. The large mintage of 505,595 business strikes were carefully produced and several nearly flawless examples were preserved by collectors.

This coin is a quintessential candidate for type and an incredibly appealing example of Indian Head ten dollar gold. A blazing Premium Gem, it is fully struck and virtually abrasion-free. There are no mentionable distractions on the Indian or eagle. The fields have a finely grained, frosty texture that projects unimpaired cartwheel luster. It would be hard to improve on this remarkable yellow-gold eagle, the only one of its grade level to receive the PCGS Plus designation. Population: 22 in 66 (1 in 66+), 9 finer (1/14). NGC ID# 28GT, PCGS# 8868

**1911-D Indian Eagle, AU58  
Far Finer Than Usually Encountered**

**4231 1911-D AU58 PCGS.** An impressive near-Mint representative of the low mintage 1911-D Indian ten, this piece has nearly full luster with frosty yellow-gold surfaces and faint greenish overtones. It is highly attractive and worthy of inclusion in an otherwise Mint State collection of the series. NGC ID# 28GU, PCGS# 8869

**1911-D Ten Dollar, MS62  
Low-Mintage, Key Date**

**4232 1911-D MS62 PCGS. CAC.** While the Indian Head series contains some notable rarities — the 1907 “Periods” pieces with rolled rim or wire rim, the 1920-S, the 1930-S, and the 1933 — the 1911-D holds its own as a Mint State rarity. Garrett and Guth call it “the undisputed condition rarity of the entire series.”

This example has a few light abrasions but no serious marks for a coin at this grade level. A large amount of mint luster resonates on the appealing surfaces and enhances the boldly struck devices. The surfaces have pleasing eye appeal suggestive of an even higher grade. Population: 73 in 62, 51 finer (1/14).

*From The Fidelis Collection. NGC ID# 28GU, PCGS# 8869*

**1911-S Ten Dollar, MS62  
Scarce Issue in Mint Condition**

**4233 1911-S MS62 PCGS.** A satiny and nicely struck orange-gold representative with relatively unmarked surfaces. A small speck of verdigris is noted near the R in DOLLARS. Unlike most gold coins of its era, the 1911-S is more likely to be located in XF and AU grades than in Mint State. Just 51,000 pieces were struck, which is the lowest mintage for a With Motto issue aside from the 1911-D. Population: 38 in 62, 84 finer (1/14).

*Ex: Portland Signature (Heritage, 3/2004), lot 6342. NGC ID# 28GV, PCGS# 8870*

**1911-S Eagle, MS65**  
**High Mint Luster, Remarkable Patina**

**4234 1911-S MS65 PCGS. CAC.** Few 1911-S eagles exist any finer than this stunning coin. It remains a condition rarity from a low mintage of 51,000 pieces despite the return of some nice examples from European hoards. Vivid orange highlights are dispersed among the stars, date, and the Indian's headdress feathers on the obverse, with more brilliant orange accents on the reverse — as if the eagle is facing a magnificent sunset. Areas of lilac and lime-green toning offset the intensely lustrous orange patination.

A bold strike is evident, especially on the Indian's hair and the feathers of the headdress. The eagle is well-feathered and bold. A single obverse luster graze and a few tiny abrasions are seen under magnification, but nothing to deter the outstanding appeal of this rare Gem. Housed in a green label PCGS holder. Population: 24 in 65, 9 finer (1/14).

*From The Fidelis Collection. NGC ID# 28GV, PCGS# 8870*

**1912-S Eagle, Exceptional MS65**  
**A Significant Condition Rarity**

**4235 1912-S MS65 NGC.** The 1912-S is one of the most challenging Indian Head eagles to locate in Uncirculated grades. This results in part from the fact that many examples entered the channels of commerce at the time of issue. Additionally, most Mint State survivors are in the lower levels due to poor strikes, substandard luster, and heavy abrasions. The 1912-S is thus a prime condition rarity in MS65 and finer. Indeed, NGC and PCGS combined have certified fewer than 20 Gems and a mere three pieces finer.

The present MS65 offering rises above the foregoing profile. First, it displays an above-average strike, including relatively strong definition in the hair around the Indian's face, an area typically very weak. The eagle's plumage also shows impressive detail, though the shoulder feathers are not full. Secondly, both sides display pleasing luster issuing from frosty surfaces attractively toned in orange-gold and lime-green colors. Finally, neither side reveals mentionable marks. The foregoing attributes add up to remarkably nice eye appeal for the date. This is significant because the issue is considered to be one of the least attractive in the Indian eagle series. Census: 8 in 65, 2 finer (1/14).

*From The Fidelis Collection. NGC ID# 28GX, PCGS# 8872*

---

**1913 Indian Eagle, Incredible MS65+  
An Excellent Type Coin**

**4236 1913 MS65+ PCGS. CAC.** The 1913 ten dollar, sporting a mintage of 442,000 circulation strikes, is available through near-Gem. Even Gem examples can be located with patience and searching, but higher-grade specimens are very rare. The 1913 is also one of the best-produced dates in the Indian eagle series, making it a popular type coin.

The current high-end Gem offering displays Incredible eye appeal that results from rich orange-gold color residing on highly lustrous surfaces, boldly defined design elements, and impeccable preservation. A couple of tiny marks on Liberty's chin and lower hair may be all that preclude an even finer grade. This super example will fit nicely in a high-grade type collection. Population: 59 in 65 (3 in 65+), 14 finer (1/14).

*From The Fidelis Collection. NGC ID# 28GY, PCGS# 8873*

---

---

**1914 Eagle, Conditionally Scarce MS65**

**4237 1914 MS65 NGC. CAC.** Intense luster radiates from both sides of this lovely Gem, each of which displays a frosty texture on attractively patinated yellow-gold surfaces imbued with traces of lime-green. A solid strike imparts strong definition to the design elements, and all exhibit remarkable clarity. A couple of minuscule, unobtrusive marks are all that stand in the way of an even finer grade. Well deserving of CAC approval.

Examples of the 1914 Indian eagle can be located without too much difficulty through the near-Gem level of preservation. Gems are very scarce, however, and finer specimens are quite rare. Census: 41 in 65, 8 finer (1/14).

*From The Fidelis Collection. NGC ID# 28H2, PCGS# 8875*

---

---

**1914-D Indian Ten Dollar, MS64**  
**An Exceptionally Attractive Type Coin**

- 4238 1914-D MS64 NGC.** This well-produced Denver Mint issue is one of the more available in the series, in Mint State, making it a preferred choice for type collectors. The current example shows nearly full strike definition, and soft gleaming mint luster highlights the medium yellow-gold and deeper peach gold coloration. A few stray grazes keep it from grading even higher. NGC ID# 28H3, PCGS# 8876

---

**1914-D Indian Ten, MS64**  
**Elusive in Finer Grades**

- 4239 1914-D MS64 PCGS.** Housed in a green-label PCGS holder is a lovely Choice Mint State 1914-D Indian ten with brilliant yellow surfaces. Frosty luster appears on both sides with faint splashes of pale blue toning. A splendid example and rarely found finer, with only 32 higher grade PCGS submissions (1/14). NGC ID# 28H3, PCGS# 8876

---

**1914-D Ten Dollar Indian, MS66+**  
**Uncommonly Bold and Appealing**

- 4240 1914-D MS66+ NGC. CAC.** The 1914-D eagle issue is one that was well-produced and accordingly is quite popular for type purposes. Only 343,500 pieces were struck and quite a lot of them were later melted, but nice coins such as this Premium Gem still surface from time to time. The 1914-D is far less common, for example, than the 1910-D. This MS66+ 1914-D shows the fine-grained, mattelike surfaces for which the issue is known, fully lustrous and exceedingly well-struck with alternating reddish-gold and greenish-gold areas. Scattered abrasions are minor in severity and few in number. Census: 13 in 66 (1 in 66+), 6 finer (1/14). *From The Fidelis Collection.* NGC ID# 28H3, PCGS# 8876
-

**1914-S Indian Ten Dollar, MS63**  
Conditionally Challenging

**4241 1914-S MS63 NGC.** The 1914-S eagle issue is among the more elusive S-mints in the Indian Head series, especially in higher Mint State grades. A relatively low mintage of 208,000 pieces was heavily exported. This Select Uncirculated example offers excellent eye appeal with wheat-gold surfaces that display only small, scattered abrasions — fewer than expected for the grade. A bold strike resides on slightly textured surfaces with ample mint luster enhancing the brilliant appeal. Extremely scarce, rare any finer.  
*From The Fidelis Collection. NGC ID# 28H4, PCGS# 8877*

**1915-S Ten Dollar, MS62**  
Conditionally Scarce S-Mint

**4243 1915-S MS62 NGC.** In 1915, the San Francisco Mint became the last mint to strike United States gold coins in six different denominations. The denomination with the third-highest mintage was the eagle, at a mere 59,000 pieces. The present example is well-struck with yellow-orange surfaces that have pleasing luster and hints of pale pink and sea-green in the fields. Scattered marks and minor abrasions do not significantly detract from the eye appeal.  
*Ex: Dallas Signature (Heritage, 10/2006), lot 3114. NGC ID# 28H6, PCGS# 8879*

**1915 Ten Dollar Indian, MS66**  
Lustrous, Frosted Surfaces

**4242 1915 MS66 NGC. CAC.** The 1915 ten dollar is a well-made and reasonably plentiful issue, with a mintage of 351,075 business strikes that collectors frequently turn to for type purposes. Premium Gems, such as this example, are more challenging to locate. The frosty surfaces show excellent luster and a delicate mix of yellow-gold, mint-green, and apricot coloration. The design elements are sharply struck, as almost always seen on the 1915. A few minuscule marks concealed within the eagle's wings do not detract in the least. Indeed, this coin generates excellent overall eye appeal, appropriately recognized by CAC. Census: 22 in 66 (1 in 66 ★), 5 finer (1/14).  
*From The Fidelis Collection. NGC ID# 28H5, PCGS# 8878*

---

1920-S Ten Dollar Indian, MS65  
Absolute and Condition Rarity  
Among the Finest Known

---

**4244 1920-S MS65 NGC.** The 1920-S ten dollar gold is acknowledged as the third rarest date of the series, only trailing the 1933 and the 1907 Rolled Rim issues. Few examples survive in any condition despite a relatively generous mintage of 126,500 pieces. Many exist in circulated grades, indicating at least a portion of the mintage was released into general circulation. Since there is little evidence the date was heavily exported (no hoards of the date have been discovered in Europe or South America), it is likely the majority of the mintage was melted under terms of the 1933 Gold Recall Act.

In Select Mint State or finer, the 1920-S issue is a classic example of condition rarity. In fact, **it is the premier condition rarity in the entire Indian Head eagle series**, with fewer examples known and graded MS63 and higher than any other issue. A review of the most recent population data from PCGS and NGC shows that in grades of MS63 and higher, the condition rarity ranking of the top five issues in the series is: 1920-S; 1933; 1913-S; 1911-D; and 1907 Rolled Rim. In this ranking, the 1920-S is approximately 20% rarer than the next-rarest issue, the 1933. When considering the condition rarity ranking in grades of MS64 and higher, the order changes to: 1920-S; 1911-D and 1913-S (tie); 1933; and 1907 Rolled Rim. In this ranking, the 1920-S is significantly rarer than the next three, which are virtually equal, and more than five times rarer than the 1907 Rolled Rim. This analysis clearly shows why the appearance at auction of a high-grade 1920-S ten always generates excitement among prospective bidders.

In all, the combined totals for PCGS and NGC are six 1920-S examples certified in MS65, two pieces in MS66, and one Superb Gem in MS67+: the Duckor example, which sold for \$1.725 million in our 2007 Charlotte National Money Show.

While the current coin is not the equal of that amazing specimen (the Duckor coin is by far the finest known), this MS65 piece is comparable to other high-ranking coins in the Condition Census, including the Kutasi coin, the Bartle Family Collection coin, the Thaine B. Price coin, and the Einstein Collection coin.

Perhaps the most impressive characteristic of this particular piece is its rich, abiding color and overall eye appeal. The surfaces display a pleasing, honey-gold patina with reddish-gold accents and a touch of lime-green at the margins. There are no singularly mentionable abrasions on the frosty surfaces — rather, the most noticeable pedigree marker is a short, shallow contact mark at the curve of Liberty's chin. Bright, frosted mint luster is plentiful and radiant.

The coin is well-struck on the obverse except for Liberty's hair and the TY in LIBERTY. Based on a study of all auction appearances since the year 2000, at least two-thirds of all 1920-S eagles show weakness and underlying planchet roughness on the word LIBERTY and in the surrounding hair detail. The reverse of this coin is also generally well-struck, including better-than-average detail on the eagle's trailing leg feathers and talons. Weakness on the reverse is diagnostic of every example of this issue that we have seen, even when the strike elsewhere is above average.

At the present time, 105 pieces of the issue have been certified in all grades by PCGS and NGC combined (1/14), split almost evenly between circulated examples and Mint State ones. Most circulated examples are at the high end of the scale, AU55 to 58, while most of the Uncirculated ones are at the low end of the Mint State scale, MS60 to 63. Allowing for an unknown but presumably small number of examples that exist but have not been certified, as well as for duplication among those that have already been graded, a reasonable estimate of the total number of examples of this issue in existence would be in the range of 115-135 pieces at most, and that estimate actually may be high.

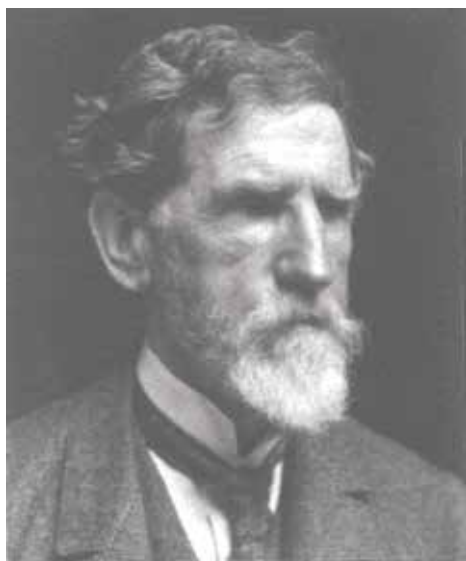

*From The Fidelis Collection. NGC ID# 28H8, PCGS# 8881*

1926 Ten Dollar Indian, MS66 NGC  
Superior-Quality Type Coin

**4245** 1926 MS66 NGC. The surfaces show smooth, nearly blemish-free features and bright, softly frosted mint luster. This is a coin earmarked for inclusion in a Premium Gem type set. Well-struck in virtually all areas, with subtle reddish-golden patina over each side.  
Ex: *New York Signature* (Heritage, 11/2003), lot 7770. NGC ID# 28H9, PCGS# 8882

1930-S Ten Dollar Gold, AU53  
Extreme Series Rarity

**4246** 1930-S AU53 PCGS. The 1930-S likely ranks fourth in overall rarity for the Indian ten dollar series behind the 1920-S, the 1933, and the 1907 Rolled Rim with Periods. Of these, the 1920-S, 1930-S and the 1933 were all heavily melted during the Gold Recall of 1933. The 1907 Rolled Rim, Periods production was nearly entirely melted, too, but that occurred the same year of mintage in 1907, apparently at the insistence of Charles Barber, who felt design changes were needed and proceeded to melt the offending coins.

The 1930-S had its production of 96,000 pieces melted to the extent that only a few hundred coins survive in all conditions. This example is an attractive, apricot-gold color with brilliant, lustrous surfaces. It is boldly struck and, if circulated at all, the rub is minimal. Rather, a series of shallow scrapes appear in the left obverse field to result in the assigned grade. Despite the abrasions, this is an appealing example of an incredibly in-demand Eagle rarity. Population: 1 in 53, 94 finer (1/14).

From *The Fidelis Collection*. NGC ID# 28HA, PCGS# 8883

## LIBERTY DOUBLE EAGLES

### 1850 Double Eagle, AU55 First Year of Issue

- 4247 1850 AU55 NGC.** The 1850 double eagle is the first year of the regular issue for the type and denomination, and is very popular as such. Most surviving examples grade Very Fine to About Uncirculated, and Mint State specimens are rare. The reddish-gold surfaces of this Choice AU example exhibit well-defined devices. Scattered marks are consistent with a large, heavy gold coin that has seen some circulation.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 268F, PCGS# 8902*

### 1851-O Double Eagle, AU50 Minimally Marked for the Issue

- 4248 1851-O AU50 PCGS. CAC. Variety 1.** The date is well centered between the truncation and the denticles, and the mintmark is high and placed over the center of the N in TWENTY. The honey-gold surfaces display traces of luster in the recessed areas and the design elements are generally well-delineated. Scattered light marks are seen on both sides, but these are fewer and less severe than typically encountered on this heavily abraded date. NGC ID# 268J, PCGS# 8905

### 1851-O Twenty Dollar, AU53 Surprisingly Bold Strike

- 4249 1851-O AU53 NGC. Variety 1.** The second-year O-mint double eagle is a popular acquisition for collectors of early gold. This AU53 example exhibits orange-gold patina on surfaces with a surprisingly bold strike and minimal abrasions. This piece is considerably nicer than the usual well-circulated survivor. NGC ID# 268J, PCGS# 8905

### 1851-O Twenty Dollar, AU53 Popular Type One O-Mint

- 4250 1851-O AU53 NGC. Variety 1.** With 315,000 pieces struck, the 1851-O is moderately available in circulated grades, even occasionally in AU. This is a minimally abraded example that shows even, somewhat muted yellow-gold color over both sides. The strike details are noticeably soft only on the peripheral stars. Census: 117 in 53, 193 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 268J, PCGS# 8905*

### 1856-S S.S. Central America Twenty, AU55 Lustrous and Beautifully Preserved

- 4251 1856-S AU55 PCGS. CAC. Variety 170.** Ex: S.S. Central America. SSCA 5625. No Serif, Left S. One of the high-quality 1856-S twenties salvaged from the ill-fated S.S. Central America — a wonderfully detailed survivor among more than 1,000 examples of the date recovered from the shipwreck. This die pairing is one of 18 varieties that were identified when the treasure could be studied in detail. The No Serif refers to a missing upper-left serif on the U in UNITED. Left S describes the mintmark, which leans slightly left. Lustrous with few abrasions and remarkably smooth surfaces, this is a high-end AU and Choice for the grade. Housed in a special gold label PCGS holder confirming its shipwreck origin. Population: 8 in 55, 50 finer (1/14). NGC ID# 2692, PCGS# 8919

### 1856-S Double Eagle, AU55 Ex: S.S. Central America

- 4252 1856-S AU55 PCGS. CAC. Variety 17J.** Ex: S.S. Central America. SSA 5305. An unusual lightly circulated 1856-S double eagle recovered from one of the most famous U.S. shipwrecks. Generous luster remains on each side with a hint of the usual deep outer color and lighter interiors. A patch of encrustation surrounds the final date digit. Offered with certificate of authenticity, faux-book case, and outer box. NGC ID# 2692, PCGS# 8919

**1856-S Twenty Dollar, AU58**  
**Lustrous Type One**

- 4253 1856-S AU58 PCGS.** Not specifically provenanced to a source, though the intense yellow-orange luster is suggestive of the S.S. *Central America* coins, and this date was considered elusive in higher grades prior to that shipwreck discovery. Scattered wispy abrasions through the fields lead to moderately marked devices that show slight friction. Population: 44 in 58, 45 finer (1/14).  
Ex: *Central States Signature* (Heritage, 4-5/2010), lot 3883. NGC ID# 2692, PCGS# 8919

**1857 Double Eagle, AU58**

- 4254 1857 AU58 NGC.** Ex: Manhattan Collection. This near-Mint example is an important entry in the early double eagle series, represented in extremely small quantities among recent treasure recoveries. Both sides have myriad abrasions, entirely trivial, with nearly full bright yellow luster and hints of darker patina. NGC has only certified 35 finer examples (1/14). NGC ID# 2693, PCGS# 8920

**1857-O Double Eagle, XF40**  
**Well-Defined**

- 4255 1857-O XF40 PCGS. Variety 1.** The population of the 1857-O double was increased by about four to five dozen pieces, from a hoard discovered in the mid-to-late 1990s. Most of these graded XF40 to AU50. The yellow-gold surfaces of this XF piece display well-defined devices despite high-point wear. Numerous light to moderate marks occur over both sides, a typical characteristic of this ordinarily heavily abraded issue.  
From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2694, PCGS# 8921

**1857-S Liberty Double Eagle, AU58**  
**Popular Type One Issue**

- 4256 1857-S AU58 PCGS.** The vivid greenish-gold surfaces of this attractive near-Mint specimen display vibrant mint luster on both sides, with just a trace of wear on the high points of the design and only minor abrasions. Prooflike reflectivity is evident in a few sheltered areas and eye appeal is outstanding. NGC ID# 2696, PCGS# 8922

**1857-S Double Eagle, AU58**  
**Ex: S.S. *Central America***  
**Broken A, Variety 20E**

- 4257 1857-S AU58 PCGS. CAC. Variety 20E.** Ex: S.S. *Central America*. SSCA 1470. Robert Evans' "Broken A" variety refers to the crossbar of the A in STATES. The A was defective on the hub and manually added by a mint worker on most 1857-S dies, though on Variety 20E, that task was neglected. The present caramel-gold double eagle displays vibrant cartwheel luster and would be regarded as Mint State by many collectors. The wing tips and shoulder curl show a trace of wear. Only wispy abrasions emerge beneath a loupe. Housed in a gold label holder. NGC ID# 2696, PCGS# 8922

**1858-O Liberty Twenty, XF45**  
**Low-Mintage Branch Mint Issue**

- 4258 1858-O XF45 PCGS.** A small mintage of 35,250 Liberty double eagles was accomplished at the New Orleans Mint in 1858. This pleasing Choice AU specimen shows a little wear on the prongs of Liberty's coronet and hair, but much interior design detail remains intact. The vivid green and orange-gold surfaces show only minor abrasions. Population: 30 in 45, 57 finer (1/14). NGC ID# 2698, PCGS# 8924

---

**1858-S Double Eagle, AU53**  
**An Above-Average Example**

- 4259** 1858-S AU53 PCGS. CAC. Like most early San Francisco double eagles, the 1858-S had a large mintage of 846,710 coins, and nearly all of those entered circulation. The average certified grade of survivors is just AU50. This example has light yellow surfaces with ample luster and scattered marks of no concern. NGC ID# 2699, PCGS# 8925

---

**1862 Twenty Dollar, XF40**  
**Scarcer Issue, Minimally Marked**

- 4260** 1862 XF40 NGC. The number of double eagles dropped precipitously in 1862 to only 92,098 pieces, down from almost 3 million the previous year. This example has even friction over the high points and bright orange-gold color. Only small abrasions are scattered over each side, none of which warrant individual mention.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 269M, PCGS# 8937*

---

**1863 Double Eagle, AU50**  
**Popular Mid-Civil War Date**

- 4261** 1863 AU50 NGC. Medium yellow-gold fields cede to brownish-gold areas on the device high points and the protected device edges. This piece is well-struck overall and shows light field chatter and scattered small marks, all well within the context of the grade. This mid-Civil War date is always popular, the present piece showing a typical grade for certified survivors.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 269P, PCGS# 8939*

---

**1865 Double Eagle, MS61**  
**Eye-Appealing for the Grade**

- 4262** 1865 MS61 NGC. This date was formerly much more elusive until the recovery of the *S.S. Republic*, bearing more than 300 examples ranging up to Gem condition. This Mint State example shows eye appeal far finer than the grade might imply, generous luster appearing over reddish-orange surfaces with a bold strike. A few larger abrasions account for the grade, but much eye appeal is present.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 269U, PCGS# 8943*

1865-S Double Eagle, MS63  
Ex: S.S. *Brother Jonathan*

- 4263 1865-S MS63 PCGS.** Ex: S.S. *Brother Jonathan* #680. A smaller shipwreck than the famous S.S. *Central America* but by no means minor, the loss and subsequent recovery of the *Brother Jonathan* made the 1865-S one of the more available No Motto twenty dollar issues in Mint State grades. This Select example has a range of hues from pale gold to deep apricot-orange. All-around luster is warm and beautiful. Crisply detailed with faint die cracks lacing through the peripheral lettering on the reverse, most visibly at TWENTY and OF AMERICA.  
Ex: *Long Beach Signature* (Heritage, 9/2002), lot 8688. NGC ID# 269V, PCGS# 8944

1865-S Twenty Dollar, MS63  
From the S.S. *Brother Jonathan*

- 4264 1865-S MS63 PCGS.** Ex: S.S. *Brother Jonathan* #623. By 1865 the hottest gold rush on the West Coast was not in California but British Columbia, and the *Brother Jonathan* ran a route from San Francisco to Vancouver. On its last such journey, it hit a rock (now known as "Jonathan Rock") and sank with most souls and all cargo lost. This *Brother Jonathan* twenty, fresh from the San Francisco Mint in 1865, never got a chance to circulate. Its bright, slightly frosted yellow-orange surfaces show only light abrasions and no wear.  
Ex: *Long Beach Signature* (Heritage, 9/2002), lot 8687. NGC ID# 269V, PCGS# 8944

**1865-S Double Eagle, Sharply Struck MS64  
Ex: Brother Jonathan**

- 4265 1865-S MS64 PCGS.** Ex: S.S. Brother Jonathan, # 572. The 1865-S Liberty double eagle, from a mintage exceeding 1 million coins, has always been available in circulated grades, but Uncirculated examples were very rare before a large number of high-quality coins were recovered from the salvage of the S.S. *Brother Jonathan* and the S.S. *Republic*. More than 500 coins were found on the former wreck and about 250 on the latter. Both sides of this near-Gem display yellow-gold coloration and exhibit sharply struck design elements. The few minute marks are in concert with the grade designation. NGC ID# 269V, PCGS# 8944

**1866-S No Motto Twenty, AU Details  
Rare Type One Issue**

- 4266 1866-S No Motto — Improperly Cleaned — NGC Details. AU.** The 1866-S No Motto is a rare issue in all grades, in spite of its estimated mintage of 120,000 pieces. It is especially scarce in high grades. This piece has been lightly cleaned, but the detailing is excellent with better-than-usual hair curls and strong star definition on each side. Even, bright orange-gold color is seen throughout and there are no obvious or mentionable abrasions. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 269W, PCGS# 8945

**1866 Double Eagle, MS62  
First Year of the With Motto Twenties**

- 4267 1866 MS62 PCGS. CAC.** This large mintage of nearly 700,000 pieces is quite popular as the first Philadelphia Mint issue of the With Motto type, the new design introduced shortly after the end of the Civil War and including the motto IN GOD WE TRUST, which had already appeared on the two cent piece. This example offers softly frosted mint luster over surfaces that show attractive apricot-gold color and a good strike overall. A few minor scrapes in the lower obverse field near stars 1-3 are consistent with the grade. With the CAC approval, this piece is among the few finest known. Population: 5 in 62, 1 finer (1/14). NGC ID# 269X, PCGS# 8949

---

**1866-S Motto Twenty, AU55**  
**Scarce Any Finer**

- 4268 1866-S Motto AU55 NGC.** A robust mintage of 842,250 pieces was heavily circulated in the West, where the shortage of gold coinage was an ongoing challenge to commerce. As a result, few Uncirculated examples of this issue exist and, when available, they are priced accordingly. Most collectors look for a quality AU example of this first-year type as an affordable alternative. This representative shows evidence of its brief time in circulation but still flashes areas of bright mint luster. The yellow-gold surfaces have the expected abrasions and wear but no serious marks, resulting in the Choice AU grade. NGC ID# 269Y, PCGS# 8950

---

**1867 Liberty Twenty, AU58**  
**Rich Color, Abundant Remaining Luster**

- 4269 1867 AU58 PCGS.** Orange-gold surfaces offer brilliant luster and a minimum of abrasions. Only the slightest trace of rub separates this piece from Mint State, and as such it may prove to be a fortunate acquisition for some lucky bidder: The mintage was a modest 251,065 pieces, and Mint State examples are rare.  
*Ex: Long Beach Signature (Heritage, 2/2007), lot 4938.* NGC ID# 269Z, PCGS# 8951

---

**1867-S Double Eagle, AU58**

- 4270 1867-S AU58 PCGS. CAC.** This is the second year of production for the Type Two design, and the San Francisco Mint produced nearly 1 million double eagles, but few have survived in higher grades. The average certified grade is less than AU50, and PCGS has only certified a handful in Mint State grades. This example has lustrous yellow surfaces with substantial dark patina on both sides. Population: 47 in 58, 15 finer (1/14). NGC ID# 26A2, PCGS# 8952

---

**1868-S Twenty Dollar, MS60**  
**Scarce Issue in Uncirculated**

- 4271 1868-S MS60 NGC.** The 1868-S has a large mintage of 837,500 pieces, but few were preserved in mint condition, an indication that this issue was most likely not sent to Europe in payment for luxury items of the day. This solid Uncirculated example has complete mint luster and shows remarkably few abrasions for the grade. The strike is also strongly brought up. The short-lived Type Two twenty dollar is seldom seen in mint condition, and most higher grade pieces are limited to just a couple of issues, the most obvious being the 1873 Open 3. Census: 19 in 60, 17 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26A4, PCGS# 8954

**1869-S Twenty, MS60**  
**Lustrous Type Two Issue**

- 4272 1869-S MS60 NGC.** The 1869-S twenty had a large mintage of more than 600,000 pieces, and it is relatively easy to locate in VF and XF grades. Mint condition is another matter. The surfaces on this piece are bright, and the mint luster is only dimmed slightly by the numerous small marks one would expect from a coin in MS60. Well struck in the centers, the peripheral stars show the usually seen weakness. Census: 18 in 60, 70 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26A6, PCGS# 8956*

**1872-CC Twenty, Choice VF**  
**Better Carson City Issue**

- 4273 1872-CC VF35 NGC. Variety 2-A.** Three die combinations are known despite a miserly mintage of 26,900 pieces. The present Choice VF representative retains ample wing plumage and is free from consequential abrasions. The apricot-gold surfaces are moderately glossy. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AE, PCGS# 8964*

**1873 Open 3 Double Eagle, MS63**  
**Attractive Type Two Example**

- 4274 1873 Open 3 MS63 NGC. CAC.** A reasonably available date at this grade level, but exceedingly scarce and costly any finer. This example displays boldly struck design motifs and scattered small abrasions that are consistent with the Select Mint State designation by NGC. Vibrant mint luster and lovely orange-gold coloration enhance the favorable eye appeal of this attractive specimen. Census: 69 in 63 (1 in 63+), 3 finer (1/14). NGC ID# 26AH, PCGS# 8967

**1873-CC Liberty Twenty, XF40**  
**22,410 Pieces Struck**

- 4275 1873-CC XF40 PCGS. CAC. Variety 1-A.** From a mintage of 22,410 pieces, the 1873-CC Liberty double eagle has a surviving population of 400-500 examples in all grades. This lightly worn XF specimen offers vivid orange-gold surfaces that retain significant amounts of original mint luster. Housed in a green label holder. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AJ, PCGS# 8968*

**1873-CC Twenty Dollar, AU Details**

- 4276 1873-CC — Obverse Improperly Cleaned — NGC Details. AU. Variety 1-A.** No misplaced digit in dentils at obverse rim. The 1873-CC double eagle had a moderately low mintage of 22,410 pieces. This piece is about a typical grade for the issue. There is some struck-in die grease on the obverse, and scattered marks appear on each side. The surfaces otherwise are yellow-gold and the luster not overly impaired from a light cleaning. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**1874-CC Twenty Dollar, AU53**  
**Attractive Orange-Gold Surfaces**

- 4277 1874-CC AU53 NGC.** Generous luster appears amid scattered, minor marks on this rather high-mintage early issue from the first decade of Carson City coinage. Attractive orange-gold color and a bold strike enhance the good eye appeal. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AP, PCGS# 8971*

1874-CC Twenty, AU55  
Good Eye Appeal

- 4278 1874-CC AU55 NGC. **Variety 5-A.** Only a single reverse die is known, but the large mintage of 115,085 pieces meant that several obverse dies have been documented by numismatists. This Choice AU example offers good eye appeal over orange-gold surfaces with strong luster and distributed, mostly small marks. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AP, PCGS# 8971

1874-CC Double Eagle, MS60  
Surprising Condition Rarity

- 4279 1874-CC MS60 NGC. While the 1874-CC double eagle is one of the more accessible Carson City issues of the series on the whole, in Mint State it is a clear condition rarity and commands a significant sum. This MS60 coin is accurately graded; while the obverse has several long abrasions in the field to the left of Liberty's forehead, the immensely lustrous surfaces show no trace of actual wear. The light apricot-gold reverse has pools of minor reflectivity and a cleaner appearance overall. Census: 10 in 60, 6 finer (1/14). Ex: Bowers and Merena (11/2007), lot 4706. NGC ID# 26AP, PCGS# 8971

1875-CC Double Eagle, MS61  
Great Carson City Type Coin

- 4280 1875-CC MS61 NGC. **Variety 7-A,** second C in mintmarked centered left of T, 1 near the bus and nearly centered between dentils, small die line above E(RICA) on the reverse. The large mintage of more than 111,000 pieces for the 1875-CC twenties resulted in at least 10 die marriages known for the date. This Mint State example offers beautiful reddish-orange color over surfaces that show scattered light abrasions combined with a couple of heavier marks that determine the grade, but there is eye appeal to spare here. A great-looking Carson City type coin. From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AT, PCGS# 8974

---

**1876-CC Double Eagle, AU55  
Appealing Carson City Issue**

- 4281 1876-CC AU55 NGC. CAC. Variety 5-A.** A heavily exported issue, the 1876-CC twenty once was rare in AU until many coins returned to this country from foreign hoards. This pleasing, olive-gold example has reddish-gold highlights on lightly abraded surfaces with glints of remaining mint luster. There are no deep or distracting abrasions — rather, circulation has muted the impact of the bagmarks. Only light, even wear affects the strong strike on this popular Carson City date. NGC ID# 26AW, PCGS# 8977

---

**1876-CC Double Eagle, Well-Struck MS60**

- 4282 1876-CC MS60 PCGS. CAC.** The vast majority of Mint State 1876-CC double eagles are graded MS60 to MS62 because they acquired many abrasions from being shipped loose in bags during overseas transit. The yellow-gold surfaces of this MS60 specimen exhibit well-struck design elements but show distributed marks over both sides. In general, however, these are not as heavy or deep as typically seen for this grade designation, helping to account for the CAC sticker. NGC ID# 26AW, PCGS# 8977

---

**1877-CC Twenty Dollar, AU53**

- 4283 1877-CC AU53 NGC. Variety 3-A.** Carson City double eagles invariably have significantly lower mintages than their San Francisco cousin of the same date. For example the 1877-CC emission was limited to 42,565 pieces, while the 1877-S production was a bountiful 1,735,000 pieces, more than 40 times greater than its Nevadan counterpart. The present lightly abraded sun-gold '77-CC twenty has a good strike and partial cartwheel luster on the reverse. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AZ, PCGS# 8983

---

**1877-CC Twenty, AU55  
Lustrous, First-Year Type Three**

- 4284 1877-CC AU55 NGC. Variety 3-A.** A low-mintage, often-exported issue with just 42,565 pieces produced. This is a first-year, Type Three Carson City twenty and is Variety 3-A, characterized by the mintmark centered above and between the words TWENTY DOLLARS. Two die lines — one above the E in AMERICA, the other above star 11 — confirm the variety. The coin is brilliant and only lightly abraded, with considerable mint luster enhancing yellow-gold surfaces. Rare and expensive in Mint State, this radiant AU example is an affordable alternative. NGC ID# 26AZ, PCGS# 8983

**1878 Double Eagle, MS63  
Early Type Three Issue**

- 4285 1878 MS63 PCGS.** A boldly struck and highly attractive example of this scarce Type Three double eagle issue, which becomes rare any finer than the current Select Mint State level. In fact, a mere nine specimens have been seen in grades higher than MS63 at NGC and PCGS combined. A vibrant satiny sheen and even honey-gold coloration increase the visual appeal of this lovely coin. The design elements are boldly rendered, even on the dentils, and slight die doubling occurs on the reverse, along the lower edges of STATES OF AMER and across the top edges of TWENTY. Population: 37 in 63 (1 in 63+), 6 finer (1/14). NGC ID# 26B3, PCGS# 8985

**1881 Twenty Dollar, AU Details  
Important Low-Mintage Issue**

- 4286 1881 — Obverse Improperly Cleaned — NGC Details. AU.** The 1881 double eagle's mintage of 2,199 circulation strikes puts it even lower than the famed 1879-O eagle, which was struck to the extent of 2,325 pieces; but some other following P-mint double eagle productions, including the 1882 (571 business strikes) and the 1885 (751 coins) make the 1881 seem a bit underrated and neglected today. This piece shows attractive orange-gold color on each with scattered marks consistent with the AU Details grade. The luster is a bit thin on each side, but that detracts little from the appeal overall, or from the importance of this piece. A problem-free AU55 PCGS example sold in in FUN Signature (Heritage, 1/2014), lot 5549, for \$61,687.50.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**1882-CC Double Eagle, AU58  
Rare Any Finer**

- 4287 1882-CC AU58 NGC. Variety 1-B.** The second C of the mintmark is slightly higher, a die crack at the base of TWENTY DOLLARS, and a vertical spike in front of Liberty's eye attribute the variety. The yellow-gold surfaces of this near-Mint State example retail luster in the recessed areas and the design elements are well-struck. Nearly all high-grade examples grade AU58 to MS61; finer pieces are very rare.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BF, PCGS# 8997*

**1883-CC Double Eagle, AU55  
Variety 2-A**

- 4288 1883-CC AU55 PCGS Secure. Variety 2-A.** The 1883-CC had a rather substantial mintage compared to other Nevada double eagles, with 59,962 coins struck from two die marriages. This Choice AU example has frosty mint luster in the protected areas on brilliant light yellow surfaces. NGC ID# 26BH, PCGS# 8999

**1884-CC Twenty Dollar, AU55**  
Original and Pleasing

- 4289 1884-CC AU55 NGC. CAC.** A single die pair was used for the entire 81,139-piece mintage of this popular Carson City issue. Glimpses of remaining mint luster are seen among the stars and throughout the smooth, unabraded fields of this unfettered twenty. Olive-tinged, orange-gold toning gives the impression of antique gold. Now mellowed by light wear on the high points, the coin displays a strong strike. Choice, original, and appealing. NGC ID# 26BK, PCGS# 9001

**1885-CC Double Eagle, XF40**  
Variety 1-A, The Only Dies

- 4290 1885-CC XF40 PCGS. Variety 1-A.** The only known die pair was used to strike a meager 9,450 double eagles in 1885, and survivors are scarce. This example is housed in a green-label PCGS holder. Ample mint luster is still evident with light yellow surfaces that exhibit splashes of orange toning. NGC ID# 26BN, PCGS# 9004

**1890-CC Double Eagle, Near-Mint**  
Doubled Die Reverse

- 4291 1890-CC AU58 NGC. Variety 1-A.** A charming orange-gold Carson City type coin with substantial luster and a crisp strike. Only lightly marked aside from a few abrasions on the cheek and a tiny counterstamp on the knob left of the eagle. The usual '90-CC marriage, but the scarce early die state with nearly complete definition on the tail feathers. The reverse is lightly die doubled, most clearly on the PLU in PLURIBUS.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BY, PCGS# 9014*

**1892-CC Double Eagle, AU55**  
Generous Luster Remaining

- 4292 1892-CC AU55 NGC. Variety 1-A.** This Choice AU 1892-CC double eagle represents the next-to-last issue from the fabled Carson City Mint. Generous luster remains on orange-gold surfaces with glints of rose around the protected device edges. A sharply struck and delightful example.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26C6, PCGS# 9020*

**1892-CC Twenty Dollar, MS61**  
Very Scarce in Mint State

- 4293 1892-CC MS61 NGC. Variety 1-A.** More available than its 1891 Carson City predecessor, the '92-CC is nonetheless a scarce and low mintage issue. A majority of certified examples are in AU grades, though NGC and PCGS have each graded a single piece as VF20. Uncirculated coins are rare, and none have been certified finer than MS63. The present MS61 twenty displays good luster and a bold strike. The radiant honey-gold surfaces are minimally abraded for the grade aside from a couple of ticks on the cheek. Hints of ruby-red toning visit the margins.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26C6, PCGS# 9020*

---

**1893-CC Double Eagle, AU58  
Semiprooflike Fields**

**4294 1893-CC AU58 NGC. CAC. Variety 1-A.** The rarer of the two '93-CC marriages. An early die state without any cracks. A semiprooflike near-Mint representative of the final Carson City emission. Small marks are distributed but none are of singular interest. A shallow strike-through (as made) is at the reverse center. A scant 18,402 pieces were issued before the facility reverted to assay office status. Now it serves as a museum.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26C9, PCGS# 9023*

---

**1904 Double Eagle, MS65+  
Razor-Sharp Motifs**

**4295 1904 MS65+ PCGS. CAC.** The 1904 twenty dollar, from a mintage exceeding 6 million pieces, is one of the more available Liberty Head double eagles. The intensely lustrous surfaces of this high-end Gem display yellow-gold color imbued with whispers of apricot. Razor-sharp design features and nicely preserved surfaces further enhance the coin's overall eye appeal. NGC ID# 26CY, PCGS# 9045

---

**1904 Liberty Head Twenty Dollar, MS66  
Highly Lustrous and Splendidly Preserved**

**4296 1904 MS66 NGC.** This intensely lustrous specimen is typically well-struck, with beautiful orange-gold color and minimal surface marks. Although thousands exist in Mint State, this issue becomes scarce at the Premium Gem level. At MS67, this date is virtually unobtainable, as just three coins have achieved that lofty grade at the two major services combined. NGC ID# 26CY, PCGS# 9045

---

**1904 Double Eagle, MS66  
One in a Thousand**

**4297 1904 MS66 PCGS.** The plentiful 1904 double eagle had the second highest mintage of any issue of the denomination, with more than 6 million pieces minted. The only higher mintage was in 1928. Both of those issues have a high survival rate that reflects the mintage. However, few 1904 double eagles exist in the highest grades. Nearly 1,000 submissions are required at PCGS to garner a single MS66 example, and only two submissions have received the next grade of MS67 (1/14). This Premium Gem has sharp design motifs and satiny yellow-gold luster with a solitary luster graze on Liberty's cheek. NGC ID# 26CY, PCGS# 9045

---

---

**1905-S Twenty Dollar, MS65  
Rarity in This Grade**

- 4298 1905-S MS65 PCGS.** The 1905-S double eagle was produced to the tune of nearly 2 million coins, a production that would seem generous were it not side-by-side with the gargantuan mintages of the 1904 Philadelphia and San Francisco issues, totaling well over 11 million pieces between them. The 1905-S was largely exported (and survivors later reimported), and all that bag travel creates surface issues; most survivors are in lower Mint State grades, and Gems such as this piece are rare. Glowing luster runs over reddish-orange surfaces that offer bold eye appeal, a sharp strike, and minimal distractions of any sort. A great-looking alternative to the 1904 or 1904-S issues for type purposes. Population: 9 in 65, 1 finer (1/14). NGC ID# 26D3, PCGS# 9048
- 

---

**1906-S Liberty Double Eagle, MS64  
Conditionally Rare in Finer Grades**

- 4299 1906-S MS64 PCGS. CAC.** The 1906-S Liberty double eagle was produced in large numbers but the issue is a prime condition rarity in grades above the MS64 level. This impressive Choice example displays sharply detailed design elements and vibrant mint luster throughout. The well-preserved peach-gold surfaces show few signs of contact. PCGS has graded just four numerically finer examples (1/14). NGC ID# 26D6, PCGS# 9051
- 

## PROOF LIBERTY DOUBLE EAGLE

### 1887 Liberty Double Eagle, PR64 Cameo Rare Proof-Only Issue Finest Cameo at PCGS

**4300 1887 PR64 Cameo PCGS.** Double eagles were produced exclusively in proof format in 1887. Since no business-strike coins were struck, the Philadelphia Mint produced a generous proof mintage of 121 pieces to satisfy collector demand. The 1887 has a low survival rate, suggesting that some of these coins were never released and were later melted. Given the fact that there are around 25-30 survivors, it would seem logical that 50 or so pieces were lost to collectors in this manner. Undoubtedly, some coins were later spent by their owners, as proof double eagles carried extremely low premiums in the late 19th and early 20th centuries. The temptation to spend the coins must have been great during hard economic times when 20 dollars went a long way toward paying for basic necessities. A number of coins are known today in impaired condition, and some were undoubtedly melted after the Gold Recall of 1933.

The present coin is a delightful Choice example with outstanding eye appeal and high technical quality. The bright, watery mirrors of this impressive specimen have the desirable "orange-peel" texture of proof gold coinage from this era and display a noticeable degree of contrast with the central devices. Wispy blemishes on the obverse are well scattered and not immediately obvious to the unaided eye. For those attempting to assemble a date set of twenties or the ultra challenging complete set, the 1887 is certainly one of the most challenging issues in the series. Population: 1 in 64 Cameo, 0 finer (1/14).

*Ex: Long Beach Signature (Heritage, 1/2004), lot 7591.*

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 89103*

## HIGH RELIEF DOUBLE EAGLES

### 1907 High Relief, Wire Rim Twenty A Marvel of 20th Century Coinage

- 4301** 1907 High Relief, Wire Rim — Filed Rims — PCGS Genuine. In our opinion, the piece has the details of an Unc specimen that has filed rims. Aside from the rims, which show signs of post-Mint tampering, this is a pleasing and well-defined High Relief twenty with gorgeous sculptural detail. Surfaces are patinated yellow-gold with a few small copper spots. NGC ID# 26F2, PCGS# 9135

### 1907 High Relief, Wire Rim Double Eagle Attractive Obverse

- 4302** 1907 High Relief, Wire Rim PCGS Genuine. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this example not gradable. In our opinion, the piece has the details of an Unc specimen that has been damaged. While the reverse shows clustered marks at the left side of the sun disk and below the O in DOLLARS, the reverse is comparatively clean with just a few shallow, albeit long abrasions. NGC ID# 26F2, PCGS# 9135

### 1907 High Relief Twenty, Fine 12 Obviously Carried Many Years as a Pocket Piece

- 4303** 1907 High Relief, Wire Rim Fine 12 NGC. Obviously carried as a pocket piece by someone for many years. This piece shows even wear over the high points, and there is a bit of light wear into the rims as well. The surfaces are bright, as one would expect from many years of handling — not to be confused with cleaning. Magnification shows a number of small, but insignificant marks over both obverse and reverse.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26F2, PCGS# 9135*

### 1907 High Relief Twenty, AU Details

- 4304** 1907 High Relief — Damaged, Ex-Jewelry, Cleaned — ANACS. AU Details, Net XF40. Undesignated as a Wire Rim, each side shows a noticeable, strong extrusion of metal around the rims. Most of the design elements remain with strong definition seen on Liberty's face and the eagle's plumage. However, each side displays numerous contact marks and brightness from cleaning.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26F2, PCGS# 9135*

### MCMVII Twenty Dollar, Unc Details

- 4305** 1907 High Relief — Tooled, Cleaned — ANACS. Unc Details, Net AU50. The interior of each side still retains much of the original satin mint luster, even though light cleaning is also evident. The devices are sharply impressed throughout, as one would expect from this coin struck on a hydraulic press. A significant wire rim is present on each side (although it is not designated as either Wire or Flat Rim on the insert). The tooling occurs on the left portion of each side in the area around 9 o'clock, with pinscratches in the left obverse field and a couple of rim bumps on each side.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26F2, PCGS# 9135*

---

1907 High Relief Twenty, Unc Details  
Wire Rim Apparent on the Reverse

- 4306 1907 High Relief, Wire Rim — Rim Filing — NGC Details. Unc Details.** Rim filing is a curious practice, and one that is seen all too often on 19th century coins. This High Relief, as well as others we have seen, confirms that the practice continued into the 20th century. Apparently most of the people who handled circulating gold coins didn't think to look at the rims and accepted coins at face value rather than thinking of their intrinsic worth. The person who did the filing apparently thought, "Who will notice?" and they were correct. One would assume the person doing the filing would accumulate a significant amount of gold if he/she were a person handling numerous coins, such a bank teller. This piece has the filing almost exclusively limited to the obverse. It has reduced the wire rim, but left the interior portions of the coin nicely preserved. The satiny mint luster is intact and shows just the slightest tinge of reddish patina. The only mentionable contact marks on the interior of the coin are a series of abrasions or luster grazes over the rays of the sun on the lower reverse.

---

1907 Saint-Gaudens Double Eagle, Unc Details  
High Relief, Wire Rim Variant

- 4307 1907 High Relief, Wire Rim — Rim Filing — NGC Details. Unc.** The Wire Rim has been reduced by filing in some areas on the reverse, but the lustrous surfaces and sharply detailed sculptural design elements remain unaffected. Saint-Gaudens majestic design shows to good effect on this spectacular piece and the light yellow and reddish-gold surfaces show the usual swirling die lines in the fields. NGC ID# 26F2, PCGS# 9135

---

SAINT-GAUDENS DOUBLE EAGLES

---

1908 No Motto Twenty, MS67  
Essential Type Coin

- 4308 1908 No Motto MS67 PCGS. CAC.** Among the No Motto Saint-Gaudens issues, the 1908 is the clear favorite for the type collector. The date accounts for about 90% of examples minted, and thanks to mass-savings events such as the Wells Fargo Hoard, even Superb Gem NGC representatives are available for a price. This coin's combination of a PCGS holder and CAC label will be an asset to many collectors, of course. Luminous wheat-gold and apricot surfaces have generous luster beneath light patina that lends each side a gauzy appearance. Softly struck but minimally marked and a real beauty. Population: 72 in 67 (2 in 67+), 1 finer (1/14). *From The Fidelis Collection.* NGC ID# 26F6, PCGS# 9142

---

1908-S Double Eagle, AU55  
Low-Mintage Saint

- 4309 1908-S AU55 NGC. CAC.** A sparse mintage of just 22,000 pieces was the entire double eagle production for the San Francisco Mint in 1908 — its first year of striking the Saint-Gaudens design. As a result, the issue is challenging for collectors. This is a lightly abraded example, sharply struck as usual for the issue, with abundant remaining mint luster, pleasing orange-gold toning, and evidence of a strong strike. The San Francisco Mint followed up its meager 1908 mintage with nearly 2.9 million double eagles produced in 1909. NGC ID# 26FA, PCGS# 9149

---

**1908-S Double Eagle, Select Mint State  
Mintage 22,000 Pieces**

**4310 1908-S MS63 PCGS. CAC.** The 1908-S Saint-Gaudens double eagle boasts an extremely low mintage for a 20th century coin at just 22,000 pieces. Many examples were released into circulation at the time of issue and this date is seen more often in circulated grades than in Mint State, an unusual situation for the series. The 1908-S is very scarce in MS63 condition and rare any finer. This is a pleasing Select example with vivid orange-gold surfaces and well-detailed design elements. Vibrantly lustrous surfaces show only a scattering of light, grade-appropriate marks. Population: 16 in 63, 61 finer (1/14).

*Ex: The Milly Chaykin Collection (Heritage, 10/2011), lot 5214.  
From The Fidelis Collection. NGC ID# 26FA, PCGS# 9149*

---

---

**1909 Saint-Gaudens Double Eagle, MS65  
Sharply Detailed and Brightly Lustrous**

**4311 1909 MS65 PCGS. CAC.** This is currently the second-finest 1909 double eagle that CAC has verified. Seldom encountered at the Gem level, the 1909 “perfect date” Saint-Gaudens double eagle is an underrated issue in the series. Few examples were saved by collectors at the time of issue, and early auction appearances were infrequent.

The outstanding feature of the coin offered here is its extraordinary, vibrant luster. The devices are richly frosted, and the surfaces are a subtle orange-gold and pale green color. Striking details are sharp throughout. The only detectable flaws are a tiny planchet flake out of the upper obverse, and a shallow luster graze across the sun. Overall eye appeal is outstanding. Population: 19 in 65, 7 finer (1/14).

*From The Fidelis Collection. NGC ID# 26FB, PCGS# 9150*

1909/8 Double Eagle, MS65  
Sole Saint-Gaudens Overdate

**4312 1909/8 MS65 PCGS. CAC. FS-301.** The Philadelphia double eagles of 1909 are unusual in that they are split almost evenly into Normal Date and Overdate varieties. The total mintage of only 161,282 business strikes is consistent with the typical die life for two double eagle obverses, one correct and the other erroneous. The 1909/8 overdate naturally enjoys a measure of popularity because of its error status (and its inclusion in the *Guide Book* as the only overdate in its series), but the premium it commands relative to the normal date is not strong until the Mint State grades.

The premium rises rapidly within that adjectival tier, from a small but significant percentage in MS60 to a near-doubling in MS63. At the Gem tier the 1909/8 is a condition rarity in its own right, further complicating collector efforts to own a high-grade representative. Examples this fine seldom change hands via auction more than once or twice a year and the ambitious Saint-Gaudens double eagle enthusiast should recognize this coin for the opportunity it is.

The most obvious asset of this piece, besides its impressive preservation, is its distinctive color, a mix of apricot-gold and paler yellows. The overdate is clear and looks closer to a plain 1908 than to a 1909, with only the straight right side of the final digit giving away the secret. Though striking softness affects the top of Liberty's torch, the overall visual appeal is excellent. Population: 19 in 65, 4 finer (1/14).

*From The Fidelis Collection. NGC ID# 26FC, PCGS# 9151*

**1909-D Double Eagle, MS64  
Scarce, Low-Mintage Issue**

- 4313 1909-D MS64 PCGS. CAC.** Formerly considered an extreme rarity, the 1909-D was heavily exported only to be largely repatriated over the past few decades. It remains the lowest Denver Mint issue of the series, however, and nothing can change the fact that only 52,500 pieces were minted. Today, prices more accurately reflect the availability of the issue. It is unquestionably scarce in near-Gem condition and rare any finer. This attractive example is a delightful yellow-gold with orange and lilac toning accents. Cartwheel luster reveals the different golden hues when rotated under light. A sharp strike is evident on all the devices, including those that usually reveal weakness, but little softness is seen on this coin. A single glancing abrasion across Liberty's gown defines the assigned MS64 grade. This coin displays excellent eye appeal. *From The Fidelis Collection.* NGC ID# 26FD, PCGS# 9152

**1909-S Twenty, MS65  
Subtle Coloration**

- 4314 1909-S MS65 PCGS.** A carefully preserved and unusually appealing representative of this early With Motto issue, solidly struck with rich sunset-orange color and distinctive aqua overtones. A hint of rose color also appears on the eagle's upper wing. Despite a generous mintage of over 2.7 million pieces, this issue is a condition rarity any finer, with just nine such pieces certified by PCGS (1/14). NGC ID# 26FE, PCGS# 9153

**1910-S Twenty Dollar, MS65  
Conditionally Rare in Higher Grades**

- 4315 1910-S MS65 NGC. CAC.** Due to its presence in some 1980s hoards, the 1910-S Saint-Gaudens double eagle is an available date in grades up to the MS64 level. Gems are scarce, and finer coins are condition rarities. This well-detailed MS65 specimen displays vibrant mint luster and well-preserved reddish-gold surfaces, with exceptional eye appeal. NGC has graded only eight numerically finer examples (1/14). *From The Fidelis Collection.* NGC ID# 26FH, PCGS# 9156

**1911 Double Eagle, MS65  
Rare Any Finer**

**4316 1911 MS65 PCGS. CAC.** In 1911 the Philadelphia Mint struck just under 200,000 double eagles, and that would prove to be the *highest* output for that denomination and facility until after World War I. The 1911 twenty is a borderline condition rarity at the Gem level and unquestionably one any finer. This MS65 piece has attractive color, caramel-gold on the satiny obverse with lighter yellow on the brighter reverse. Modestly marked. A tiny copper spot is noted on one of the rays to the right of Liberty's form. Population: 39 in 65, 11 finer (1/14).

*From The Fidelis Collection. NGC ID# 26FJ, PCGS# 9157*

**1913 Twenty Dollar, MS64  
Elusive, Conditionally Scarce**

**4317 1913 MS64 PCGS. CAC.** The 1913 is actually more elusive in Gem-or-better grades than several more-famous Philadelphia dates such as the 1929, 1931, and 1932. This near-Gem example is a lustrous and minimally abraded representative of the issue. The coin is free from visible contact aside from a solitary small mark on the eagle's leg. The strike is good, although we note slight merging of detail on Liberty's chest and raised knee. PCGS has graded only 11 numerically finer examples (1/14).

*From The Fidelis Collection.*

*Ex: Orlando Summer FUN (Heritage, 7/2011), lot 5237; August Signature (Heritage, 8/2013), lot 5314, where it brought \$7,637.50. NGC ID# 26FN, PCGS# 9161*

---

1913 Saint-Gaudens Double Eagle, MS65  
Low-Mintage Early Series Issue  
None Finer at PCGS

**4318 1913 MS65 PCGS.** The 1913 Saint Gaudens double eagle claims a smallish mintage of 168,780 pieces, making the issue slightly scarce in all Mint State grades today. The population drops off drastically at the MS65 level, however, at which point the 1913 becomes one of the leading condition rarities of the entire series. The 1913 is actually more elusive in Gem-or-better grades than more famous dates like the 1929, 1931 and 1932.

Because of the high intrinsic value of each individual coin, collecting date runs of business-strike double eagles was virtually unheard of in the early 20th century. A few collectors, like Virgil Brand, did acquire proof examples from the Philadelphia Mint every year to keep their collections current, but few regular-issue examples were saved. It was only in the late 1930s, when clever numismatists like Louis Eliasberg and Dr. Charles W. Green began to save large denomination gold coins as a legal means of investing in gold that the collection of double eagles became widespread. The 1913 double eagle had been circulating for two decades before this interest developed, explaining why so few high-quality pieces were saved for present-day collectors. When B. Max Mehl offered Dr. Green's example of the 1913 in lot 787 of his April 1949 mail bid sale, it realized \$50.50, considered a good price at the time. Recent sales include the spectacular MS65 PCGS coin in lot 4619 of the FUN Signature (Heritage, 1/2012), which realized \$63,250.

The present coin exhibits razor-sharp definition on all design elements. The well-preserved orange-gold surfaces are accented with hints of rose and vibrant mint luster radiates from both sides. A minor scratch on Liberty's torch arm and a few scattered marks in the left obverse field do not detract from the outstanding eye appeal of this delightful Gem. This coin should find a home in the finest collection or Registry Set. Population: 11 in 65, 0 finer (1/14). NGC ID# 26FN, PCGS# 9161

---

**1913-S Double Eagle, MS64**  
**Just 34,000 Pieces Minted**

- 4319 1913-S MS64 PCGS. CAC. 1913-S MS64 PCGS.** Satiny yellow-orange surfaces display abundant luster that contributes greatly to this coin's eye appeal. Both sides are well-defined, and if not for a few light horizontal marks on Liberty, this piece could make a claim to an even higher grade. Population: 542 in 64 (9 in 64+), 23 finer (1/14).  
*From The Fidelis Collection.*  
*Ex: Baltimore Signature (Heritage 3/2009), lot 3402, which brought \$6,325.00 NGC ID# 26FR, PCGS# 9163*

---

**1914 Saint-Gaudens Double Eagle, MS64**  
**Vivid Color and Luster**

- 4320 1914 MS64 PCGS. CAC.** Always popular because of its small reported mintage of 95,250 pieces, the 1914 Saint-Gaudens double eagle is not too difficult to locate at the MS64 level, but finer specimens are rare. This impressive Choice example displays well-detailed design elements and vibrant mint luster, with lightly marked orange and rose-gold surfaces.  
*From The Fidelis Collection. NGC ID# 26FS, PCGS# 9164*

---

**1915 Saint-Gaudens Twenty, MS65**  
**Only One Finer Coin at NGC**

- 4321 1915 MS65 NGC.** From a smallish mintage of 152,000 pieces, the 1915 Saint-Gaudens double eagle is very scarce in MS65 condition and finer specimens are virtually unobtainable. This delightful Gem displays sharply detailed design elements, with razor-sharp definition on the Capitol and the eagle's feathers. The well-preserved yellow and rose-gold surfaces are free of mentionable distractions and vibrant mint luster radiates from both sides. Overall eye appeal is tremendous. This coin should find a home in the finest collection or Registry Set. Census: 40 in 65, 1 finer (1/14). NGC ID# 26FV, PCGS# 9167
-

---

1915 Saint-Gaudens Double Eagle, MS65  
Only One Finer Certified

**4322** 1915 MS65 NGC. CAC. The 1915 Saint-Gaudens double eagle continues to mimic the conditionally challenged 1913 and 1914 issues. Despite a respectable mintage of 152,050 pieces, this date is all but impossible to locate in grades above the Gem level. Certainly, few examples were saved by contemporary collectors, as collecting large denomination gold coins did not become popular until the 1930s.

This delightful Gem is one of the finest coins certified at NGC. The luster remains fresh and full, with the desirable radiance attendant to this coining era. Bright yellow-gold dominates the surfaces, and there are no significant or distracting marks to report. For identification purposes, there is a nick on Liberty's left leg, midway up her calf. The eagle is wonderfully clean for the grade, with minimal signs of contact. Eye appeal is outstanding. Census: 40 in 65, 1 finer (1/14).

Ex: FUN Signature (Heritage, 1/2006), lot 3609.

From The Fidelis Collection. NGC ID# 26FV, PCGS# 9167

---

---

**1920-S Saint-Gaudens Twenty, MS61**  
**Heavily Melted Series Rarity**  
**Not Seen in Foreign Hoards**

**4323 1920-S MS61 PCGS. CAC.** The 1920-S is one of the keys to the series of Saint-Gaudens twenties, and it is a prized find in any grade. A previous estimate by Breen (1988) of "Probably 8-12 survive" is woefully inadequate; nevertheless, most collectors have never seen, much less owned a 1920-S. A more realistic estimate is somewhere around 55-60 examples are extant today in the various grades of Uncirculated. This estimate underscores the scarcity of this issue, which was absent from the usual hoards from Europe or South America. Apparently the 1920-S was struck, a number were released into circulation, most were set aside in government vaults, apparently none were exported, and what was not distributed or sold in the early 1920s appears to have been melted in the mid-1930s.

This is an attractive example, especially for the grade. Numerous small to mid-sized abrasions seem to be the primary deterrent to a higher grade. The surfaces display pleasing, although somewhat muted mint frost. Both sides also possess rich reddish-golden coloration—a deeper hue than the often-seen orange-gold color, and certainly different from the green-gold pieces that are known. The strike on this coin is somewhat atypical, as the Capitol building, Liberty's toes, and the breast feathers on the eagle are all strongly defined. Only the nose of Liberty shows any weakness.

This coin represents the opportunity for the collector of Saint-Gaudens twenties to acquire this key issue in solid Uncirculated condition. Population: 4 in 61, 47 finer (1/14).

Ex: FUN Signature (Heritage, 1/2007), lot 3809.

From The Fidelis Collection. NGC ID# 26FZ, PCGS# 9171

**1922-S Saint-Gaudens Twenty, MS64  
Rare Issue in Finer Grades**

- 4324 1922-S MS64 PCGS.** The 1922-S Saint-Gaudens double eagle is reasonably available at the MS64 grade level, but finer coins are definitely rare. This attractive Choice specimen displays well-detailed design elements and well-preserved yellow and greenish-gold surfaces, with vibrant mint luster and outstanding eye appeal. PCGS has graded 16 numerically finer examples (1/14). NGC ID# 26G4, PCGS# 9174

**1922-S Double Eagle, MS64+  
Only 16 Finer at PCGS**

- 4325 1922-S MS64+ PCGS. CAC.** The 1922-S is one of the former celebrated rarities in the Saint-Gaudens series, several decades ago considered in the same breath with such luminaries as the 1927-S and 1921. Today, Mint State examples are scarce but available due to overseas repatriations, a theme with many variations in the series. This near-Gem example boasts original surfaces with a slight reddish-gold tinge covering each side. The strike is sharp, even if not quite full. There are no mentionable abrasions, although a small alloy spot appears on the obverse rock, near 6 o'clock. The large number of submissions in MS64+ is explained by the jump in the PCGS online Price Guide from \$12,000 in MS64+ to \$48,500 in MS65. Population: 32 in 64+, 16 finer (1/14).  
*From The Fidelis Collection. NGC ID# 26G4, PCGS# 9174*

**1923-D Double Eagle, MS67 ★  
Magnificent Eye Appeal**

- 4326 1923-D MS67 ★ NGC. CAC.** The type collector looking for a high-end mintmarked Saint-Gaudens twenty need not look any further than this magnificent Superb Gem. Not only has NGC awarded it the coveted Star designation, CAC has approved the MS67 grade, reinforcing the quality and eye appeal that would be obvious to the connoisseur even without the holder. The interiors are pale yellow and the outer zones generally richer apricot-peach. Touches of violet and green appear close to the rims and the cartwheel luster rolling around each side is magnificent. Census: 44 in 67 (1 in 67+, 1 in 67 ★), 1 finer (1/14).  
*From The Fidelis Collection. NGC ID# 26G6, PCGS# 9176*

**1924-S Saint-Gaudens Twenty, MS64  
Only Three Finer Coins at PCGS**

**4327 1924-S MS64 PCGS. CAC.** A large mintage of 2.9 million Saint-Gaudens double eagles was achieved by the San Francisco Mint in 1924, but only 259,000 examples were officially released. Most of the coins released were used in foreign trade. The balance of the mintage was melted and stored as ingots in Fort Knox after the Gold Recall of 1933.

The issue was extremely rare in the 1940s, and the 1924-S was regarded as the rarest date of the series. In the Dr. Charles W. Green Collection (B. Max Mehl, 4/1949), lot 879, the cataloger reported, "To the best of my knowledge, only three specimens are known to exist." In the 1950s and 1960s, numerous examples used in foreign trade were discovered in European banks, and the 1924-S was demoted from the "rarest of the rare" to the scarce category. Most examples recovered in recent decades were in MS63 and lower grades. Near-Gem and finer examples are still challenging today.

The present coin exhibits extraordinary mint luster, with intermingled rose and lilac color on each side. The surfaces are lightly abraded for the grade. Overall visual appeal is strong, as attested by the CAC sticker. PCGS has graded three numerically finer examples (1/14).

*From The Fidelis Collection. NGC ID# 26G9, PCGS# 9179*

**1925-D Double Eagle, MS64  
Rare Any Finer**

**4328 1925-D MS64 PCGS. CAC.** The double eagles struck at Denver in 1925 were "trapped" inland without ready access to the ports in California and the Eastern seaboard, where they could be shipped out of the country and thus accidentally saved from the mass meltings of U.S. gold in the 1930s. For the vast majority of collectors, a pleasing MS64 example of the 1925-D is the most practical high-end coin to own as anything finer is a clear condition rarity; PCGS has graded only seven pieces as MS65 or better (1/14). Wheat-gold surfaces splashed with peach have frosty luster with partial cartwheels. The detail is uncommonly fine and marks are few.

*From The Fidelis Collection. NGC ID# 26GB, PCGS# 9181*

**1925-S Double Eagle, Well-Struck AU58**

**4329 1925-S AU58 PCGS.** Despite a mintage of more than 3.7 million pieces, the 1925-S double eagle is scarce to rare today. The yellow-gold surfaces of this near-Mint State example are tinged with red and rose and retain traces of luster in the recessed areas. The design elements are well-struck, including Liberty's fingers and the panes of the Capitol building. NGC ID# 26GC, PCGS# 9182

1925-S Double Eagle, MS62  
Amplly Lustrous

**4330 1925-S MS62 PCGS. CAC.** The 1925-S double eagle circulated to a limited extent, as the average grade for the combined certified population weighs in at 59.0 as of (1/14). That said, the vast majority of examples were destroyed during the gold recall ordered by Franklin Delano Roosevelt and executed during the 1930s. This MS62 example has its share of wispy abrasions, though fewer than ordinarily would be expected on a coin of its grade. Yellow-gold luster has a few small coppery areas hidden in the central design elements and the overall detail is pleasing, though Liberty's torch hand is a trifle soft.

*From The Fidelis Collection. NGC ID# 26GC, PCGS# 9182*

1926-D Double Eagle, MS63  
Semikey Issue, Sharp and Attractive

**4331 1926-D MS63 PCGS. CAC.** The 1926-D is one of the most challenging issues in the Saint-Gaudens double eagle series thanks to the gold meltings of the 1930s. In the 1930s and 1940s it was considered to be extremely rare with fewer than 10 pieces known, but over time examples were discovered in overseas bank vaults. Still, NGC and PCGS report a combined population of only 281 coins — a minuscule figure compared to tens of thousands for other dates in this series (1/14). The 1926-D remains a very scarce coin.

Reddish-gold patina drapes the surfaces of this attractive representative. Scattered grade-defining abrasions are seen on both sides, but none are particularly bothersome. We do note some striking softness, most notably on the Capitol building. Sweeping luster amid thick mint frost on both sides enhances the eye appeal.

*From The Fidelis Collection.*

*Ex: Beverly Hills Signature (Heritage, 11/2011), lot 4537, where it brought \$25,300.00 NGC ID# 26GE, PCGS# 9184*

1926-S Twenty Dollar, MS65  
Mass-Melted Mintmarked Issue

- 4332 1926-S MS65 PCGS. CAC.** Primarily sun-gold overall with elements of pale apricot. Both sides have appreciable cartwheel luster, though the reverse effect is stronger. The 1926-S double eagle is among the many mintmarked twenty dollar gold issues melted in mass quantities following Franklin Delano Roosevelt's Executive Order 6102, which criminalized the possession of most gold coinage and related financial instruments. Despite a mintage of more than 2 million pieces, the 1926-S is scarce regardless of condition and rare as a Gem. Population: 31 in 65, 4 finer (1/14). *From The Fidelis Collection.* NGC ID# 26GF, PCGS# 9185

1929 Saint-Gaudens Twenty, Unc Details  
Late-Series Rarity

- 4333 1929 — Improperly Cleaned — NGC Details. Unc.** The 1929 Saint-Gaudens double eagle claims a mintage of nearly 1.8 million pieces but only 25,170 examples were officially released into circulation. The Great Depression started in 1929 and few twenty dollar coins were needed in the shrinking economy. The rest of the large mintage was held in banks and Treasury vaults to act as currency reserves. After the Gold Recall of 1933, the great majority of the mintage was melted and stored as gold bars in the Fort Knox Bullion Repository. Only a few hundred specimens survive today.
- The present coin offers sharply detailed design elements and vibrant mint luster throughout. The orange and rose-gold surfaces show few signs of contact but an unnatural sheen is evident, indicative of a light cleaning. This still-attractive specimen should find a home in a fine collection of 20th century gold. NGC ID# 26GL, PCGS# 9190

---

1929 Saint-Gaudens Twenty, MS64+  
Rare 20th Century Issue  
First of the Late-Date Saints

**4334 1929 MS64+ PCGS. CAC.** The 1929 Saint-Gaudens double eagle is the first date in the famous group of “late-date Saints” that includes five of the rarest and most valuable issues of the series (1929, 1930-S, 1931, 1931-D, and 1932). Historically, many collections of Saint-Gaudens double eagles have stopped with the 1928 issue. While the 1929 is definitely the most available coin of this illustrious group, it is still quite elusive, and has much in common with the other challenging dates in this quintet.

All the issues at the end of the Saint-Gaudens series owe their rarity to the Gold Recall of 1933, and the subsequent melts of the mid-1930s. The 1929 claims a substantial mintage of nearly 1.8 million pieces, but the coins were intended as currency reserves, and few examples were ever released into circulation. Research by Dr. Charles W. Green in the 1940s indicates only 25,170 coins were actually “put out” through official channels. The great majority of the mintage remained stored in Treasury vaults and Federal Reserve Banks until 1933, when they were easily gathered up and melted into gold bars. From the modest total of coins released into circulation it is doubtful that more than 300-400 examples survive today in all grades. A few Premium Gem specimens have been certified, but the 1929 is actually much rarer in MS66 than its 1931 or 1932 counterparts. The 1929 is most often seen in grades between MS60 and MS64.

The 1929 was extremely rare in the 1930s and 1940s, and auction appearances were few-and-far-between. The first appearance of the 1929 that we have been able to locate was in Sale 416 (Morgenthau, 6/1940), lot 61. Of all the “late-dates,” only the 1930-S had not been publicly offered by that time. A number of hoards that surfaced in foreign holdings over the years included some examples of the 1929, but the number was never large, and the issue remains quite scarce today. Recent auction sales include the spectacular MS66 PCGS coin in lot 4508 of the Long Beach signature (Heritage, 9/2008) that realized \$184,000.

The present coin is a high-end Choice example, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved yellow-gold surfaces show some highlights of rose and a few minor digs in the right obverse field are all that prevent an even higher grade. Population: 90 in 64 (12 in 64+), 31 finer (1/14).  
*From The Fidelis Collection. NGC ID# 26GL, PCGS# 9190*

---

1931 Double Eagle, MS63  
Rare Late-Date Saint  
Key Series Issue

**4335 1931 MS63 PCGS.** Opinions vary regarding the rarity of the 1931 relative to the 1929, 1930-S, and 1931-D. In an absolute sense, the 1931 is more difficult to locate than the 1929 across virtually all grades. Some experts feel that, in terms of total number of coins known, it is also scarcer than the 1931-D and 1932. As a Gem, the 1931 appears to be more plentiful than the 1929, 1930-S, and 1931-D, but less available than the 1932. Such debates, however, are largely academic, since the 1931 ranks among the keys to the 20th century U.S. gold series in any condition. As noted by Garrett and Guth, "Virtually the entire mintage was wiped out, leaving perhaps 200 to 300 surviving pieces."

Most known examples of the 1931 are sharply struck, and the present Select representative is no exception. Liberty's portrait, the eagle's feathers, and the peripheral devices are all crisply defined. The surfaces show lovely rich coloration and a pleasing satiny sheen. The reverse is practically immaculate and from an early die state, judging by the lack of the die crack that bisects the eagle's beak on most 1931 double eagles.

There are a few minor marks on the obverse, the most noticeable of which resides in the right field area, below Liberty's elbow. Despite these flaws, the eye appeal is largely unaffected. While copper stains are common on this issue, the present example has entirely avoided this unsightly tendency, one of the reasons that this Select representative boasts a level of visual appeal that definitely seems exceptional for the MS63 grade level. An exciting opportunity for the discerning 20th century gold enthusiast. Population: 10 in 63, 61 finer (1/14).

Ex: *Denver Signature* (Heritage, 8/2006), lot 5732; *FUN Signature* (Heritage, 1/2007), lot 3829; *Baltimore Signature* (Heritage, 7/2008), lot 2130.

## PROOF SAINT-GAUDENS DOUBLE EAGLE

1908 With Motto Twenty, Proof

**4336 1908 Motto — Repaired — NCS. Proof.** All matte proof 1908 Saint-Gaudens double eagles represent the second type, or With Motto, issued late in the year, after President Roosevelt's decision to omit the motto IN GOD WE TRUST from the design. The Philadelphia Mint coined 101 proofs double eagles that year.

This example has the typical fine-grained matte surfaces with bold details as expected. The khaki-gold surfaces are smooth and attractive. The repair is not immediately obvious, and appears to be at the lower reverse, on the left side of the sun, where a small disturbance has been smoothed out. NGC ID# 26GV, PCGS# 9205

## COMMEMORATIVE SILVER

1893 Isabella Quarter, Toned MS66

**4337 1893 Isabella Quarter MS66 PCGS.** The Isabella quarter issue is a favorite among many commemorative silver collectors as it is the only commemorative quarter dollar. Bluish-gray and reddish-brown patination encircles the margins of this handsome Premium Gem. Well-struck design elements and well-cared for surfaces round out the coin's outstanding eye appeal. NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, MS66  
Outstanding Eye Appeal

**4338 1893 Isabella Quarter MS66 PCGS. CAC.** An outstanding example of this early commemorative issue, struck in conjunction with the 1893 World's Columbian Exhibition, in Chicago. This example is flawlessly preserved, and the design motifs are crisply struck. In addition to slate-gray and rose toning, both sides shows appealing accents of gold, violet, and indigo near the borders. NGC ID# 28HR, PCGS# 9220

1900 Lafayette Dollar, MS65  
Richly Toned

**4339 1900 Lafayette Dollar MS65 PCGS Secure. DuVall 2-C.** One of the more accessible Lafayette dollar varieties with the second S in STATES on the obverse repunched. The obverse has blue-violet outer toning with green-gold and gray on the interior, while the reverse shows the same colors with a "bar" of the deepest hue across the middle with a slight slant up. NGC ID# 28N8, PCGS# 9222

**1937 Antietam Commemorative, MS68**  
**Beautifully Toned and Magnificently Preserved**

- 4340 1937 Antietam MS68 NGC.** A splendid Superb Gem example of this Civil War commemorative issue. A beautiful array of blended gold, rose, apple-green and lilac patina adorns the obverse, while the reverse shows deeper shades of indigo and orange at the peripheries, with speckled russet flecks across the fields and centers. Census: 18 in 68 (6 in 68 ★), 2 finer (1/14). NGC ID# 28HV, PCGS# 9229

**1939-S Arkansas Half Dollar, MS67**  
**Tied for Finest Certified**

- 4341 1939-S Arkansas MS67 PCGS.** Ex: JFS Collection. The last year of Arkansas Centennial half dollar production saw the Philadelphia, Denver, and San Francisco mints each coin 2,100 pieces, which were sold as sets. The current S-mint issue features light mottled olive and lavender toning, which is slightly more apparent on the reverse. All of the design elements are sharply struck. The lustrous surfaces are well-preserved, showing only a few trivial marks on the Indian's jaw and neck, and in the adjacent lower left obverse field. Ex: *Long Beach Signature Sale* (Heritage, 2/2003), lot 8821; *JFS Collection / ANA Signature* (Heritage, 8/2004), lot 4224. NGC ID# 28JC, PCGS# 9251

**1936 Boone Half Dollar, MS68**  
**None Certified in Higher Numeric Grade**

- 4342 1936 Boone MS68 PCGS. CAC.** The Boone half dollars were struck from 1934-1938 to commemorate the 200th anniversary of the birth of Daniel Boone. Of course, the 1934 issue is the only one with true bicentennial status. Federal law required that the coins issued in following years show the actual date of production, so special legislation was enacted in 1935 approving the addition of the small inscription "1934 PIONEER YEAR" to the design. Many abuses were perpetrated in the sale and distribution of the later issues, causing much controversy in the hobby.

The 1936 Philadelphia issue enjoyed a distribution of 12,012 pieces and this magnificent MS68 example is one of the finest survivors. The design elements are sharply detailed throughout and the pristine surfaces display vibrant mint luster, under shades of sea-green, ice-blue, and silver-gray toning. Population: 4 in 68, 0 finer (1/14). NGC ID# 28JM, PCGS# 9266

**1936 Cincinnati Half Dollar, MS67  
Attractive Design, Low-Mintage Issue**

**4343 1936 Cincinnati MS67 PCGS.** The Cincinnati commemorative half dollars were produced in approximately even numbers at all three mints in 1936, with the Philadelphia issue claiming a mintage of 5,005 pieces including assay coins. Officially, the coins were supposed to commemorate the 50th anniversary of Cincinnati as a center of music, but no such tradition of musical achievement exists. The coins were actually made for profit by sale to collectors by their sponsor, Thomas G. Melish. Most of the coins were roughly handled at the Mint, accounting for the extensive contact marks observed on many specimens. The issue was distributed to collectors, however, and most of the coins were carefully preserved over the years.

This marvelous Superb Gem displays well-detailed design elements and vibrant mint luster throughout. The well-preserved surfaces exhibit attractive shades of champagne-gold and lavender patina, with exceptional eye appeal. Population: 7 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 28JZ, PCGS# 9283

**1892 Columbian Half Dollar, MS67**

**4344 1892 Columbian MS67 PCGS.** This is a stunning Columbian half dollar that is tied for the finest certified. The central obverse is fully brilliant with frosty white luster inside a peripheral frame of orange-gold, yellow, blue, and violet. The reverse is entirely toned, primarily displaying cobalt-blue, with iridescent peripheral toning. Population: 21 in 67 (4 in 67+), 0 finer (1/14). NGC ID# 26H5, PCGS# 9296

**1935 Connecticut Tercentenary Half  
MS67+, Few Are Finer**

**4345 1935 Connecticut MS67+ PCGS.** Appealing satin luster is abundant on the undisturbed fields of this Superb Connecticut commemorative half. Lilac and gold toning covers an unusually full strike on this challenging design, with the Charter Oak leaves fully defined and the modernistic eagle boldly rendered. An extremely attractive example — rare in Superb Gem condition with the Plus designation. Population: 65 in 67 (5 in 67+), 1 finer (1/14). NGC ID# 28K8, PCGS# 9299

**1928 Hawaiian Half, MS66  
Multicolor Toning**

**4346 1928 Hawaiian MS66 PCGS.** The notable lack of visible contact marks competes with the multicolor surfaces on this Premium Gem Hawaiian for the prime attraction. Most of the obverse and about half of the reverse is pale bluish-gray, but then the reverse blooms out into gorgeous saffron and cinnamon hues. A stellar example of this key commemorative half. Population: 89 in 66 (7 in 66+), 2 finer (1/14). NGC ID# 28KE, PCGS# 9309

**1920 Pilgrim Half Dollar, MS67+  
Just One Certified Finer**

**4347 1920 Pilgrim MS67+ PCGS.** A thin margin of lime-green and gold toning frames silver-gray centers on this notably unmarked commemorative half. The satiny fields are lustrous and unabraded. This is one of just five Superb Gem examples with the Plus designation for outstanding quality and eye appeal. The coin is fully struck as few of the issue are, especially on the reverse peripheries where the legends are sharp and the masts are full. Governor Bradford is bold on the obverse. Population: 40 in 67 (5 in 67+), 1 finer (1/14). NGC ID# 28LC, PCGS# 9359

**1947-D Booker T. Washington Half Dollar,  
Exceptional MS67**

**4348 1947-D Booker T. Washington MS67 PCGS. CAC.** Quality control was apparently not a primary consideration in producing the Booker T. Washington half dollar at the various mints, as nearly all specimens were poorly struck on the obverse and have graininess and marks on Washington's cheek from the original planchet surface that did not strike up fully (Bowers, 2008). Additionally, most examples in the marketplace today are heavily abraded.

The present Superb Gem offering is a refreshing exception to this profile. All design elements are well-defined, and the cheek lacks the serious marks seen on most pieces. Both sides display pleasing luster and whispers of soft gold coloration. Examples such as this are extremely rare, which is readily evident from the PCGS/NGC population data that indicate only 14 coins assigned MS67 and none finer. Population: 6 in 67, 0 finer (1/14). NGC ID# 28MB, PCGS# 9409

---

**1951 Washington-Carver Half Dollar, MS67**  
**One of the Finest Known**

**4349** 1951 Washington-Carver MS67 PCGS. CAC. Lovely shades of steel-blue and rose emerge across both sides of this marvelously preserved Superb Gem example. The peripheries display pleasing accents of mint-green and peach-gold. Fully struck and free of any surface distractions. Despite a reasonably high mintage of 110,018 pieces, this issue is rare at the MS67 grade level, at both services, and none have merited an even finer rating. Population: 2 in 67, 0 finer (1/14). NGC ID# 28MS, PCGS# 9430

---

**1951 Washington-Carver Half, MS67**  
**Lightly and Evenly Toned**

**4350** 1951 Washington-Carver MS67 PCGS. CAC. Some of the Washington-Carver half dollars were struck from silver obtained by melting down remaining unsold examples of the earlier Booker T. Washington commemorative halves; this should have been taken as a bad omen, but it was not. Nonetheless, of the 110,000-plus 1951 Washington-Carver halves, it is estimated that 90,000 of them were melted, for a net distribution around 20,000 pieces. This piece is one of only two to receive this grade at PCGS, and none are finer (1/14). Both sides show the high points and all areas to be devoid of mentionable contact, with surfaces that are pinkish-gray in the centers to light jade near the rims. A beautiful coin. NGC ID# 28MS, PCGS# 9430

---

**1953 Washington-Carver Half, MS67**  
**Frosty Example, Tied for Finest**

**4351** 1953 Washington-Carver MS67 PCGS. The Booker T. Washington and Washington-Carver commemorative half dollar series continued for too long (as did many others), but the many abuses within the various series issues finally spelled the death knell for commemorative coinage after the 1954 Washington-Carver until 1982, when the 250th anniversary of George Washington's birth would resurrect the commemorative halves.

The 1953 (and 1953-D) Washington-Carvers were the mintage low point by a few coins, 8,003 of each distributed. This 1953 certified MS67 PCGS is tied for finest certified with four other submissions (1/14). The silvery surfaces are thoroughly frosted with an arc of rich amber-gold on the left-side obverse, while the reverse is nearly color-free. Marks are held to a minimum. NGC ID# 28MY, PCGS# 9438

---

**1953 Washington-Carver Half Dollar**  
Well-Struck MS67  
Pleasing Overall Eye Appeal

**4352 1953 Washington-Carver MS67 PCGS. CAC.** Ex: Young Collection. The 1953 Washington-Carver commemorative half dollar shows a reported distribution of only 8,003 pieces, far less than the 108,020 examples struck at the San Francisco Mint in that year. All coins were apparently handled casually at the mints and during the distribution process, resulting in numerous abrasions. Additionally, most pieces in this series were poorly struck.

Peripheral orange-gold patina cedes to yellow-gold and grayish-lavender in the centers, and the devices are well struck. This last factor is significant in resulting not only in strong design detail, but also in obliterating most of the tiny marks on the original planchet that plague the centers of most specimens of this series. Moreover, close examination reveals no mentionable contact marks. The CAC sticker affirms the above-average eye appeal. Population: 5 in 67, 0 finer (1/14). NGC ID# 28MY, PCGS# 9438

**1953-S Washington-Carver Half Dollar, MS67**  
Conditionally Rare, One of the Finest Known

**4353 1953-S Washington-Carver MS67 PCGS.** A gorgeous representative of this popular commemorative type, with vibrant satin luster and attractive blended patina across both sides. Sharply struck and obviously preserved with great care, as the smooth surfaces display only a few minute marks. One of the best examples that we have ever seen. Population: 9 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 28N2, PCGS# 9440

**COMMEMORATIVE GOLD**

**1903 Louisiana Purchase/Jefferson Gold Dollar, MS67**  
Splendidly Preserved and Intensely Lustrous

**4354 1903 Louisiana Purchase/Jefferson MS67 PCGS.** A truly exceptional representative of this early gold commemorative issue, this example shows razor-sharp definition throughout, and bright, flashy mint luster. The light antique-gold coloration and clean, mark-free surfaces contribute to this coin's splendid visual appeal. Population: 81 in 67, 0 finer (1/14). NGC ID# 26HA, PCGS# 7443

**1915-S Panama-Pacific Quarter Eagle, MS66**  
Rarely Seen Finer

**4355 1915-S Panama-Pacific Quarter Eagle MS66 PCGS. CAC.** This Premium Gem is fully brilliant with splendid yellow-gold surfaces and frosty luster. Delicate splashes of pale blue toning adds to the visual appeal of this lovely commemorative gold piece. PCGS has only certified 31 finer Panama-Pacific quarter eagles, all in MS67 (1/14). NGC ID# 26HK, PCGS# 7450

## TERRITORIAL GOLD

### August Bechtler Gold Dollar, MS63 Prooflike K-24

- 4356** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge MS63 PCGS. CAC. K-24, R.3. The K-24 August Bechtler gold dollar is the most frequently encountered variety of this popular private gold coiner. However, this is an unusual, high-grade example. Perhaps the most unusual aspect is the deep, flashy prooflikeness on each side. The high Uncirculated grade is also unusual, but not as much as the mirroring in the fields. The combination of both results in a coin with undeniable eye appeal and collector interest. The surfaces are bright yellow-gold with scattered patches of red, most likely from improper mixture of the copper alloy. Sharply struck and minimally abraded. Listed on page 378 of the 2014 *Guide Book*. PCGS# 10040

### Christopher Bechtler Gold Dollar, AU55 K-1, 30 Grains, Third Series (Circa 1831-34)

- 4357** (1831-34) C. Bechtler Dollar, 30G. AU55 PCGS. K-1, R.4. A through-the-coin crack at 4 o'clock adds interest to this 30-grain Bechtler gold dollar, but does not detract from its appeal. Struck before the 1834 Federal devaluation of the dollar relative to gold, this is the sole Bechtler dollar of this weight. Subsequent issues were done at a weight of 28 grains and 27 grains. This example is slightly wavy but has few abrasions or other distractions. The coin displays a softly reflective, yellow-gold color with a touch of orange gold on some of the lettering. Struck from rotated dies as often seen. Listed on page 376 of the 2014 *Guide Book*. Population: 14 in 55, 21 finer (1/14). PCGS# 10064

### 1852 U.S. Assay Office Ten, AU58 Popular K-12a Variety

- 4358** 1852 Assay Office Ten Dollar AU58 NGC. K-12a, R.4. The O in OFFICE is located under the N in UNITED, identifying the K-12a variety. The U.S. Assay Office was the successor to Moffat & Co., with Curtis, Perry, and Ward as the chief partners, after Moffat retired. This lightly abraded yellow-gold specimen retains most of its original design detail and mint luster. Census: 23 in 58 (1 in 58+), 43 finer (1/14). PCGS# 10001

### 1853 K-18 Assay Office Twenty Unc Details

- 4359** 1853 Assay Office Twenty Dollar, 900 Thous. — Rims Filed, Improperly Cleaned — NCS Details. Unc. K-18, R.2. Traces of an 8 are visible beneath the first 0 in 900 on this example. Both sides exhibit cleaning lines, with the obverse rim filed to diminish the appearance of rim bruises. Bright yellow surfaces appear on both sides. PCGS# 10013

### 1850 Moffat & Co. Five Dollar, XF45 K-7, Small Eagle Variety

- 4360** 1850 Moffat & Co. Five Dollar XF45 NGC. K-7, R.4. Small Eagle variety, confirmed by thin arrows that do not touch at the arrowheads. This is the sub-variety with a berry positioned beneath the FI of FIVE. A yellow-gold example with orange-gold accents, the coin is moderately worn but still retains excellent detail on the devices. Numerous small abrasions dot the fields and portrait — none are severe. The MOFFAT & Co. name is worn but readable on the coronet, the mark of the most respected coiner of pioneer gold. Listed on page 380 of the 2014 *Guide Book*. Census: 11 in 45, 46 finer (1/14). PCGS# 10243

---

1849 Mormon Five, AU58  
Rare Territorial Gold Issue, K-2  
Only One Finer Coin at PCGS

**4361 1849 Mormon Five Dollar AU58 PCGS. K-2, R.5.** A group of Mormon soldier-pioneers, who had left a Midwestern settlement to fight on the American side in the Mexican-American War, were part of the first wave of miners during the California Gold Rush, and they were also among the first to leave; as Emily Mullins notes in the November 21, 2005 *Coin World* article "Mormons Strike Gold!", "... rather than becoming swept up in gold rush fever, the Mormons simply found enough gold to comprise a small fortune and complete [sic] the trip back to the Great Salt Lake Valley."

Much of that gold was in the form of dust, a time-honored but inconvenient method of carrying such precious material, and though measured-out parcels of gold dust served as money for some time, the leaders of the settlement sought the materials and equipment necessary to turn the gold into more convenient coinage. An interesting parallel can be made to the early coinage of the United States; though the devices used in each case were simple, rendered in low relief, and not particularly artistic, they were successful in communicating the ideals of the issuing authority. Both the crowned eye and the clasped hands on the coinages of 1849-1850 are richly evocative of the Mormons' spiritual aims.

Much of the early Mormon coinage was melted down or worn beyond recognition, leaving relatively few survivors even in better circulated grades. The five dollar coin of 1849 is a rarity in any condition, much less near-Mint as the present piece is. Warmly lustrous yellow-gold surfaces show glimpses of orange. Minimally marked with soft detail on the hands, as usual. Listed on page 393 of the 2014 *Guide Book*. Population: 3 in 58, 1 finer (1/14).

Ex: *Central States Signature (Heritage, 4/2009)*, lot 2798. PCGS# 10262

---

1860 Mormon Five Dollar, K-6, MS61  
Culturally and Numismatically Significant

**4362 1860 Mormon Five Dollar MS61 NGC. K-6, High R.5.** In 1860, a full decade after the previous issues of Mormon gold, further five-dollar pieces were issued bearing a new design. The obverse has a recumbent lion, date 1860 below, and motto HOLINESS TO THE LORD around, this last in the Deseret alphabet. The reverse shows an eagle behind a beehive, DESERET ASSAY OFFICE PURE GOLD / 5 D. around, all in the Latin alphabet. The 1860 Mormon five dollar pieces are important not only numismatically but also culturally, since they are among the few 19th century appearances of the Deseret alphabet surviving to the present day.

As was the case with the earlier Mormon money, there was considerable mistrust of the new coins outside the religious community. Donald Kagin's *Private Gold Coins and Patterns of the United States* reprints an order posted at Camp Floyd in Utah Territory on January 10, 1860, that reads in part:

"... there is a large amount of gold coins—several thousands of dollars, purported to be worth five dollars, commonly called 'Mormon Coin,' about to be put in circulation ... As this coin is understood to be worth only (about) 4 1/2 dollars, the Commanding Officer recommended to the soldiers not to receive it for more than the sum, and better still, not to take it at all."

Today, of course, the Mormon five dollar pieces of 1860 are highly desirable members of the Territorial gold family. This orange-gold example is luminous and vibrant, though a number of wispy abrasions and a few deeper marks affect each side. Unusually high-grade for the issue. Listed on page 394 of the 2014 *Guide Book*.

Ex: CSNS Signature (*Heritage*, 4/2009), lot 2799. PCGS# 10268

## CALIFORNIA FRACTIONAL GOLD

Liberty Round Quarter, BG-222, MS67  
Sole Finest Certified

- 4363** Undated Liberty Round 25 Cents, BG-222, R.2, MS67 NGC. These undated pieces were struck in 1853. The fraction on the reverse is higher in the wreath than on the BG-221. This Superb Gem is the sole finest of the issue graded at NGC (1/14). The golden-yellow surfaces are virtually pristine and nearly prooflike, showing reflective black, inky fields against the frosty devices. This piece appears to be the early die state, although the prongs of the holder cover a bit of the area at star 1. The Jay Roe Collection piece (Bowers and Merena, 9/2003), lot 36, was an MS65 PCGS example in Die State IV. PCGS# 10407

## COIN OF HAWAII

1883 Hawaii Half Dollar, MS65  
Rich Multicolor Toning

- 4364** 1883 Hawaii Half Dollar MS65 PCGS. The hapalua was struck at the San Francisco Mint on Federal half dollar planchets. After Hawaii became a U.S. territory, most examples were recalled by banks and melted by the Treasury. The present lustrous and crisply struck Gem displays dappled lavender, tan-brown, and jade-green toning. A lens reveals only unimportant contact. Certified in a green label holder. Population: 14 in 65 (1 in 65+), 2 finer (1/14). From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 10991

## PATTERNS

1858 Flying Eagle Cent Pattern, PR64+ Cameo  
Judd-203, Hook-Necked Eagle

- 4365** 1858 Flying Eagle Cent, Judd-203, Pollock-247, R.5, PR64+ Cameo NGC. CAC. Borderline Gem condition for this mirrored-proof, Judd-203 pattern cent, which has pleasing purple and reddish-gold toning with nicely contrasted devices. The obverse displays a small, hook-necked eagle flying left with wings that seem too tall for its slender body. The reverse design shows the denomination surrounded by an oak wreath (no shield), with arrows and an olive sprig wrapped in a bow. This popular pattern has a plain edge and displays a sharp strike on a copper-nickel planchet. A small void appears beneath the D in UNITED. Census: 10 in 64+, 7 finer (1/14). PCGS# 11869

1863 With Motto Copper Half Dollar  
Judd-343, PR65+ Red and Brown

- 4366** 1863 Half Dollar, Judd-343, Pollock-415, R.7, PR65+ Red and Brown NGC. Ex: Simpson. Identical in design to the proof 1866 With Motto Seated half dollar, but the date is 1863. Struck in copper with a reeded edge. This so-called transitional half dollar uses the reverse of 1866-1891. These and the other "With Motto" patterns of this date, as well as 1864 and possibly 1865, are actually restrikes made circa 1869 and into the early 1870s and were offered with restrikes of other denominations in complete sets. The fields are bright and highly reflective, and the color is mostly a deep cherry-red with blue accents here and there. A lovely, problem-free Gem. Ex: Long Beach Signature (Heritage, 9/2006), lot 1828; ANA Signature (Heritage, 8/2010), lot 5664. PCGS# 70505

1866 George Washington Nickel  
PR66 Cameo, Judd-470

- 4367** 1866 Five Cents, Judd-470, Pollock-562, Low R.6, PR66 Cameo NGC. A bust of George Washington faces right on the obverse, the legend IN GOD WE TRUST above and the date below. A wreath of laurel on the reverse encloses a large numeral 5 with the legend UNITED STATES OF AMERICA around. Struck in nickel with a plain edge. This flashy and minimally toned Premium Gem has a matte-like surfaces, as coined. Sharply struck and unabraded with minor retained laminations along the lower right reverse border. PCGS# 60666

1866 Washington Nickel, Struck in Nickel  
Judd-473, PR66 Cameo

- 4368** 1866 Judd-473, Pollock-564, R.6, PR66 Cameo PCGS. George Washington appeared on numerous privately minted Early American tokens, but did not appear on U.S. Mint coins prior to the 1866 five cent patterns. The obverse depicts a bust of Washington facing right and has the legend IN GOD WE TRUST. The obverse is muled with a regular issue shield nickel rays reverse. Struck in nickel with a plain edge. Just the slightest hint of golden-lilac toning is seen over each side. As one would expect from a Cameo, the fields are deeply reflective and there is a significant presence of mint frost over the devices. PCGS# 860669

1870 Three Cent Nickel in Copper  
Judd-794, PR65 Red and Brown

- 4369** 1870 Three Cent Nickel, Judd-794, Pollock-881, R.7, PR65 Red and Brown PCGS. CAC. Ex: Denali Collection. Struck from regular issue dies with a plain edge, but in copper. An extremely rare trial piece. The 2009 Tenth Edition of Judd lists the last auction appearance at a 1994 Bowers and Merena auction. The Pollock pattern book, also from 1994, lists only a single specimen, from the famed Farouk auction. The present needle-sharp example displays dusky autumn-gold and lavender-red toning. Void of hairlines and highly appealing. Ex: Heritage Signature Sale (8/2013), lot 4900. PCGS# 71037

1870 Standard Silver Quarter  
Judd-895, Richly Toned PR66

- 4370** 1870 Standard Silver Quarter Dollar, Judd-895, Pollock-1002, Low R.7, PR66 NGC. The Liberty Head obverse, with no star on the tiara. IN GOD WE TRUST is on a scroll below the portrait. On the reverse an open agricultural wreath encloses 25 CENTS, date 1870 below. STANDARD is at the upper rim. Struck in silver with a plain edge. Deep blue-lavender toning covers each side but fails to subdue the mirrored flash in the fields. PCGS# 61139

**1883 Judd-1709 Liberty Nickel in Aluminum  
Superb Gem Proof Example**

- 4371** 1883 Liberty Head Five Cents, Judd-1709, Pollock-1913, Low R.7, PR67 PCGS. Charles Barber's head of Liberty faces left, the date below, and UNITED STATES OF AMERICA at the margin. The reverse indicates the use of experimental dies with 75 N./25 C. in the center, surrounded by a wreath of cotton and corn, FIVE CENTS at the top and bottom margins with seven stars left and six right. Struck in aluminum with a plain edge. Only a half-dozen pieces are believed known of this pattern in aluminum. The surfaces are essentially perfect. As expected from an aluminum pattern, the fields are deeply mirrored with strongly contrasting frosted devices. PCGS# 62126

**1883 Liberty Nickel, With Cents, PR63  
Judd-1720, Aluminum  
Judd 10th Edition Plate Coin**

- 4372** 1883 Liberty Nickel, With Cents, Judd-1720, Pollock-1927, High R.7, PR63 PCGS. The very rare Judd-1720 is sometimes cataloged as a dies trial piece, since it was struck in aluminum (with a plain edge) and appears upon cursory inspection to match the regular issue 1883 With Cents designs. Indeed, the obverse layout is identical, but the reverse differs in the length of the tassels above the large V. This sharply struck silver-gray specimen is beautifully preserved, though the market grade is affected by two slender parallel retained laminations from star 4 to Liberty's neck across the chin. Housed in a first generation holder.  
Ex: Auction '89 (Stack's, 7/1989), lot 1855. PCGS# 62137

**1883 Aluminum Liberty Nickel  
Judd-1720, PR64**

- 4373** 1883 Liberty Nickel, With Cents, Judd-1720, Pollock-1927, High R.7, PR64 PCGS. Similar to the issued 1883 With Cents Liberty nickel, but the lower tassels of the upper corn ears differ in length. Struck in aluminum with a plain edge. This is a most unusual opportunity. Our records indicate we have only handled one other Judd-1720 before this auction, that was from Newman I. Now we have three from the same consignor, each in first-generation PCGS holders. This piece has deeply reflective mirrors in the fields and a good portion of mint frost over the devices. A few imperfections are noted in the fields from the time of striking.  
Ex: Dr. Alfred R. Globus Pattern Collection (Stack's, 5/1998), lot 526. PCGS# 62137

**1883 Liberty Nickel Dies Trial in Aluminum  
Judd-1720, PR64**

- 4374** 1883 Liberty Nickel, With Cents, Judd-1720, Pollock-1927, High R.7, PR64 PCGS. Nearly identical to the distributed 1883 With Cents nickel, but there are subtle differences on the length of the tassels over the large V. Struck in aluminum with a plain edge. Struck as a regular dies trial, with examples known in copper (Judd-1719A) and the present aluminum version (Judd-1720). This issue was not listed by Robert Coulton Davis in his early work on patterns. An example was included in William Woodin's collection and it passed to Judson Brenner, who exhibited it at the 1914 ANS Exhibition. The brilliant surfaces show streaks of what we think are impurities in the aluminum. Deeply reflective mirrors are seen in the fields.  
Ex: Dr. Alfred R. Globus Pattern Collection (Stack's, 5/1998), lot 527. PCGS# 62137

## GSA DOLLARS

1879-CC Morgan Dollar, MS64  
GSA, Original Packaging  
VAM-3 Overmintmark Variety

**4375** 1879-CC Capped Die, GSA MS64 NGC. VAM-3. A Top 100 Variety. An untoned, brilliant-white example of the Capped Die variety with obvious effacing of the die to hide the smaller CC beneath a larger CC. This near-Gem is one of just 4,123 Morgans dated 1879 that were included in the GSA distribution of more than 2.9 million Carson City silver dollars, and one of 19 GSA VAM-3 coins band-wrapped with the NGC MS64 certification (1/14).

This lustrous, frosted dollar displays remarkably clean fields and an unblemished portrait seldom seen on a GSA dollar. Cartwheel silver luster abounds over unabraded surfaces. A bold strike shows only a touch of softness over the ear. Housed in the original GSA black box with the accompanying certificate. PCGS# 407086

1882-CC Morgan Dollar, MS67  
Brilliant, Frosted GSA Example

**4376** 1882-CC GSA MS67 PCGS. The General Services Administration at one time held over 600,000 1882-CC Morgan dollars — more than half of the original Carson City mintage of the issue. Few could be of comparable quality to this Superb Gem. It displays frosted, brilliant surfaces that are entirely untuned. A full strike exists on both sides of the coin, with Liberty's hair shown in outstanding detail and the eagle equally bold. Only the most minor abrasions are widely scattered on the coin, with none even remotely detrimental to the appearance of the coin. A rarity in this grade and perhaps the ultimate prize for GSA dollar collectors. GSA Population: 1 in 67, 0 finer (1/14). PCGS# 518866

## INGOTS

1904 Economic Gold Extraction Ingot  
220.4 dwt.

**4377** 1904 Economic Gold Extraction Co. Gold Ingot. 220.4 dwt. Assayed by the Arequa Assay Office in Colorado and dated 1904. Everything is included except the weight in ounces on this small ingot. It is 21 5/10 carats, 220.4 dwt., and valued at \$204.10. This is Bar No 7.

*From Christopher Bently's Nob Hill Collection.*

---

1930 New York Assay Office Gold Ingot  
11.79 Ounces

- 4378** 1930 New York Assay Office Gold Ingot. 11.79 Ounces. This smaller-sized gold ingot has a light but clear-to-read imprint of the New York Assay Office centered nicely on the top side. Set just below is FINE / 999.7. The weight is on the long side 11.79 in a large font and just to the left is a tiny OZS, but the O cannot be made out. The short sides read: 12964 and 230. The other long side has the value expressed as \$243.65. The almost pure gold surfaces are expectantly bright, and the top side shows numerous small imperfections from casting.

*From Christopher Bently's Nob Hill Collection.*

---

---

1932 New York Assay Office Gold Ingot  
24.38 Ounces

- 4379** 1932 New York Assay Office Gold Ingot. 24.38 Ounces. This compact ingot is small but remarkably thick, resulting in a surprising heft when handled. On the upper part of the top side, the Assay Office imprint is centered and below is FINE. / 999.3. On the right side the weight is expressed as OZS 24.38. The other long side values the ingot at \$503.63. The top and bottom numbers are 1602 and 106 respectively. This is a remarkably attractive and problem-free ingot.

*From Christopher Bently's Nob Hill Collection.*

---

---

1946 New York Assay Office Gold Ingot  
25.42 Ounces

- 4380** 1946 New York Assay Office Gold Ingot. 25.42 Ounces. This post-war ingot has a nicely centered imprint of the Assay Office, and overlapping the bottom of the imprint is FINE/999.6. The right (long) side has the weight expressed as OZS 25.42. On the short sides, both top and bottom, the numbers have been effaced. Otherwise, a pleasing and bright ingot with minimal production problems.  
*From Christopher Bently's Nob Hill Collection.*

---

1959 New York Assay Office Gold Ingot  
6.35 Ounces

- 4381** 1959 New York Assay Office Gold Ingot. 6.35 Ounces. This small-sized gold ingot has a stronger impression of the Assay Office imprint on the lower part, but 959 in the date is still clearly discernable. The top and left portions of the imprint are off the ingot. Overlapping the bottom of the imprint is FINE, and just below is 999.8. The weight on the right (long) side is expressed as OZS 6.35. The top (short) sides read 510 and M2 respectively. A clean, small-sized gold ingot.  
*From Christopher Bently's Nob Hill Collection.*

*End of Session Two*

## SESSION THREE

### SHIELD NICKELS

- 4382 1866 Rays MS65 NGC.** An attractive Gem representative of the short-lived Rays design, this coin is sharply detailed and brightly lustrous, with a few hints of golden-tan toning. NGC has graded 24 numerically finer examples (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 22NX, PCGS# 3790
- 4383 1866 Rays MS65 PCGS.** A well-detailed Gem, with design elements that show the slight softness that led to the removal of the rays in 1867. Shades of golden-brown and lavender-gray patina blanket the lustrous surfaces. NGC ID# 22NX, PCGS# 3790
- 4384 1871 MS64 NGC.** The nickel-gray surfaces show minimal marks for the grade and good eye appeal on this sharply struck coin. Mint State survivors of this issue of 561,000 pieces are more elusive than nonspecialists realize. Census: 22 in 64, 25 finer (1/14). NGC ID# 22P5, PCGS# 3798
- 4385 1874 MS65 NGC. CAC.** Almond-gold and cream-gray adorn this lustrous and exquisite Gem. A fully struck and essentially pristine Shield type coin. Encapsulated in a prior generation holder. Census: 23 in 65, 5 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 22P9, PCGS# 3803
- 4386 1880 AG3 PCGS. CAC.** This AG3 1880 nickel would be the key coin for a lowball Registry Set, increasingly popular as the numismatic tide lifts so many boats; every time you “upgrade,” you make money on the deal, at least in theory ... This piece is extensively worn, of course, but the date and central types are clear. The reverse is better-detailed overall, usual for the type. The low mintage of circulation strikes for this issue, 16,000 pieces, makes it the series key. Population: 7 in 3, 77 finer (1/14). NGC ID# 276E, PCGS# 3810
- 4387 1883/2 AU53 PCGS. FS-302.** The knob and lower left corner of the 2 is west of the 3. The curve of the 2 is within the 3. The die crack through the ball and the 3 in the date, characteristic of FS-302, is present but faint on this early die state example. An almond-gold and stone-gray representative of the scarce overdate. NGC ID# 22PD, PCGS# 3814

### PROOF SHIELD NICKELS

#### 1866 Rays Shield Nickel, PR65 In-Demand First-Year Type

- 4388 1866 Rays PR65 NGC.** The 1866 Rays proof nickels were a two-year type along with their 1867 Rays counterparts, but the later issue in proof is a great rarity, subjecting the earlier to intense collector demand. An estimated 600-plus examples were struck of the first-year date. This Gem proof shows untoned surfaces with a bold strike and considerable contrast, even if unacknowledged. Census: 63 in 65 (1 in 65 ★), 30 finer (1/14). NGC ID# 276G, PCGS# 3817

- 4389 1867 No Rays PR64 PCGS. CAC.** The usually seen 1867 format for proof coins, as the With Rays 1867s are great rarities. This near-Gem No Rays shows attractive pinkish-gold patina over well-struck surfaces that are minimally marked, an excellent example for type-coin purposes. PCGS has seen only 39 submissions numerically finer (1/14). NGC ID# 22PF, PCGS# 3821

- 4390 1867 No Rays PR65 Cameo NGC.** Delicate champagne toning appears on both sides of this Gem Cameo proof, concentrated at the borders. Each side exhibits deeply mirrored fields behind the lustrous nickel-gray devices with bold design definition. Census: 18 in 65 Cameo, 14 finer (1/14). PCGS# 83821

#### 1867 No Rays Nickel, PR66 Cameo Great Type Coin

- 4391 1867 No Rays PR66 Cameo NGC.** Silver and pinkish-gold hues vie for territory on this Premium Gem Cameo proof 1867 No Rays nickel, among the few finest Cameos graded at both services combined. The proof strike is full throughout both sides, even the problematic star centrils on the reverse. A great example of the first-year No Rays type. Census: 12 in 66 Cameo (3 in 66 ★ Cameo), 2 finer (1/14). PCGS# 83821

#### 1867 No Rays Shield Nickel, PR66 Cameo Elusive in High Grades

- 4392 1867 No Rays PR66 Cameo NGC.** The 1867 Rays Shield nickels are extreme rarities despite the existence of some apparent restrikes, while the 1867 No Rays are more available but still elusive in the higher proof grades. The present Premium Gem Cameo example shows excellent contrast with deeply reflective fields. Lovely accents of jade and sunset-orange add to the broad eye appeal. Census: 12 in 66 Cameo (3 in 66 ★ Cameo), 2 finer (1/14). PCGS# 83821

- 4393 1869 PR65 Cameo NGC.** The *Guide Book* estimates for these early Shield nickel proof strike are really little more than educated guesswork, usually tracing back to Walter Breen's research several decades ago. Bowers' more-recent *Guide Book of Shield and Liberty Head Nickels* places the guess at 850 to 1,100 pieces. In either case, few survive as nice as this Gem proof Cameo 1869, well-struck surfaces showing no more than a trace of gold patina and minimal contact. Census: 20 in 65 Cameo (2 in 65+ Cameo), 10 finer (1/14). PCGS# 83823

**4394 1870 PR66 Cameo NGC.** This untoned Premium Gem Cameo 1870 Shield nickel shows silver-gray fields with lighter silver-white high points amid surfaces that are virtually unmarked throughout, quite appealing and high-end for this elusive proof issue. These Shield nickel proofs are considerably underrated at today's market levels. Census: 14 in 66 Cameo, 2 finer (1/14). PCGS# 83824

**4395 1872 PR66+ NGC.** Superior surface preservation is the hallmark of this untoned silver-gray example, showing a bold proof strike and no singular contact amid great eye appeal. Among the few finest available of this issue. Census: 49 in 66 (1 in 66+), 5 finer (1/14). NGC ID# 276N, PCGS# 3826

**4396 1875 PR65 NGC.** A hint of gold patina plays against the prevailing nickel-gray coloration on this Gem proof 1875, a difficult date to find in nicer condition. The planchet on this piece is better, and the strike sharper, than on some survivors of the issue. Census: 65 in 65 (1 in 65+), 1 in 65 ★, 26 finer (1/14). NGC ID# 276S, PCGS# 3829

**4397 1876 PR65 Ultra Cameo NGC.** The Centennial Shield nickel issue, the 1876 proof was struck in a larger quantity of 1,150 pieces, but the Ultra Cameo grade of this Gem example puts it far and way finer than most survivors of the issue. Great eye appeal is the product of splendid, deeply reflective fields contrasting against frost-white devices with good preservation throughout. Census: 4 in 65 Ultra Cameo (1 in 65+ Ultra Cameo), 7 finer (1/14). PCGS# 93830

### 1877 Shield Nickel, PR62 Attractive Key-Date Coin

**4398 1877 PR62 PCGS.** This proof-only issue had a low mintage of just 900 pieces, contributing to its key-date status in the series. Fully struck and free of contact marks or hairlines, this piece may be conservatively assessed at the PR62 grade level. Attractive light patina enhances the eye appeal.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 276U, PCGS# 3831*

### 1877 Nickel, PR63 Sharp Key-Date Example

**4399 1877 PR63 PCGS.** This key-date coin shows sharp strike definition on the stubbornly difficult design elements. A low-mintage proof issue now reported as 900 pieces, according to the updated figure in the 2014 *Guide Book*. Other than a pair of trivial contact marks in the reverse fields, the surfaces are essentially distraction-free.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 276U, PCGS# 3831*

### 1877 Shield Nickel, PR64 Proof-Only Key to the Series

**4400 1877 PR64 NGC.** The proof-only key to the Shield nickel series, the 1877 saw just 900 pieces struck and survivors are eagerly contested today at auction. This near-Gem example shows the expected sharp proof strike on nickel-gray, largely untuned surfaces that are highly lustrous and show only minimal contact. A couple of daubs of deeper color appear on the reverse. NGC ID# 276U, PCGS# 3831

**4401 1877 PR61 Cameo ANACS.** From a proof-only mintage of 510 pieces, this boldly contrasted proof is sharply detailed throughout and the reflective surfaces show only minor signs of contact.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 83831*

**4402 1878 PR64 PCGS.** Shades of champagne-gold and lavender toning enhance the well-preserved surfaces of this attractive Choice proof. The design elements are sharply detailed and eye appeal is quite strong.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 276V, PCGS# 3832*

**4403 1878 PR64 NGC.** The "second key" in the Shield nickel series, the 1878 was also a proof-only issue like the 1877 but struck in far larger quantity, 2,350 pieces versus 900. This near-Gem proof 1878 show nickel-gray surfaces with some accents of gold and dusky patina on each side, sharply struck and appealing. NGC ID# 276V, PCGS# 3832

**4404 1878 PR66+ PCGS.** The second proof-only mintage among the Shield nickels, the 1878 saw an emission of 2,350 coins in minor proof sets that included the three cent nickel and Indian cent. This PR66+ PCGS example is among the finest survivors, pinkish-gray with a sharp strike and impeccable preservation. Population: 3 in 66+, 16 finer (1/14). NGC ID# 276V, PCGS# 3832

**4405 1878 PR66 NGC. CAC.** From a mintage of 2,350 pieces, this impressive Premium Gem proof displays sharply detailed design elements and moderately reflective nickel-gray surfaces with no mentionable signs of contact. NGC ID# 276V, PCGS# 3832

### 1879/8 Shield Nickel, PR67 Cameo Splendid Eye Appeal

**4406 1879/8 PR67 Cameo PCGS. CAC.** The design motifs are fully impressed and the pristine surfaces exhibit startling contrast between richly frosted devices and gorgeously reflective fields. A lovely black-and-white Superb Gem that is equally impressive for its high degree of technical merit and stunning visual appeal. Population: 8 in 67 Cameo, 0 finer (1/14). PCGS# 83834

- 4407 1880 PR66 Cameo NGC.** Delicate lavender-gray and golden overtones enrich the eye appeal of this clearly contrasted Cameo Premium Gem proof. Sharply struck and smooth. Census: 51 in 66 Cameo (4 in 66+ Cameo, 1 in 66 ★ Cameo), 24 finer (1/14). PCGS# 83835

**1881 Shield Nickel, PR66 Deep Cameo  
Rarely Seen Contrasted Proof**

- 4408 1881 PR66 Deep Cameo PCGS. CAC.** The 1881 is an important issue in the Shield nickel series, having a low overall mintage. Proofs of this issue are no rarer than of any other Shield nickel issue, but they are in higher demand as a result of the low business strike mintage. This Premium Gem Deep Cameo proof is brilliant and untuned with extraordinary contrast. Population: 1 in 66 Deep Cameo, 1 finer (1/14). PCGS# 93836

**LIBERTY NICKELS**

- 4409 1885 XF45 PCGS.** This Choice XF specimen shows slight wear on the design elements, but the grains of corn at the bottom of the wreath are still visible and LIBERTY remains bold. No large or distracting surface marks are evident. NGC ID# 2773, PCGS# 3846
- 4410 1885 MS66 PCGS.** This lustrous Premium Gem exhibits well-detailed design elements and pristine surfaces with a few hints of greenish-gold toning. Population: 21 in 66 (1 in 66+), 3 finer (1/14). NGC ID# 2773, PCGS# 3846
- 4411 1891 MS66 PCGS.** This is a common date with almost 17 million pieces produced, but few examples of the 1891 nickel have certified as MS66 and only 3 are certified numerically finer by PCGS and NGC combined (1/14). This Premium Gem shows strong mint luster over golden-toned, satin surfaces. The strike is strong with only a slight lack of detail on a few of the stars and a soft spot on the always-problematic ear of corn to the left of the bow on the reverse. NGC ID# 2776, PCGS# 3852
- 4412 1901 MS66 PCGS.** Strong cartwheel luster is present on both sides of this gorgeous Premium Gem example. Close examination reveals scattered areas of faint tan toning. Portions of the design reveal an incompleteness of strike, including the star centrils and the left ear of corn. A few minuscule marks on Liberty provide little distraction, if any. PCGS and NGC combined have awarded higher numeric grades to only five examples (1/14). NGC ID# 277C, PCGS# 3862
- 4413 1905 MS66 PCGS.** Amply lustrous with a mix of pearl-gray and peach-orange hues, the latter stronger on the reverse. Though the obverse stars are largely crisp, the left ear of corn on the reverse is flat. Population: 71 in 66 (2 in 66+), 0 finer (1/14). NGC ID# 277G, PCGS# 3866
- 4414 1909 MS66 PCGS.** This impressive Premium Gem exhibits well-detailed design elements, with a touch of softness on the wreath. Vibrant mint luster shines through light shades of gold and lavender toning. A better date in this condition. Population: 26 in 66 (1 in 66+), 0 finer (1/14). NGC ID# 277K, PCGS# 3870

- 4415 1912-D MS65 NGC.** This well-detailed Gem represents the final year of the Liberty design, discounting the clandestine 1913 issue. The lustrous surfaces show accents of greenish-gold toning. Census: 94 in 65 (1 in 65+, 1 in 65 ★), 25 finer (1/14). NGC ID# 277P, PCGS# 3874

**1912-S Liberty Nickel, MS65  
Low-Mintage, Key Branch Mint Issue**

- 4416 1912-S MS65 PCGS.** While all previous Liberty nickels had mintages numbering in the millions of pieces, this series-ending issue (not including the 1913 anomaly) had a meager output of just 238,000 pieces. The current coin is a lovely Gem example this key San Francisco date. The surfaces are satiny and bright, with none of the dullness all too often seen on the issue. The strike is generally well-defined, the only exception being the left ear of corn on the reverse wreath. Minimal marks are present, as one would expect from the grade, and the coin offers a pleasing display of pale-lilac and rose toning. NGC ID# 277R, PCGS# 3875

**PROOF LIBERTY NICKELS**

- 4417 1883 No Cents PR67 ★ NGC.** Fully struck with vivid reflectivity in the fields and lovely golden frost on the pristine devices. A bit of milky sky-blue patina is mingled with dark-green color in the fields. Stunning cameo contrast on each side further elevates the visual quality of this magnificent Superb Gem, which certainly seems deserving of the "Star" designation for exceptional eye appeal. Census: 20 in 67 (2 in 67 ★), 0 finer (1/14). NGC ID# 22PU, PCGS# 3878
- 4418 1883 No Cents PR66 Cameo NGC.** The 18 in the date is clearly repunched. A well struck and satiny specimen with dusky apricot patina. Carbon is confined to a fleck on the foot of the R in AMERICA. PCGS# 83878
- 4419 1883 No Cents PR66 Cameo PCGS.** Glistening brilliance erupts from impeccably preserved surfaces. The frosted, crisply impressed motifs appear to float over deeply mirrored, watery fields, which reveal faint speckles of milky color under magnification. Population: 86 in 66 (6 in 66+) Cameo, 14 finer (1/14). PCGS# 83878
- 4420 1885 PR64 NGC.** A sharply detailed Choice proof from a mintage of 3,790 pieces, this coin displays well-preserved reflective fields, with subtle hints of pink and gold toning. Eye appeal is outstanding. NGC ID# 277T, PCGS# 3883
- 4421 1888 PR65 Cameo NGC.** Ex: Eliasberg. A hint of gold toning graces this prominently mirrored Gem. The motifs are icy. The strike shows incompleteness on several stars and the left ear of corn. Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 780; Baltimore ANA Signature (Heritage, 7/2008), lot 1314, which realized \$1,092.50. PCGS# 83886

---

**1891 Nickel, PR66+ Cameo  
A Breathtaking Example**

- 4422 1891 PR66+ Cameo NGC. CAC.** Examples of this early Liberty nickel proof issue are scarce with Cameo contrast, especially at grade levels any higher than PR64. This PR66+ Cameo piece is one of the most attractive and impressive examples that we have ever seen, as the meticulous strike definition and flawless surfaces are near-unimprovable. The exquisitely frosted devices are virtually white and the deeply reflective fields are jet-black on both sides. A coin to make even jaded specialists look twice. Census: 33 in 66 Cameo (1 in 66+ Cameo, 2 in 66 ★ Cameo), 8 finer (1/14). PCGS# 83889

---

**1892 Liberty Nickel, PR65+ Ultra Cameo  
Finest-Graded at NGC**

- 4423 1892 PR65+ Ultra Cameo NGC.** This extraordinary example is the single finest-graded example at NGC, and one of the few proof Liberty nickels to receive the coveted Ultra Cameo classification at that grading service (1/14). Either at arm's-length or under close examination with a loupe, this remarkable coin impresses the viewer with stunning visual appeal and essentially unimprovable technical merit. The illimitable reflectivity in the "black" fields and intense frosting on the motifs make for a memorable display. Expertly preserved surfaces showing just a couple of trivial ticks confirm the splendid overall quality of this great proof. Census: 1 in 65 Ultra Cameo (1 in 65+ Ultra Cameo), 0 finer (1/14). PCGS# 93890

---

**1897 Liberty Head Nickel, PR66+ Cameo  
Pristine and Impressive**

- 4424 1897 PR66+ Cameo PCGS. CAC.** From an original proof mintage of 1,938 pieces, this PR66+ Cameo piece is fully struck and meticulously preserved with glassy deep-mirror fields and imposing cameo contrast evident on both sides. Relatively few examples of this late 19th century date display noteworthy field-to-device contrast, making this coin a pleasing exception to the rule. Population: 29 in 66 (6 in 66+) Cameo, 12 finer (1/14). PCGS# 83895

- 4425 1897 PR67 Cameo NGC.** A majestic specimen that was not only produced with exceptional care, but has been meticulously preserved as well. The nearly untuned surfaces display only a few mint-made imperfections on Liberty's portrait and show pronounced contrast between fields and devices. Census: 8 in 67 Cameo (1 in 67 ★ Cameo), 4 finer (1/14). Ex: FUN Signature (Heritage, 1/2007), lot 2184. PCGS# 83895

---

**1903 Liberty Nickel, PR67 Cameo  
Conditionally Rare**

- 4426 1903 PR67 Cameo PCGS. CAC.** The two major grading services have seen few specimens from this early 20th century issue that have qualified for both Superb Gem and Cameo status, making this a conditionally rare item indeed. Stunning white-on-black contrast is easy to see at first glance, and more careful inspection reveals exacting strike definition and flawlessly preserved surfaces. Population: 14 in 67 (4 in 67+) Cameo, 1 finer (1/14). PCGS# 83901

- 4427 1910 PR66 Cameo PCGS. CAC.** The design elements of this delightful Premium Gem are richly frosted and well-detailed, creating stark cameo contrast with the slightly reflective fields. Population: 27 in 66 (4 in 66+) Cameo, 16 finer (1/14). PCGS# 83908

## BUFFALO NICKELS

- 4428** 1913 Type One MS67 PCGS. CAC. Honey-gold, lime-green, and rose-red adorn this lustrous and nearly immaculate single-year type coin. The strike is good and the eye appeal is uncommon. NGC ID# 22PW, PCGS# 3915
- 4429** 1913 Type One MS67 PCGS. CAC. A magnificent Superb Gem of this single year design subtype. Light olive-green with blushes of rose-red near the rims. A good strike with occasional minor incompleteness on peripheral elements. PCGS has graded 13 numerically finer examples (1/14). NGC ID# 22PW, PCGS# 3915
- 4430** 1913 Type One MS67 PCGS. CAC. A great Superb Gem example of this ever-popular Type One Buffalo nickel type issue. Toning is largely pale blue and rose-peach. The reverse is rotated approximately 40 degrees counterclockwise. NGC ID# 22PW, PCGS# 3915

### 1913-S Buffalo Nickel, MS67 ★ Type One, Bison on Raised Ground Rare Full Strike

- 4431** 1913-S Type One MS67 ★ NGC. This is a splendid representative of the San Francisco Mint's inaugural striking of the Buffalo nickel. It may be an early strike — or at least a strike from a new die pair — with all of the details sharp including the hair above the braid tie and strong definition on the bison's fur line, tail, head, and facing legs. Quality of strike is of great importance to Buffalo nickel collectors, and there will be no disappointment in that regard with this Superb Gem. Likewise, the toning and luster are exceptional. Golden-orange hues surround silver-lilac centers, with fiery orange on the high points. Excellent luster prevails. Census: 15 in 67 (1 in 67 ★), 1 finer (1/14). NGC ID# 22PY, PCGS# 3917
- 4432** 1913 Type Two MS66 PCGS. More difficult to acquire than its Type One counterpart. This boldly struck piece has rainbow patina over its lustrous surfaces, with yellow-orange and blue-green most prominent. PCGS has graded 19 numerically finer examples (1/14). NGC ID# 22PZ, PCGS# 3921
- 4433** 1913 Type Two MS66 PCGS. CAC. Attractive gold-green patina appears on both sides of this Premium Gem representative along with a few scattered flyspecks of darker color. This coin is well struck for the issue, with only minor peripheral weakness at LIBERTY. Rich satin luster adds to the eye appeal. PCGS has awarded higher numeric grades to only 19 examples (1/14). NGC ID# 22PZ, PCGS# 3921
- 4434** 1913 Type Two MS66 PCGS. CAC. A sharp strike and attractive, lilac and gold toning with lime-green highlights define this Type Two Buffalo nickel. There are no visible abrasions or spots to detract from the smooth and lustrous surfaces. This variety is scarce any finer. NGC ID# 22PZ, PCGS# 3921
- 4435** 1913 Type Two MS66 PCGS. CAC. Gorgeous satin luster and subtle hints of iridescence combine for great visual appeal on this Premium Gem. Minimally marked and gorgeous. NGC ID# 22PZ, PCGS# 3921
- 4436** 1913-S Type Two MS63 PCGS. CAC. Although the bison's front leg is flat, all other details present nicely, with satiny gray luster and lovely light gold toning. Traces of field reflectivity are noted on the reverse. NGC ID# 22R3, PCGS# 3923

- 4437** 1913-S Type Two MS64 PCGS. Delicate champagne toning appears on the satiny surfaces of this lustrous Choice Mint State example. Although the strike is a trifle weak, this piece presents excellent eye appeal. NGC ID# 22R3, PCGS# 3923

### 1914/3 Buffalo Nickel, MS62+ Strong Underdigit

- 4438** 1914/3 MS62+ PCGS. FS-101. When viewing a coin from an early die state, such as this piece, one has to wonder why there are those who still question the overdate status of this issue. The top of the 3 is bold both on the left and right top of the 4 and the upper part of the downstroke of the 3 is equally strong. Lightly abraded with satiny mint luster. As an additional bonus, the date shows mechanical doubling. Population: 5 in 62 (1 in 62+), 27 finer (1/14). NGC ID# 22R4, PCGS# 93924
- 4439** 1914-D MS66 NGC. This frosty Premium Gem is an extraordinary beauty with vivid gold toning around a brilliant center on both sides. Glints of violet add to the eye appeal. Census: 21 in 66 (1 in 66+, 1 in 66+★), 1 finer (1/14). NGC ID# 22R5, PCGS# 3925
- 4440** 1914-S MS65 NGC. Rich reddish-gold toning dominates, though the upper obverse periphery is deep blue. Lustrous and pristine with a typical strike at the centers and on the tail. Highly lustrous surfaces. NGC ID# 22R6, PCGS# 3926

### 1915-S Five Cent, MS66 Condition Rarity, Memorable Toning

- 4441** 1915-S MS66 NGC. Ex: Yankee Collection. The fields have prooflike characteristics on both sides of this colorful, Premium Gem nickel. Most likely, the reflective surfaces are the result of die polishing or an early strike. Memorable toning covers this sharp nickel. Deep lilac surfaces display magenta and gold highlights on the obverse. The reverse is lavender with vivid, golden-orange overtones. No significant abrasions appear on the surfaces, which are pristine and highly lustrous. Census: 25 in 66, 0 finer (1/14). NGC ID# 22R9, PCGS# 3929
- 4442** 1916-S MS67 NGC. An outstandingly toned representative of this surprisingly tough San Francisco issue, by turns amethyst, sapphire, jade, citrine, and all hues in between. Quicksilver surfaces have only a few faint flyspecks and the bison's horn is not only fully outlined but rounded. Census: 1 in 67, 0 finer (1/14). NGC ID# 22RC, PCGS# 3933
- 4443** 1917 MS66 PCGS. Golden toning through the margins with a lighter nickel-gray gracing the interiors. Generally well-defined with only a hint of softness on the central portrait and the bison's shoulder. NGC ID# 22RD, PCGS# 3934

**4444 1917 MS66 PCGS.** Although most examples of this issue have textured, frosty luster due to extended die use (more than 50 million pieces were produced), this blazing example is an exception. It is boldly reflective and sharply struck, with abundant brilliant luster. The smooth, unmarked surfaces are covered with champagne-gold toning. A scarce Premium Gem, rare any finer. NGC ID# 22RD, PCGS# 3934

**4445 1917-D MS65 PCGS.** Attractive shades of ice-blue and champagne-gold toning blanket the surfaces of this delightful Gem, with well-detailed design elements and vibrant mint luster on both sides. PCGS has graded 18 numerically finer examples (1/14). NGC ID# 22RE, PCGS# 3935

**4446 1917-S MS63 PCGS.** A pleasing Select Mint State piece, this scarce Buffalo has satiny gray luster and above average design definition. NGC ID# 22RF, PCGS# 3936

**4447 1918/7-D Fine 15 NGC. FS-101.** A pearl-gray example with clear legends, including the date. The underdigit is evident by its thick downstroke. Two hair-thin parallel marks are noted above the date, and a minor and narrow mint-made lamination streak extends from 7 o'clock to the bison's back. NGC ID# 22RJ, PCGS# 3939

**4448 1918-D MS64 PCGS. CAC.** A lightly toned and unabraded near-Gem with infrequent minute carbon and a typical strike. Like most early branch mint issues, the 1918-D is scarce in Uncirculated grades. NGC ID# 22RH, PCGS# 3938

**4449 1920-D MS64 PCGS. CAC.** Olive-green and wheat-gold toning encompasses this nicely struck and essentially mark-free better date nickel. An excellent candidate for a high quality specialized set. NGC ID# 22RR, PCGS# 3945

**4450 1920-D MS64 PCGS. CAC.** Light walnut-brown and pale gray toning embraces this lustrous and minimally unabraded branch mint near-Gem. The strike is generally good, although the curve of the tail is soft. A better date in all grades, and desirable in the present quality.  
Ex: *West Palm Beach Signature* (Heritage, 7/2009), lot 256. NGC ID# 22RR, PCGS# 3945

#### 1920-S Buffalo Nickel, MS64 Challenging Issue Any Finer

**4451 1920-S MS64 NGC.** While the 1920-S Buffalo nickel is not too difficult to locate at the MS64 level, finer examples are conditionally rare. This well-detailed Choice example shows just a touch of softness on the Bison's shoulder. The lightly marked surfaces are brightly lustrous, with a few hints of amber toning on the lower reverse. NGC has graded 19 numerically finer examples (1/14). NGC ID# 22RS, PCGS# 3946

**4452 1921-S XF45 PCGS. CAC.** Despite a mintage of over 1.5 million pieces, the 1921-S Buffalo nickel is a genuinely elusive date even at the Choice XF level. This representative has deep mustard and golden-brown toning over a steel-gray base. NGC ID# 22RU, PCGS# 3948

#### 1921-S Buffalo Nickel, MS64 Attractive Multicolor Toning

**4453 1921-S MS64 PCGS.** The 1921-S Buffalo nickel is known as a strike rarity, but this well-detailed Choice example shows just a touch of softness on the bison's shoulder. The lightly marked lustrous surfaces display attractive shades of greenish-gold, lavender, and ice-blue toning. Overall eye appeal is quite strong. NGC ID# 22RU, PCGS# 3948

**4454 1923 MS66+ PCGS. CAC.** Light golden elements visit each side of this carefully preserved Buffalo nickel. The bison's head has excellent detail and the shoulder shows only minor softness. NGC ID# 22RV, PCGS# 3949

#### 1923 Buffalo Five Cent, MS66+ Vivid Multicolor Toning

**4455 1923 MS66+ PCGS. CAC.** While the 1923 Philadelphia issue is a common date with more than 35 million pieces produced, it is seldom seen in Premium Gem and finer conditions. This example has a sharp strike, but not full on the bison's forward leg and shoulder, and with some weakness on the hair above the braid tie. The colorful toning, however, is outstanding, with neon-orange, lime-green, magenta, yellow-gold tones over surfaces flowing with satin luster. Each side of the coin is equally dramatic, yet distinct in the melding of vivid colors. PCGS surely awarded the Plus designation for this coin's incredible eye appeal. NGC ID# 22RV, PCGS# 3949

**4456 1924 MS66 PCGS.** Blue and violet overtones cross quicksilver luster. A softly struck but still-pleasing Premium Gem from the Roaring Twenties. Population: 87 in 66 (1 in 66+), 6 finer (1/14). NGC ID# 22RX, PCGS# 3951

**1926-S Buffalo Nickel, AU55  
Sought-After Low-Mintage Issue**

**4457 1926-S AU55 PCGS.** The 1926-S Buffalo nickel claims the lowest regular-issue mintage of the series, at 970,000 pieces. This Choice AU example shows a touch of wear on the design elements and the surfaces are lightly abraded, with bluish-gray toning on the obverse and greenish-gold and lavender on the reverse. NGC ID# 22S7, PCGS# 3959

**4458 1927-S MS62 NGC. CAC.** A sharply detailed MS62 example, with satiny mint luster and lightly marked surfaces with hints of bluish-gray and greenish-gold toning. The 1927-D is a challenging date in high Mint State grades. NGC ID# 22SA, PCGS# 3962

**4459 1927-S MS63 PCGS. CAC.** The design elements of this attractive Select Buffalo nickel are sharply detailed throughout and the lightly marked surfaces show hints of ice-blue and pale gold toning, with satiny mint luster on both sides. NGC ID# 22SA, PCGS# 3962

**4460 1927-S MS64 PCGS.** Here is an important issue in the Buffalo nickel series that is rarely found finer than MS60. This Choice Mint State piece has a bold strike that is nearly full and far finer than usual. Both sides have satin luster with delicate iridescent toning. PCGS has only certified 23 finer examples (1/14). NGC ID# 22SA, PCGS# 3962

**1928-D Nickel, MS66  
None Finer by PCGS**

**4461 1928-D MS66 PCGS. CAC.** This lustrous nickel is a champagne-gold beauty, with a sharply struck bison and excellent eye appeal. Over the past two years, only a handful of auction appearances can be found for the 1928-D at this grade level. The absence of appearances confirms the condition rarity of this D-mint issue, which is seldom seen in Premium Gem preservation. Collectors have taken the cue, and eagerly pursue attractive, high-grade examples such as this coin. Population: 45 in 66, 0 finer (1/14). NGC ID# 22SC, PCGS# 3964

**1930-S Buffalo Nickel, MS66+  
Only Five Finer at PCGS**

**4462 1930-S MS66+ PCGS. CAC.** This is a dazzling Premium Gem that represents the conditionally rare 1930-S, a common issue in lower Mint State grades but elusive any finer. PCGS has only assigned the Plus designation to three MS66 pieces, and they have only certified five finer examples (1/14). This piece has frosty nickel-gray luster with an average strike. The delicate champagne toning adds immeasurably to the eye appeal. NGC ID# 22SJ, PCGS# 3970

**4463 1935 MS67 NGC.** A stunning Superb Gem example, this late-series Buffalo nickel exhibits scintillating gold and rainbow toning over both surfaces. NGC has only certified one finer example (1/14). NGC ID# 22SN, PCGS# 3974

**4464 1935 MS67 PCGS. CAC.** This magnificent Superb Gem boasts immaculate powder-blue and rose-gold surfaces. The strike is full except for trivial inexactness on the hair above the braid. As nice as can be found for this later Philadelphia issue. NGC ID# 22SN, PCGS# 3974

**4465 1936-D 3 1/2 Legs VF30 PCGS. FS-901.** A problem-free gunmetal-gray and wheat-gold example. Far scarcer than the more famous 1937-D Three-Legged nickel. Both varieties were likely caused by a Mint attempt to remove evidence of clashing from the reverse die. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* PCGS# 93978

**1936-D 3 1/2 Legs Nickel, XF  
Rare Guide Book Variety**

**4466 1936-D 3 1/2 Legs XF40 PCGS. CAC. FS-901.** Though less famous and less dramatic than the 1937-D Three Legged nickel, the present variety is many times rarer, and is also listed in the Guide Book. This stone-gray example has moderate wear but the horn is complete and there are no reportable marks. Population: 13 in 40, 14 finer (1/14). PCGS# 93978

**4467 1937 MS67+ PCGS Secure.** A pleasingly toned MS67+ example of this final Philadelphia Buffalo nickel issue. Blue-violet interiors shift to green at the edges and bright luster lights up the whole. NGC ID# 22SV, PCGS# 3980

**4468 1937 MS67+ PCGS. CAC.** The last Buffalo nickels struck at Philadelphia are dated 1937, as only Denver coined the design in 1938. This MS67+ example is modestly toned nickel-blue with soft interior detail but a strong horn on the bison. NGC ID# 22SV, PCGS# 3980

- 4469 1937-D Three-Legged XF45 PCGS. CAC. FS-901.** A dove-gray representative of the perennial collector favorite. The front foreleg is absent except for the hoof, characteristic of the mint error. Other diagnostics of the variety are present, and include a granular appearance on the bison's back leg and on the field beneath the bison's flank. NGC ID# 22SX, PCGS# 3982

#### 1937-D Three-Legged Nickel, MS62

- 4470 1937-D Three-Legged MS62 PCGS. CAC. FS-901.** Rich gunmetal-gray and olive-brown patina embraces this satiny and nicely struck representative. A lens fails to locate more than marginal marks. All diagnostics of the popular variety are present, such as the trail of minute die lumps beneath the bison's flank. NGC ID# 22SX, PCGS# 3982

- 4471 1938-D MS67+ PCGS. CAC.** Well-struck with extremely attractive lilac-on-silver surfaces, this Buffalo nickel is technically and aesthetically beautiful. Satin luster rolls across the smooth and undisturbed surfaces. While excellent examples abound, this Superb Gem with the PCGS Plus designation is a standout representative of the issue. NGC ID# 22SZ, PCGS# 3984

### PROOF BUFFALO NICKELS

#### 1913 Buffalo Nickel, PR65 Matte Proof, Type One

- 4472 1913 Type One PR65 PCGS. CAC.** This is a meticulously struck Matte Proof with satin luster and outstanding eye appeal. The coin is essentially as made save for light-tan toning, a few microscopic flecks on the lower obverse, and one small spot on the N in UNUM. This is the sole year for the Variety One design subtype, since mint officials worried that FIVE CENTS would wear too quickly in circulation. Variety One shows the bison standing on raised ground (or, as some say, on a mound).  
*Ex: Houston Signature (Heritage, 12/2009), lot 300, which brought \$2,990.00. NGC ID# 278R, PCGS# 3988*

#### 1913 Type Two Nickel, PR66+ Silverlike Matte Proof

- 4473 1913 Type Two PR66+ NGC.** The bison stands on a thin, straight line to comprise the second design type from 1913. Although 1,514 Type Two matte proofs were struck, many were melted as unsold, adding to the scarcity of the issue. This example appears silverlike in color, virtually untuned save for a small blush of champagne-gold on the bison's back and the surrounding legends. The strike is full, and no contact marks, carbon flecks, or other distractions are seen on this lovely Premium Gem, which received the highly-valued Plus grade from NGC. NGC ID# 278S, PCGS# 3990

- 4474 1914 PR64 PCGS Secure. CAC.** From a matte proof mintage of 1,275 pieces, this attractive Choice example displays sharply detailed design elements and lustrous surfaces under shades of ice-blue and greenish-gold toning. NGC ID# 278T, PCGS# 3991

- 4475 1936 Type One — Satin Finish PR66 NGC.** The Satin proofs were replaced by an all-brilliant finish later in the year. This sharply detailed Premium Gem displays satiny mint luster under highlights of champagne-gold and ice-blue toning. NGC ID# 278X, PCGS# 3994

- 4476 1936 Type One — Satin Finish PR66+ PCGS. CAC.** A high-end Premium Gem example of the earlier Satin finish type, with razor-sharp design elements and satiny fields that show no mentionable distractions. Eye appeal is terrific. NGC ID# 278X, PCGS# 3994

#### 1937 Nickel, PR66 ★ Dramatic Multicolor Shades

- 4477 1937 PR66 ★ NGC.** Both sides display alternating iridescent bands of fire-red, lemon-gold, jade-green, and electric-blue. The spectacular toning is undoubtedly the reason the present Premium Gem received the elusive NGC Star. A loupe reveals scattered minute carbon. As of (1/14), NGC has certified a total of only 30 examples with a Star designation. NGC ID# 278Z, PCGS# 3996

- 4478 1937 PR66 NGC. CAC.** Glassy fields, well struck devices, and outstanding preservation ensure the eye appeal. Lightly toned in pastel shade of chestnut-gold and ice-blue. Housed in a prior generation holder. NGC ID# 278Z, PCGS# 3996

## JEFFERSON NICKELS

### 1938 Jefferson Nickel, MS67 Rare Full Steps Example

- 4479 1938 MS67 Full Steps PCGS.** An underrated, first-year Philadelphia issue, the 1938 nickel is recognized by experts as a rarity in MS67 condition — with or without Full Steps, but especially so if the steps are full. This unmarked, satin-lustrous Superb Gem displays steely-lilac color with magenta overtones. The strike is full everywhere including Monticello's steps. No examples are certified finer by either service. Population: 14 in 67 Full Steps, 0 finer (1/14). NGC ID# 22T4, PCGS# 84000

### 1938 Jefferson Nickel, MS67 Full Steps Remarkable Bright, Satiny Luster

- 4480 1938 MS67 Full Steps PCGS.** Perhaps one in 20 high-grade Uncirculated 1938 nickels are encountered with full steps. This bright-white example exhibits remarkable satiny mint luster. As one would expect from a coin at this grade level, there are no obvious or detracting abrasions. Population: 10 in 67 Full Steps, 0 finer (12/13). NGC ID# 22T4, PCGS# 84000

### 1938 Jefferson Nickel, MS67 Full Steps Radiant Mint Luster

- 4481 1938 MS67 Full Steps PCGS.** The 1938 Jefferson nickel is remarkably scarce considering it was the first year of the type. In an unpublished interview with *Legacy* magazine in 1990, Harry Forman said he considered the 1938 nickel to be the most undervalued roll he could think of. And that proved correct. This Superb Gem shows strong detail overall, not just on the steps, and each side shines with bright mint luster. Population: 10 in 67 Full Steps, 0 finer (12/13). NGC ID# 22T4, PCGS# 84000

- 4482 1939 Reverse of 1938 MS67+ Full Steps PCGS.** 1939 was a transitional year for the series. The "Wavy Steps" subtype of 1938 was on the way out, replaced by its "Straight Steps" successor. The present pristine Superb Gem is an example of the obsolete subtype. Sharply struck and highly lustrous with even olive-gold toning. Population: 12 in 67 (1 in 67+) Full Steps, 0 finer (1/14). NGC ID# 22T8, PCGS# 84003

- 4483 1939-D Reverse of 1938 MS67+ PCGS.** Weak and wavy steps characterize this seldom-seen variant. The coin itself is pleasingly preserved with a mix of subdued gold, peach, blue, and violet shades. Population: 72 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 2793, PCGS# 4005

- 4484 1941 MS67 Full Steps PCGS.** A delightful Superb Gem representative, with razor-sharp definition on all design elements, including Full Steps on Monticello. Vibrant mint luster radiates from both sides and subtle shades of greenish-gold toning visit the peripheries. Population: 24 in 67 (1 in 67+) Full Steps, 0 finer (1/14). NGC ID# 22TG, PCGS# 84010

- 4485 1941 MS67 Full Steps PCGS.** Blazing luster emanates from the impeccably preserved surfaces of this Superb Gem. Sharply struck throughout. Population: 24 in 67 (1 in 67+) Full Steps, 0 finer (1/14). NGC ID# 22TG, PCGS# 84010

- 4486 1941-D MS67+ Full Steps PCGS Secure.** Colorful with a fade from peach to orange, gold, and nickel-gray on the obverse and bold blue-to-violet hues on the sharply struck reverse. PCGS has graded only one numerically finer Full Steps example (1/14). NGC ID# 22TH, PCGS# 84011

### 1943 War Nickel, MS67+ Scarce with 6 Full Steps

- 4487 1943-P MS67+ Full Steps PCGS.** All six steps of Monticello are sharp on this lustrous example, which displays lemon-gold toning accents with orange and lilac highlights. This beautifully preserved war nickel is an unquestioned Superb Gem, with satiny-smooth surfaces of surpassing beauty. Certainly among the finest of this issue, with just one certified numerically finer by either service. Population: 55 in 67 (4 in 67+) Full Steps, 1 finer (1/14). NGC ID# 22TP, PCGS# 84018

- 4488 1945-P MS67 PCGS.** Vivid shades of burnt-orange and magenta toning blanket the well-preserved lustrous surfaces of this wartime composition Superb Gem. The design elements are sharply detailed and eye appeal is terrific. Population: 43 in 67 (3 in 67+), 0 finer (1/14). NGC ID# 22TX, PCGS# 4025

**1946-D Jefferson Five Cent, MS67  
Full Steps, Superb Toning**

**4489 1946-D MS67 Full Steps PCGS.** A singularly beautiful nickel, with vibrant, lustrous toning on both sides in magnificent shades of lilac, azure-blue, magenta, fire-orange, and gold. A full strike includes five full steps and a partial sixth, with the portrait fully brought up and the legends sharp. No abrasions are seen on the immaculate, satiny surfaces. No 1946-D nickel has been certified numerically finer by PCGS and NGC combined (1/14). NGC ID# 22U3, PCGS# 84029

**4490 1947-D MS67 Full Steps PCGS.** Soft champagne patination resides on the highly lustrous surfaces of this Superb Gem nickel. The design elements are well brought up. Population: 15 in 67 Full Steps, 0 finer (1/14). NGC ID# 22U6, PCGS# 84032

**1950-D Nickel, MS67 Full Steps  
Evenly Toned, Strong Mint Luster**

**4491 1950-D MS67 Full Steps PCGS.** The 1950-D was once the darling of numismatics, a recently minted coin with a remarkably low mintage that could be found in circulation once in a while and immediately sold to any corner coin dealer. Those days are gone, but for those who remember much of the charm lingers. This is a brightly lustrous example with even, light golden-brown toning over each side. NGC ID# 22UF, PCGS# 84042

**PROOF JEFFERSON NICKELS**

**4492 1938 PR68 NGC.** Pale green toning at the bottom of the bust lends a touch of color to this specimen, an early modern proof with immaculate surfaces. The old-style steps of the Reverse of 1938 are wavy and incomplete, though the other design elements are sharply struck. Census: 12 in 68 (1 in 68 ★), 0 finer (1/14). NGC ID# 279W, PCGS# 4175

**4493 1939 Reverse of 1940 PR67 PCGS.** An exemplary specimen that boasts an intricate strike and a hint of cameo contrast on the reverse. Lightly toned with flashy fields and undeniable eye appeal. Perhaps 95% of all 1939 proofs are the Wavy Steps or Reverse of 1939. The rarity of the Straight Steps, Reverse of 1940 1939 proof is well-known to the specialist. Population: 17 in 67, 1 finer (1/14). Ex: *Dallas Signature (Heritage, 4/2007)*, lot 480, which realized \$3,220. NGC ID# 22YB, PCGS# 94176

**4494 1940 Reverse of 1938 PR66 ★ NGC. FS-901.** Only a small percentage of 1940 proofs have the obsolete "Wavy Steps" reverse of 1938. Brilliant and boldly struck. A lens reveals microscopic obverse flecks. Census: 22 in 66 (1 in 66 ★), 13 finer (1/14). Ex: *Los Angeles Signature (Heritage, 8/2009)*, lot 7556. NGC ID# 279Y, PCGS# 94177

**4495 1954 PR67 Deep Cameo PCGS.** This incredible Superb Gem exhibits sharply detailed frosty design elements that contrast profoundly with the flawless deeply mirrored fields. Housed in a green label holder. Population: 12 in 67 Deep Cameo, 7 finer (1/14). NGC ID# 27A7, PCGS# 94186

**4496 1971 No S PR68 Cameo PCGS.** This boldly contrasted proof is just two ticks away from perfection, with sharply detailed frosty devices and completely brilliant mirrored fields that show no visible distractions. The mintmark was inadvertently omitted from the die used to strike these proofs. Population: 65 in 68 Cameo, 11 finer (1/14). NGC ID# 22YN, PCGS# 84204

**MERCURY DIMES**

**4497 1916 MS67 Full Bands PCGS.** A stone-white Superb Gem whose potent luster and good strike further testify to the exceptional quality. A loupe reveals only incidental imperfections. NGC ID# 23GX, PCGS# 4905

**4498 1916 MS67 Full Bands NGC.** This sharply detailed Superb Gem exhibits Full Bands definition on the fasces and the well-preserved surfaces display vibrant mint luster under shades of ice-blue and greenish-gold toning. NGC has graded 14 numerically finer examples (1/14). NGC ID# 23GX, PCGS# 4905

**4499 1916 MS67 Full Bands PCGS.** Highly lustrous surfaces are visited by speckles of green, gold, and lavender toning, and are devoid of mentionable marks. Exquisitely struck throughout. PCGS has graded nine numerically finer examples (1/14). NGC ID# 23GX, PCGS# 4905

**4500 1916 MS67+ Full Bands PCGS.** Largely frosty silver with ample reddish-orange on and to the left of Liberty's portrait. Elusive any finer with just nine coins graded MS68 Full Bands or better by PCGS (1/14). NGC ID# 23GX, PCGS# 4905

**1916 Mercury Dime, MS67+ Full Bands  
Only Nine Finer at PCGS**

**4501 1916 MS67+ Full Bands PCGS. CAC.** This amazing first-year Mercury dime features a bold strike with brilliant silver luster, all beneath lovely reddish-gold and iridescent toning. An extraordinary piece that is rarely encountered so fine, with only nine finer examples certified by PCGS (1/14). NGC ID# 23GX, PCGS# 4905

**4502 1916-D Fine 12 PCGS.** The sticks in the fasces are well-defined on this Fine 12 representative, but the bands are worn nearly flat. The pleasing lavender-gray surfaces show no large or distracting abrasions. NGC ID# 23GY, PCGS# 4906

**1916-D Mercury Dime, VF25  
The Series Key**

**4503 1916-D VF25 PCGS Secure.** Both sides of this mid-grade specimen exhibit pewter-gray and subdued brown toning on microscopically granular, matte-like surfaces. The 1916-D is widely recognized as the key to the Mercury dime series, and appears on more collector want lists than any other issue. NGC ID# 23GY, PCGS# 4906

**4504 1918-D MS67 NGC.** Vivid shades of greenish-gold patina blanket the lustrous surfaces of this well-preserved Superb Gem, with sharply detailed design elements and outstanding eye appeal. Census: 4 in 67, 0 finer (1/14). NGC ID# 23H6, PCGS# 4918

**1919-D Mercury Dime, MS66  
Among the Finest Certified at PCGS**

**4505 1919-D MS66 PCGS.** This impressive Premium Gem exhibits just a touch of softness on the middle band of the fasces that prevents a Full Bands designation, but the coin is well-detailed in other areas. Vivid shades of lime-green and lavender toning blanket the well-preserved lustrous surfaces. Population: 5 in 66, 0 finer (1/14). NGC ID# 23H9, PCGS# 4924

**4506 1919-S MS66 PCGS. CAC.** Few survivors of this issue have reached the Premium Gem level, and the 1919-S is seldom found with full bands. This MS66 example has a full strike except for some central weakness on the reverse. A few hints of gold and lilac appear on the lustrous surfaces, which are abrasion-free and attractive. Population: 16 in 66 (1 in 66+), 2 finer (1/14). NGC ID# 23HA, PCGS# 4926

**4507 1920-S MS64 Full Bands PCGS.** Broadly silver surfaces show areas of peach, blue, and violet in the left obverse field, those colors finding faint echoes at the peripheral reverse. Intricately detailed all-around and gorgeous. NGC ID# 23HD, PCGS# 4933

**4508 1921 AU55 PCGS.** The low mintage 1921 is a semikey in all grades. The satiny and unmarked surfaces exhibit gunmetal-gray toning that is deepest on the devices.  
*Ex: Orlando FUN Signature (Heritage, 1/2009), lot 8063, which realized \$1,265. NGC ID# 23HE, PCGS# 4934*

**4509 1921 AU55 PCGS. CAC.** The 1921 Mercury dime is seldom encountered in high grade. This Choice AU specimen retains most of its original design detail, with slightly subdued mint luster and no large or distracting abrasions. Population: 33 in 55, 40 finer (1/14). NGC ID# 23HE, PCGS# 4934

**4510 1921 AU58 ANACS.** This semi-key dime has untuned centers and rich peripheral golden-brown and navy-blue patina. Mint luster is essentially complete, and marks are few and of little consequence. NGC ID# 23HE, PCGS# 4934

**4511 1921 — Questionable Color — PCGS Genuine. Unc. Details.** The PCGS number ending in .91 suggests Questionable Color as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an Uncirculated specimen that is perhaps artificially toned. This low-mintage semikey dime is sharply struck, and some luster remains beneath the toning. A small, dark spot exists near Liberty's chin. NGC ID# 23HE, PCGS# 4934

**4512 1921-D AU50 PCGS.** Lightly toned and briefly circulated with attractive surfaces and a nice strike. The 1921-D has one of the lowest mintages of the series, since the Denver Mint was obligated with large-scale silver dollar production. Encased in a green label holder.  
*Ex: Long Beach Signature (Heritage, 2/2010), lot 375, which realized \$1,092.50. NGC ID# 23HE, PCGS# 4936*

**4513 1921-D AU58 PCGS.** The 1921-D is a low-mintage issue, seldom encountered in high grade. This attractive near-Mint specimen shows only a trace of wear on the design elements and slightly subdued mint luster under delicate pink patina. NGC ID# 23HF, PCGS# 4936

**4514 1921-D MS63 Full Bands NGC.** The 1921-D Mercury dime boasts a low mintage of just over 1 million pieces. The present Select Mint State example displays an exemplary strike throughout all design elements. NGC ID# 23HE, PCGS# 4937

**1921-D Mercury Dime, MS64 Full Bands  
Small Reported Mintage**

**4515 1921-D MS64 Full Bands PCGS.** A sharply detailed Choice Mercury dime, with Full Bands definition on the fasces, this coin exhibits vibrant mint luster and well-preserved surfaces that show accents of pale gold toning. From a small mintage of just more than 1 million pieces. PCGS has graded 78 numerically finer examples (1/14). NGC ID# 23HF, PCGS# 4937

**4516 1929-S MS66 Full Bands PCGS.** Frosty silver overall with a few windows of brilliance in the protected areas next to the portrait's face area. Occasional hints of blue add color to the fields. NGC ID# 23J4, PCGS# 4977

**4517 1931-S MS67 PCGS. CAC. Ex: Newman.** This impressive Superb Gem exhibits delicate shades of pink patina and vibrant mint luster on well-preserved surfaces that show few signs of contact. Population: 7 in 67, 1 finer (1/14). NGC ID# 23J9, PCGS# 4986

**1931-S Mercury Dime, MS65  
Brilliant-White and Full Bands**

**4518 1931-S MS65 Full Bands PCGS. CAC.** Full Bands examples of this San Francisco issue are rare and highly valued by collectors. A small mintage of 1.8 million pieces is the second-lowest total for any San Francisco issue in the series, behind only the 1926-S dime. As a group, the S-Mint dimes from the 1920s and early 1930s are all difficult to find with Full Bands. This 1931-S dime is a brilliant and untoned example with excellent satiny luster. A tiny luster graze on Liberty's cheek is the only mark of any kind, and it is of little consequence. Population: 55 in 65 Full Bands, 49 finer (1/14). NGC ID# 23J9, PCGS# 4987

**4519 1934-D MS67 Full Bands PCGS.** Lightly toned yellow with the color largely at the borders. This slightly satiny Superb Gem has bright eye appeal and a razor-sharp strike. Population: 46 in 67 (4 in 67+) Full Bands, 0 finer (1/14). NGC ID# 23JB, PCGS# 4991

**4520 1936 MS68 Full Bands PCGS.** Sharply struck and modestly toned golden-tan at the borders of textured silver surfaces. Excellent visual appeal. Population: 16 in 68 Full Bands, 0 finer (1/14). NGC ID# 23JF, PCGS# 4999

**4521 1937-S MS67 Full Bands PCGS.** Only one numerically finer submission has been examined at PCGS. This piece has bright mint frost with bold design features and hints of iridescence. A stunning Superb Gem with full band detail on the reverse. Population: 93 in 67 (4 in 67+) Full Bands, 1 finer (1/14). NGC ID# 23JL, PCGS# 5009

**4522 1939 MS67+ Full Bands PCGS.** Golden-tinged rims yield to pale pearl and pink accents on the silver interiors. A crisply struck and beautiful later-date Mercury dime. NGC ID# 23JR, PCGS# 5017

**1941 Dime, MS68 Full Bands  
Prior Generation Holder**

**4523 1941 MS68 Full Bands NGC. CAC.** This lot was the first 1941 dime certified as MS68 Full Bands by NGC, since it was described as such in its 2002 auction appearance. Housed in a prior generation holder. Gorgeous apple-green, ruby-red, and peach-gold patina. A sharply struck and lustrous Superb Gem with pristine surfaces. Census: 5 in 68 Full Bands, none finer (1/14).  
*Ex: Long Beach Signature (Heritage, 9/2002), lot 6410, which realized \$2,300. NGC ID# 23JX, PCGS# 5029*

**4524 1942/1 AU58 NGC. FS-101.** Cartwheel luster is evident on this lightly abraded stone-gray key date dime. The central bands show slight merging. A desirable 'naked eye' hubbed overdate.  
*Ex: Charlotte ANA Signature (Heritage, 3/2003), lot 5638. NGC ID# 23K4, PCGS# 5036*

**4525 1942/1 AU55 Full Bands PCGS. FS-101.** A brilliant and partially lustrous example of the scarce and obvious Philadelphia wartime overdate. Inconspicuous coin counter marks are noted near 9 o'clock on the obverse and 4 o'clock on the reverse. NGC ID# 23K4, PCGS# 5037

**4526 1942/1-D AU58 NGC. FS-101.** The silver-gray surfaces of this near-Mint example retain considerable luster and exhibit well defined design features. The middle bands, while not full, display a good amount of separation. An untuned slider of this widely pursued overdate. Census: 51 in 58, 11 finer (1/14).  
*Ex: Long Beach Signature (Heritage, 9/2008), lot 1775, which realized \$1,725. NGC ID# 23K6, PCGS# 5040*

**4527 1942/1-D AU58 PCGS. FS-101.** While the 1942/1-D overdate is less obvious as its Philadelphia counterpart, this lustrous example nonetheless circulated only momentarily. Toned tan-brown and gunmetal-blue. The bands are just shy of full.  
*Ex: Orlando FUN Signature (Heritage, 1/2012), lot 5667, which realized \$2,070. NGC ID# 23K6, PCGS# 5040*

**4528 1942/1-D AU58 Full Bands NGC. FS-101.** The 1942/1-D is a hubbed overdate and also a doubled die, evident on IN GOD WE TRUST. This lustrous and well struck piece is just a whisper away from Mint State, with gold, russet, and iridescent accents scattered about each side. NGC ID# 23K6, PCGS# 5041

**4529 1942-D MS68 Full Bands PCGS.** Silver and reddish-orange overall with more of the former color on the brightly lustrous obverse and more of the latter on the reverse. A sharp line separates the reverse bands. Population: 27 in 68 Full Bands, 0 finer (1/14). NGC ID# 23K5, PCGS# 5039

**4530 1942-D MS68 Full Bands PCGS.** This magnificent Mercury dime exhibits sharply detailed design elements, with Full Bands definition and vibrant mint luster throughout. The flawless surfaces show vivid shades of lime-green and violet toning. Population: 27 in 68 Full Bands, 0 finer (1/14). NGC ID# 23K5, PCGS# 5039

**4531 1944-D MS68 Full Bands PCGS.** Smooth silver surfaces have glowing luster and only the faintest mellowing of patina. A deep and clear line separates the bands on the fascies. Population: 85 in 68 (1 in 68+) Full Bands, 0 finer (1/14). NGC ID# 23KC, PCGS# 5053

**4532 1944-D MS68 Full Bands PCGS.** A stone-white and immaculate wartime dime. Intricately struck aside from slight incompleteness on the left obverse margin. Population: 85 in 68 (1 in 68+) Full Bands, 0 finer (1/14). NGC ID# 23KC, PCGS# 5053

**4533 1944-S MS67+ Full Bands PCGS. CAC.** Large S. Dappled fire-red and jade-green invigorate the borders of this pristine Superb Gem. The central strike is bold and the lustrous surfaces exude remarkable eye appeal. NGC ID# 23KD, PCGS# 5055

**PROOF MERCURY DIMES**

**4534 1936 PR66 NGC.** A first-year Premium Gem proof with a broad silver gleam and touches of gold at the margins. Only 4,130 of the pieces were struck and anything finer is scarce. NGC ID# 27DG, PCGS# 5071

**4535 1936 PR66 NGC. CAC.** Toned light silver-gray with peripheral tan-gold and a blush of ocean-blue near E PLURIBUS UNUM. A needle-sharp example of the first and scarcest proof Mercury date. The satiny surfaces appear pristine. Housed in a former generation holder.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 27DG, PCGS# 5071*

- 4536 1936 PR66 PCGS. CAC.** This stone-white and needle-sharp Premium Gem appears as pristine as if it were just removed from the dies with a gloved hand. The low mintage key to the brief seven-year proof run. NGC ID# 27DG, PCGS# 5071

**1938 Dime, PR68 ★  
Among Finest Certified**

- 4537 1938 PR68 ★ NGC.** An intricately struck specimen with dazzling mirrors and eye appeal in spades. Both sides are minimally toned, though a suggestion of silver-gray or golden-tan appears occasionally at the rims. Exquisite preservation completes the eye appeal. Census: 43 in 68 (4 in 68 ★), 1 finer (1/14).  
*Ex: Dallas Signature (Heritage, 10/2009), lot 461, which realized \$3,450. NGC ID# 27DJ, PCGS# 5073*

- 4538 1940 PR68 NGC.** A beautifully toned specimen with orange-gold, cherry-red, and aquamarine obverse patina. The reverse toning is also attractive, and features caramel-gold and sky-blue shades. NGC ID# 27DL, PCGS# 5075

- 4539 1940 PR68 ★ NGC.** A beautiful PR68 specimen with impressive eye appeal created by a combination of brilliant silver centers and splashes of peripheral peach-gold and fire-red patina. Census: 4 in 68 ★, 2 finer as 69 without a Star designation (1/14).  
*Ex: Houston Signature (Heritage, 12/2008), lot 1201; Long Beach Signature (Heritage, 9/2010), lot 3875, which realized \$2,645. NGC ID# 27DL, PCGS# 5075*

- 4540 1942 PR68 PCGS.** This magnificent proof is among the finest certified at PCGS, with fully struck design elements and deeply mirrored brilliant fields. Population: 50 in 68 (2 in 68+), 0 finer (1/14). NGC ID# 27DN, PCGS# 5077

- 4541 1942 PR68 NGC.** A profoundly mirrored piece with a touch of frost on the exquisitely detailed portrait. Minimally toned interiors with an arc of yellow-orange and crimson at right obverse and diffuse golden color at the peripheral reverse. NGC has graded one numerically finer example (1/14). NGC ID# 27DN, PCGS# 5077

- 4542 1942 PR68 PCGS.** Light gold and silver-blue shadings are thinnest at the centers and grow in opacity near the rims. Sharply struck with impressive mirrors that hold up to even the most intense scrutiny. This final-year 1942 proof Mercury dime is among the finest specimens certified by PCGS. Population: 50 in 68 (2 in 68+), 0 finer (1/14). NGC ID# 27DN, PCGS# 5077

- 4543 1942 PR68 NGC. CAC.** The remarkable ruby-red, apple-green, and cobalt-blue peripheral toning is particularly attractive on the obverse. The fully struck centers display only delicate silver-gray shades. NGC ID# 27DN, PCGS# 5077

## ROOSEVELT DIMES

- 4544 1946 MS67+ Full Bands PCGS.** The russet-brown and aquamarine toning is especially generous on the obverse, though a majority of both sides are white. A pristine, lustrous, and sharply struck first-year Roosevelt dime. Population: 44 in 67 (4 in 67+) Full Bands, 1 finer (1/14). NGC ID# 23KJ, PCGS# 85082

**1946-S Roosevelt Dime, MS68  
Full Bands, Tied for Finest Certified**

- 4545 1946-S MS68 Full Bands PCGS.** Remarkable for its full strike and for the unmatched beauty of its toning, this lustrous Roosevelt dime is exceptional. It displays an impressive Full Torch, and the details on the portrait are fully struck and well-preserved. The toning is fabulous. Areas of aqua, orange, violet, azure and gold float on highly lustrous silver surfaces. A Superb Gem in every regard, this is a strong Registry Set candidate and a stunning example of this first-year San Francisco issue. Population: 7 in 68 Full Bands, 0 finer (1/14). NGC ID# 23KL, PCGS# 85084

- 4546 1949 MS67 Full Bands PCGS.** Frosty silver overall with hints of gold and blue visiting the reverse. This Superb Gem has clear separation between the bands on both the upper and lower pairs. Population: 13 in 67 (1 in 67+) Full Bands, 1 finer (1/14). NGC ID# 23KU, PCGS# 85091

- 4547 1951 MS67+ Full Bands PCGS.** Colorful margins, gold-orange and violet, yield to silver centers with a wonderfully frosty character. Solidly struck and carefully preserved. Population: 36 in 67 (2 in 67+) Full Bands, 0 finer (1/14). NGC ID# 23L2, PCGS# 85097

- 4548 1951-S MS68 PCGS.** Magnificent multicolored patina with gold-orange, blue, violet, and peach hues across each side. Frosty surfaces are magnificently preserved beneath the toning. Population: 7 in 68, 0 finer (1/14). NGC ID# 23L4, PCGS# 5099

- 4549 1957-D MS67+ Full Bands PCGS.** The bold green-gold, rose, amber, and violet patina draping the obverse appears only at the rims of the medium-gray reverse. Crisply struck and carefully preserved. Population: 20 in 67 (2 in 67+) Full Bands, 0 finer (1/14). NGC ID# 23LL, PCGS# 85115

- 4550 1960-D MS67+ Full Bands PCGS.** The obverse is pale gold and peach at the margins with a fade to deep green, blue, and violet on the centers. The reverse is pale silver and sharply struck. Population: 15 in 67 (2 in 67+) Full Bands, 0 finer (1/14). NGC ID# 23LT, PCGS# 85121

- 4551 1961 MS67 Full Bands PCGS.** Frosty silver surfaces show the faintest hint of blue. An attractive Superb Gem with clearly separated bands on the reverse torch. Population: 6 in 67 (1 in 67+) Full Bands, 0 finer (1/14). NGC ID# 23LU, PCGS# 85122

- 4552 1963-D MS67 Full Bands PCGS.** Pale silver with just a hint of gold near the rims. Better-defined than usually seen with smooth eye appeal. Population: 11 in 67 Full Bands, 0 finer (1/14). NGC ID# 23LZ, PCGS# 85127

---

**1963-D Dime, MS67 Full Bands  
All-Brilliant Surfaces**

- 4553** 1963-D MS67 Full Bands PCGS. Curiously scarce for a coin with such a high mintage, the 1963-D is not only a condition rarity but a strike rarity as well. Only 10 other Full Bands pieces have been so graded by PCGS and none are finer at either service (1/14). This is a brightly lustrous, all-brilliant example. NGC ID# 23LZ, PCGS# 85127

---

**PROOF ROOSEVELT DIME**

- 4554** 1983 No S PR69 Ultra Cameo NGC. This profoundly contrasted proof is one tick away from technical perfection, with fully struck frosty design elements and pristine deeply mirrored fields. The S mintmark was inadvertently omitted when the die was prepared. Census: 84 in 69 Ultra Cameo, 2 finer (1/14). NGC ID# 27FJ, PCGS# 95265

---

**STANDING LIBERTY QUARTERS**

- 4555** 1917 Type One MS65 Full Head NGC. Sharply struck with lovely luster and delightful patina, a wonderful Gem example of this popular type issue. Both sides exhibit gold, amber, and orange toning with hints of rose and blue. NGC ID# 242Z, PCGS# 5707
- 4556** 1917 Type One MS65 Full Head PCGS. Gold-orange peripheral color is light and pleasing with a fade to silver on the interiors. Well-defined and undeniably appealing, a great type coin. NGC ID# 242Z, PCGS# 5707
- 4557** 1917 Type One MS65 Full Head PCGS. Dazzling luster radiates from well preserved surfaces that yield soft champagne-gold color. Sharply struck design elements culminate in a full head on Liberty. A highly attractive Gem. NGC ID# 242Z, PCGS# 5707
- 4558** 1917 Type One MS65 Full Head PCGS. Frosty silver with only a hint of golden overtone. This Gem has crisp detail on head and shield and generous all-around visual appeal. NGC ID# 242Z, PCGS# 5707
- 4559** 1917 Type One MS65 Full Head PCGS. CAC. From pale silver and champagne to richer gold and peach, this Full Head Gem has generous toning over swirling luster and excellent design definition. A great Type One type coin. NGC ID# 242Z, PCGS# 5707
- 4560** 1917 Type One MS65 Full Head PCGS. CAC. A sharply detailed Gem representative of this popular two-year design type with Full Head definition and vibrant mint luster under golden-brown and ice-blue patina. NGC ID# 242Z, PCGS# 5707
- 4561** 1917 Type One MS66+ Full Head PCGS. An excellent Type One type coin with Full Head details and prominent luster. Gold-to-orange patina sticks to the margins on the obverse but has greater coverage on the reverse. NGC ID# 242Z, PCGS# 5707

- 4562** 1917 Type One MS66 Full Head PCGS. CAC. Extremely well-defined and attractive, this Type One Standing Liberty quarter is lightly toned in champagne-gold with lilac highlights. Wonderfully smooth surfaces radiate strong mint luster. The strike is bold on the head, shield, and eagle. All of the shield rivets are fully brought up. With an 8.7 million-piece mintage, the 1917 Type One is the most affordable way to represent the two-year type. This Premium Gem is a standout for any advanced collection. NGC ID# 242Z, PCGS# 5707

- 4563** 1917 Type One MS66 Full Head PCGS. CAC. Type collectors will want to take note of this gleaming Premium Gem example, not only for the attractive, lustrous eye appeal, but also for the full strike. Liberty is sharp from head to toe; in fact, the head and shield are extra bold. The reverse strike is full as well, with the eagle full-feathered. The fields and devices are without contact marks or other distractions, and the coin has a hint of clear gold over silver surfaces. NGC ID# 242Z, PCGS# 5707

---

**1917 Type One Quarter, MS66+ Full Head  
Splendid Luster and Sharp Strike**

- 4564** 1917 Type One MS66+ Full Head PCGS. CAC. Not only does the head display a strong degree of detail, all of the shield rivets are present and well-defined as well. A few tiny, scattered yellow-gold splashes of toning appear on the obverse. This is a pleasing high-end Premium Gem representative of this always-collectable Type One issue. NGC ID# 242Z, PCGS# 5707
- 4565** 1917-D Type One MS65 Full Head PCGS. A razor-sharp, lustrous, and splendidly preserved Gem. Close to brilliant, though a trace of tan toning is evident. A desirable Denver example of the briefly issued design subtype. NGC ID# 2432, PCGS# 5709
- 4566** 1917-D Type One MS66 Full Head PCGS. Faintly tinged gold-to-peach near the borders with silver interiors. The detail on Liberty's head is crisp, as often seen, but the preservation is uncommon. NGC ID# 2432, PCGS# 5709
- 4567** 1917-S Type One MS65 Full Head PCGS. An attractive Gem representative of the short-lived Type One design, with sharply detailed design elements and Full Head definition. The lustrous surfaces show highlights of pink, gold, and amber patina. NGC ID# 2433, PCGS# 5711

---

**1917-S Standing Liberty Quarter, MS65 Full Head  
Popular Type One Representative**

- 4568** 1917-S Type One MS65 Full Head NGC. CAC. Modest flatness to the hair and some weakness to the date, both normal for even the better struck Full Head examples of this date. Strong details to the feathers. Lustrous and silver colored, with some light gray overtones. Census: 92 in 65 (1 in 65+ Full Head, 1 in 65 ★), 90 finer (1/14). NGC ID# 2433, PCGS# 5711
- 4569** 1917 Type Two MS65 Full Head PCGS. Nearly 14 million business strikes of the Type Two Standing Liberty design were issued in 1917. Not many were fully struck and many were weak at the centers. This Gem example shows a complete set of shield rivets and a strong center emblem on the shield. Liberty has a full head, with an above-average strike on the gown and forward leg. The eagle is fully feathered. Ice-blue and lilac toning are enhanced by golden accents. A few toning flecks are seen under a glass, but mint luster is vivid and pervasive on this splendid example of the type. NGC ID# 2434, PCGS# 5715

- 4570 1917-S Type Two MS64 Full Head PCGS. CAC.** This lovely Full Head Type Two example from the San Francisco Mint has light gold toning over frosty silver surfaces, and that toning is slightly deeper on the reverse. PCGS has only certified 74 finer examples (1/14). NGC ID# 2436, PCGS# 5719

**1917-S Standing Liberty Quarter, MS65  
Type Two, Full Head Example**

- 4571 1917-S Type Two MS65 Full Head NGC.** Always popular with mintmark type collectors, the 1917-S Standing Liberty quarter represents the first year of the Type Two design. This attractive Gem offers well-detailed design elements, with Full Head definition, and lustrous well-preserved surfaces that show hints of sea-green toning. Census: 24 in 65 Full Head, 17 finer (1/14). NGC ID# 2436, PCGS# 5719

- 4572 1918-S MS63 ★ Full Head NGC.** Crisply struck on Liberty's head, if not her shield, and colorful with gold and blue overtones that are stronger on the obverse. Lightly abraded but amply lustrous. NGC ID# 2439, PCGS# 5725

**1920 Standing Liberty Quarter, MS66+  
Spectacular Peripheral Toning**

- 4573 1920 MS66+ PCGS.** This high-end Premium Gem possesses exquisite eye appeal to complement its high technical grade. The silver centers are ringed by vivid shades of burnt-orange, greenish-gold, and magenta toning, with vibrant mint luster underneath, and the design elements are sharply detailed in most areas. Population: 57 in 66 (4 in 66+), 6 finer (1/14). NGC ID# 243E, PCGS# 5734

**1920-D Quarter, MS66  
Thick Mint Luster, Lightly Toned**

- 4574 1920-D MS66 PCGS.** Not generally recognized as a series-rarity, the 1920-D is surprisingly scarce in high grades and with a strong strike. The details on Liberty's head are approximately half-complete with the three sprigs showing fully. Otherwise, the coin glows with strong mint luster, and there are no observable abrasions over the pale golden-toned surfaces. Population: 27 in 66, 2 finer (1/14). NGC ID# 243F, PCGS# 5736

- 4575 1921 MS63 PCGS. CAC.** This Select Standing Liberty quarter features sharply detailed design elements and vibrant mint luster, with hints of russet, gray, and amber toning. Only minor contact marks are evident. NGC ID# 243H, PCGS# 5740

**1924 Standing Liberty Quarter, MS67  
Extraordinary Mint Luster**

- 4576 1924 MS67 PCGS. CAC.** For a series that is known for above-average mint luster, it takes quite a coin to call attention to how extraordinary the luster is. That is this coin. Each side has a thin layer of even golden patina, and the mint frost shines forcefully through. As expected from an MS67, there are no observable marks present. Population: 12 in 67 (1 in 67+), 2 finer (1/14). NGC ID# 243L, PCGS# 5746

**1924 Standing Liberty Quarter, MS67  
A Remarkable, Gorgeous Example**

- 4577 1924 MS67 PCGS. CAC.** This remarkable Superb Gem quarter appears to be flawlessly preserved, and even close inspection with a loupe fails to reveal the smallest mark or blemish. The design motifs are well-impressed, if not full on a few of the elements. Intense, shimmering mint luster further elevates the eye appeal of this conditionally rare example. Population: 12 in 67 (1 in 67+), 2 finer (1/14). NGC ID# 243L, PCGS# 5746

- 4578 1924 MS65 Full Head PCGS.** This impressive Gem exhibits sharply detailed design elements with Full Head definition and just a touch of softness on the shield rivets. The lustrous untuned surfaces show no mentionable defects. Population: 73 in 65 Full Head, 51 finer (1/14). NGC ID# 243L, PCGS# 5747

**1924-S Quarter, MS66  
A 'Just Miss' Full Head Example**

- 4579 1924-S MS66 PCGS.** Oh so close to Full Head status, this piece would make a fine addition to a sharply struck, but not technically fully struck set of Standing Liberty quarters. Bright mint luster is seen over each side, and most of the obverse and reverse is brilliant except for the occasional dab of color. Population: 32 in 66, 2 finer (1/14). NGC ID# 243N, PCGS# 5750

**4580 1924-S MS62 Full Head PCGS.** The strike is uncommonly sharp for a Type Two quarter. The head and all rivets are crisp. A lustrous example with dappled tan-brown and stone-gray surfaces. A pair of thin marks noted near the B in LIBERTY. Encapsulated in an old green label holder. NGC ID# 243N, PCGS# 5751

**4581 1926 MS66 PCGS.** A thin film of golden-tan patination, slightly deeper on the reverse, resides on highly lustrous surfaces. Generally well struck. A few minor marks are noted on Liberty's torso. Population: 35 in 66, 2 finer (1/14). NGC ID# 243R, PCGS# 5754

#### 1926-S Standing Liberty Quarter, MS65 Elusive Issue in High Grade

**4582 1926-S MS65 PCGS. CAC.** From a mintage of 2.7 million pieces, the 1926-S Standing Liberty quarter is a challenging issue in high grade. This delightful Gem features well-detailed design elements, with just a touch of flatness on the head and a few missing shield rivets. The mostly brilliant surfaces show a few hints of pale gold toning. Population: 66 in 65 (1 in 65+), 18 finer (1/14). NGC ID# 243T, PCGS# 5758

**4583 1927-D MS65 Full Head PCGS. CAC.** With fewer than a million examples struck, the 1927-D quarter is popular, particularly in Gem Full Head condition. This piece has bright and pale luster with hints of sky-blue and gold in the patina. Population: 81 in 65 (3 in 65+) Full Head, 14 finer (1/14). NGC ID# 243V, PCGS# 5763

**4584 1928-S MS66+ Full Head PCGS.** Large S. A pristine and lustrous representative with rich peach-gold, plum-red, and jade-green toning. Both the head and date are fully struck. The waist and nearby shield rivet trio show inexactness of impression. NGC ID# 243Z, PCGS# 5771

#### 1929-S Quarter, MS66+ Full Head Bright, Frosted Surfaces

**4585 1929-S MS66+ Full Head PCGS. CAC.** Thick frosted mint luster and boldly brilliant surfaces provide this high-end Premium Gem Full Head example with tremendous eye appeal. The coin exhibits minor incompleteness of strike at a few of the shield rivets. A tiny hint of haze appears near the I in LIBERTY when the coin is examined closely and rotated. NGC ID# 2444, PCGS# 5777

**4586 1930 MS66 Full Head PCGS.** A final-year issue and desirable as a type coin for that reason. This Premium Gem example is brilliant with vibrant cartwheel luster. The smooth silver surfaces are nearly free of abrasions and the strike is full except for the usual weakness on two shield rivets near Liberty's waist. The slightest hint of clear-gold toning covers the surfaces. NGC ID# 2445, PCGS# 5779

**4587 1930 MS66+ Full Head PCGS. CAC.** This final-year silver type coin is virtually void of marks and displays vibrant cartwheel sheen. The strike is full except on the two rivets near the waist. Lightly toned olive-green toning aside from a few blushes of deep russet on the reverse. NGC ID# 2445, PCGS# 5779

### WASHINGTON QUARTERS

**4588 1932 MS66+ PCGS. CAC.** The palest blushes of jade and ice-blue appear on surfaces that still present as largely silver on this first-year Washington quarter. It is perhaps only the small luster graze in the right obverse field, away from the devices, that keeps this piece from the vaunted 67 grade. Population: 12 in 66+, 3 finer (1/14). NGC ID# 2447, PCGS# 5790

**4589 1932 MS66+ PCGS. CAC.** This high-end Premium Gem represents the first year of the Washington design, with sharply detailed design elements and vibrant mint luster. PCGS has graded only three numerically finer examples (1/14). NGC ID# 2447, PCGS# 5790

**4590 1932-D MS62 NGC.** A sharply detailed MS62 specimen of the key date in the Washington quarter series, this coin displays vibrant mint luster and lightly marked surfaces with speckled greenish-gold toning. NGC ID# 2448, PCGS# 5791

**4591 1932-D MS62 NGC.** The 1932-D Washington quarter boasts a low mintage of 436,800 pieces. This attractive MS62 specimen is sharply detailed and lustrous, with lightly toned surfaces that show only minor signs of contact. NGC ID# 2448, PCGS# 5791

**1932-D Quarter, MS64+  
Important Key Issue**

**4592 1932-D MS64+ PCGS. CAC.** The Denver Mint version of the initial Washington quarter issue is a key to the set, from a mintage of 436,800 coins. Only the 1932-S had a lower mintage, and those are the only two issues with sub-million coin production levels. This near-Gem example has satin mint luster with delicate gold toning over brilliant silver surfaces. NGC ID# 2448, PCGS# 5791

**4593 1932-S MS64 PCGS.** This sharply detailed key date displays hints of gray and cerulean-blue toning on the obverse, with pale gold and lavender hues on the reverse. Only minor signs of contact are evident. NGC ID# 2449, PCGS# 5792

**4594 1932-S MS64 PCGS. CAC.** Pale silver surfaces have the faintest shimmering hint of blue. Generally well-defined and attractively lustrous, a lovely first-year key-date Washington quarter. NGC ID# 2449, PCGS# 5792

**4595 1934 Light Motto MS66+ PCGS. CAC. FS-401.** Only a small minority of 1934 quarters are the Light Motto variety, which exhibits a blurry IN GOD WE TRUST. The present lustrous high grade representative displays light peripheral powder-blue, sun-gold, and rose-red toning. NGC ID# 244A, PCGS# 5794

**4596 1934 Doubled Die Obverse MS62 PCGS. FS-101.** Among the strongest doubled die varieties of the entire Washington series. LIBERTY and the date have notched, thick letters. However, the Motto is the pick-up point, as it is broadly doubled counter-clockwise. Sharply struck and unmarked with good luster and dappled golden-gray toning. PCGS# 5795

**1934-D Medium Motto Quarter, MS66+  
Conditionally Scarce**

**4597 1934-D Medium Motto MS66+ PCGS. CAC.** The beautifully clean silver-white surfaces of this remarkable MS66+ coin are radiantly lustrous and the devices reveal crisp definition. From a relatively puny mintage of just over 3.5 million coins for the type, this Denver Mint issue is scarce at the Premium Gem grade level and rare any finer. Population: 89 in 66 (6 in 66+), 6 finer (1/14). NGC ID# 244C, PCGS# 5796

**4598 1935-S MS67 PCGS. CAC.** A dusky patina with shades of gold, lemon-lime, tan, plum, bright green, and red appears on the obverse of this Superb Gem. The more brilliant reverse reveals subtle hints of gold color. A wispy horizontal die crack is present near the top of Washington's head. Population: 26 in 67, 0 finer (1/14). NGC ID# 244F, PCGS# 5799

**4599 1936 MS67+ PCGS. CAC.** This high-end Superb Gem representative displays sharply detailed design elements and well-preserved brilliant surfaces with vibrant mint luster. Population: 72 in 67 (5 in 67+), 0 finer (1/14). NGC ID# 244G, PCGS# 5800

**1937 Quarter, MS67+  
Tied for Finest Certified**

**4600 1937 MS67+ PCGS. CAC.** Still less than 80 years old, this 1937 Washington quarter is an amazing Superb Gem that is tied for the finest certified at PCGS or NGC. Both sides are brilliant with white-silver luster and frosty surfaces. This pristine example is destined for a top Washington quarter Registry Set. Population: 64 in 67 (5 in 67+), 0 finer (1/14). NGC ID# 244K, PCGS# 5803

**4601 1937-D MS67 PCGS.** This magnificent Superb Gem exhibits sharply detailed design elements and vibrant mint luster, with well-preserved untuned surfaces and outstanding eye appeal. Population: 46 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 244L, PCGS# 5804

**4602 1937-D MS67 PCGS.** The 1937-D quarter is an important condition rarity, and this Superb Gem is tied for the finest that PCGS or NGC have certified. Both sides are pristine with brilliant and frosty silver luster. Population: 46 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 244L, PCGS# 5804

**4603 1937-D MS67 PCGS. CAC.** The 1937-D Washington quarter is conditionally rare at the MS67 level. This well-detailed Superb Gem displays vibrant mint luster and a few hints of green and violet toning. Population: 46 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 244L, PCGS# 5804

**1937-S Washington Quarter, MS67  
Low Mintage, None Numerically Finer**

**4604 1937-S MS67 PCGS.** A dusting of golden-almond toning — most evident surrounding the date — covers the obverse of this fully struck, virtually unmarked Superb Gem quarter. The coin is softly lustrous, with only a whisper of gold toning on the reverse. The 1937-S has the third-lowest mintage of the series, with neither PCGS nor NGC seeing a numerically finer example, although PCGS has graded two pieces MS67+ (1/14). NGC ID# 244M, PCGS# 5805

**4605 1938 MS67 PCGS.** Wisps of soft bluish color makes occasional visits to the margins of this well struck Superb Gem. Both sides have been nicely cared for. Population: 48 in 67 (3 in 67+), 0 finer (1/14). NGC ID# 244N, PCGS# 5806

**4606 1939-S MS67 PCGS.** Virtually untuned with bright and slightly satiny luster. As usually seen, Washington's wig and the eagle's breast and tail feathers are softly defined, though the coin's near-immaculate surfaces dispel any viewer's perception of actual wear. Population: 53 in 67, 0 finer (1/14). NGC ID# 244T, PCGS# 5810

- 4607 1939-S MS67 PCGS.** Tiny splashes of russet, golden-tan, orange, yellow, and green toning appear on both sides of this Superb Gem example, primarily at the outer edges. Richly lustrous and appealing. Population: 53 in 67, 0 finer (1/14). NGC ID# 244T, PCGS# 5810
- 4608 1939-S MS67 PCGS Secure. CAC.** This magnificent Superb Gem exhibits well-detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show hints of pale gold toning. Population: 53 in 67, 0 finer (1/14). NGC ID# 244T, PCGS# 5810
- 4609 1940-D MS67 PCGS.** This Superb Gem Washington quarter offers pinpoint definition on all design elements and the virtually pristine surfaces are untuned and brightly lustrous. Population: 35 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 244V, PCGS# 5812

**1940-D Quarter, MS67+  
Fifth Lowest Mintage**

- 4610 1940-D MS67+ PCGS. CAC.** The 1940-D is an important condition rarity in the Washington quarter series, and this example is an impressive Superb Gem. The 1940-D had the fifth lowest mintage of any Washington quarter. The present Superb Gem has lovely powder-blue and pale gold toning over frosty silver luster with pristine surfaces. Population: 35 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 244V, PCGS# 5812
- 4611 1941-D MS67 PCGS.** This impressive Superb Gem Washington quarter exhibits sharply detailed design elements and frosty mint luster, under attractive shades of golden-brown and lavender toning. Population: 35 in 67 (8 in 67+), 1 finer (1/14). NGC ID# 244Y, PCGS# 5815
- 4612 1941-D MS67+ PCGS.** A condition rarity in a boldly lustrous state of preservation, this eye-appealing coin is worthy of attention from collectors assembling a top-shelf set of Washington quarters. A full strike complements pristine surfaces. Dramatic toning frames silver centers with tones of purple, magenta, and lemon-gold on the obverse and lilac, orange, and lemon-gold on the reverse. Population: 33 in 67 (8 in 67+), 1 finer (1/14). NGC ID# 244Y, PCGS# 5815

**1942-S Quarter Dollar, MS67+  
One Certified Finer**

- 4613 1942-S MS67+ PCGS.** Knob tail S. Golden-orange toning around the date merges with delicate lime-green and lilac nuances over the smooth surfaces of this lustrous and pristine Superb Gem. The major devices are fully struck. San Francisco production was under 20,000,000 pieces in 1942, less than one fifth of the Philadelphia production of Washington quarters for the year. Population: 44 in 67 (6 in 67+), 1 finer (1/14). NGC ID# 2454, PCGS# 5819

**1942-S Quarter, MS67+  
Exquisite Patina**

- 4614 1942-S MS67+ PCGS.** Trumpet tail S. This beautifully patinated Superb Gem has a window of brilliance on each side, bordered by generous swaths of autumn-brown, ruby-red, lime-green, and ocean-blue. Boldly struck, and marks are absent save for minor contact on the eagle's chest and legs. Population: 44 in 67 (6 in 67+), 1 finer (1/14). NGC ID# 2454, PCGS# 5819
- 4615 1943-S Doubled Die Obverse MS64 PCGS. FS-101.** IN GOD WE TRUST is obviously die doubled clockwise. The date and LIBERTY show notching and thick lettering. Washington's queue is also nicely doubled. Crisply struck and lustrous with medium rose-red and lemon-gold toning. PCGS# 5823
- 4616 1945 MS67 PCGS.** A scarce coin in high Mint State grades, this Superb Gem displays a bold strike and subtle shades of lavender, blue, and gold on the obverse, while the reverse sparkles with vivid tones of fire-orange, sky-blue, lavender, lime-green, and gold. PCGS has seen just one example in a numerically higher grade. NGC ID# 245B, PCGS# 5827
- 4617 1945-D MS67 PCGS.** Soft luster radiates beneath russet-brown, violet, and electric-blue toning on the obverse, with orange-gold, violet, and azure-blue toning covering the reverse of this sharp, Superb Gem quarter. The coin is unabraded and attractive. Few examples of this Denver date exist any finer. Population: 29 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 245C, PCGS# 5828

**1946 Quarter, MS67  
Tied for Finest Certified**

- 4618 1946 MS67 PCGS.** Only recently has the condition-rarity of post-World War II Washington quarters been recognized by collectors. This Superb Gem is extraordinary, combining russet, gold, turquoise, violet, and blue toning on both sides, with satiny silver luster shining from beneath. Population: 24 in 67 (2 in 67+), 0 finer (1/14). NGC ID# 245E, PCGS# 5830
- 4619 1946-S MS67+ PCGS. CAC.** Lemon-gold, fire-red, and lime-green toning illuminates this lustrous and crisply struck Superb Gem. Only trivial and infrequent contact is evident. Exceptional quality for this lower mintage issue. PCGS has only certified five finer pieces (1/14). NGC ID# 245G, PCGS# 5832

**1946-S/S Quarter, MS67+  
FS-501, Single Finest Certified**

- 4620 1946-S/S Repunched Mintmark MS67+ PCGS. CAC. FS-501.** The mintmark is obviously repunched north. Both sides are luxuriously toned. The obverse is cherry-red and sea-green. The reverse has similar but lighter shades, along with peach and tan toning. Lustrous and well-preserved. As of (1/14), the single finest among 97 certified by PCGS as FS-501. PCGS# 5973
- 4621 1949-D MS67 PCGS. CAC.** Gold-orange shadings overall with hints of russet at parts of the rims and small breaks to silver-gray. An impressively preserved and attractive coin. Population: 49 in 67 (6 in 67+), 2 finer (1/14). NGC ID# 245R, PCGS# 5840
- 4622 1951-D MS67+ PCGS. CAC.** This high-end Superb Gem is richly toned in shades of sea-green and magenta, with vibrant mint luster underneath. The design elements are sharply detailed and eye appeal is quite strong. Population: 31 in 67 (1 in 67+), 1 finer (1/14). NGC ID# 245X, PCGS# 5847
- 4623 1952-D MS67 PCGS. CAC.** Lightly gold-toned over parts of the obverse with a broadly silver reverse. Aside from a tiny depression on Washington's nose, there are no flaws warranting individual mention and the eye appeal is strong. Population: 10 in 67, 0 finer (1/14). NGC ID# 2462, PCGS# 5850
- 4624 1953-S MS67+ PCGS.** A broad arc of olive-green, ruby-red, powder-blue, and orange endows portions of each periphery. The remainder of this lustrous and nearly mark-free quarter remains brilliant. Population: 78 in 67 (7 in 67+), nine finer (1/14). NGC ID# 2466, PCGS# 5854
- 4625 1958-D MS67+ PCGS.** The obverse of this Superb Gem is toned in rainbow bands that range from deep orange to lemon yellow. An exceptional example that is tied for the finest PCGS has certified. NGC ID# 246G, PCGS# 5865
- 4626 1958-D MS67+ PCGS. CAC.** Immensely colorful with a rainbow mix of hues and a break toward silver at the central reverse. PCGS has graded nine examples in MS67+ and none finer (1/14). NGC ID# 246G, PCGS# 5865
- 4627 1964 MS67 PCGS.** Amazing red-gold toning and lime-green margins cover the obverse of this Superb Gem quarter. The reverse is lightly toned in clear magenta-gold with blue-green rims. The surfaces appear nearly abrasion-free and boldly struck, with the exception of a tiny mark on the eagle's right (facing) leg. Neither PCGS nor NGC have certified any examples numerically finer (1/14). NGC ID# 246U, PCGS# 5876

- 4628 1964 MS67 ★ NGC. CAC.** Type A Reverse. Dramatic cherry-red, sea-green, and orange-gold obverse toning explains the presence of the NGC Star. The reverse is brilliant. Census: 45 in 67 (4 in 67 ★), none finer with or without a Star designation (1/14). NGC ID# 246U, PCGS# 5876

**1969-D Clad Quarter, MS68  
Impeccable Surface Quality**

- 4629 1969-D MS68 PCGS.** Many collectors end their sets and collecting pursuits at the "end of silver" era in 1964 (1970 for Kennedy halves) — and many miss the boat on condition rarities such as the early clad D-mint Washington quarter keys, for example, which include all of the 1968-D through 1972-D issues. This MS68 1969-D is one of only six such at PCGS with none finer, showing simply impeccable surface quality over silver-gold surfaces (12/13). NGC ID# 2474, PCGS# 5884

**PROOF WASHINGTON QUARTERS**

- 4630 1936 PR66 NGC.** A glossy first-year Premium Gem proof with considerable pearl-gray toning. Hints of golden color also are scattered in the fields. Low-mintage and in-demand. NGC ID# 27HN, PCGS# 5975
- 4631 1937 PR67 PCGS.** An essentially brilliant Superb Gem proof, save for small splashes of lemon-yellow toning on each side, and a smaller splash of deep magenta on the reverse. Population: 93 in 67 (4 in 67+), 2 finer (1/14). NGC ID# 27HP, PCGS# 5976
- 4632 1950 PR67 Cameo PCGS.** The design elements of this spectacular Superb Gem are razor-sharp and frosty, contrasting boldly with the deeply mirrored brilliant fields. Population: 19 in 67 (1 in 67+) Cameo, 4 finer (1/14). NGC ID# 27HW, PCGS# 85982

**PROOF STATEHOOD QUARTER**

- 4633 1999-S Delaware Silver PR70 Deep Cameo PCGS.** The silver Delaware Statehood quarter, from the debut year 1999, is one of the keys to the complete set in the perfect PR70 Deep Cameo grade at PCGS. Only 127 coins are in this grade, far fewer than the number of collectors working on this popular series (1/14). This is a silver-white, optimally contrasted example, certified in the special Flag holder. NGC ID# 27M8, PCGS# 96043

## WALKING LIBERTY HALF DOLLARS

- 4634 1916 MS65 NGC.** A lovely Gem with frosty silver luster, this example is partially toned in deep gold and steel on the obverse, with splashes of gold on the reverse. NGC ID# 24PL, PCGS# 6566
- 4635 1916 MS65 NGC.** This delightful Gem features well-detailed design elements, with visible separation between Liberty's thumb and finger and emerging detail on the eagle's leg, but the skirt lines are a little soft. Vibrant mint luster and pale gold toning add to the outstanding eye appeal. NGC ID# 24PL, PCGS# 6566

### 1916 Half, MS66 Silver-White, First-Year Example

- 4636 1916 MS66 NGC.** This issue is the subject of unrelenting demand from first-year-of-type specialists. Just 608,000 pieces were minted, and few survivors exist to fill the want lists of those needing a high-grade example. This boldly struck Premium Gem is relatively unmarked and will more than fill the bill for most type and date collectors. The frosty surfaces display abundant satin luster over untuned, silver-white surfaces. Census: 59 in 66 (1 in 66 ★), 10 finer (1/14). NGC ID# 24PL, PCGS# 6566

- 4637 1916-D MS64 PCGS. CAC.** The first Denver Walker issue has a mintage of just over a million pieces and is tricky to find as an attractive Mint State coin. This softly struck but amply lustrous near-Gem with faint golden overtones fills the bill. NGC ID# 24PM, PCGS# 6567

### 1916-D Half Dollar, MS66 Obverse Mintmark Subtype

- 4638 1916-D MS66 PCGS.** Liberal, scattered splashes of teal toning are present on both sides of this Premium Gem, particularly on the obverse. The reverse also includes russet and plum-brown color. The level of design detail is pleasing and the coin displays attractive luster. Population: 59 in 66 (1 in 66+), 3 finer (1/14). NGC ID# 24PM, PCGS# 6567

- 4639 1917 MS65 NGC. CAC.** The obverse is lightly toned olive-green and lilac. The reverse displays rich steel-blue, lavender, and sea-green patina. This coruscating Gem has an exemplary strike and pristine mattelike surfaces. Encased in a former generation holder. NGC ID# 24PP, PCGS# 6569

- 4640 1917-D Obverse MS63 PCGS.** Deeply toned violet with glimmers of dusky peach and gold. The obverse mintmarks on Walking Liberty half dollars lasted only for the first two years of the series. NGC ID# 24PR, PCGS# 6570

### 1917-D Walking Liberty Half Dollar, MS64 First Year With Reverse Mintmark

- 4641 1917-D Reverse MS64 PCGS.** An impressive Choice Walking Liberty half dollar, from the first year with the mintmark on the reverse. This well-detailed specimen shows some separation between Liberty's thumb and finger and the lustrous surfaces are visited by shades of pale gold toning. PCGS has graded 47 numerically finer examples (1/14). NGC ID# 24PS, PCGS# 6571

### 1917-D Walking Liberty Half, MS64 Mintmark on the Reverse

- 4642 1917-D Reverse MS64 PCGS.** With a mintage of over 1.9 million pieces, this issue is more than twice as plentiful as the Obverse Mintmark variant. It is scarce, however, in near-Mint condition — especially when it is a lustrous, brilliant-white example like this one. Strike quality is always an issue on these early Walkers, and this coin is no exception with some weakness down the center portrait. It is better-struck than many, though, and the reverse strike is bold. The coin is virtually free of abrasions with not even a minor contact to mention. NGC ID# 24PS, PCGS# 6571

- 4643 1917-D Reverse MS65 PCGS.** This is a lovely Gem example of the second type with the mintmark removed to the reverse. The 1916 and early 1917 Walkers had the mintmark on the obverse, and all remaining issues through 1947 had the reverse mintmark location. Some collectors suggest that these represent two different subtypes of the Walking Liberty half dollars. Those collectors state that the 1917-D and 1917-S reverse mintmark pieces are a necessary part of first year type collections. The present Gem is ideal for those collectors, and for specialized collectors as well. This Gem has full silver luster beneath splashes of gold, violet, and sea-green toning with brilliant frost at the center of the reverse. Population: 42 in 65, 5 finer (1/14). NGC ID# 24PS, PCGS# 6571

**1918-S Walking Liberty Half, MS64  
Better-Than-Average Strike**

**4644 1918-S MS64 PCGS. CAC.** The 1918-S Walking Liberty half dollar is only slightly scarce in MS64 condition, but finer examples are elusive. This impressive Choice specimen offers a better-than-average strike, with some emerging detail on Liberty's wreath hand and head. Vibrant mint luster and a few hints of champagne-gold toning add to the terrific eye appeal. PCGS has graded 37 numerically finer examples (1/14). NGC ID# 24PX, PCGS# 6576

**4645 1920 MS64 PCGS.** Well-struck for an early Walker, the 1920 Philadelphia issue had a high mintage of more than 6.3 million coins. This near-Gem example is attractively toned on both sides with a mixture of orange and gold toning. The obverse is especially attractive with areas of lavender and blue accents intermixed with sunset-gold hues. Nice mint luster radiates from beneath the toning. NGC ID# 24R3, PCGS# 6580

**4646 1920 MS64 PCGS.** Pale silver luster has a subtly frosted character. Modestly toned overall with a few hints of antique-gold along the rims and good eye appeal for a near-Gem. NGC ID# 24R3, PCGS# 6580

**4647 1920-D AU55 PCGS.** A few traces of wear show on the high points of this attractive near-Mint specimen, but the surfaces are minimally abraded and brightly lustrous.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24R4, PCGS# 6581

**1920-S Walker, MS64  
Bold Strike, Original Appeal**

**4648 1920-S MS64 PCGS. CAC.** The satin-smooth surfaces of this near-Gem half dollar display bold design details that are much sharper than usually seen on this issue, with brilliant silver surfaces and gorgeous golden accents. Subtle blue undertones enhance the overall visual appeal of this impressive example. PCGS has certified just 63 pieces numerically finer (1/14). NGC ID# 24R5, PCGS# 6582

**4649 1921-D VF20 PCGS. CAC.** Some wear shows on the wreath hand and Liberty's breast, but the skirt lines are still visible and the pleasing gray surfaces are free of large or distracting marks. Always in demand because of the series-low mintage. NGC ID# 24R7, PCGS# 6584

**1921-D Walking Liberty Half, XF45  
Lowest Mintage of the Series**

**4650 1921-D XF45 PCGS.** Demand for all grades of the 1921-D Walker outpaces the supply, with collectors of every ilk looking to fill the hole in their collection. Just 208,000 pieces were produced by the Denver Mint, with not nearly enough survivors in grades above VF to satisfy the many enthusiasts. This Choice XF example is moderately worn but retains enough detail for an XF/AU set. The silver-gray surfaces show no significant marks and the rims are strong. NGC ID# 24R7, PCGS# 6584

**1927-S Walking Liberty Half, MS64  
Well-Preserved Brilliant Surfaces**

**4651 1927-S MS64 NGC.** From a mintage of nearly 2.4 million pieces, the 1927-S Walking Liberty half dollar is slightly scarce in MS64 condition, and finer examples are elusive. This well-detailed Choice specimen displays some of the typical softness on the central obverse, with vibrant mint luster and remarkably clean brilliant surfaces. NGC has graded 37 numerically finer examples (1/14). NGC ID# 24RA, PCGS# 6587

**1929-S Walker, MS65  
Iridescent Toning**

**4652 1929-S MS65 PCGS.** This scarce late-1920s Walker shows remarkable strength of strike, especially on the obverse. The surfaces display the expected glowing mint luster, still readily apparent beneath the subtle multicolored iridescent toning seen on each side. This is a solid Gem with no discernable abrasions and originally toned surfaces. NGC ID# 24RD, PCGS# 6590

**4653 1935-D MS65 NGC.** The 1935-D Walking Liberty half dollar is a challenging issue in grades above the Gem level. This well-detailed specimen displays pristine brilliant surfaces with vibrant mint luster. NGC has graded five numerically finer examples (1/14). NGC ID# 24RK, PCGS# 6596

**1935-S Walking Liberty Half  
Originally Toned Gem**

**4654 1935-S MS65 PCGS.** The 1935-S Walkers are known to be somewhat weakly struck and are usually found with brilliant or lightly toned surfaces. This Gem half dollar is lightly struck on the central details, but no more so than most examples of this San Francisco issue. The toning, however, is rich and pervasive. Dusky shades of golden-brown and dove-gray patina blanket the obverse. The reverse is spectacularly toned in multiple hues of forest green, aqua, rose, and gold. Strong mint luster shines beneath the toning of this impressive Gem. NGC ID# 24RL, PCGS# 6597

**4655 1936 MS67 PCGS.** Blue-violet obverse rim toning yields to gold-orange and peach with broken patches of silver. Uncommonly well-defined on the less-toned reverse, even on the eagle's legs. NGC ID# 24RM, PCGS# 6598

**4656 1937 MS67 PCGS.** The 1937 Walking Liberty half dollar was a well-produced issue and this sharply detailed Superb Gem lives up to that high reputation. The pristine surfaces radiate vibrant mint luster under shades of champagne-gold toning. PCGS has graded four numerically finer examples (1/14). NGC ID# 24RR, PCGS# 6601

**4657 1937-D MS66 PCGS.** The 1937-D is one of the better-struck issues from this decade, and this example demonstrates why. All three key striking areas on the obverse are fully detailed. Otherwise, the surfaces are highly lustrous and mostly brilliant with just a hint of peripheral color.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 24RS, PCGS# 6602

**4658 1937-D MS66 PCGS.** This impressive Premium Gem is an exceptional example of a scarcity in the Walking Liberty series, showing mint luster that shines through rich iridescent toning that entirely covers both sides. NGC ID# 24RS, PCGS# 6602

**4659 1937-D MS66+ PCGS.** Frosty silver luster on both sides with slightly lighter color on the obverse. Liberty's head is better-defined than usually seen and a degree of separation appears on the branch hand. NGC ID# 24RS, PCGS# 6602

**4660 1938 MS67 PCGS.** Delicate gold and blue overtones visit immensely lustrous surfaces. Liberty's head is well-struck, though her branch hand displays considerable softness. Population: 77 in 67 (1 in 67+), 1 finer (1/14). NGC ID# 24RU, PCGS# 6604

**4661 1938-D MS66+ PCGS.** With a mintage of fewer than half a million pieces, the 1938-D half dollar enjoys great popularity. This MS66+ piece is softly struck but attractively lustrous, silver in the centers with dappled gold-orange at the margins. Finer coins are condition rarities. NGC ID# 24RV, PCGS# 6605

**4662 1940-S MS66+ PCGS.** CAC. This high-end Premium Gem exhibits well-detailed design elements, with a touch of softness on Liberty's wreath hand and the eagle's leg. The well-preserved surfaces radiate vibrant mint luster, with hints of pale gold toning. PCGS has graded 10 numerically finer examples (1/14). NGC ID# 24S2, PCGS# 6610

**4663 1941-S MS65+ PCGS.** CAC. Ex: Dakota Collection. Golden-brown at the margins with generous silver interior luster. Softly struck but an appealing short-set example. NGC ID# 24S5, PCGS# 6613

**4664 1941-S MS66 PCGS.** A colorful short-setter with bright luster beneath peach, blue, violet, and gold-gray patina that yields to silver in the centers. Pleasing as a near-Gem, though considerable striking softness affects the usual trouble-spots. NGC ID# 24S5, PCGS# 6613

**1941-S Walker, MS66+  
Extraordinary Surfaces, Strong Strike**

**4665 1941-S MS66+ PCGS.** CAC. Exceptional mint luster is expected on any high-grade 1941-S half dollar. The mint luster on this piece is especially pronounced and only the slightest hint of color is present over the reverse. The always-important strike details are so close to being fully brought up. NGC ID# 24S5, PCGS# 6613

**1942 Walking Liberty Half, MS67+  
Essentially Perfect Surfaces**

**4666 1942 MS67+ PCGS.** Simply amazing quality. The surfaces are brightly lustrous with mint frost that is more suggestive of an S-mint half than a P-mint. The strike is complete, there are no obvious abrasions, and the coin is brilliant throughout. It is difficult to imagine what more a collector could want on a Walking Liberty type coin; it's all found on this single piece. NGC ID# 24S6, PCGS# 6614

**4667 1943-D MS67+ PCGS.** Satiny pearl-gray with occasional gold-gray overlay. An impressively preserved MS67+ Denver coin struck at the height of World War II. NGC ID# 24SA, PCGS# 6619

**4668 1943-S MS66+ PCGS.** Occasional hints of golden peripheral color with pale silver-gray interiors. Excellent detail on Liberty's head, though her branch hand shows more softness. NGC ID# 24SB, PCGS# 6620

**4669 1944-S MS66+ PCGS.** Large S. Light almond-gold and ice-blue patina visits this lustrous and exceptionally smooth Premium Gem. The upper central skirt lines are incompletely defined, as usual for wartime S-mint halves. NGC ID# 24SE, PCGS# 6623

**4670 1945 MS67 PCGS.** A magnificent Superb Gem with vibrant mint luster and vivid shades of greenish-gold toning. The design elements are sharply detailed in most areas but Liberty's wreath hand shows just a touch of softness. PCGS has graded no coins in higher numeric grades (1/14). NGC ID# 24SF, PCGS# 6624

**4671 1945 MS67 PCGS.** Toned peach at parts of the margins with pale silver-to-blue elsewhere. This Superb Gem is well-struck by the standards of its short-set issue. PCGS has graded no coins as MS68 or better (1/14). NGC ID# 24SF, PCGS# 6624

**4672 1945 MS67 PCGS. CAC.** Shades of greenish-gold and lavender-gray toning enliven the well-preserved surfaces of this delightful Superb Gem, with vibrant luster and sharply detailed design elements throughout. PCGS has graded no coins in higher numeric grades (1/14). NGC ID# 24SF, PCGS# 6624

**4673 1946 MS67 PCGS.** Vivid shades of magenta, gray, and lime-green toning visit the lustrous surfaces of this sharply detailed Superb Gem. Eye appeal is terrific. Population: 51 in 67 (2 in 67+), 0 finer (1/14). NGC ID# 24SJ, PCGS# 6627

## PROOF WALKING LIBERTY HALF DOLLARS

**4674 1936 PR63 NGC.** The completely brilliant surfaces of this attractive Select proof show just a few minor hairlines and contact marks and the sharply detailed design elements add to the considerable eye appeal. NGC ID# 27V4, PCGS# 6636

### 1936 Walking Liberty Half, PR66 First Year of Proof Production

**4675 1936 PR66 PCGS.** Only 3,901 proof Walking Liberty half dollars were struck in 1936, the first mass-distributed proof coinage in two decades. This spectacular Premium Gem is sharply detailed throughout with deeply mirrored fields and speckled champagne-gold toning. Proof coins were overshadowed by the activity in the commemorative market in 1936, but collector demand rose encouragingly in following years. NGC ID# 27V4, PCGS# 6636

### 1936 Walking Liberty Half, PR66 Only 3,901 Pieces Struck

**4676 1936 PR66 PCGS.** Razor-sharp definition is evident on all design elements of this delightful Premium Gem, with deeply mirrored fields and mostly brilliant well-preserved surfaces that show a few hints of pale gold toning. Outstanding eye appeal complements the high technical grade. PCGS has graded 31 numerically finer examples (1/14). NGC ID# 27V4, PCGS# 6636

**4677 1937 PR66 PCGS. CAC.** This is a glorious Premium Gem proof example that shows some elements of field-device contrast. Fully brilliant silver surfaces without any indication of toning on either side and terrific eye appeal. NGC ID# 27V5, PCGS# 6637

**4678 1937 PR66 PCGS. CAC.** A snow-white and essentially immaculate specimen. The precisely struck motifs display moderate contrast with the prominently mirrored fields. Scarce relative to subsequent proof dates. NGC ID# 27V5, PCGS# 6637

**4679 1939 PR67+ PCGS. CAC.** This high-end Superb Gem displays fully struck design elements and deeply mirrored fields with some delicate hints of greenish-gold toning. PCGS has graded 31 numerically finer examples (1/14). NGC ID# 27V7, PCGS# 6639

### 1939 Half Dollar, Brilliant PR68 Moderate Field-Device Contrast

**4680 1939 PR68 NGC.** While Walking Liberty proofs were produced using all-brilliant proofing techniques and are thus uniformly mirrored in finish, a number of coins are known with mint frost over the central devices. This Superb Gem is one of those coins, displaying lightly frosted motifs. Both sides are boldly struck, untoned, and immaculately preserved.

*Ex: Long Beach Signature (Heritage, 2/2009), lot 1487; Central States Signature (Heritage, 4-5/2009), lot 2916. NGC ID# 27V7, PCGS# 6639*

**4681 1940 PR67+ PCGS.** Gleaming silver surfaces show only a few faint traces of gold and gray patina. A magnificently preserved example of the fifth of seven proof Walking Liberty half dollar issues. NGC ID# 27V8, PCGS# 6640

**4682 1940 PR67+ NGC. CAC.** This high-end Superb Gem exhibits fully detailed design elements and deeply mirrored fields with a few hints of pale gold toning. NGC has graded 59 numerically finer examples (1/14). NGC ID# 27V8, PCGS# 6640

**4683 1941 PR68 NGC.** Potent gold-orange and sky-blue overtones prevail on this gleaming proof, particularly on the obverse. Overall detail is outstanding. Census: 79 in 68 (18 in 68 ★), 1 finer (1/14). NGC ID# 24SP, PCGS# 6641

**4684 1942 PR67+ PCGS. CAC.** Gleaming mirrors offer a slight contrast with the delicately textured devices. Magnificently preserved with the faintest hint of blue on the surfaces. NGC ID# 27V9, PCGS# 6642

**4685 1942 PR67+ PCGS. CAC.** This fully brilliant Superb Gem proof has no toning on either side, with deeply mirrored fields and satiny devices. A hint of cameo contrast is present on both sides of this beauty. PCGS has only certified 42 finer examples (1/14). NGC ID# 27V9, PCGS# 6642

**4686 1942 PR67+ PCGS. CAC.** Vivid shades of greenish-gold, lavender-gray, and amber toning visit the surfaces of this high-end Superb Gem, with most of the color on the obverse. The design elements are fully struck and reflective fields shine beneath the toning. NGC ID# 27V9, PCGS# 6642

**1942 Walking Liberty Half Dollar, PR68  
Vivid Multicolor Toning**

- 4687 1942 PR68 NGC. CAC.** Vivid shades of emerald-green and lavender toning visit the deeply reflective surfaces of this magnificent Walking Liberty half, but the centers remain essentially brilliant. The design elements are fully struck and no mentionable distractions are evident. Eye appeal is terrific. NGC has graded four numerically finer examples (1/14). NGC ID# 27V9, PCGS# 6642

**FRANKLIN HALF DOLLARS**

- 4688 1948 MS66+ Full Bell Lines PCGS.** This high-end Premium Gem displays lustrous well-preserved surfaces under intense shades of greenish-gold and magenta toning. The design elements are sharply detailed, with Full Bell Lines. PCGS has graded three numerically finer examples (1/14). NGC ID# 24SR, PCGS# 86651
- 4689 1949-S MS66+ Full Bell Lines PCGS. CAC.** This high-end Premium Gem features well-detailed design elements, with the Full Bell Lines designation and CAC sticker. Vibrant mint luster shines under speckled green and amber toning. PCGS has graded five numerically finer examples (1/14). NGC ID# 24SV, PCGS# 86655
- 4690 1952-D MS66+ Full Bell Lines PCGS. CAC.** Deep dappled toning has a mix of green-gold, reddish-orange, and steel-gray shades. Clearly defined bell lines are among this coin's greatest assets. Population: 82 in 66 (6 in 66+) Full Bell Lines, 2 finer (1/14). NGC ID# 24T4, PCGS# 86662

**1952-S Franklin Half, MS66+ Full Bell Lines  
Only One Numerically Finer at PCGS**

- 4691 1952-S MS66+ Full Bell Lines PCGS.** This high-end Premium Gem exhibits sharply detailed design elements with Full Bell Lines and vibrant mint luster radiates from both sides. The well-preserved surfaces display shades of lavender and greenish-gold toning. Population: 41 in 66 (2 in 66+) Full Bell Lines, 1 finer (1/14). NGC ID# 24T5, PCGS# 86663
- 4692 1953-D MS66+ Full Bell Lines PCGS. CAC.** Vibrant mint luster shines through vivid shades of lavender and greenish-gold toning on the well-preserved surfaces of this high-end Premium Gem. The design elements are sharply detailed, with Full Bands Definition. PCGS has graded one numerically finer example (1/14). NGC ID# 24T7, PCGS# 86665

**1953-S Franklin Half Dollar, MS67  
Prime Registry Set Candidate**

- 4693 1953-S MS67 PCGS. CAC.** The 1953-S Franklin half dollar claims a mintage of 4.1 million pieces and this spectacular Superb Gem is one of the finest survivors. The design elements are well-detailed and the well-preserved surfaces display vibrant mint luster and vivid shades of greenish-gold and lavender toning. Population: 5 in 67, 0 finer (1/14). NGC ID# 24T8, PCGS# 6666
- 4694 1954-D MS66+ Full Bell Lines PCGS. CAC.** Gold-to-orange obverse toning yields to silver across most of the reverse. Uncommonly crisp detail on the bell lines is a great asset. PCGS has graded just three finer Full Bell Lines pieces (1/14). NGC ID# 24TA, PCGS# 86668
- 4695 1954-S MS66+ Full Bell Lines PCGS.** This high-end Premium Gem is richly patinated in shades of golden-brown and magenta, with well-detailed design elements and vibrant mint luster. Population: 87 in 66 (6 in 66+) Full Bell Lines, 1 finer (1/14). NGC ID# 24TB, PCGS# 86669
- 4696 1958-D MS67 Full Bell Lines PCGS.** A brightly lustrous Superb Gem with well-detailed design elements and Full Bell Lines. Subtle hints of lavender-gray and greenish-gold toning enliven the well-preserved surfaces. Population: 47 in 67 Full Bell Lines, 0 finer (1/14). NGC ID# 24TH, PCGS# 86675
- 4697 1958-D MS67 Full Bell Lines PCGS.** A well-detailed Superb Gem with the Full Bell Lines designation, this coin displays vibrant mint luster under delicate shades of pink and greenish-gold toning. Population: 47 in 67 Full Bell Lines, 0 finer (1/14). NGC ID# 24TH, PCGS# 86675
- 4698 1958-D MS67 Full Bell Lines PCGS. CAC.** This sharply detailed Superb Gem exhibits Full Bell Lines definition and the lustrous surfaces are richly toned, with shades of magenta and greenish-gold on the obverse, and gray and amber on the reverse. Population: 47 in 67 Full Bell Lines, 0 finer (1/14). NGC ID# 24TH, PCGS# 86675
- 4699 1958-D MS67 Full Bell Lines PCGS. CAC.** The lustrous surfaces of this Superb Gem display medium-intensity multicolored toning around the borders. Both sides have been well cared for and exhibit sharply struck devices. Population: 47 in 67 Full Bell Lines, 0 finer (1/14). NGC ID# 24TH, PCGS# 86675
- 4700 1960 MS66 Full Bell Lines PCGS.** This spectacular Premium Gem exhibits razor-sharp definition on all design elements, with Full Bell Lines. The brilliant surfaces are well-preserved and brightly lustrous. Population: 48 in 66 (2 in 66+) Full Bell Lines, 0 finer (1/14). NGC ID# 24TL, PCGS# 86678

**1963-D Franklin Half Dollar, MS67  
Single Finest-Graded at Both Services**

- 4701 1963-D MS67 NGC. CAC.** An outstanding representative, this coin is the sole example to have reached the MS67 level at either major grading service, with none finer (1/14). In addition, this piece displays rich toning on both sides, with the reverse being particularly stunning. The colors include shades of orange, red, green, yellow, and fuchsia. NGC ID# 24TU, PCGS# 6685

## PROOF FRANKLIN HALF DOLLARS

- 4702 1950 PR65 Cameo PCGS.** This attractive Gem displays sharply detailed frosty design elements that contrast noticeably with the deeply reflective brilliant fields. PCGS has graded 40 numerically finer examples (1/14). NGC ID# 27VA, PCGS# 86691
- 4703 1953 PR67 Cameo PCGS. CAC.** The deeply mirrored fields of this spectacular Superb Gem contrast boldly with the sharply detailed frosty design elements. The brilliant surfaces are free of mentionable distractions. PCGS has graded six numerically finer examples (1/14). NGC ID# 27VD, PCGS# 86694

## KENNEDY HALF DOLLARS

- 4704 1964 MS67 PCGS.** Vibrant multicolored patina saturates both sides of this first-year Kennedy half. Smooth under the toning and a significant condition rarity at PCGS. Population: 32 in 67, 0 finer (1/14). NGC ID# 24U2, PCGS# 6706
- 4705 1968-D MS67 PCGS.** Intense shades of violet and sea-green toning enhance the lustrous surfaces of this spectacular Superb Gem, with more color on the obverse. Population: 25 in 67, 0 finer (1/14). NGC ID# 24U7, PCGS# 6711

## PROOF KENNEDY HALF DOLLAR

- 4706 1981-S Type Two PR70 Deep Cameo PCGS.** The scarcer clear mintmark type on a technically perfect Kennedy half. Only the faintest hints of patina visit the crisply contrasted surfaces. Population: 55 in 70 Deep Cameo (1/14). NGC ID# 24WS, PCGS# 96822

## MORGAN DOLLARS

- 4707 1878 8TF MS65 PCGS. VAM-17.** An essentially brilliant Gem that exhibits potent luster and a precise strike. Marks are chiefly confined to minor contact on the field near the nose. Both sides are die doubled, usual for the First Reverse subtype.  
*Ex: Long Beach Signature (Heritage, 2/2010), lot 502, which realized \$1,265. NGC ID# 253H, PCGS# 7072*
- 4708 1878 7TF Reverse of 1878 MS65 PCGS.** Medium-gray at the centers with rich autumnal colors filling the fields. Intricately detailed central devices add to the strong all-around eye appeal. NGC ID# 253K, PCGS# 7074

- 4709 1878 7TF Reverse of 1878 MS65 PCGS.** The reverse of this Gem in particular displays strong cartwheel luster. A bold strike and virtually untuned surfaces are additional attributes of this lovely Morgan. Only 33 examples have been awarded higher numeric grades by PCGS (1/14). NGC ID# 253K, PCGS# 7074

- 4710 1878 7TF Reverse of 1878 MS65 PCGS.** This lovely Gem exhibits fully brilliant and untuned silver surfaces with light field reflectivity on both sides. A border prooflike example, this quality earned the "semi-prooflike" label back in the 1970s. PCGS has only certified 33 finer examples. NGC ID# 253K, PCGS# 7074

- 4711 1878 7TF Reverse of 1878 MS65 PCGS.** The surfaces are enlivened with sparkling luster, and display whispers of purple, cobalt-blue, and reddish-tan patination along the obverse margins. Great definition is apparent on the design elements, including the hair over Liberty's ear and the eagle's breast feathers. Minute contact marks on the cheek and scuffs in the left obverse field are mentioned for accuracy. PCGS has graded 33 numerically finer examples (1/14).  
*Ex: Columbus Central States Signature (Heritage, 4/2006), lot 3194, which realized \$920. NGC ID# 253K, PCGS# 7074*

- 4712 1878 7TF Reverse of 1878 MS65 PCGS. CAC.** The Reverse of 1878 is identified by the parallel arrow feathers. This impressive Gem is sharply detailed and brightly lustrous, with brilliant untuned surfaces that show only a few minor contact marks. NGC ID# 253K, PCGS# 7074

- 4713 1878 7TF Reverse of 1878 MS65 Prooflike NGC.** A snow-white Gem that boasts flashy fields and exceptionally mark-free surfaces. Scattered tiny mint-made strike-throughs are noted on Liberty's neck and the reverse field. NGC ID# 253K, PCGS# 7075

- 4714 1878 7TF Reverse of 1878 MS64 Deep Mirror Prooflike NGC. VAM-82.** LIBERTY is clearly die doubled north. A crisply struck Second Reverse Morgan with flashy fields and a well preserved reverse. The borders display narrow bands of rose-gold and aquamarine. Liberty's chin and neck are abraded. Certified in a former generation holder. NGC ID# 253K, PCGS# 97075

- 4715 1878 7TF Reverse of 1879 MS65 PCGS.** A pleasing Gem, this piece is virtually untuned, displaying lustrous surfaces. The design elements exhibit a strong degree of detail except at the extreme centers. Survivors are conditionally scarce beyond the Gem level, with PCGS having graded only 18 numerically finer examples (1/14). NGC ID# 253L, PCGS# 7076

- 4716 1878 7TF Reverse of 1879 MS65 NGC.** Pleasing shades of lavender and greenish-gold toning enliven the lustrous well-preserved surfaces of this well-detailed Gem Morgan dollar. Eye appeal is outstanding. NGC has graded 17 numerically finer examples (1/14). NGC ID# 253L, PCGS# 7076

- 4717 1878 7TF Reverse of 1879 MS65 PCGS.** The 1878 Morgan dollars are known from three different hubs, including the 8 Tailfeathers, 7 Tailfeathers, and Reverse of 1879 hubs. The fourth major type, the 7/8 Tailfeathers type, was the result of double hubbing from the first two types. This piece has the Reverse of 1879, and it is an elusive variety, especially in Gem grades. The surfaces are fully brilliant with frosty silver luster and untuned surfaces. NGC ID# 253L, PCGS# 7076

- 4718 1878-CC MS65 PCGS.** Light caramel-gold patina embraces the obverse of this lustrous and well-struck CC-mint Gem. Well-preserved overall with only slight marks noted on the portrait.  
*Ex: Long Beach Signature (Heritage, 6/2010), lot 1041. NGC ID# 253M, PCGS# 7080*

- 4719 1878-CC MS65 PCGS. CAC.** This sharply detailed Gem displays vibrant mint luster and well-preserved surfaces, with rings of attractive greenish-gold and magenta toning at the peripheries. NGC ID# 253M, PCGS# 7080

**4720 1878-CC MS65 Prooflike PCGS.** A spectacular first-year Morgan dollar from the Carson City Mint, with sharply detailed frosty design elements and reflective surfaces that show a few minor contact marks and hairlines. PCGS has graded six numerically finer examples (1/14). NGC ID# 253M, PCGS# 7081

**4721 1879-CC AU53 NGC.** This scarce, semikey CC dollar is seldom found with such clean surfaces. Just a few light scrapes on the face of Liberty are worth mentioning. Pale gray-brilliant color overall with a light accent of golden around the perimeters. NGC ID# 253T, PCGS# 7086

---

**1879-CC Morgan Dollar, AU55  
Key Carson City Issue**

**4722 1879-CC AU55 PCGS.** A lustrous and highly attractive Choice AU 1879-CC Morgan dollar with nearly full luster and faint champagne toning. This is an extremely rare issue in Choice AU grade, as nearly all have much more wear, or none at all. This piece will appeal to a wide audience.  
Ex: *Central States Signature (Heritage, 4/2007)*, lot 4496; *Summer FUN Signature (Heritage, 7/2009)*, lot 819. NGC ID# 253T, PCGS# 7086

**4723 1879-S Reverse of 1878 MS63 Prooflike PCGS. CAC. VAM-51.** A Top 100 Variety. The Second Reverse 1879-S variety is scarce relative to its Third Reverse counterpart. This brilliant example is prominently mirrored with strongly contrasting mint frost over the devices. Distributed small abrasions are consistent with the grade. Population: 26 in 63 Prooflike, 9 finer (1/14). NGC ID# 253W, PCGS# 7095

**4724 1879-S MS67+ PCGS. CAC.** A high-end Superb Gem specimen of this popular mintmark type coin, with sharply detailed design elements and vibrant mint luster. The well-preserved surfaces display accents of greenish-gold toning. NGC ID# 253X, PCGS# 7092

**4725 1879-S MS65 Deep Mirror Prooflike PCGS. CAC.** The reflective fields and frosty motifs are brilliant, though glimpses of golden-brown and ocean-blue endow the margins. A well struck silver type coin. Encapsulated in a first generation holder. NGC ID# 253X, PCGS# 97093

**4726 1880 MS65 PCGS.** A highly colorful Gem with similar extensive fire-red, ocean-blue, and canary-gold patina on both sides. Lustrous and nicely struck with minimal contact. NGC ID# 253Y, PCGS# 7096

**4727 1880 MS66 PCGS.** Many 1880 dollars from all the Mints show overdates, but this is the normal date. This brilliant and lustrous example is untuned and sharply struck. A tiny, short abrasion on the jawline is the only mentionable mark. Remarkably, no examples are graded numerically finer by either service (1/14). NGC ID# 253Y, PCGS# 7096

**4728 1880 MS64 Deep Mirror Prooflike NGC.** Honey-gold toning adorns the borders of this flashy and well preserved silver dollar. The strike is good though the centers are incomplete. Housed in a prior generation holder. Census: 59 in 64 (1 in 64 ★) Deep Mirror Prooflike, 11 finer (1/14).  
From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 253Y, PCGS# 97097

**4729 1880-CC MS65 NGC. CAC.** This attractive Gem Morgan dollar exhibits well-detailed frosty design elements, with frosty mint luster and lightly toned surfaces that show few signs of contact. Eye appeal is quite strong. NGC ID# 2542, PCGS# 7100

**4730 1880-CC MS65 PCGS. CAC.** A faint clashed n is apparent in front of Liberty's neck. This lustrous and lightly toned Gem that has a clean cheek, smooth fields, and minor inexactness of strike at the centers. NGC ID# 2542, PCGS# 7100

**4731 1880-CC MS64+ Prooflike PCGS.** A reflective, Deep Mirror Prooflike example of this popular Carson City date. This sharply struck dollar is a borderline Gem, with just a few minor contact marks and a small chip above the 0 in the date. The coin is untuned, brilliant-white, lustrous, and attractive. NGC ID# 2542, PCGS# 7101

**4732 1880/79-CC Reverse of 1878 MS64 PCGS. VAM-4.** A Top 100 Variety. The obsolete Second Reverse is paired with the clearest overdate of the series. A lightly toned and lustrous Choice Carson City Morgan. The fields are nearly pristine though the portrait shows minor marks.  
Ex: *Orlando FUN Signature (Heritage, 1/2010)*, lot 8592, which realized \$1,035. NGC ID# 253Z, PCGS# 7108

---

**1880-CC 8/High 7 Silver Dollar, MS66+  
VAM-5, Reflective Silver-White Example**

**4733 1880-CC 8 Over High 7 MS66+ PCGS. CAC. VAM-5.** A Top 100 Variety. The 7 underdigit is easily seen above and within the first 8, diagnostic of the popular, Fey-Oxman Top 100 variety. The fields are semiprooflike and reflective, framing devices covered with mint frost for nice contrast. Other than a tiny mark near star 2, the surfaces of this Premium Gem are unabraded. The coin is fully struck. An impressive, silver-white dollar, it earned the PCGS Plus designation for excellent quality and eye appeal. Population: 71 in 66 (8 in 66+), 7 finer (1/14). PCGS# 7102

**4734 1880-CC 8/7 Reverse of 1878 MS64 PCGS. VAM-7A.** The later die state with double clash marks in front of Liberty's neck. The popular Second Reverse subtype, struck from leftover reverse dies made in 1878. Well struck and brilliant with booming luster and clean surfaces.  
Ex: *Fort Worth ANA Signature (Heritage, 3/2010)*, lot 1344. PCGS# 7110

---

**1880-CC Dollar, MS65+  
Second Reverse, VAM-7A**

**4735 1880-CC 8/7 Reverse of 1878 MS65+ PCGS. CAC. VAM-7A.** A Hit List 40 Variety. VAM-7A is the later die state of VAM-7 and exhibits a double set of clash marks. However, the obsolete Second Reverse is the variety's major attraction. Lustrous and crisply struck with just a trace of golden toning. The portrait and obverse field display only delicate grazes. PCGS# 7110

- 4736 1880-O MS64 PCGS.** Amply toned peach, pink, violet, and blue with the colors a trifle deeper on the obverse. Generous underlying luster completes the eye appeal. NGC ID# 2543, PCGS# 7114
- 4737 1880-O MS64 PCGS. CAC.** Medium oval O. A fully struck New Orleans dollar with only a trace of olive-gold toning. Lustrous and surprisingly unabraded, even for the designated grade. An excellent value relative to the cost of a full Gem. NGC ID# 2543, PCGS# 7114
- 4738 1880-O MS64 NGC. CAC.** Small or Micro O. Dusky peach centers and steel-gray motifs are framed by peripheral sea-green, cherry-red, and lemon-gold. Lustrous and intricately struck with unmarked surfaces. NGC ID# 2543, PCGS# 7114
- 4739 1880/79-O MS64 PCGS. VAM-4.** A Top 100 Variety. Small or Micro O. Remnants of the crossbar of a 7 can be seen within the upper loop of the second 8 in the date. Well struck, lustrous, and virtually brilliant. PCGS# 7116
- 4740 1880/79-O MS64 PCGS Secure. VAM-4.** A Top 100 Variety. Small or Micro O. Along with VAM-5, the most prominent of the various 1880-O overdate varieties. This well struck near-Gem has dynamic luster and medium tan-gold toning. Well preserved for the designated grade.  
*Ex: Long Beach Signature (Heritage, 6/2010), lot 1071, which realized \$1,840. PCGS# 7116*
- 4741 1880-S MS67 PCGS. CAC.** Medium S. Iridescent lemon, peach, cherry, and ice-blue toning illuminates the obverse. The reverse remains brilliant. A flashy and well struck Superb Gem that is void of relevant marks. NGC ID# 2544, PCGS# 7118

**1880-S Silver Dollar, MS68  
Ultimate Type Coin**

- 4742 1880-S MS68 PCGS.** Brilliant with semiprooflike fields and an immaculate cheek, this 1880-S dollar is the prototypical coin for any collector wanting to upgrade or to acquire a top example for type. The reflective fields display bright luster and frame lightly frosted devices. The full strike leaves nothing more to be desired — a silver-white Superb Gem of the highest quality. NGC ID# 2544, PCGS# 7118
- 4743 1880-S MS67+ Prooflike PCGS. CAC.** Medium S. A magnificent Superb Gem that boasts a sharp strike, flashy fields, faint wheat-gold toning, and outstanding preservation. Ideal for the advanced silver type collector. NGC ID# 2544, PCGS# 7119

**1880-S Morgan Dollar, MS66+  
Deep Mirror Prooflike Surfaces**

- 4744 1880-S MS66+ Deep Mirror Prooflike PCGS. CAC.** Large S. From a mintage of 8.9 million pieces, the 1880-S Morgan dollar is a plentiful issue in high grade and a popular choice of type collectors. This high-end Premium Gem exhibits razor-sharp definition on all design elements and the devices have a frosty texture that contrasts profoundly with the deeply reflective fields. The well-preserved brilliant surfaces show no mentionable distractions. NGC ID# 2544, PCGS# 97119
- 4745 1880/9-S MS67 PCGS. CAC. VAM-11.** A Hot 50 Variety. Die fill within the 0 suggests an underdigit 9. The variety is listed in the *Guide Book*. This stone-white Superb Gem is well struck and thoroughly lustrous with exemplary fields and only faint grazes on the portrait.  
*Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 1354, which realized \$1,955. PCGS# 7122*
- 4746 1881-CC MS66 PCGS.** A lovely example of this ever-popular Carson City Morgan dollar, well-defined with subtly frosted high points. Ample silver-gray haze drapes the beautifully preserved surfaces. NGC ID# 2547, PCGS# 7126
- 4747 1881-CC MS66+ PCGS.** A high-end Premium Gem from the famous Carson City Mint, this coin is sharply detailed and brightly lustrous throughout. The well-preserved surfaces show a few hints of golden-tan toning and eye appeal is outstanding. NGC ID# 2547, PCGS# 7126
- 4748 1881-CC MS64+ Deep Mirror Prooflike PCGS.** An amazing near-Gem, this brilliant and untoned silver dollar has fully and deeply mirrored fields that frame the lustrous devices with excellent contrast. NGC ID# 2547, PCGS# 97127
- 4749 1881-CC MS64 Deep Mirror Prooflike PCGS. CAC.** The well-detailed design elements of this attractive Choice specimen have a frosty texture that contrasts starkly with the deeply reflective fields. A scattering of minor contact marks on both sides prevents an even higher grade. NGC ID# 2547, PCGS# 97127

**1881-CC Morgan Dollar, MS65  
Spectacular Deep Mirror Prooflike Example**

- 4750 1881-CC MS65 Deep Mirror Prooflike PCGS.** The 1881-CC Morgan dollar claims one of the lowest mintages of the series, at 296,000 pieces. Surprisingly, the 1881-CC is not difficult to locate in high grade, because it was well-represented in the GSA sales. This coin exhibits sharply detailed design elements, with rich mint frost that contrasts boldly with the deeply reflective fields. Eye appeal is terrific. NGC ID# 2547, PCGS# 97127

- 4751 1881-O MS65 PCGS.** Vibrant mint luster and sharply detailed design elements are the calling cards of this remarkable Gem. The brilliant surfaces show a few hints of pale gold toning. PCGS has graded 19 numerically finer examples (1/14). NGC ID# 2548, PCGS# 7128
- 4752 1881-O MS65 NGC.** This sharply detailed Gem displays vibrant mint luster and well-preserved untuned surfaces with outstanding eye appeal. NGC has graded only eight numerically finer examples (1/14). NGC ID# 2548, PCGS# 7128
- 4753 1881-O MS65 PCGS. CAC.** The upper half of the obverse and most of the reverse exhibit delicate gold, blue, and iridescent toning over frosty silver luster. PCGS has only certified 19 of these in higher grades (1/14). NGC ID# 2548, PCGS# 7128
- 4754 1881-S MS67+ PCGS. CAC.** This high-end Superb Gem displays razor-sharp design elements and especially vibrant mint luster on both sides. The brilliant surfaces are well-preserved, with outstanding eye appeal. NGC ID# 2549, PCGS# 7130
- 4755 1881-S MS67+ PCGS. CAC.** Prominent cartwheel luster and brilliant virtually untuned surfaces are among the attributes this gorgeous coin possesses. The design elements display a bold level of detail, even at the extreme centers. This is a wonderful piece. NGC ID# 2549, PCGS# 7130

#### 1881-S Silver Dollar, MS68

- 4756 1881-S MS68 NGC. CAC.** The 1881-S is one of the better produced issues in the Morgan dollar series, prompting David Bowers (2006) to write: "Specimens nearly always are sharply struck and beautiful." The present high grade example is one such product, with shimmering cartwheel luster, a bold strike, and exceptional preservation. Liberty's cheek is virtually pristine. The borders exhibit peach-gold, lilac-red, and forest-green. Certified in a former generation holder.  
Ex: *Long Beach Signature* (Heritage, 5/2009), lot 1045, which realized \$3,220. NGC ID# 2549, PCGS# 7130

- 4757 1882 MS66 PCGS.** The obverse of this lovely Premium Gem is fully brilliant with faint gold toning at the border, while the reverse is deeply toned in dark gold and iridescent shades. PCGS has only certified seven numerically finer pieces (1/14). NGC ID# 254A, PCGS# 7132
- 4758 1882 MS66 PCGS.** Vivid shades of greenish-gold and lavender-gray toning visit the well-preserved surfaces of this impressive Premium Gem, with most of the color on the obverse. Vibrant mint luster and sharply detailed design elements add to the outstanding eye appeal. PCGS has graded seven numerically finer examples (1/14). NGC ID# 254A, PCGS# 7132
- 4759 1882 MS66 PCGS. CAC.** Scarce in Premium Gem condition and rare any finer, this elegantly toned example has lilac at the margins and over the high points, with radiant peach-gold toning everywhere else. The toning is remarkably consistent on both sides, and the coin displays a sharp strike for the issue. Virtually unabraded with strong luster beneath the pastel tones. NGC ID# 254A, PCGS# 7132
- 4760 1882-CC MS66 PCGS.** Potent luster provides this virtually untuned Premium Gem with strong visual appeal. The coin displays a bold strike and is minimally abraded. A tiny planchet flake is present near Liberty's ear. NGC ID# 254B, PCGS# 7134

- 4761 1882-CC MS66+ PCGS.** Potent luster provides this lightly toned high-end Premium Gem with strong visual appeal. The coin displays a sharp strike and the surfaces are minimally marked. PCGS has graded 66 numerically finer examples (1/14). NGC ID# 254B, PCGS# 7134
- 4762 1882-CC MS66 PCGS. CAC.** Rich honey-gold toning is limited to PLURIBUS and the lower left reverse border. This well struck Premium Gem has dazzling luster and impressive preservation. An ideal candidate for a Carson City type set. NGC ID# 254B, PCGS# 7134
- 4763 1882-CC MS66 PCGS. CAC.** Light straw-gold and pearl-gray toning visits this thoroughly lustrous and precisely struck Carson City type coin. A costly acquisition any finer. Encapsulated in a green label holder. NGC ID# 254B, PCGS# 7134
- 4764 1882-CC MS66+ PCGS. CAC.** A high-end Premium Gem from the fabled Carson City Mint, this coin features sharply detailed frosty design elements and vibrant mint luster with well-preserved brilliant surfaces. NGC ID# 254B, PCGS# 7134
- 4765 1882-CC MS66+ PCGS. CAC.** The 1882-CC Morgan dollar was a well-produced issue and this high-end Premium Gem lives up to that excellent reputation. The design elements are sharply detailed and frosty and the pristine surfaces radiate vibrant mint luster. NGC ID# 254B, PCGS# 7134
- 4766 1882-CC MS66 Prooflike PCGS. CAC.** Clearly semireflective but with considerable cartwheel luster as well. Both sides are minimally toned with generous frost across the central devices. Population: 83 in 66 (6 in 66+) Prooflike, 1 finer (1/14). NGC ID# 254B, PCGS# 7135
- 4767 1882-O MS65 Prooflike PCGS Secure.** The design elements of this spectacular Gem are sharply detailed and richly frosted, while the fields are deeply reflective with a few hints of pale gold toning and some well-scattered minor contact marks. Population: 38 in 65 Prooflike, 2 finer (1/14). NGC ID# 254C, PCGS# 7137
- 4768 1882-O/S MS64 NGC. VAM-4.** A Top 100 Variety. The "O/S Recessed" VAM with a prominent diagonal portion of an S within the lower half of the New Orleans mintmark. This high-end example is splendidly preserved and displays light golden-gray toning. Struck from moderately rusted dies.  
Ex: *Richmond Collection, Part II* (David Lawrence, 11/2004), lot 1598.  
From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 254D, PCGS# 7138
- 4769 1883 MS66+ PCGS. CAC.** This high-end Premium Gem offers vibrant mint luster and well-detailed design elements, with well-preserved surfaces that show a few hints of greenish-gold toning at the rims. NGC ID# 254G, PCGS# 7142

#### 1883 Morgan Dollar, MS65+ Elusive Deep Mirror Prooflike Example

- 4770 1883 MS65+ Deep Mirror Prooflike PCGS. CAC.** The 1883 Morgan dollar is very scarce with Deep Mirror Prooflike surfaces. This high-end Gem displays sharply detailed design elements with a frosty texture that contrasts profoundly with the well-preserved reflective fields. Population: 87 in 65 (2 in 65+) Deep Mirror Prooflike, 9 finer (1/14). NGC ID# 254G, PCGS# 97143

- 4771 1883-CC MS66+ PCGS. VAM-5A.** Various interesting features of this VAM include a clashed N (from IN) near Liberty's neck. A nearly brilliant high grade Carson City type coin. Lustrous and sharply struck with an essentially pristine reverse. NGC ID# 254H, PCGS# 7144
- 4772 1883-CC MS66+ PCGS. CAC.** Soft but excellent cartwheel luster does much for this MS66+ piece's eye appeal. The obverse has extensive peach, violet, and blue patina, while the reverse is resolutely silver. NGC ID# 254H, PCGS# 7144
- 4773 1883-CC MS66+ PCGS. CAC.** A crisply struck and minimally toned Premium Gem that has sweeping luster and impressively smooth surfaces. The left reverse displays unobtrusive contact. A pleasing Carson City type coin. NGC ID# 254H, PCGS# 7144
- 4774 1883-CC MS66+ PCGS. CAC.** Sea-green, lilac, and peach encompass the reverse. The obverse has only a hint of peripheral golden toning. The reverse has the same die scratch on the right (facing) wing as VAM-5, but the obverse die differs. The 1 in the date is lightly doubled. NGC ID# 254H, PCGS# 7144
- 4775 1883-CC MS66+ PCGS. CAC.** Golden-brown, aquamarine, and rose-red toning illuminates generous portions of both sides. Lustrous and well preserved with a bold strike and exceptional eye appeal. NGC ID# 254H, PCGS# 7144
- 4776 1883-S MS62 NGC.** The 1883-S is a better early S-mint dollar that commands a significant premium in all grades. This is a brilliant example that shows bright mint luster (similar to its 1882-S predecessor) and is well-struck in the central regions. Minimally marked.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 254K, PCGS# 7148
- 4777 1883-S MS62 PCGS.** Essentially untoned surfaces exhibit a nearly unbroken luster flow and the design elements are sharply detailed throughout. Distributed light marks occur over each side. NGC ID# 254K, PCGS# 7148
- 4778 1883-S MS61 Prooflike ANACS.** The design elements of this Mint State Morgan dollar are sharply detailed and the fields are deeply reflective. A number of minor contact marks, mostly on the obverse, explains the grade.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 254K, PCGS# 7149
- 4779 1884 MS66 PCGS.** Thick and attractive rainbow toning enhances the sharply struck surfaces on both sides of this eye-catching Premium Gem. The surfaces display an amazing ensemble of variegated hues including orange, forest green, deep pink, magenta, azure blue, and gold. An amazing candidate for collectors of memorably toned coins. NGC ID# 254L, PCGS# 7150
- 4780 1884 MS66 PCGS. CAC.** A few hints of greenish-gold toning visit the peripheries of this delightful Premium Gem. The design elements are sharply detailed and the well-preserved surfaces radiate vibrant mint luster. NGC ID# 254L, PCGS# 7150
- 4781 1884-CC MS66 PCGS. CAC.** The 1884-CC was heavily represented in the GSA sales and is a favorite with mintmark type collectors. This delightful Premium Gem is sharply detailed and lustrous and the surfaces show subtle shades of pink and gold toning. NGC ID# 254M, PCGS# 7152

**1884-CC Morgan Dollar, MS67  
Silver-White, Untoned Surfaces**

- 4782 1884-CC MS67 NGC.** Blatant cartwheel luster and considerable, if undesigned, field-device contrast are hallmarks of this silver-white Superb Gem 1884-CC Morgan dollar, a piece tied with several dozen submissions at each service in this grade but all but unobtainable in a higher numeric grade. The surfaces are simply free of any post-Mint distractions and show great eye appeal. Some as-made light roller marks appear on the cheek. NGC shows only a single MS68 numerically finer (1/14). NGC ID# 254M, PCGS# 7152
- 4783 1884-CC MS66 Prooflike PCGS.** Boldly struck with shimmering, beautifully frosty surfaces that are nearly untuned, save for a few light splashes of apricot color. Notable field-motif contrast exists on both sides. Some wispy luster grazes fail to restrict the grade of this lovely Premium Gem. Population: 85 in 66 (1 in 66+) Prooflike, 1 finer (1/14). NGC ID# 254M, PCGS# 7153
- 4784 1884-O MS65 PCGS. CAC.** Spectacular shades of burnt-orange, jade, and violet toning blanket the lustrous well-preserved surfaces of the reverse, while the obverse remains mostly brilliant. NGC ID# 254N, PCGS# 7154
- 4785 1884-S AU58 NGC.** Significant portions of mint luster remain on each side, but the rich, multicolored toning makes it somewhat difficult to discern. Well-struck with only a couple of larger marks, this is an excellent near-Mint example of this conditionally elusive Morgan.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 254P, PCGS# 7156
- 4786 1884-S AU58 NGC.** This attractive near-Mint specimen shows just a trace of wear on the sharply detailed design elements and retains most of its original mint luster under shades of golden-brown and lavender-gray toning. NGC ID# 254P, PCGS# 7156
- 4787 1884-S AU58 PCGS.** This attractive near-Mint specimen shows just a trace of wear on the sharply detailed design elements and the lightly abraded surfaces retain almost all of their original mint luster. NGC ID# 254P, PCGS# 7156
- 4788 1885 MS66 PCGS.** Looking at the obverse of this coin, one might notice the ample luster and brilliant mint frost, along with just a hint of golden toning around the left edge. Turn the holder over, and without warning one is struck by the rich multicolored bag toning, showing areas of deep gold, maroon, and rich cobalt blue. This is an exceptional toned beauty with smooth surfaces every bit deserving of the Premium Gem grade. Worth a strong bid from the color specialist. NGC ID# 254R, PCGS# 7158
- 4789 1885 MS65 Deep Mirror Prooflike PCGS.** Formerly in an ANACS holder as MS65 DMPL, this coin is now in a PCGS holder and also graded MS65 Deep Mirror Prooflike. The mirrors are impressively reflective, with mint frost on the devices for excellent contrast. A scattering of tiny marks in the fields do not detract from the appeal of this Gem dollar, which displays a framing of orange-gold toning at the rims. NGC ID# 254R, PCGS# 97159
- 4790 1885-CC MS66 PCGS.** The obverse has a broad swath of gold, peach, and blue-to-violet patina, while the reverse is broadly lustrous and near-silver. Excellent detail. NGC ID# 254S, PCGS# 7160

**4791 1885-CC MS66 PCGS.** This crisply struck Carson City Morgan provides pleasing luster and has only a glimpse of sun-gold toning. No marks are consequential. A favorite collector issue since the GSA auctions of the 1970s. NGC ID# 254S, PCGS# 7160

**4792 1885-CC MS66 PCGS.** A sharply detailed Premium Gem from a mintage of 228,000 pieces, this coin displays vibrant mint luster and well-preserved brilliant surfaces with outstanding eye appeal. PCGS has graded 55 numerically finer examples (1/14). NGC ID# 254S, PCGS# 7160

**1885-CC Morgan Dollar, MS66+  
Very Scarce Any Finer**

**4793 1885-CC MS66+ PCGS.** The 1885-CC Morgan dollar claims a small mintage of 228,000 pieces, but the issue was well-represented in the GSA sales of the 1970s. This delightful Premium Gem displays sharply detailed frosty design elements with vibrant mint luster and well-preserved brilliant surfaces. PCGS has graded 55 numerically finer examples (1/14). NGC ID# 254S, PCGS# 7160

**4794 1885-CC MS66 PCGS. CAC.** Attractive hints of sea-green, lavender, and turquoise toning visit the surfaces of this delightful Premium Gem, with vibrant mint luster and sharply detailed design elements throughout. NGC ID# 254S, PCGS# 7160

**1885-CC Morgan Dollar, MS66  
Low-Mintage Carson City Issue**

**4795 1885-CC MS66 PCGS. CAC.** Vivid crescents of lime-green and violet toning visit the peripheries of this delightful Premium Gem. The design elements are sharply detailed and the well-preserved surfaces show no mentionable distractions. This coin possesses outstanding eye appeal to complement the high technical grade. NGC ID# 254S, PCGS# 7160

**4796 1885-CC MS64+ Deep Mirror Prooflike PCGS.** Remarkable field reflectivity provides contrast with the evenly frosted motifs. The eye appeal is imposing, and the grade is only limited by occasional moderate marks.  
*Ex: Houston Signature (Heritage, 12/2010), lot 3921. NGC ID# 254S, PCGS# 97161*

**4797 1885-O MS65 PCGS. CAC.** This well-detailed Gem Morgan dollar is richly patinated on the reverse, with vivid shades of emerald-green and violet toning that create a dazzling play of colors. Frosty mint luster is evident on both sides. NGC ID# 254T, PCGS# 7162

**4798 1885-O MS67 PCGS.** Frosted on portrait and eagle with cartwheel luster around. Occasional hints of cloud-white and gold-gray visit the shimmering silver surfaces. NGC ID# 254T, PCGS# 7162

**1885-O Morgan Dollar, MS66 Deep Mirror Prooflike  
An Impressive, Conditionally Rare Example**

**4799 1885-O MS66 Deep Mirror Prooflike PCGS.** Ten die pairs were employed to manufacture the 1885-O Morgan dollars, which saw a total mintage of 9,185,000 coins or nearly one million pieces per die pair! Dave Bowers advises cherrypicking for buyers of this New Orleans date, based upon disparities in strike and luster quality. The current example is well-struck and offers profound field-to-device contrast on both sides. With terrific preservation and rare eye appeal, this essentially brilliant example will impress even the most knowledgeable specialist. Population: 38 in 66 Deep Mirror Prooflike, 1 finer (1/14). NGC ID# 254T, PCGS# 97163

**4800 1885-S MS65 PCGS.** The obverse is prooflike and the reverse is semiprooflike, factors that augment the eye appeal of this boldly struck silver dollar. Glimpses of tan-gold toning grace both sides. NGC ID# 254U, PCGS# 7164

**4801 1885-S MS65+ PCGS.** Frosty silver over most of each side with gold-orange elements at the upper right reverse. Detail is above-average for the date and the surfaces are smooth. NGC ID# 254U, PCGS# 7164

**1885-S Morgan Dollar, MS65+  
Lightly Toned Lustrous Surfaces**

**4802 1885-S MS65+ PCGS. CAC.** This high-end Gem Morgan dollar displays well-detailed design elements with just a touch of softness on the hair above the ear. The well-preserved lustrous surfaces show hints of sea-green toning at the rims, with few signs of contact. PCGS has graded 34 numerically finer examples (1/14). NGC ID# 254U, PCGS# 7164

**4803 1886 MS67 PCGS.** Pale silver luster through the centers with touches of reddish-gold and blue at the margins. Detail on the eagle is excellent. Struck from lightly clashed dies. NGC ID# 254V, PCGS# 7166

**4804 1886 MS67 ★ NGC.** The colorful obverse has green-to-gold patina with a small section of violet and blue at the extreme left margin. The reverse is minimally toned but has strong cartwheel luster. NGC ID# 254V, PCGS# 7166

- 4805 1886-O MS61 PCGS.** The brilliant surfaces are surprisingly bright in the fields, semiprooflike many would say, and the strike is slightly above average. Numerous small, but individually insignificant abrasions are mostly seen on the obverse. NGC ID# 254W, PCGS# 7168
- 4806 1886-O MS61 PCGS Secure.** This attractive Mint State Morgan dollar offers well-struck design elements, with a touch of softness on the hair above the ear, and lustrous lightly marked surfaces that show traces of pink and golden-tan toning. NGC ID# 254W, PCGS# 7168
- 4807 1886-O MS62 PCGS.** Faint golden tinges and a handful of deeper brown dots visit the margins on each side. Luster cartwheels appear at certain angles to the light. Numerous fine abrasions on the portrait contribute to the grade. NGC ID# 254W, PCGS# 7168
- 4808 1886-O MS62 PCGS.** This impressive MS62 Morgan dollar exhibits sharply detailed design elements, an attribute not often associated with O-mint products. The lightly marked surfaces are lustrous and appealing. NGC ID# 254W, PCGS# 7168

### 1886-O Morgan Dollar, MS63 Challenging Issue in High Grade

- 4809 1886-O MS63 PCGS.** The 1896-O Morgan dollar is one of the most challenging dates of the series in high grade. Most examples were released into circulation near the time of issue and many more were probably melted in 1918 under the provisions of the Pittman Act. This well-detailed Select example displays vibrant mint luster under vivid shades of sea-green, purple, and amber toning. NGC ID# 254W, PCGS# 7168
- 4810 1886-S MS64 PCGS. CAC.** Glimmering cartwheel luster defines the eye appeal of this minimally toned near-Gem. Small scrapes at Liberty's chin and neck contribute to the grade. NGC ID# 254X, PCGS# 7170
- 4811 1886-S MS65 PCGS.** The 1886-S Morgan dollar is a challenging issue in high grade, from a small mintage of 750,000 pieces. This well-detailed Gem exhibits vibrant mint luster under shades of greenish-gold and bluish-gray toning. PCGS has graded 40 numerically finer examples (1/14). NGC ID# 254X, PCGS# 7170
- 4812 1886-S MS66+ PCGS.** Sharply detailed design elements and vibrant mint luster are the calling cards of this high-end Premium Gem, with virtually pristine surfaces that show a few accents of pale gold toning. Population: 36 in 66 (2 in 66+), 4 finer (1/14). NGC ID# 254X, PCGS# 7170
- 4813 1887 MS67 PCGS.** A lustrous, sharply struck Superb Gem representative, this piece is largely brilliant and untuned save for portions of the outer edges. The toning includes hues of golden-orange, teal, yellow, and hints of red. Population: 96 in 67, 1 finer (1/14). NGC ID# 254Y, PCGS# 7172
- 4814 1887 MS67 PCGS.** The brilliant surfaces of this well-preserved Superb Gem show no mentionable defects and radiate vibrant mint luster. Sharply detailed design elements add to the outstanding eye appeal. Population: 97 in 67, 1 finer (1/14). NGC ID# 254Y, PCGS# 7172
- 4815 1887/6-O MS63 PCGS. VAM-3.** A Top 100 Variety. A remnant of the base of a 6 shows to the lower right of the 7. Lustrous and essentially untuned surfaces reveal a smooth reverse and grade-consistent obverse marks. Well impressed save for the centers. *Ex: Long Beach Signature (Heritage, 2/2010), lot 605, which realized \$2,535.75. NGC ID# 2553, PCGS# 7178*

- 4816 1887/6-O MS63+ PCGS. VAM-3.** A Top 100 Variety. Almond-gold patina visits this lustrous and nicely preserved Select silver dollar overdate. Customary for the issue, the centers show moderate blending of detail. NGC ID# 2553, PCGS# 7178
- 4817 1887-O MS65 ANACS.** A spectacular Gem, with sharply detailed design elements and lustrous well-preserved surfaces that show hints of greenish-gold and pink toning. Eye appeal is terrific. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2552, PCGS# 7176*
- 4818 1887-O MS65 ANACS.** Shades of greenish-gold and violet toning enliven the well-preserved surfaces of this spectacular Gem, with most of the toning on the obverse. The design elements are sharply detailed and vibrant mint luster shines through the toning. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2552, PCGS# 7176*
- 4819 1887-S MS64+ PCGS. CAC.** Frosted over the high points with booming cartwheel luster around. Light reed marks below the E in E PLURIBUS UNUM keep this coin just shy of a Gem grade, though the MS64+ designation and CAC label attest to the coin's quality. NGC ID# 2554, PCGS# 7180

- 4820 1887-S MS65 PCGS.** A virtually stone-white Gem with blazing cartwheel luster and a pleasing strike. The fields are beautifully devoid of contact, and the portrait displays only faint grazes. The 1887-S is a common sight in circulated grades, but Uncirculated examples are somewhat scarce and generally encountered in MS62 through MS64. NGC ID# 2554, PCGS# 7180

- 4821 1887-S/S MS64 PCGS. CAC. VAM-2.** A Top 100 Variety. The upper serif of an additional S is obvious within the curve of the prominent S. This popular VAM comprises a reasonable percentage of Uncirculated 1887-S dollars, but any near-Gem of this scarce issue is both scarce and desirable. Brilliant and well struck with dynamic luster and clean fields. PCGS# 133915

### 1887-S/S Dollar, MS65 VAM-2, Top 100 Variety

- 4822 1887-S/S MS65 PCGS. CAC. VAM-2.** A Top 100 Variety. The mintmark is clearly repunched within the loops. The variety is also noteworthy for "extra metal" at the dentils beneath the DO in DOLLAR, caused by unknown damage to the reverse die, perhaps during its lengthy rail journey from Philadelphia to San Francisco. Lightly toned and crisply struck with booming luster and unabraded fields. *Ex: Baltimore Signature (Heritage, 3/2009), lot 1347, which realized \$2,530. PCGS# 133915*
- 4823 1888 MS66+ PCGS. CAC.** Light silver overall with a modest cartwheel effect. Glimpses of gold-orange appear at the margins. Only a small cut on the lower cheek precludes an even finer designation. NGC ID# 2555, PCGS# 7182
- 4824 1888-O MS66 PCGS.** Typically seen with a flat strike, this 1888-O is a refreshing departure with a full strike in evidence. Liberty's cheek is clean with just a whisper of almond-gray tone; otherwise, the coin is silver-white and brilliant. A virtually unabraded and lustrous Premium Gem, PCGS hasn't certified any example of this date in a higher numerical grade (1/14). NGC ID# 2556, PCGS# 7184
- 4825 1888-O MS66 PCGS.** This spectacular Premium Gem offers sharply detailed design elements and vibrant mint luster, with well-preserved brilliant surfaces. PCGS has graded no coins in higher numeric grades (1/14). NGC ID# 2556, PCGS# 7184

**4826 1888-O Doubled Die Obverse, Hot Lips AU53 PCGS. VAM-4.** A Top 100 Variety. The famous "Hot Lips" VAM with prominent die doubling on Liberty's profile. This VAM is imaged on page 228 of the 2014 *Guide Book*. Lightly toned and moderately abraded with ample luster. Population: 39 in 53, 62 finer (1/14). PCGS# 7308

**4827 1888-S MS64 PCGS. CAC.** Vivid shades of green, gray, violet, and burnt-orange toning blanket the surfaces of this attractive Choice example, with most of the toning on the reverse. The design elements are well-detailed and frosty luster shines through the patina. NGC ID# 2557, PCGS# 7186

**4828 1888-S MS64 NGC. CAC.** Blushes of golden-brown toning grace the margins of this well struck and highly lustrous better date near-Gem. The fields are smooth and the cheek displays only wispy contact. Certified in a former generation holder. NGC ID# 2557, PCGS# 7186

**4829 1888-S MS65 PCGS.** The 1888-S Morgan dollar is prized for its low mintage of 657,000 pieces. This spectacular Gem is well-detailed and brightly lustrous. PCGS has graded 25 numerically finer examples (1/14). NGC ID# 2557, PCGS# 7186

**4830 1889 MS66 PCGS.** Well-defined with a great original "skin" that includes bold silver and occasional cloud-white patina. This well struck Premium Gem also shows minor green-gold elements at the rims. PCGS has certified just four coins finer (1/14). NGC ID# 2558, PCGS# 7188

#### 1889 Morgan Dollar, MS65 Rare Deep Mirror Prooflike Specimen

**4831 1889 MS65 Deep Mirror Prooflike PCGS.** The 1889 Morgan dollar was produced in huge numbers, but examples with prooflike surfaces are quite elusive. This delightful Gem displays well-detailed frosty design elements that contrast boldly with the deeply reflective fields. A few minor contact marks in the fields do not detract from the outstanding eye appeal. Population: 34 in 65 Deep Mirror Prooflike, 3 finer (1/14). NGC ID# 2558, PCGS# 97189

**4832 1889-CC VF25 NGC.** A VF25 example of the rarest Carson City Morgan, with Liberty's ear well-defined and much interior hair detail still intact. No large or distracting abrasions are evident. NGC ID# 2559, PCGS# 7190

**4833 1889-CC — Cleaned — ANACS. XF Details, Net VF30.** This key date Carson City Morgan is somewhat bright but more than acceptable for many collectors of the series. The breast feathers are worn although the wings are richly detailed.

**4834 1889-CC — Improperly Cleaned — NGC Details. XF.** This stone-gray key date Carson City dollar displays glints of luster within the borders and motifs. Somewhat dull but nonetheless desirable to many collectors. No marks merit mention except for a small reverse rim nick at 2 o'clock. NGC ID# 2559, PCGS# 7190

#### 1889-CC Dollar, Lightly Toned AU50

**4835 1889-CC AU50 ANACS.** A lovely AU example of this important key date in the Morgan dollar series, this piece resides in an older ANACS holder. The satiny surfaces reveal only modest high-point wear, and a slight dusting of golden-tan patina on each side. Liberty's cheek is remarkably smooth, and the coin's surfaces are minimally marked for the grade.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2559, PCGS# 7190*

**4836 1889-CC — Improperly Cleaned — NGC Details. AU.** A faintly hairlined stone-gray and powder-blue representative of the coveted Carson City key. Luster brightens the borders, wings, and curls. Marks are trivial aside from a small reverse rim nick at 9 o'clock. NGC ID# 2559, PCGS# 7190

**4837 1889-O MS64+ PCGS.** Pale silver overall with the faintest hint of golden color visiting parts of the reverse fields. A shallow scrape at the back of Liberty's jawline leaves the piece just shy of Gem status. NGC ID# 255A, PCGS# 7192

**4838 1889-O MS64 NGC. CAC.** An attractive Choice Morgan dollar, with well-detailed design elements and lustrous surfaces that show few signs of contact. A few hints of pink toning add to the considerable eye appeal. NGC ID# 255A, PCGS# 7192

**4839 1889-S MS65 PCGS.** Ebullient luster endows both sides of this appropriately struck Gem. Essentially untoned and revealing just few grade-consistent marks. The '89-S becomes difficult to acquire any finer. NGC ID# 255B, PCGS# 7194

**4840 1890 MS65 PCGS.** Scintillating luster across untuned surfaces. Without the aid of magnification we find no distractions worthy of mention. Overall, this specimen exhibits the qualities of a coin grading even finer. PCGS has graded only one numerically finer example (1/14). NGC ID# 255C, PCGS# 7196

#### 1890-CC Morgan Dollar, MS64 Popular Tail Bar, VAM-4 Variety

**4841 1890-CC Tail Bar MS64 PCGS. VAM-4.** A Top 100 Variety. This coin represents the popular VAM-4 variety discovered by Melvin Carmichael in 1951, with an enormous die gouge connecting the eagle's tailfeathers with the wreath. This attractive Choice example displays well-detailed design elements and vibrant mint luster throughout. Population: 83 in 64 (2 in 64+), 4 finer (1/14). PCGS# 87198

**4842 1890-CC MS64 PCGS. VAM-5A.** The second C in the mintmark is repunched. Both sides exhibit many peripheral cracks. Light tan toning visits this lustrous and lightly abraded Choice Carson City dollar. Ex: Boston ANA (*Heritage*, 8/2010), lot 10382, which realized \$977.50. NGC ID# 255D, PCGS# 7198

**4843 1890-CC MS64+ PCGS.** Delicately frosted devices have intricate detail. The surrounding fields are almost entirely silver-white with just a touch of golden-brown near the rims. NGC ID# 255D, PCGS# 7198

**4844 1890-CC MS64 PCGS. CAC.** Bright silver with a frosty character. This later-date Carson City dollar is well-defined and offers generous eye appeal. A few small, faint toning spots are noted. NGC ID# 255D, PCGS# 7198

#### 1890-CC Morgan Dollar, MS65 Rare Any Finer

**4845 1890-CC MS65 NGC.** The 1890-CC Morgan dollar is a scarce issue in MS65 condition, and finer examples are prime condition rarities. This attractive Gem exhibits sharply detailed design elements and well-preserved lustrous surfaces with a few hints of golden-tan toning. Census: 89 in 65, 2 finer (1/14). NGC ID# 255D, PCGS# 7198

**4846 1890-O MS65 PCGS.** This impressive Gem exhibits the well-detailed design elements usually seen on New Orleans Mint examples from this era, with vibrant mint luster and strong eye appeal. PCGS has graded 20 numerically finer examples (1/14). NGC ID# 255E, PCGS# 7200

#### 1890-O Morgan Dollar, MS65+ Partially Prooflike Surfaces

**4847 1890-O MS65+ PCGS. CAC.** Despite a large mintage of 10.7 million pieces, the 1890-O Morgan dollar is rare in Premium Gem condition, making this high-end Gem a good balance of quality and value. The design elements are well-detailed and the well-preserved surfaces show prooflike reflectivity in many areas. NGC ID# 255E, PCGS# 7200

**4848 1890-O MS64 Deep Mirror Prooflike PCGS.** Both sides are clearly reflective around thickly frosted devices. Surfaces are largely silver aside from a few reddish-violet spots on the eagle's breast. NGC ID# 255E, PCGS# 97201

**4849 1890-O MS64 Deep Mirror Prooflike PCGS.** The design elements of this delightful Choice Morgan dollar are sharply detailed throughout and the fields are deeply reflective, with scattered minor hairlines and contact marks. PCGS has graded 18 numerically finer examples (1/14). NGC ID# 255E, PCGS# 97201

#### 1890-S Morgan Dollar, MS66 Well-Preserved and Naturally Toned

**4850 1890-S MS66 PCGS Secure. CAC.** Ex: Simpson. Lavender and golden-brown embrace the margins and visit the centers. This sharply struck Premium Gem has exemplary luster and an essentially pristine reverse. The obverse field is also nearly immaculate, and even Liberty's cheek has only trivial grazes. As of (1/14), PCGS has certified just six pieces in higher grades. Ex: *Long Beach Signature* (Heritage, 6/2010), lot 1134. NGC ID# 255F, PCGS# 7202

**4851 1891 MS64 PCGS.** This attractive well-detailed Morgan dollar displays vibrant mint luster and the pleasing surfaces show few signs of contact. An odd pattern of sea-green toning is evident on the lower-left obverse. NGC ID# 255G, PCGS# 7204

**4852 1891 MS64+ PCGS.** A high-end Choice example of this popular date, with sharply detailed design elements and vibrant cartwheel mint luster. The brilliant surfaces show only minor signs of contact. NGC ID# 255G, PCGS# 7204

**4853 1891 MS64 PCGS. CAC.** Broad silver luster with touches of reddish-orange and violet at the margins. A small cut is noted just to the left of Liberty's chin. NGC ID# 255G, PCGS# 7204

**4854 1891 MS64+ PCGS. CAC.** Delicate almond-gold toning visits this otherwise brilliant near-Gem. The strike is good and the lustrous surfaces are minimally marked. The 1891 is common in typical Mint State but comparatively scarce in the present grade. NGC ID# 255G, PCGS# 7204

**4855 1891-CC MS64 PCGS.** Extensively toned on the obverse with a mix of gold, rose, and blue hues. The reverse has briefer coverage but in the same dusky hues. Generous underlying cartwheel luster. NGC ID# 255H, PCGS# 7206

**4856 1891-CC MS64 PCGS. VAM-3.** A Top 100 Variety. The familiar "Spitting Eagle" variety, also interesting for its repunched mintmark. A lustrous near-Gem with a good strike and uncommonly smooth fields. Brilliant aside from a few tiny brown spots on the reverse. Ex: *Long Beach Signature* (Heritage, 6/2010), lot 1140, which realized \$977.50. NGC ID# 255H, PCGS# 7206

**4857 1891-CC MS64 NGC. VAM-3.** A Top 100 Variety. A brilliant Choice dollar with booming luster and a nearly pristine reverse. The cheek and right obverse field display minor grazes. The centers and claws show slight incompleteness of strike. NGC ID# 255H, PCGS# 7206

**4858 1891-CC MS64 PCGS. CAC.** An impressive Choice specimen, with vibrant mint luster and sharply detailed design elements, the surfaces show a few minor contact marks and hints of greenish-gold toning at the rims. NGC ID# 255H, PCGS# 7206

**1891-CC Morgan Dollar, MS65  
Seldom Available Finer**

**4859 1891-CC MS65 PCGS.** This issue is available up to MS65 condition, but it is rare any finer. Most Uncirculated Carson City dollars spent time in transit, and most were moved several times during many years in storage. Each time, previously unmarked coins acquired abrasions from coin-to-coin contact — one of the reasons few coins survived in high grades. This example shows only a few small abrasions and a small grease mark appears near Liberty's chin. Otherwise, it is brilliant and lustrous with few flaws. A strong strike is evident on the frosted devices. The coin is untoned except for a touch of gold at star 2. NGC ID# 255H, PCGS# 7206

**4860 1891-CC MS64+ Prooflike PCGS. CAC.** Blatant field reflectivity brings attention to this sharply struck and essentially brilliant Carson City dollar. Well preserved aside from unobtrusive marks on the portrait. NGC ID# 255H, PCGS# 7207

**4861 1891-S MS65+ PCGS Secure. CAC.** Gold, orange, blue, and violet shadings form the subdued border toning, which contrasts with the lively silver luster of the centers. Well-defined and carefully preserved by Gem standards. NGC ID# 255K, PCGS# 7210

**1891-S Dollar, MS65+ Prooflike  
Conditionally Rare**

**4862 1891-S MS65+ Prooflike PCGS.** According to Dave Bowers' *Guide Book of Morgan Dollars*: "The 1891-S is usually seen well struck, lustrous, and with a generous measure of eye appeal—a Morgan dollar as a Morgan dollar should be." This coin is no exception to Bowers' description, with well-detailed motifs and an unmistakably high degree of visual allure. In addition, this Gem example offers dynamically Prooflike surfaces, a rare attribute for coins from this San Francisco Mint issue. Population: 26 in 65 (2 in 65+) Prooflike, 1 finer (1/14). NGC ID# 255K, PCGS# 7211

**4863 1892 MS64 PCGS.** Each side is brilliant and each exhibits the bright, softly frosted luster this issue is known for. A trait this issue is also known for is incompleteness of high-point detail. Seen here, it is better than most. Minimally abraded. NGC ID# 255L, PCGS# 7212

**4864 1892 MS64 PCGS. CAC.** This attractive Choice Morgan dollar exhibits well-detailed design elements that show a trace of softness on the hair above the ear and the eagle's breast. The surfaces are lightly marked and brightly lustrous. NGC ID# 255L, PCGS# 7212

**4865 1892-CC — Improperly Cleaned — NGC Details. Unc.** A sharply struck and untuned representative of this scarcer Carson City issue. No hairlines are evident and bagmarks are minimal. Liberty's cheek and neck are moderately granular and the cartwheel luster is subdued. NGC ID# 255M, PCGS# 7214

**4866 1892-CC MS63 PCGS. CAC.** Shades of sea-green and lavender toning visit the surfaces of this pleasing Select example, with sharply detailed design elements and vibrant mint luster. A few minor contact marks are evident on both sides. NGC ID# 255M, PCGS# 7214

**1892-CC Morgan Dollar, MS64  
Preferred Grade for Collectors**

**4867 1892-CC MS64 PCGS.** A whisper of reddish-gold toning invades the margins of this otherwise frosty-white Carson City dollar. A somewhat soft strike is seen above Liberty's ear and on the eagle's breast, with thick mint frost prominent in those areas as well. The coin displays smooth fields and a clean cheek, with plentiful, cartwheel mint luster. The 1892-CC takes a big jump in price any finer, so many collectors prefer high-quality, near-Gem examples such as this. NGC ID# 255M, PCGS# 7214

**4868 1892-O MS64 PCGS.** This well-detailed Choice Morgan dollar shows a touch of softness on the hair above the ear and the eagle's breast. The lustrous surfaces are brilliant and lightly marked. NGC ID# 255N, PCGS# 7216

**4869 1892-O MS64 PCGS.** This well-detailed Choice example shows a touch of softness on the hair above the ear. The well-preserved surfaces radiate vibrant mint luster and hints of greenish-gold toning visit the peripheries. NGC ID# 255N, PCGS# 7216

**4870 1892-O MS64 PCGS Secure.** Some slight softness is apparent on the central devices of this attractive near-Gem specimen, as usually seen on the 1892-O, but the surfaces are lustrous and eye appeal is compelling. Q. David Bowers considers MS64 the Optimal Collecting Grade for this issue. NGC ID# 255N, PCGS# 7216

**4871 1892-S AU53 NGC.** Lightly rubbed across the high points with diffusely reflective silver-white surfaces that show touches of peripheral gold. A shallow pincscratch below Liberty's chin contributes to the grade. NGC ID# 255P, PCGS# 7218

**4872 1892-S AU53 NGC.** Mostly brilliant with just a hint of light yellow-gold peripheral color, noticeable portions of mint luster can be seen surrounding the devices. The only detractions worthy of note are a linear strike-through on the lower portion of Liberty's cheek and several spots scattered across the lower part of the obverse. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 255P, PCGS# 7218

**1892-S Morgan Dollar, AU55  
Choice for the Grade**

- 4873 1892-S AU55 NGC.** Writing in the third edition of his *A Buyer's Guide to Silver Dollars & Trade Dollars of the United States*, Bowers notes that: "Many if not most were placed into circulation within a decade or two of striking. The 1892-S is common in worn grades but is very rare in true Mint State."

This situation has prompted many collectors to seek an example in AU, such as the current offering, rather than pursue a rare and pricey Uncirculated coin. This piece should attract favorable notice, as it has finer-than-expected eye appeal and technical quality for the grade. Well-defined and essentially untuned with considerable mint luster still evident.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255P, PCGS# 7218*

- 4874 1892-S — Scratched — ANACS. AU58 Details.** An untuned and partly lustrous example of the conditionally rare 1892-S. The strike is good and the eye appeal is attractive for the near-Mint level. Despite the ANACS disclaimer, no marks merit individual description.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255P, PCGS# 7218*

- 4875 1893 MS62 PCGS. VAM-3.** The 3 is repunched north. Liberty's chin and the upper reverse legends show minor die doubling. This low mintage and conservatively graded example has dynamic luster and a glimpse of golden toning. Housed in a first generation holder. NGC ID# 255R, PCGS# 7220

- 4876 1893 MS63 NGC.** Though not so famous as the S-mint Morgan of the same year, the 1893-P has a low mintage of fewer than 400,000 coins. This Select example is colorful with a mix of gold-gray, lemon, peach, and plum hues over bold cartwheel luster.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255R, PCGS# 7220*

**1893 Morgan Dollar, MS64+  
Low-Mintage Philadelphia Issue**

- 4877 1893 MS64+ PCGS.** The 1893 Morgan dollar is always popular because of its low mintage of 389,000 pieces. This high-end Choice specimen possesses a bold strike and vibrant mint luster, with outstanding eye appeal. The well-preserved brilliant surfaces show a linear streak of sea-green toning on the reverse. NGC ID# 255R, PCGS# 7220

**1893 Morgan Dollar, MS64  
Low-Mintage Philadelphia Issue**

- 4878 1893 MS64 PCGS. CAC.** The 1893 Philadelphia Morgan dollar is often overshadowed by its San Francisco counterpart, but it claims a memorably low mintage of 389,000 pieces and is always in demand from series specialists. This sharply detailed Choice example offers lustrous brilliant surfaces with few signs of contact. NGC ID# 255R, PCGS# 7220

- 4879 1893-CC XF45 NGC.** A lightly worn Choice XF specimen of the final Carson City Morgan dollar, Liberty's ear is bold and much interior detail remains intact on the hair. No large or distracting abrasions are present. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, MS62  
The Final CC Dollar**

- 4880 1893-CC MS62 PCGS. CAC.** The 1893-CC Morgan is the last of the Carson city Mint dollars. Soft golden-brown patination visits the lustrous surfaces of this MS62 example. The design elements are typically struck in that the eagle's breast is soft. Somewhat better definition is noted in the hair above Liberty's ear, however. Scattered marks are within the confines of the grade. NGC ID# 255S, PCGS# 7222

- 4881 1893-O AU53 PCGS.** The 1893-O claims the lowest mintage of any Morgan dollar from the New Orleans Mint, at 300,000 pieces. This lightly circulated AU53 example displays lustrous surfaces with hints of greenish-gold toning.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255T, PCGS# 7224*

- 4882 1893-O AU53 NGC.** A lightly circulated example of this low-mintage branch mint issue, with a touch of wear on the hair left of the forehead and the eagle's breast. No large or distracting abrasions are evident. NGC ID# 255T, PCGS# 7224

- 4883 1893-O AU58 ANACS.** Softly struck but broadly lustrous with only a trace of wear on its pale pearl-gray surfaces. Hints of gold-orange color visit the obverse rim.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255T, PCGS# 7224*

- 4884 1893-S AG3 NGC.** Deep peach-gray and slate-blue toning overall. Though the rims show merging and a sizable bump below the first L in DOLLAR, this coin remains highly recognizable and just as desirable. NGC ID# 255U, PCGS# 7226

**4885 1893-S — Reverse Rim Damaged — ANACS. VF Details, Net VG8.** The reverse has rim dings at 3 o'clock, 6 o'clock, and 10:30. A lesser rim nick is noted at 12:30. All legends are bold on this lavender-gray and steel-blue key date silver dollar. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255U, PCGS# 7226*

**4886 1893-S — Improperly Cleaned — NGC Details. VG.** The cream-gray motifs and fields are framed by peripheral walnut-brown and cobalt-blue. This key date silver dollar displays parallel hairlines but marks are minor except for a small dig beneath the eagle's beak. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255U, PCGS# 7226*

---

**1893-S Morgan Dollar, VG8  
Famous Low-Mintage Key**

**4887 1893-S VG8 NGC.** From a series-low mintage of 100,000 pieces, the 1893-S Morgan dollar is usually seen in lower circulated grades, and even well worn specimens are always in demand among series enthusiasts. The present coin shows even wear on all design elements, with problem-free, silver-gray surfaces. NGC ID# 255U, PCGS# 7226

---

**1893-S Morgan Dollar, VG10  
Sought-After, Key Date**

**4888 1893-S VG10 PCGS. CAC.** The low-mintage king of the regular-issue Morgan dollar series, the 1893-S is on the want list of every Morgan dollar collector. The present coin displays even wear over all surfaces, with no major distractions, and much original detail remaining. The surfaces exhibit light gray patina, with wisps of champagne toning. *Ex: Houston Signature (Heritage, 12/2010), lot 3987. NGC ID# 255U, PCGS# 7226*

---

**1893-S Morgan Dollar, VF Details  
Important Series Key**

**4889 1893-S — Damaged, Cleaned — ANACS. VF Details, Net Fine 12.** This still-attractive specimen of the most sought-after date in the Morgan dollar series shows a number of small dents around the obverse rim and the surfaces show signs of a long-ago cleaning. Much interior detail remains intact on the devices, with Liberty's ear well-formed and 70% of the hairlines still evident. The surfaces show a scattering of minor abrasions and shades of sea-green, turquoise, and lavender-gray toning. NGC ID# 255U, PCGS# 7226

---

**1893-S Dollar, Choice Fine  
Famous West Coast Rarity**

**4890 1893-S Fine 15 PCGS.** Cream-gray and powder-blue toning encompass this collector's example of the famous key date '93-S. Nicely defined, and the only consequential abrasions are concealed near LIBERTY and within Liberty's hair. Fine 15 is the median grade for the issue at both NGC and PCGS. Certified in a green label holder. NGC ID# 255U, PCGS# 7226

---

**1893-S Dollar, XF Sharpness**

**4891 1893-S — Cleaning — PCGS Genuine. XF Details.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been Cleaned and Retoned. The hair above the ear shows moderate wear, but this key date silver dollar is sharper than most examples. It is toned deep gunmetal-blue and plum-mauve with a dab of dark gray on the eagle's breast. Hairlined beneath the toning, a few marks are noted on Liberty's cheek and chin. NGC ID# 255U, PCGS# 7226

- 4892 1894 VF25 NGC. CAC.** The 1894 Morgan dollar boasts one of the lowest mintages of the series, leading to the desirability of representatives at any grade level. A few hints of gold appear on this circulated example displaying overall even wear and gunmetal-gray color. There are no surface marks worthy of individual mention. NGC ID# 255V, PCGS# 7228
- 4893 1894 XF45 ANACS.** Even wear across both sides of this better Philadelphia issue, with small portions of mint luster still evident surrounding the devices. Even gray patina deepens to patchy portions of golden-russet around the rims.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228*
- 4894 1894 — Improperly Cleaned — NGC Details. AU.** Light golden-tan toning graces the borders of this partly lustrous and nicely struck representative. Minor hairlines confirm an inoffensive cleaning. The key to a business strike collection of Philadelphia Mint Morgan dollars. NGC ID# 255V, PCGS# 7228
- 4895 1894 AU50 ANACS.** The pearl-gray surfaces exhibit nice traces of luster around the devices. There is just a bit of peripheral color present and there are no abrasions worthy of mention. A scarce and much-needed issue for Morgan dollar collectors.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228*
- 4896 1894 AU53 NGC.** From a mintage of 110,000 pieces, this attractive AU53 Morgan dollar shows just a trace of wear on the well-detailed design elements. The lightly abraded surfaces are lustrous and pleasingly patinated in shades of golden-tan and lavender-gray.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228*
- 4897 1894 AU55 ANACS.** At just 110,000 business strikes produced the 1894 dollar is among the more popular series keys. This Choice AU representative has a number of wispy abrasions on its pale silver surfaces but little actual wear.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228*
- 4898 1894 AU58 NGC.** A modestly rubbed example of this popular and low-mintage Philadelphia issue. Little wear, though a number of abrasions are visible on the lower part of Liberty's jaw.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255V, PCGS# 7228*
- 4899 1894-O MS62 NGC.** This pleasing dollar has delicate champagne centers with lovely peripheral blue, gold, and iridescent toning. The strike is well above average.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255W, PCGS# 7230*

**1894-O Morgan Dollar, MS63  
Attractive Toning and Luster**

- 4900 1894-O MS63 PCGS.** Attractive shades of violet and greenish-gold toning visit the peripheries of this impressive Select Morgan dollar, while the centers remain essentially brilliant. The design elements are well-detailed and the pleasing surfaces show only a few minor contact marks. Vibrant mint luster adds to the strong eye appeal. NGC ID# 255W, PCGS# 7230

- 4901 1894-S MS62 NGC.** Generally light silver with touches of gold-orange and violet along parts of the margins. Cartwheel luster is flashy, especially on the obverse. NGC ID# 255X, PCGS# 7232
- 4902 1894-S MS63+ NGC.** Gold-to-gray overall with a stripe of deeper violet just right-of-center on the reverse. Creamy cartwheel luster lends generous eye appeal. NGC ID# 255X, PCGS# 7232
- 4903 1894-S MS64 PCGS.** The lustrous, untuned surfaces of this attractive near-Gem exhibit relatively well-detailed design elements. A few scattered light marks deny Gem classification.  
*Ex: Long Beach Signature (Heritage, 9/2009), lot 1157. NGC ID# 255X, PCGS# 7232*
- 4904 1894-S MS64 PCGS.** A few wisps of light gold are the only color occurring on the highly lustrous surfaces of this adequately struck S-mint representative. Some minute marks preclude Gem status. NGC ID# 255X, PCGS# 7232
- 4905 1895-O AU50 PCGS.** A brilliant example of this key New Orleans issue. Luster illuminates the peripheries and though the centers are lightly impressed, circulation wear is minimal. No marks have singular relevance. Encased in an old green label holder.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255Y, PCGS# 7236*
- 4906 1895-O AU50 ANACS.** Numerous small- to medium-sized abrasions are scattered over each side. Still, good amounts of mint luster remain surrounding the devices, and there is deeper golden-rose and violet shadings around the margins. A more affordable way to own this scarce, semikey Morgan.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 255Y, PCGS# 7236*
- 4907 1895-O AU55 NGC.** Only a faint golden overtone visits the otherwise silver surfaces of this Choice AU coin. Modest rub on the high points leaves the fields lustrous, though the broad spaces show a number of wispy marks. NGC ID# 255Y, PCGS# 7236

**1895-O Morgan Dollar, AU58  
Silver-White and Well-Struck**

- 4908 1895-O AU58 PCGS.** Just a whisper of high-point wear separates this silver-white and surprisingly well-struck 1895-O Morgan dollar from a Mint State level and a much higher price. This is a great collector-grade example of this semikey issue, showing minimal marks and excellent eye appeal. NGC ID# 255Y, PCGS# 7236

**1895-O Silver Dollar, AU58  
Pleasing Near-Mint Example**

**4909 1895-O AU58 NGC.** Just a notch higher on the grading scale, and this issue becomes price-prohibitive for many collectors. The 1895-O is a well-documented rarity in Mint State. Just 450,000 were produced, and of those perhaps only 100,000 were distributed and the rest were melted. This untuned example displays nearly full luster and is well-struck for a New Orleans dollar. The surfaces of this have numerous abrasions, most of them on the obverse, but none are particularly severe. A silver-white dollar, always in demand. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 255Y, PCGS# 7236

**4910 1895-S XF40 ANACS.** Liberty's ear is bold but the eagle's breast shows a little wear. The lightly abraded surfaces are blanketed in shades of golden-tan toning. From a mintage of 400,000 pieces. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 255Z, PCGS# 7238

**4911 1895-S/S — Cleaned — ANACS. AU55 Details. VAM-3.** A Hot 50 Variety. The mintmark is widely repunched northwest. This scarce date silver dollar retains substantial mint sheen. Attractive overall, but the field beneath the chin displays a patch of wispy hairlines. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 255Z, PCGS# 7238

**4912 1895-S AU58 NGC. VAM-4.** A Top 100 Variety. Though undesignated as such on the NGC insert, this is the "S Over Horizontal S" variety of the better date '95-S. Partly lustrous and close to brilliant. The cheek displays tiny marks. NGC ID# 255Z, PCGS# 7238

**4913 1896 MS66 PCGS.** The obverse has colorful rainbow-band horizontal toning while the reverse is scarcely patinated at all. Generally well-struck and amply appealing. NGC ID# 2562, PCGS# 7240

**4914 1896 MS66 PCGS. CAC.** Rich shades of greenish-gold and violet toning enliven the well-preserved surfaces of this delightful Premium Gem, with almost all the color on the obverse. The design elements are sharply detailed and vibrant mint luster is evident on both sides. NGC ID# 2562, PCGS# 7240

**4915 1896 MS66+ PCGS. CAC.** This high-end Premium Gem displays sharply detailed design elements and vibrant mint luster with well-preserved surfaces that show a few hints of greenish-gold toning. NGC ID# 2562, PCGS# 7240

**4916 1896 MS66+ PCGS. CAC.** This high-end Premium Gem Morgan dollar exhibits well-detailed design elements and brilliant well-preserved surfaces with vibrant mint luster on both sides. Exceptional eye appeal complements the high technical grade. NGC ID# 2562, PCGS# 7240

**4917 1896 MS66+ PCGS. CAC.** A delightful high-end Premium Gem, with well-preserved untuned surfaces that radiate vibrant mint luster. The design elements are sharply detailed and eye appeal is terrific. NGC ID# 2562, PCGS# 7240

**4918 1896 MS66+ PCGS. CAC.** A rich arc of lemon-gold and cobalt-blue endows the left obverse border. This lustrous and high grade Morgan type coin has a nice strike and only minor grazes on the portrait. The top of the 6 is repunched. NGC ID# 2562, PCGS# 7240

**4919 1896 MS66+ PCGS. CAC.** This high-end Premium Gem displays well-detailed design elements and vibrant mint luster under shades of greenish-gold and lavender toning. No mentionable surface flaws are noted. NGC ID# 2562, PCGS# 7240

**1896 Morgan Dollar, MS67  
Brilliant-White Example**

**4920 1896 MS67 PCGS. CAC.** The mintage of nearly 10 million pieces is deceiving, because the 1896 Philadelphia silver dollar is a scarcity in MS67, and for all practical purposes it is unobtainable any finer. This Superb Gem is brilliant-white and highly lustrous. Wholly untuned, the surfaces are free of abrasions other than a few scattered pinpricks in the fields and one or two tiny marks on the high points. The strike is bold with only the slightest weakness above Liberty's ear. PCGS has graded just two pieces numerically finer (1/14). NGC ID# 2562, PCGS# 7240

**4921 1896-O MS60 PCGS. VAM-7.** The 6 in the date is obviously repunched southwest. The 9 is lightly repunched south. Lustrous and lightly toned with pleasing preservation and a typical strike at the centers. Certified in a green label holder. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2563, PCGS# 7242

**4922 1896-O MS61 NGC.** Softly lustrous with hints of peach on a faintly silver-blue base. Aside from cuts above Liberty's eye and on her chin there are surprisingly few abrasions. NGC ID# 2563, PCGS# 7242

**4923 1896-O MS62 PCGS.** Gold-green at the rims with blue and gray through the interiors. Cartwheel luster filters through the intriguing but dusky patina. A pleasing O-mint Morgan dollar. NGC ID# 2563, PCGS# 7242

**4924 1896-O MS62 PCGS.** The 1896-O Morgan dollar is almost always softly struck, but this example is much better than average, with just a touch of softness on Liberty's hair above the ear. The surfaces are lustrous and attractive, with touches of champagne and gold toning on the obverse. NGC ID# 2563, PCGS# 7242

**4925 1896-S MS60 PCGS.** Mostly white though the borders display light tan toning. A well struck example with vibrant luster. Smooth except for an abrasion on the cheek. Housed in a first generation holder. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2564, PCGS# 7244

**1896-S Morgan Dollar, MS63  
Elusive San Francisco Issue**

- 4926 1896-S MS63 PCGS.** Several hundred 1896-S Morgans were acquired by Reno investor LaVere Redfield many years ago, and eventually they were disbursed to the market through his estate. Most of these reportedly graded MS60 to MS63. We can only guess if this MS63 specimen is one of these coins. We do note, however, that it is essentially untuned with bright luster. A few minor abrasions on the cheek and neck define the grade. A sharp strike occurs on the motifs, except on the hair over Liberty's ear, which is a touch weak.  
*Ex: Long Beach Signature (Heritage, 2/2006), lot 2273, where it brought \$3,105.00 NGC ID# 2564, PCGS# 7244*

**1896-S Morgan Dollar, MS63  
Vibrant Luster, Untoned Surfaces**

- 4927 1896-S MS63 PCGS. CAC.** The 1896-S is a difficult but not impossible Morgan dollar issue in this grade, but at the Gem level they are decidedly scarce, with a price to match. This MS63 coin might represent an excellent compromise, with lots of life emanating from vibrant silver-white surfaces that display a few grade-consistent abrasions. NGC ID# 2564, PCGS# 7244
- 4928 1897 MS66 PCGS.** The 1897 Morgan dollar is conditionally rare in grades above the MS66 level. This sharply detailed Premium Gem offers well-preserved lustrous surfaces with outstanding eye appeal. PCGS has graded 21 numerically finer examples (1/14). NGC ID# 2565, PCGS# 7246
- 4929 1897 MS66+ PCGS. CAC.** A common date in uncommonly pristine condition. Brilliant, silver-white surfaces radiate frosty luster with not a bit of toning. A bold strike shows just a touch of softness at the ear but is otherwise complete. The coin is free of any abrasions other than the most minor luster grazes — an exceptional Premium Gem with the PCGS Plus designation. NGC ID# 2565, PCGS# 7246
- 4930 1897-OMS61 PCGS.** Brilliant throughout with complete mint luster, but numerous small abrasions are scattered about as well as a couple of medium-sized marks. Better struck than most 1897-O dollars. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2566, PCGS# 7248
- 4931 1897-O MS61 PCGS.** Complete mint luster and sharply struck throughout, the only grade limitations are several marks on cheek of Liberty. Mostly brilliant with patchy golden-brown scattered about the margins.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2566, PCGS# 7248

- 4932 1897-O MS61 PCGS. CAC.** An occasional freckle of orange appears on this O-mint representative that displays nearly full luster and is well struck. A few small marks are noted on the obverse, yet a very appealing coin for the designated grade, an observation not lost on CAC. NGC ID# 2566, PCGS# 7248

**1897-O Morgan Dollar, MS63  
Elusive Issue in Higher Grades**

- 4933 1897-O MS63 PCGS.** Despite an adequate mintage of more than 4 million pieces, the 1897-O Morgan dollar is a scarce issue in grades above the MS63 level. This attractive Select specimen is well-detailed and lustrous, with lightly marked surfaces that display hints of greenish-gold and silver-gray toning. PCGS has graded 46 numerically finer examples (1/14). NGC ID# 2566, PCGS# 7248
- 4934 1897-S MS66 PCGS.** Lovely autumn-gold and dove-gray toning competes for territory across both sides. This lustrous Premium Gem has a precise strike and a remarkably unabraded obverse. A slender vertical mark near the arrowheads prevents an even finer grade. NGC ID# 2567, PCGS# 7250
- 4935 1897-S MS66 Prooflike NGC.** Moderately contrasted between the lightly frosted devices and the distinctly reflective cartwheel-luster fields. A minimally toned marvel. Census: 23 in 66 (1 in 66 ★) Prooflike, 2 finer (1/14). NGC ID# 2567, PCGS# 7251
- 4936 1898-O MS67 PCGS.** A delightful Superb Gem, this common date is offered here in an uncommon grade, and it is tied for the finest that PCGS has certified. Both sides are brilliant and untuned with frosty silver luster and excellent eye appeal. NGC ID# 2569, PCGS# 7254
- 4937 1898-O MS67 PCGS.** Brilliant, untuned surfaces and rich luster provide this Superb Gem with a strong degree of visual appeal. The piece exhibits minor incompleteness of strike at center. Very few abrasions are present and they are minor. PCGS has graded no coins in numerically finer grades (1/14). NGC ID# 2569, PCGS# 7254
- 4938 1898-O MS67 Prooflike NGC.** A fabulous coin with shimmering, prooflike fields. The surfaces are nearly perfect with a smooth, unblemished cheek on Liberty. Essentially brilliant overall. Just a lovely type coin and unexcelled in Prooflike by either of the two major certification services. Census: 3 in 67 Prooflike, 0 finer (1/14). NGC ID# 2569, PCGS# 7255
- 4939 1898-O MS67 Prooflike NGC.** Nearly bereft of toning, and the smooth, flashy fields provide exemplary eye appeal. The strike is above average. The 1898-O is plentiful in Uncirculated grades, but prooflike pieces are scarce and almost never seen in the present outstanding condition. Census: 3 in 67 Prooflike, 0 finer (1/14). NGC ID# 2569, PCGS# 7255
- 4940 1898-O MS65 Deep Mirror Prooflike PCGS.** A rarity in the Morgan dollar series until the early 1960s, the Treasury released hundreds of 1,000-coin bags and the date is now common. This example is a lustrous Deep Mirror Prooflike coin and fully struck. Brilliant, silver-white surfaces display frosted devices for nice contrast. An untuned Gem, with few marks and excellent eye appeal. NGC ID# 2569, PCGS# 97255

**4941 1898-O MS65 Deep Mirror Prooflike PCGS.** A brilliant Gem with exceptionally reflective fields and substantial white-on-black contrast. The strike is good though the centers lack absolute detail. Encapsulated in a green label holder. NGC ID# 2569, PCGS# 97255

**4942 1899 MS65 NGC. CAC.** Only 330,000 Morgan dollars were struck in 1899, making the issue quite scarce in higher Mint State grades. This attractive Gem displays sharply detailed design elements and vibrant mint luster, under shades of greenish-gold and lavender-gray toning. NGC ID# 256B, PCGS# 7258

**4943 1899 MS66+ PCGS. Ex: The Shrike Set.** A frosty Premium Gem, this example has full silver brilliance with no toning on either side. Slight central weakness is typical on this scarce date. PCGS has only certified 18 finer examples (1/14). NGC ID# 256B, PCGS# 7258

**4944 1899 MS66 PCGS. CAC.** Attractive luster shows twinkles of frost on the high design elements. This light silver-gray coin shows only minor central softness, and the surfaces are smooth. PCGS has graded 18 numerically finer examples (1/14). NGC ID# 256B, PCGS# 7258

**4945 1899 MS66 PCGS. CAC.** A trace of gold toning appears along the obverse border of this highly lustrous Premium Gem, with the balance of the obverse and all of the reverse displaying untuned silver surfaces. PCGS has only certified 18 finer examples (1/14). NGC ID# 256B, PCGS# 7258

**4946 1899 MS64 Deep Mirror Prooflike PCGS. CAC.** Lightly gold-toned overall with the color deepest at parts of the rims. A beautifully reflective near-Gem that is housed in a green label holder. NGC ID# 256B, PCGS# 97259

**4947 1899-O MS66+ PCGS.** Pale silver luster has a strong cartwheel effect. A decently detailed and uncommonly appealing example of this turn-of-the-century New Orleans issue. NGC ID# 256C, PCGS# 7260

**4948 1899-O MS67 PCGS.** This brilliant Superb Gem has frosty silver luster and entirely untuned surfaces, with slight central weakness, but a better than usual strike. PCGS has only certified one finer example (1/14). NGC ID# 256C, PCGS# 7260

**4949 1899-O MS67 NGC.** A magnificent Superb Gem with razor-sharp definition on all design elements and vibrant mint luster. The well-preserved surfaces show no mentionable flaws and no trace of toning. NGC has graded no coins in higher numeric grades (1/14). NGC ID# 256C, PCGS# 7260

**4950 1899-S MS65 NGC.** Broad silver interiors with elements of gold-orange and violet at the top, left, and bottom margins. An amply lustrous Gem with eye appeal in spades. NGC ID# 256D, PCGS# 7262

#### 1899-S Morgan, MS66 Few Certified Finer

**4951 1899-S MS66 PCGS.** A comparatively low mintage of 2.5 million coins makes this San Francisco dollar a better date. Sharply struck and attractive, this example was preserved in its original brilliant state, as if just minted. Silver cartwheel luster rolls across the untuned and unabraded surfaces, earning Premium Gem status for this high-quality Morgan. Only nine pieces are certified numerically higher by PCGS and NGC combined (1/14). NGC ID# 256D, PCGS# 7262

#### 1899-S Morgan Dollar, MS66 Sharply Detailed and Lustrous

**4952 1899-S MS66 PCGS. CAC.** Dazzling luster endows this wonderful Premium Gem, complementing its sharply detailed design motifs, and the untuned surfaces are impeccably preserved. Great overall eye appeal. David Bowers (2006) suggests that more than 1 million of the 2.5 million mintage was probably melted. PCGS has graded eight numerically finer examples (1/14). NGC ID# 256D, PCGS# 7262

**4953 1900-O MS66+ PCGS.** The obverse is awash with delicate gold toning over its brilliant silver surface, while the reverse is essentially untuned on this Premium Gem. Both sides are sharply detailed with pristine surfaces. PCGS has only certified 50 finer examples (1/14). NGC ID# 256F, PCGS# 7266

**4954 1900-O MS66+ PCGS. CAC.** This high-end Premium Gem exhibits razor-sharp definition on all design elements and the lustrous brilliant surfaces show few signs of contact. PCGS has graded 50 numerically finer examples (1/14). NGC ID# 256F, PCGS# 7266

**4955 1900-O/CC MS64 PCGS. VAM-11.** A Top 100 Variety. A well-detailed Choice example of this popular variety, with the undertype CC set high and to the left in relation to the primary mintmark. Brightly lustrous, with hints of greenish-gold and silver-gray toning. Housed in a green label holder. NGC ID# 256G, PCGS# 7268

**4956 1900-O/CC MS64 PCGS. CAC. VAM-8.** A Top 100 Variety. The famous Capped Die variety, with the primary mintmark struck over a partially effaced CC. Sharply detailed and lustrous, with few signs of contact. Housed in a green label holder. NGC ID# 256G, PCGS# 7268

**4957 1900-O/CC MS65 PCGS. CAC. VAM-11.** A Top 100 Variety. This virtually brilliant Gem has splendidly smooth fields and a clean cheek. Sharply struck and highly lustrous. Faint marks on Liberty's neck are all that determine the grade.  
*Ex: Milwaukee Central States Signature (Heritage, 4/2010), lot 1411, which realized \$2,070.* NGC ID# 256G, PCGS# 7268

**4958 1900-S MS65 PCGS. CAC.** Both sides show gold-orange and reddish-tan peripheral toning, though the patina on the reverse hews more closely to the rims. Immensely lustrous and attractive.  
*Ex: Baltimore Signature (Heritage, 3/2009), lot 1509; Summer FUN Signature (Heritage, 7/2009), lot 1010.* NGC ID# 256H, PCGS# 7270

**1900-S Morgan Dollar, MS66  
Only Two Finer Coins at PCGS**

**4959 1900-S MS66 PCGS.** Fully lustrous silver-gray surfaces display an occasional speckle of gold-tan. Generally well-struck, except for minor softness in the centers. A few minute ticks and grazes do not detract. David Bowers (2006) estimates that a million or more of the 3.54 million pieces minted were melted under the 1918 Pittman Act. PCGS has graded only two numerically finer examples (1/14). NGC ID# 256H, PCGS# 7270

**4960 1900-S MS64 Prooflike PCGS.** Well-defined overall, though the hair over the ear is a touch soft. This minimally toned near-Gem has distinctly reflective surfaces, though the mirrors are not so deep as to warrant Deep Mirror Prooflike status. NGC ID# 256H, PCGS# 7271

**4961 1901 AU58 PCGS.** This attractive near-Mint specimen shows a trace of wear on the hair above the ear and the eagle's breast and the surfaces show a scattering of minor contact marks and hints of gold and lavender toning.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256J, PCGS# 7272*

**4962 1901 AU58 PCGS.** Light wear shows mostly on the left side of this attractive near-Mint example. The central design elements are well-detailed and the surfaces retain much of their original mint luster. NGC ID# 256J, PCGS# 7272

**4963 1901 MS60 ANACS.** The surfaces on this conditionally challenging P-mint Morgan exhibit complete mint luster and just a touch of toning along the obverse and reverse edges. Well-struck and extensively abraded throughout.  
*Ex: Long Beach Signature (Heritage, 9/2004), lot 8870.  
From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256J, PCGS# 7272*

**1901 Morgan Dollar, MS61  
Sharply Detailed and Lustrous**

**4964 1901 MS61 ANACS.** This attractive Mint State Morgan dollar exhibits sharply detailed design elements throughout, with mostly brilliant surfaces that show a few hints of golden-tan toning and vibrant mint luster on both sides. A scattering of minor contact marks explains the grade.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256J, PCGS# 7272*

**1901 Silver Dollar, MS61  
Strong Central Strike**

**4965 1901 MS61 NGC.** This pleasing, Mint State example has bright-silver luster and no toning on the brilliant-white surfaces. The strike is sharp as evidenced by nearly complete hair detail over Liberty's ear — seldom seen for this semikey date — and the eagle displays strong breast feathers. A faint, grade-limiting abrasion is visible on the cheek.  
*Ex: Dallas Signature (Heritage, 11/2006), lot 1483, where it brought \$2,530.00. NGC ID# 256J, PCGS# 7272*

**1901 Dollar, MS62  
Semikey Date in Mint State**

**4966 1901 MS62 ANACS.** The 1901 Philadelphia silver dollar is conditionally scarce-to-rare in Uncirculated grades. This coin is at the lower end of the Uncirculated range, but it is above average in strike and luster. A few abrasions appear on the high points of Liberty's portrait, and a touch of purple and russet toning appears on the coin.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256J, PCGS# 7272*

**1901 Doubled Die Dollar, AU55  
VAM-3, Scarce and Popular Variety**

**4967 1901 Doubled Die Reverse AU55 PCGS. VAM-3.** A Top 100 Variety. The bottom of the eagle's tailfeathers are noticeably doubled on this rare and highly sought-after Morgan dollar variety. Few pieces appear to have survived in mint condition, perhaps not all that surprising since the 1901 dollar is one of the rarest of all 20th century coins in any grade of Uncirculated. This is a brilliant example with significant remnants of mint luster surrounding the devices, and there are no mentionable marks on either side. Population: 29 in 55, 16 finer (1/14). PCGS# 7302

- 968 1901-S MS64 NGC.** Silver interiors have frosty touches. The rims have gold-to-orange and blue-violet colors. A pleasing near-Gem example of an issue that is surprisingly elusive in finer grades. NGC ID# 256L, PCGS# 7276

**1901-S Morgan Dollar, MS65  
Conditionally Rare in Finer Grades**

- 4969 1901-S MS65 PCGS.** All San Francisco Mint silver dollars from the first decade of the 20th century are scarce in Uncirculated grades, and the 1901-S is no exception. The typical unworn '01-S grades MS63, but the present piece is much nicer, as the fields and devices are remarkably devoid of contact. The lustrous surfaces display light chestnut and ice-blue toning. Held back in grade only by the central strike, which lacks absolute detail. NGC ID# 256L, PCGS# 7276

- 4970 1902 MS66 NGC. CAC.** This sharply detailed Premium Gem features essentially brilliant well-preserved surfaces with vibrant mint luster on both sides. NGC has graded 17 numerically finer examples (1/14). NGC ID# 256M, PCGS# 7278

- 4971 1902 MS66 PCGS. CAC.** A delightful Premium Gem representative, with sharply detailed design elements and well-preserved brilliant surfaces that radiate vibrant mint luster. PCGS has graded 28 numerically finer examples (1/14). NGC ID# 256M, PCGS# 7278

- 4972 1902-S MS64+ NGC.** Blue, rose-violet, and gold outer bands yield to smooth silver on the interiors. Lightly marked central devices display minor striking softness. NGC ID# 256P, PCGS# 7282

- 4973 1903 MS67 ★ NGC.** This Superb Gem approaches prooflike status, and the obverse features a particularly flashy field. The moderate but noticeable reflectivity is presumably the cause of the Star designation from NGC. A nearly brilliant piece with a refreshingly unmarked appearance. Census: 97 in 67 (2 in 67 ★), 2 finer (1/14). NGC ID# 256R, PCGS# 7284

**1903 Morgan Dollar, MS67  
Extremely Rare Any Finer**

- 4974 1903 MS67 PCGS. CAC.** The reported mintage for the 1903 Morgan dollar exceeds 4.6 million pieces, but the issue is definitely scarce in MS67 condition and finer examples are virtually unobtainable. This well-detailed Superb Gem displays vibrant mint luster, with pristine surfaces that show hints of greenish-gold toning at the rims. Population: 82 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 256R, PCGS# 7284

- 4975 1903-O MS66 PCGS.** A hoard coin that was once a major rarity as few were released. Countless thousands of examples came out of the Treasury in the early 1960s. This example is richly toned in green, gold, and iridescent shades. NGC ID# 256S, PCGS# 7286

- 4976 1903-O MS66 PCGS.** Once a great rarity, the 1903-O Morgan dollar is still very scarce in grades above the MS66 level. This sharply detailed Premium Gem is brightly lustrous, with well-preserved brilliant surfaces. NGC ID# 256S, PCGS# 7286

- 4977 1903-O MS64 Deep Mirror Prooflike PCGS Secure. CAC.** The design elements of this spectacular Choice example are sharply detailed and richly frosted, providing intense cameo contrast with the deeply mirrored fields. The 1903-O was a great rarity before the Treasury releases of the 1960s. Population: 33 in 64 Deep Mirror Prooflike, 15 finer (1/14). NGC ID# 256S, PCGS# 97287

- 4978 1903-S AU50 PCGS.** A desirable San Francisco issue in any condition. This AU50 example has remaining mint luster amid a few light abrasions, although most marks are smoothed by its short time in circulation. A bit of reddish-gold toning hugs the margins. Nicely detailed for the grade.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256T, PCGS# 7288*

- 4979 1903-S AU50 NGC.** Glimmers of reflectivity cling to the protected areas on the pearl-gray obverse. The reverse adds a subtle peach overtone. Good eye appeal for an AU50 example. NGC ID# 256T, PCGS# 7288

- 4980 1903-S AU50 PCGS.** Light but distinct wear is focused on the high points, leaving the rest of the silver surfaces surprisingly lustrous. Minor to moderate abrasions dot the portrait and the nearby fields. NGC ID# 256T, PCGS# 7288

**1904-O Morgan Dollar, MS67  
Exceptional Registry Set Candidate**

- 4981 1904-O MS67 PCGS.** Like its more famous 1903-O counterpart, the 1904-O Morgan dollar was once a rarity in the series, but both issues were well-represented in the Treasury Releases of the 1960s. The 1904-O is still very scarce at the MS67 level, and numerically finer examples are currently unknown. This magnificent Superb Gem exhibits sharply detailed design elements and pristine brilliant surfaces that radiate vibrant mint luster. Population: 34 in 67, 0 finer (1/14). NGC ID# 256V, PCGS# 7292

**1904-S Morgan Dollar, MS62  
Better Late-Series Date**

- 4982 1904-S MS62 ANACS.** The 1904-S is a better date in the Morgan dollar series and no silver dollars were coined in the period from 1904-1921. This charming MS62 example features sharply detailed design elements and vibrant mint luster, with brilliant surfaces that show some well-scattered minor contact marks.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256W, PCGS# 7294*

**1904-S Morgan Dollar, MS62  
Lightly Toned Lustrous Surfaces**

- 4983 1904-S MS62 PCGS.** Occasional small splashes of light gold visit both sides of this attractive S-mint representative, each of which exhibits well-struck devices. Small obverse marks on softly lustrous surfaces help limit the grade. Still, a rather nice piece for MS62. From a mintage of 2.3 million pieces, the 1904-S Morgan dollar is a better date in the series. NGC ID# 256W, PCGS# 7294

**1904-S Dollar, MS63  
VAM-1A, Die Gouge in STATES**

- 4984 1904-S MS63 NGC. VAM-1A.** A significant die gouge passes through the A in STATES. The upper portion of the right (facing) wing is nicely die doubled. Golden-brown toning adorns both sides, but only the lower reverse exhibits additional ocean-blue and lilac shades. Well struck and lustrous. Certified in a prior generation holder.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 256W, PCGS# 7294*

**1921 Morgan Dollar, MS66+  
Ideal Final-Year Type Coin**

- 4985 1921 MS66+ PCGS. CAC.** A high-end Premium Gem example from the last year of the Morgan design, this coin exhibits razor-sharp definition on all design elements and the well-preserved brilliant surfaces radiate vibrant mint luster on both sides. PCGS has graded only eight numerically finer examples (1/14). NGC ID# 256X, PCGS# 7296

- 4986 1921 MS65 Prooflike PCGS.** Brilliant throughout with bright, sparkling prooflike fields. The field reflectivity contrasts nicely against the slightly frosted devices. Remarkably clean for a 1921, the only interruption in the surface is a hazy white area above the eagle. Population: 14 in 65 Prooflike, 2 finer (1/14). NGC ID# 256X, PCGS# 7297

**1921-D VAM-1H Dollar, XF45  
Retained Cud on Obverse  
Rare Late State**

- 4987 1921-D XF45 NGC. VAM-1H, extremely late state.** The extremely late (and extremely rare) obverse die state with retained cud affecting the first three stars of the obverse. The coin itself is lightly worn with still-glimmering luster and a largely quicksilver texture. Colors range from pale pearl to gold-gray, tan, and violet. NGC ID# 256Y, PCGS# 7298

- 4988 1921-S MS65 PCGS.** Lovely lime-green and gold toning covers the lustrous, carefully preserved surfaces. Only a few trivial marks are observed, on Liberty's face and neck. PCGS has graded 49 numerically finer examples (1/14). NGC ID# 256Z, PCGS# 7300

- 4989 1921-S MS65 PCGS.** This all-brilliant, final-year dollar displays the bright, frosted mint luster one would expect. Each side is remarkably clean and high-point definition is a bit less than complete. NGC ID# 256Z, PCGS# 7300

- 4990 1921-S MS65+ PCGS.** This high-end Gem exhibits brilliant white surfaces with no trace of toning and few signs of contact. The design elements are well-detailed and vibrant mint luster radiates from both sides. NGC ID# 256Z, PCGS# 7300

## PROOF MORGAN DOLLARS

- 4991 1880 PR61 ANACS.** From a generous proof mintage of 1,355 pieces, this impressive Morgan dollar exhibits sharply detailed design elements and deeply mirrored fields throughout. The surfaces show a few minor hairlines and hints of golden-tan toning. NGC ID# 2724, PCGS# 7315

### 1881 Morgan Dollar, PR64 High-End for the Grade

- 4992 1881 PR64 PCGS.** Razor-sharp striking definition leaves no doubt as to the proof status of this Choice coin. Expertly preserved and distraction-free, this piece will reward its new owner with strong eye appeal and high-end technical quality for the grade. From a relatively low mintage of just 984 coins, all produced from the same pair of dies. Population: 66 in 64, 37 finer (1/14). NGC ID# 2725, PCGS# 7316

- 4993 1882 — Questionable Color — PCGS Proof Genuine. Unc. Details.** This precisely struck and lightly hairlined specimen has untuned centers. Milky walnut-brown patina is present near the rims. The devices are mildly glossy. No contact marks are evident. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2726, PCGS# 7317

### 1883 Morgan Dollar, PR64

- 4994 1883 PR64 PCGS.** This attractively toned example shows full, unmistakably proof strike definition throughout, plus light cameo contrast between motifs and mildly reflective fields. A smattering of brownish toning specks, too small to detract from the coin's visual appeal, may have influenced the technical grade of the piece. Otherwise, this lovely proof has the appearance of a Gem. NGC ID# 2727, PCGS# 7318

### 1885 Morgan Dollar, PR63 Cameo Extraordinary Field-Device Contrast

- 4995 1885 PR63 Cameo PCGS Secure.** With a mintage of 930 proofs, the 1885 is one of the more popular proof dates from the earlier years in the Morgan dollar series. What is most surprising when viewing this coin is why it is "only" a Cameo. Why not Deep Cameo? The contrast is profound on each side. A few barely noticeable slide marks and faint hairlines determine the grade, but be advised: This is a premium coin for the grade. PCGS# 87320

- 4996 1894 — Improperly Cleaned — NGC Details. Proof.** Splashes of navy-blue and apple-green patina are prominent, though the centers and borders show glimpses of brilliance. A lens reveals a smattering of small contact marks. The business strike counterpart is a series semikey. NGC ID# 2577, PCGS# 7329

- 4997 1896 PR62 PCGS.** The design elements of this impressive proof Morgan dollar are sharply detailed, with rich mint frost, and the reflective fields are brightly reflective. Shades of greenish-gray toning visit the surfaces. NGC ID# 2727, PCGS# 7331

- 4998 1898 — Questionable Color — PCGS Proof Genuine. Unc. Details.** This fully struck proof Morgan dollar has milky gray surfaces with butter-gold undertones. The portrait has a mattelike appearance and the fields display faint hairlines. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 272W, PCGS# 7333

- 4999 1898 PR63 PCGS.** Greens and blues are prominent in the patina of this Select proof. Glossy surfaces show light hairlines beneath the toning but the arm's-length eye appeal is solid. NGC ID# 272W, PCGS# 7333

### 1899 Morgan Dollar, PR64 Popular Low-Mintage Date

- 5000 1899 PR64 PCGS.** The 1899 Philadelphia Mint silver dollar production was low for business strikes and proofs alike, making this a popular better date for the decade. This marvelous near-Gem specimen displays fully defined motifs, and mild field-to-device contrast on each side. A few trivial marks, mostly away from the central motifs, seemingly prevent a finer assessment. This issue is scarce in higher grades. NGC ID# 272X, PCGS# 7334

- 5001 1903 — Questionable Color — PCGS Proof Genuine. Unc. Details.** This intricately struck specimen displays only trivial hairlines. The surfaces appear dusky silver-gray when held away from the light, then reveal chestnut shades upon rotation. Only 755 proofs were coined.

**1903 Morgan Dollar, PR64  
Vivid Multicolor Toning**

- 5002 1903 PR64 NGC. CAC.** Only 755 proof Morgan dollars were struck in 1903. This attractive Choice example is spectacularly toned, with brilliant silver centers surrounded by shades of subtle golden-brown and vivid cobalt-blue at the peripheries. The design elements are sharply detailed and eye appeal is terrific. NGC ID# 2823, PCGS# 7338

**PEACE DOLLARS**

- 5003 1921 MS64+ PCGS.** This piece exhibits the inherent central weakness common to all 1921 High Relief Peace dollars. A splendid Choice Mint State example with brilliant luster, this example has delicate gold toning along the obverse and reverse borders. NGC ID# 2U4E, PCGS# 7356
- 5004 1921 MS65 PCGS. VAM-1G.** The obverse die was used to strike matte proofs, but this is a Gem business example with exceptionally smooth surfaces. The strike is above average for the 1921, though the centers nonetheless show minor weakness. Lightly toned powder-blue and straw-gold. NGC ID# 2U4E, PCGS# 7356
- 5005 1921 MS65 NGC.** A broadly lustrous Gem example of the ever-popular 1921 Peace dollar with just a hint of blue to the silver surfaces. The obverse is even cleaner than the grade would suggest, though the reverse eagle has a cut across its wings. NGC ID# 2U4E, PCGS# 7356
- 5006 1921 MS65 PCGS. CAC.** Both sides of this Gem 1921 High Relief Peace dollar exhibit frosty silver luster with no evidence of toning on either side. Although a trifle weak at the centers, the strike is sharper than on many of these coins. NGC ID# 2U4E, PCGS# 7356

**1921 Peace Dollar, MS65+  
Glowing Mint Luster, Lightly Toned**

- 5007 1921 MS65+ PCGS. CAC.** Attractively patinated caramel-gold and ice-blue. This lustrous Gem is well-preserved despite minor contact near the L in PLURIBUS. The strike is above average for this novel and limited-mintage issue struck in high relief, although the date and the hair above the ear are incompletely brought up. NGC ID# 2U4E, PCGS# 7356
- 5008 1922 MS66 NGC. CAC.** The brightly lustrous surfaces of this delightful Premium Gem are untuned and free of mentionable distractions. The design elements are sharply detailed and eye appeal is tremendous. NGC ID# 257C, PCGS# 7357

- 5009 1922-D MS66 NGC.** This is an untuned example with nice silver-white luster and a typically sharp impression for a D-mint Peace Dollar. A premium quality representative of an issue that is rare above the MS66 grade level. NGC ID# 257D, PCGS# 7358
- 5010 1922-S MS65 NGC.** Light honey toning visits the motifs of this lustrous silver type coin. The strike shows only minor blending at the centers, and marks are absent except on select portions of E PLURIBUS UNUM. NGC ID# 257E, PCGS# 7359
- 5011 1922-S MS65 PCGS.** An above-average strike and a thin, translucent veil of champagne-gold toning enhance lustrous surfaces of this Gem Peace dollar. Only a few minor abrasions dot the surfaces, none significant for the assigned grade. The issue is rare any finer. NGC ID# 257E, PCGS# 7359
- 5012 1923 MS66+ PCGS. CAC.** Frosty silver luster is bright and gorgeous. A well-defined beauty that is just a few shallow luster scrapes away from full Superb Gem status. NGC ID# 257F, PCGS# 7360
- 5013 1923 MS66+ PCGS. CAC.** 1923 dollars were struck in great number to help replace silver dollars melted due to the Pittman Act. They also backed silver certificates. However, the 1923 becomes very scarce in the present grade. Faint almond-gold and ice-blue toning adorn lustrous and lightly abraded surfaces. NGC ID# 257F, PCGS# 7360
- 5014 1923 MS66+ PCGS. CAC.** The strike is razor-sharp at the centers, though obverse peripheral elements show slight incompleteness. Light golden toning visits this lustrous and high grade silver type coin. The cheek is remarkably smooth.
- 5015 1923 MS67 NGC.** Faintly silver-gray surfaces take on an apricot tone at certain angles to the light. A frosty and delightful Superb Gem. Census: 93 in 67, 0 finer (1/14). NGC ID# 257F, PCGS# 7360
- 5016 1923 Broken Wing MS63 PCGS. CAC. VAM-1E.** A Top 50 Variety. The "Broken Wing" VAM with three die lumps on the wing connected by a slender die crack. This lustrous Select example displays well-detailed design elements and only minor signs of contact. PCGS# 133756
- 5017 1923-D MS65 PCGS. CAC.** Attractive shades of lavender and champagne-gold toning visit the reverse of this delightful Premium Gem, while the obverse remains essentially brilliant. The design elements are well-detailed and vibrant mint luster radiates from both sides. NGC ID# 257G, PCGS# 7361

**1924 Peace Dollar, MS67  
Only One Numerically Finer at NGC**

- 5018 1924 MS67 NGC.** The 1924 Peace dollar was produced in large numbers, but the issue is conditionally very scarce at the MS67 level, and finer coins are virtually unobtainable. This well-detailed Superb Gem possesses outstanding eye appeal, with well-preserved lustrous surfaces under subtle shades of pale gold toning. Census: 84 in 67 (2 in 67 ★), 1 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 257J, PCGS# 7363
- 5019 1924-S MS64 PCGS.** Vibrantly toned canary-yellow, orange, and mustard across otherwise silver surfaces. Shallow scrapes crossing the wingtips and tail contribute to the grade. NGC ID# 257K, PCGS# 7364

- 5020 1924-S MS64 PCGS.** The 1924-S is a lower-mintage issue in the Peace dollar series. This attractive Choice specimen displays well-detailed design elements and vibrant mint luster throughout. NGC ID# 257K, PCGS# 7364
- 5021 1924-S MS64 PCGS.** Flashy vibrant mint luster shines through shades of sea-green, violet, and amber patina on both sides of this well-detailed Choice example. Only minor marks affect the surfaces. NGC ID# 257K, PCGS# 7364
- 5022 1924-S MS64 PCGS. VAM-4.** Liberty's profile is lightly die doubled. Pastel ice-blue, rose-red, and wheat-gold shades grace this lustrous and well preserved Choice silver dollar. A better date. Housed in an old green label holder.  
*Ex: Long Beach Signature (Heritage, 9/2004), lot 8977, which realized \$1,207.50. NGC ID# 257K, PCGS# 7364*
- 5023 1925 MS67 NGC.** Light canary-yellow toning over a majority of each side with light blue and pink through much of the obverse fields. The 1925 Peace dollar issue is scarce as a Superb Gem and rare any better. Census: 71 in 67 (1 in 67 ★), 1 finer (1/14). NGC ID# 257L, PCGS# 7365
- 5024 1925-S MS64+ PCGS.** The 1925-S Peace dollar is a better date in the series, especially in high grade. This high-end Choice example is well-detailed and lustrous, with only minor signs of contact. NGC ID# 257M, PCGS# 7366
- 5025 1925-S MS64 PCGS. CAC.** Frosted across the high points with ample silver luster and eye appeal in spades. Only the faintest hints of gold color visit each side. NGC ID# 257M, PCGS# 7366
- 5026 1925-S MS64 PCGS. CAC.** This delightful Choice specimen is sharply detailed and brightly lustrous, with well-preserved brilliant surfaces that show no trace of toning and few signs of contact. NGC ID# 257M, PCGS# 7366
- 5027 1926 MS66 PCGS.** Light hints of golden-tan visit the broadly lustrous surfaces of this Premium Gem. The reverse is smoother and a touch richer in color. PCGS has graded no examples of this issue as MS67 or finer (1/14). NGC ID# 257N, PCGS# 7367
- 5028 1926 MS66 PCGS.** The 1926 Peace dollar is scarce in MS66 condition and PCGS has certified no coins in higher numeric grades (1/14). This sharply detailed Premium Gem exhibits vibrant mint luster and well-preserved surfaces with hints of greenish-gold toning. NGC ID# 257N, PCGS# 7367
- 5029 1926 MS66 PCGS. CAC.** Bright and lightly frosted with hints of ivory and gold in the patina. Only a few scattered flaws combine to account for an even higher grade. PCGS has certified no examples as MS67 or finer (1/14). NGC ID# 257N, PCGS# 7367
- 5030 1926-D MS65+ PCGS. CAC.** Frosty with areas of ruddy toning along parts of the margins. The obverse is strongly cracked through the base of the bust and down the right side. NGC ID# 257P, PCGS# 7368
- 5032 1927 MS65 NGC. VAM-2.** A Top 50 Variety. Clear die doubling is evident on TRVST and the designer's monogram. The variety is undesignated on the NGC holder. Wheat-gold toning is prevalent though the borders also exhibit rose-red, powder-blue, and apple-green. NGC ID# 257S, PCGS# 7370
- 5033 1927 MS65 PCGS.** This sharply detailed Gem displays vibrant mint luster and lightly toned surfaces with few signs of contact. PCGS has graded only eight numerically finer examples (1/14). NGC ID# 257S, PCGS# 7370
- 5034 1927-D MS64 PCGS.** A well-detailed Choice example of this better date Peace dollar, with vibrant mint luster and lightly marked surfaces under shades of sea-green and amber toning. NGC ID# 257T, PCGS# 7371
- 5035 1927-D MS64 PCGS.** Each side is coated by beige-gray patina, with slight amounts of dappled and peripheral light-gold and russet toning in evidence. There are a few wispy blemishes on each side, none of which are singularly distracting. NGC ID# 257T, PCGS# 7371
- 5036 1927-D MS64 PCGS. CAC.** Frosty silver with only the faintest hint of gold overlay. Occasional areas of glossiness give this near-Gem an unusual but desirable character. NGC ID# 257T, PCGS# 7371
- 5037 1927-S MS64 PCGS.** Pearl-gray and chestnut toning visits this nicely struck, lustrous, and pleasing near-Gem. The better date '27-S is rarely encountered any finer. Housed in an old green label holder. NGC ID# 257U, PCGS# 7372
- 5038 1927-S MS64+ PCGS.** This high-end Choice Peace dollar displays a few hints of pale gold toning on lustrous surfaces that show few abrasions. A graze below Liberty's eye is the greatest obstacle to the next grade. NGC ID# 257U, PCGS# 7372
- 5039 1928 MS64+ NGC.** The lightly marked surfaces of this high-end Choice example are blanketed in shades of greenish-gold patina. The design elements are sharply detailed and vibrant mint luster radiates from both sides. NGC ID# 257V, PCGS# 7373
- 5040 1928 MS64 PCGS. CAC.** The 1928 Peace dollar claims a low mintage of 360,649 pieces. This well-detailed Choice example displays bright mint luster and hints of greenish-gold toning, with only a few minor contact marks. NGC ID# 257V, PCGS# 7373
- 5041 1928 MS64+ PCGS. CAC.** Lightly gold-toned on the obverse with bright silver-frost on the reverse. A pleasing example of this popular low-mintage date that looks like a Gem at arm's length. NGC ID# 257V, PCGS# 7373
- 5042 1928-S MS64 PCGS.** This well-detailed Choice example displays vibrant mint luster under shades of pale gold toning and the surfaces are lightly marked. The 1928-S Peace dollar is very scarce in finer grades. NGC ID# 257W, PCGS# 7374
- 5043 1928-S MS64 PCGS.** Autumn-brown and olive-green bathe this lustrous and nicely struck Choice better date dollar. The cheek is smooth though the front wing displays a couple of thin marks. Much of IN GOD WE TRVST is nicely die doubled, as is the monogram. NGC ID# 257W, PCGS# 7374
- 5044 1928-S MS64 PCGS.** An attractive Choice example of this date, which is seldom encountered in higher grades. The design elements are well-detailed and the lustrous surfaces show only minor signs of contact. NGC ID# 257W, PCGS# 7374
- 5045 1928-S MS64 PCGS. CAC.** Grading services are averse to bestowing the MS65 grade on the conditionally rare 1928-S. Some examples certified as MS64, such as the present coin, appear to merit an even higher grade but are conservatively assessed. Lustrous and well preserved with dusky almond-gold toning. WE TRVST is strongly die doubled, as often seen on the issue.  
*Ex: Orlando FUN Signature (Heritage, 1/2009), lot 4911. NGC ID# 257W, PCGS# 7374*
- 5046 1928-S MS64 PCGS. CAC.** Bright silver overall with touches of gray in the fields, particularly to the right of the eagle. Lightly marked but with great charm as a near-Gem. NGC ID# 257W, PCGS# 7374

**1926-S Dollar, MS65+  
Fully Struck, Bright Mint Luster**

- 5031 1926-S MS65+ PCGS. CAC.** Although scarce in better grades, the 1926-S is actually one of the more available S-mints in the Peace dollar series. Unlike previous S-mints, this is a fully struck piece and the surfaces display minimal abrasions. The centers are brilliant and ringed by light golden patina at the margins. NGC ID# 257R, PCGS# 7369

**5047 1928-S MS64+ PCGS. CAC.** Silver-frost on the eagle but largely toned elsewhere in gold-gray, orange, and violet. Amply lustrous surfaces have great charm and only a few small abrasions to preclude full Gem status. NGC ID# 257W, PCGS# 7374

**5048 1928-S MS64+ PCGS. CAC.** The '28-S is a famous conditional rarity in MS65, which makes the MS64+ grade the highest accessible for most collectors. This well preserved near-Gem displays vibrant luster and peripheral peach-gold and lime-green toning. NGC ID# 257W, PCGS# 7374

**1928-S Dollar, MS64+  
Highly Lustrous, Lightly Toned**

**5049 1928-S MS64+ PCGS. CAC.** The obverse of this near-Gem has hints of golden-brown toning to the left and right, while the reverse has similar toning over much of its surface. The balance on both sides is ivory with brilliant and frosty luster. Just a bit softly struck in the centers but a highly lustrous dollar. Only 51 finer examples are PCGS certified (9/14). NGC ID# 257W, PCGS# 7374

**1934 Peace Dollar, MS66  
Low-Mintage Philadelphia Issue**

**5050 1934 MS66 PCGS. CAC.** From a mintage of fewer than 1 million pieces, the 1934 Peace dollar is very rare in grades above the MS66 level. This impressive Premium Gem displays well-detailed design elements and essentially brilliant well-preserved surfaces that radiate vibrant mint luster. PCGS has graded three numerically finer examples (1/14). NGC ID# 257X, PCGS# 7375

**1934 Peace Dollar, MS66  
Strong Strike and Excellent Preservation**

**5051 1934 MS66 PCGS Secure. CAC.** Among regular issues, the 1934 Peace dollar is one of only four sub-million-coin mintages in the series, in this case struck to the extent of a tad more than 954,000 coins. (The other three are the 1927, 1927-S, and 1928.) The 1934 issue is an odd duck, the first entry in the series since the 1928. They were struck because the Treasury Department deemed it appropriate to stimulate America's money supply during the depths of the Great Depression by issuing Silver Certificates and backing them with domestically mined silver bullion. (Sound familiar? It should.) The Treasury's announcement of the program in December 1933 caused about 1.5 million ounces of silver per month to come in, which was used to strike 1934- and 1935-dated silver dollars.

The 1934 silver dollars are well-made and likely underrated at today's levels. This Premium Gem with the CAC sticker shows exceptional quality and eye appeal, with frosty silver-white surfaces accented by reddish-copper tones near the rims on each side. The strong strike and excellent preservation are in keeping with the grade. NGC ID# 257X, PCGS# 7375

**5052 1934-S AU58 PCGS. CAC.** From a mintage of just over 1 million pieces, the 1934-S Peace dollar is a sought-after key date. This lightly worn and minimally abraded near-Mint specimen retains almost all of its original mint luster. NGC ID# 257Z, PCGS# 7377

**5053 1934-S MS61 NGC.** Rich almond-gold toning bathes this lustrous and well struck key date dollar. The obverse on its own has the look of a higher grade, though the reverse displays occasional minute granularity. NGC ID# 257Z, PCGS# 7377

**5054 1934-S MS62 PCGS.** The 1934-S is the celebrated key to the Peace dollar series. This attractive MS62 example displays sharply detailed design elements and vibrant mint luster under delicate shades of champagne-gold toning. NGC ID# 257Z, PCGS# 7377

**5055 1934-S Doubled Tiara AU55 PCGS. CAC. VAM-3.** A Top 50 Variety. The most coveted die variety of the conditionally rare '34-S dollar. Die doubling is clear on the tips of Liberty's upper curls, and the rays from the tiara are also lightly doubled. A conservatively graded example with pastel butter-gold and silver-gray toning. PCGS# 133782

**5056 1935 MS66 PCGS.** Brilliant silver-white and extremely lustrous, this exceptional Premium Gem is visually impressive with very few distractions. The strike is bold on the obverse, with the reverse just slightly weak on the eagle's leg and shoulders. Only a few minor abrasions are seen, keeping this radiant dollar from an even higher grade. PCGS has yet to certify a single Superb Gem 1935 Peace dollar, the finest being four pieces in 66+ and none finer (1/14). NGC ID# 2582, PCGS# 7378

**1935 Peace Dollar, MS66  
Extremely Rare Any Finer**

**5057 1935 MS66 PCGS. CAC.** The 1935, from a mintage of nearly 1.6 million pieces, is a fairly common date in the Peace dollar series through the Gem grade level. The certified population drops at the Premium Gem grade, which can be acquired with patience and searching. Higher-grade pieces are rarely seen. Satiny luster covers each side, and the design elements are relatively well-struck for the issue. A few light reverse marks do not detract from the overall pleasing eye appeal. The Peace dollar was discontinued after 1935, making this issue an important one for type collectors. PCGS has graded none finer, and NGC five higher (1/14). NGC ID# 2582, PCGS# 7378

**5058 1935-S MS66 ANACS.** Ex: Bill Lower. Four rays below ONE, a subtype limited to the '35-S. Examples with three rays below ONE are more often encountered. A sharply struck Gem that has exceptional cartwheel luster, nearly immaculate fields, and a virtually pristine cheek.  
Ex: *Baltimore Signature (Heritage, 7/2003)*, lot 9053. NGC ID# 2583, PCGS# 7379

**EISENHOWER DOLLAR**

**5059 1972 Type Two MS65 PCGS.** The Type Two 1972 is key to a *Guide Book* collection of Ike dollars. The three 1972 design subtypes are identified by the shape of the islands off the coast of Florida, as seen on the small cloudless Earth on the reverse. The islands are large and incused on the ephemeral Type Two. The present golden-brown Gem is lustrous and well preserved with a good strike. Population: 58 in 65 (1 in 65+), 5 finer (1/14). NGC ID# 2587, PCGS# 97409

**MODERN ISSUES**

**5060 1997-W Jackie Robinson Gold Five Dollar MS69 NGC.** An impressive example of the popular baseball-themed modern gold commemorative, this near-Perfect piece exhibits brilliant and satiny yellow luster. NGC ID# 28UG, PCGS# 9759

**5061 1997-W Jackie Robinson Gold Five Dollar MS69 NGC.** While the U.S. Mint had coined several previous commemoratives celebrating sport, the Jackie Robinson issues were the first to honor a specific athlete. This satiny yellow-gold example, one of just 5,202 Uncirculated pieces in the net mintage, is near-perfect. NGC ID# 28UG, PCGS# 9759

**1997-W Jackie Robinson Half Eagle, MS70  
Technically Perfect Representative**

**5062 1997-W Jackie Robinson Gold Five Dollar MS70 NGC.** The 1997-W Jackie Robinson five dollar gold commemorative in Uncirculated format is the acknowledged key to the modern series, with a low net mintage of 5,202 pieces. This delightful specimen exhibits fully struck design elements and vibrant cartwheel mint luster, with perfectly preserved yellow-gold surfaces. NGC ID# 28UG, PCGS# 9759

**1997-W Five Dollar, MS70  
Jackie Robinson Commemorative**

**5063 1997-W Jackie Robinson Gold Five Dollar MS70 NGC.** A bold strike, brilliant yellow surfaces, and frosty luster characterize this perfect Mint State Jackie Robinson five dollar gold piece. The Legacy of Courage sentiment on the reverse of this commemorative is befitting the famous baseball player. NGC ID# 28UG, PCGS# 9759

**1997-W Jackie Robinson Five, MS70  
Key to the Modern Series**

**5064 1997-W Jackie Robinson Gold Five Dollar MS70 NGC.** The Uncirculated 1997-W Jackie Robinson half eagle is the key to the modern commemorative series, with a net mintage of 5,202 pieces. This technically perfect specimen offers fully struck design elements and vibrant frosty mint luster with no visible distractions. Eye appeal is tremendous. NGC ID# 28UG, PCGS# 9759

- 5065 2000-W Library of Congress Bimetallic Ten Dollars MS70 PCGS.** Only 7,261 Mint State examples of the gold and platinum bimetallic Library of Congress commemorative ten were distributed by the West Point Mint. This technically perfect example is fully struck, with outstanding eye appeal. NGC ID# 28V5, PCGS# 9784
- 5066 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC.** An exceptional bi-metallic piece with extraordinary eye appeal, combining yellow and gray luster with a bold strike. NGC ID# 28V5, PCGS# 9784
- 5067 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC.** This delightful bi-metallic example is a perfect Mint State piece with extraordinary eye appeal, combining satiny yellow-gold with a light gray platinum center. NGC ID# 28V5, PCGS# 9784
- 5068 2000-W Library of Congress Bimetallic Ten Dollars MS70 PCGS.** Deep butter-yellow outer ring color with the pale platinum core offsetting. A technically perfect example of this distinctive and low-mintage offering. NGC ID# 28V5, PCGS# 9784
- 5069 2000-W Library of Congress PR70 Ultra Cameo NGC.** A perfectly preserved example of the popular bimetallic commemorative with outstanding reflectivity and contrast. The Library of Congress ten dollar, perhaps unappreciated at the time of issue, has a number of enthusiasts in the contemporary numismatic community.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 28V6, PCGS# 99784
- 5070 2001-W Capitol Visitor's Center Half Eagle MS69 NGC.** Pale golden color overall with a touch of satin to the luster. This near-perfect example of a low-net-mintage modern commemorative will attract plenty of interest.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 28VB, PCGS# 9792
- 5071 2001-W Capitol Visitor's Center Half Eagle MS69 PCGS.** A stunning, nearly perfect Superb Gem, this Mint State example has satiny yellow-gold luster with excellent eye appeal.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 28VB, PCGS# 9792
- 5072 2001-W Capitol Visitor's Center Half Eagle MS70 NGC.** This is a perfect Mint State commemorative gold piece with brilliant and satiny yellow luster and bold design motifs.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 28VB, PCGS# 9792
- 5073 2001-W Capitol Visitor's Center Half Eagle MS70 NGC.** The Uncirculated 2001-W Capitol Visitor Center gold five is always in demand due to its limited mintage of 6,761 pieces. This virtually perfect specimen is fully struck and lustrous, with no visible flaws. NGC ID# 28VB, PCGS# 9792
- 5074 2001-W Capitol Visitor's Center Half Eagle MS70 NGC.** A lovely specimen, this perfect Mint State half eagle has a bold strike with frosty yellow luster and excellent eye appeal. NGC ID# 28VB, PCGS# 9792
- 5075 2001-W Capitol Visitor's Center Half Eagle MS70 NGC.** An extraordinary and perfect Mint State example, this lemon-yellow specimen has a bold strike and brilliant luster. NGC ID# 28VB, PCGS# 9792
- 5076 2001-W Capitol Visitor's Center Half Eagle MS70 NGC.** A gorgeous and perfect Mint State example with a bold strike and brilliant light yellow luster. NGC ID# 28VB, PCGS# 9792

## MODERN BULLION COINS

### 1997 Tenth-Ounce Platinum Eagle, MS70

- 5077 1997 Tenth-Ounce Platinum Eagle MS70 PCGS.** From a mintage of 70,250 pieces, this magnificent bullion coin is technically perfect, with fully struck design elements and no visible surface flaws. Liberty's gown, tiara, and hair are brightly polished, while her face and the fields have matte-like luster qualities. Eye appeal is terrific. Population: 11 in 70 (1/14). NGC ID# 26S5, PCGS# 99754

### 1997 Quarter-Ounce Platinum American Eagle, MS70

- 5078 1997 Quarter-Ounce Platinum Eagle MS70 PCGS.** The initial Uncirculated-finish quarter-ounce platinum American Eagle issue saw a meager mintage of 27,100 pieces that would be improved upon in the next few years. This technically perfect MS70 example, one of only three coins so graded by PCGS (1/14), is of great importance to the Registry collector. NGC ID# 26SR, PCGS# 99753
- 5079 1999-W Quarter-Ounce Gold Eagle — Struck With Unfinished Proof Dies — MS69 PCGS.** This coin's unusual semireflective character comes from it being struck by unfinished proof dies. Pale yellow on the obverse with a touch more apricot color on the reverse and near-perfect on both sides.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*
- 5080 2008-W Gold Eagle MS70 PCGS.** From light gold to richer sun-yellow, this satiny quarter-ounce gold American Eagle offers a range of colors in its uncirculated-format perfection. PCGS# 393064

## COINS OF HAWAII

- 5081 1883 Hawaii Half Dollar MS63 PCGS.** Kalakaua, King of Hawaii by vote rather than birth, is the subject of this half dollar struck for what was then an independent nation. Both sides are uncommonly bright silver with just a hint of blue. Lightly marked with a shallow scrape below the chin. PCGS# 10991
- 5082 1883 Hawaii Dollar XF45 PCGS.** Luster outlines the legends of this lightly toned Choice XF dollar. Small marks are scattered but none are of individual importance. A scarce single-year crown-sized type. Housed in an old green label holder.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* PCGS# 10995

- 5083 1883 Hawaii Dollar AU58 NGC.** The “dala” or crown-size Hawaii dollar from the only year of issue, 1883. Semireflective despite light rub with gold-to-gray patina dappled across each side. Census: 39 in 58, 70 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 10995*

## GSA DOLLAR

### 1881-CC GSA Dollar, MS66+ Remarkably Clean Surfaces

- 5084 1881-CC MS66+ NGC. CAC.** The mintage for the 1881-CC is remarkably low with only 296,000 pieces struck, one of the lowest production runs in the entire Morgan series. But nearly half the original mintage was set aside in government vaults and later sold in the GSA Sales in the 1970s. Few, however, can be found in this remarkable state of preservation. The brightly frosted surfaces are uninterrupted by the usual numerous abrasions. Brilliant throughout.

## CERTIFIED MODERN PROOF SETS

- 5085 Five-Piece 1938 Proof Set.** The set includes: **cent PR63 Red PCGS**, rich orange-gold color, a blush of olive and rose near the jaw; **nickel PR65 PCGS**, milky powder-blue and almond-gold toning; **dime PR64 PCGS**, fully struck, light gray patina; **quarter PR65 PCGS**, an undisturbed cream-gray Gem, housed in a first generation holder; and a **half dollar PR64 NGC**, well struck, satiny, a few minute obverse flecks near 3 o'clock. (Total: 5 coins)
- 5086 Five-Piece 1939 Proof Set.** The set includes a **cent PR65 Red PCGS**, an outstanding Gem housed in an old green label holder, the coat is lapped near the date; **Reverse of 1938 nickel PR64 NGC**, fully struck, pastel lavender and gold toning, minor carbon; **dime PR66 PCGS**, needle-sharp and flawless, a hint of gold patina; **quarter PR64 PCGS**, virtually brilliant, highly pleasing for the certified grade; and a **half dollar PR64 NGC**, light golden-gray toning, well struck, satiny. (Total: 5 coins)
- 5087 Five-Piece 1940 Proof Set.** The set includes a **cent PR65 Red PCGS**, a peach-gold Gem with a couple of minute obverse flecks; **Reverse of 1940 nickel PR65 PCGS**, ice-blue and almond-gold toning, well struck; **dime PR64 PCGS**, a razor-sharp specimen with dappled light caramel toning; **quarter PR64 PCGS**, lightly toned and high-end for the designated grade; and a **half dollar PR65 NGC**, fully struck, medium cream-gray patina. (Total: 5 coins)
- 5088 Five-Piece 1941 Proof Set.** The set includes a **cent PR64 Red PCGS**, one small spot on the shoulder, housed in an older green label holder; **nickel PR64 PCGS**, fully struck, light golden-gray toning; **dime PR66 NGC**, pristine and fully white; **quarter PR65 NGC**, stone-white and exemplary; and a **half dollar PR63 NGC**, the AW monogram is present, brilliant and sharply struck, minor obverse hairlines. (Total: 5 coins)

- 5089 Six-Piece 1942 Proof Set.** The set includes a **cent PR64 Red and Brown NGC**, dramatic cherry-red, orange, cobalt-blue, and apple-green patina; **Type One nickel PR64 PCGS**, razor-sharp, light golden toning, one tiny spot on Jefferson's collar; **Type Two nickel PR65 PCGS**, pristine, honey-gold toning, a minor retained lamination near the profile; **dime PR65 NGC**, brilliant and prominently mirrored with exemplary surfaces; **quarter PR64 NGC**, stone-white and flawless aside from minor weakness of strike on the right borders; and a **half dollar PR63 PCGS**, faint marks near the monogram, a minor reverse spot at 3 o'clock. (Total: 6 coins)

## ERRORS

### 1943 Steel Cent Struck 10% Off-Center, MS61

- 5090 1943 Cent — Struck 10% Off-Center — MS61 NGC.** The one-year-only steel cent type lends added interest to this Philadelphia piece that was struck 10% off-center toward 2 o'clock. The piece has toned considerably and exhibits a fingerprint pattern in sage on a steel-blue backdrop. Minor darkening on the high points counterbalances ample luster.

### 1985 Cent, MS68 Red Two Planchet Bonded Pair

- 5091 1985 Cent — Two Planchet Bonded Pair — MS68 Red NGC.** 5.0 gm. Upon first glance, this mint error appears to be a reverse die cap, and an impressive one with a steep thimble-like rim. Close inspection shows a double rim, one inside the other. There are two cents in the holder: an obverse die cap housed inside a reverse die cap, with the reverse of the obverse cap fused (from the strike) to the obverse of the reverse cap. Both the exterior obverse and reverse designs are well struck, and the margins exhibit zinc residue forced out from the interior of the coin by the strike.

**1986 Cent on a 1986-P Dime, MS66**

- 5092 1986 Cent — Struck on a 1986-P Dime — MS66 NGC.** The final digit in the dime date is nearly lost in a fold of Lincoln's jacket, though with great discernment the left curve of a 6 appears. Roosevelt's upper profile is far more obvious, and his brow and nose appear to provide an artificial "top" for Lincoln's head. A pleasingly preserved "11 cents" coin.

**90% Off-Center Buffalo Nickel, MS61  
Identifiable By Reverse**

- 5093 Undated Buffalo Nickel — Struck 90% Off-Center — MS61 PCGS.** Essentially a blank planchet that hosts a small tab, this piece is struck 90% or more off-center at 11 o'clock. The obverse design is illegible, while just enough of the reverse remains to identify the type. Visible are the letters OF AMERI and the E from the motto. Satiny luster appears on the small tab, and the original brilliance of the blank planchet remains.

**Undated Buffalo Nickel  
Struck 80% Off-Center, MS62**

- 5094 Undated Buffalo Nickel — Struck 80% Off-Center — MS62 PCGS.** Offset toward 12 o'clock with part of the lower portrait and the top of the bison's back visible. Surfaces are mostly medium-gray and sage, streaky with an area of possible lamination at the bottom of the obverse. A great error that is at least 75 years old and may already be a centenarian.

**Jefferson Nickel, MS66  
Two Planchet Bonded Pair**

- 5095 Undated Jefferson Nickel, Monticello Reverse — Two Planchet Bonded Pair — MS66 NGC.** This imposing mint error began as a broadstrike. The coin remained in the coinage chamber, and a new planchet was delivered, off center. The stack was struck, bonding the two coins together. No discernible design feature is visible on the obverse, which suggests that for both strikes, the obverse die was completely blocked by an unknown textured object. The second strike of the obverse exhibits an oval-shaped indent.

**1943-S Nickel on a Steel Cent Planchet  
AU Details**

- 5096 1943-S Nickel — Struck on a Steel Cent Planchet, Environmental Damage — NGC Details. AU.** A different sort of "war nickel," this S-mint coin was struck on a steel cent planchet. While NGC puts the date in parentheses, enough of the 3 in the date is present to make a clear distinction. Lightly rubbed with considerable environmental damage but a fascinating error nonetheless.

**1982-P Nickel Obverse Die Cap, MS67  
Broad and Deep**

- 5097 1982-P Nickel — Obverse Die Cap — MS67 NGC.** If it were not an error, this would be among the few finest 1982-P nickels available to Registry collectors. It is, however, a dramatic obverse die cap with hyper-detailed portrait of Jefferson at the bottom and walls at least three "nickel-thicknesses" at their highest. The reverse is near-obliterated.

**1973-D Quarter, MS65 Red  
Struck on a Cent Planchet**

- 5098** 1973-D Washington Quarter — Struck on a Cent Planchet — MS65 Red NGC. 3.06 gm. Well centered within the dies, favoring Washington and the eagle. The peripheral legends are partial but the upper half of the date is present, as is all of the mintmark. Appropriately, most of QUARTER DOLLAR is off the flan. A lustrous orange-gold Gem with occasional glimpses of plum-red and blue-green on the reverse.

**1999-D Delaware Quarter on a Nickel Planchet  
An Attractively Toned Near-Gem**

- 5099** 1999-D Delaware Quarter — Struck on a Nickel Planchet — MS64 PCGS. The first of the Statehood quarter issues on an erroneous five cent planchet. Toning is generally light and green-gold in color. Luster is ample and inner detail solid, though the peripheral letters show a "drawn" effect from the flow of insufficient metal beneath the quarter dies.

**1999-P Connecticut Quarter, MS64  
Struck Three Times and Off-Center**

- 5100** 1999-P Connecticut Quarter — Struck Thrice — MS64 NGC. After this Philadelphia Connecticut quarter's first off-center impression, it failed to clear the dies and received two more strikes in quick succession. The secondary portrait of Washington, to the original's northeast, has a clear doubling effect on features such as Washington's chin and eye.

**Connecticut State Quarter, MS64  
Double Struck on Aluminum Scrap**

- 5101** (1999) Connecticut Statehood Quarter — Double Struck on Aluminum Scrap — MS64 PCGS. Similar errors are sometimes certified as "struck on a feeder finger fragment," and indeed, that may be the source of the errant fragment. If so, it may have put the press out of service until the finger could be replaced. This thick and dark silver-gray fragment displays two impressions of LIBERTY, confirming a double strike. Most of CONNECTICUT and a generous portion of the tree are on the coin.

**1964-D Kennedy Half, MS64  
on a Jefferson Nickel Planchet**

- 5102** 1964-D Kennedy Half — Struck on a Five Cent Planchet — MS64 PCGS. Though the date is off the flan, we know it must be 1964, since the Denver mintmark is present near the branch stem. Mintmarks were absent between 1965 and 1967, and moved to the obverse beginning in 1968. A second mint error, a retained lamination, overlaps the arrowheads. Struck aligned with the collar at 12:30; all of UNITED STATES OF AMERICA is absent. Lustrous and smooth with pastel almond-gold and steel-gray toning.

**1966 SMS Kennedy Half, MS63  
Struck on a Quarter Planchet**

- 5103** 1966 SMS Kennedy Half Dollar — Struck on a Quarter Planchet — MS63 NGC. The usual care and attention paid to Special Mint Sets must have been diverted when this half dollar was struck on a quarter planchet. Watery reflectivity persists through dappled gold-and-gray patina of considerable opacity. Wispy abrasions in the fields account for the grade.

**1976 Clad Bicentennial Half, MS62  
Struck on a Quarter Blank**

- 5104 1976 Clad Bicentennial Half — Struck on a Quarter Blank — MS62 NGC.** 5.7 gm. A wrong planchet error on a briefly issued type. Aligned with the collar at 5 o'clock with edge reeding visible in the vicinity. Both dates are complete, but appropriately, most of HALF DOLLAR is absent, as is a majority of LIBERTY and UNITED. Lightly toned, satiny, and minimally abraded. The type one planchet likely passed through a half dollar upset mill but was unaffected due to its undersized status.

**1979 Half Dollar, Near-Mint  
Struck on an Anthony Dollar Flan**

- 5105 1979 Half Dollar — Struck on an Anthony Dollar Planchet — AU58 NGC.** 8.1 gm. An uncommon wrong planchet combination. The base of the date is off the flan but all four date digits are obvious. The peripheral legends exhibit spreading toward the rim, characteristic of the error category. Lustrous with light gold toning and exceptionally mark-free surfaces.

**Anthony Dollar on a Cent Planchet  
MS63 Red and Brown**

- 5106 Undated Anthony Dollar — Struck on a Cent Planchet — MS63 Red and Brown PCGS.** Aligned with the collar die at 1 o'clock, where edge reeding is noted. The date and mintmark are off the flan but most of the portrait and eagle are present. Lustrous and lightly abraded with predominant peach-red color. The high points display hints of steel-blue.

**SO-CALLED DOLLARS**

- 5107 1826 Erie Canal Completion MS61 NGC. HK-1.** Famous as the first variety in the Hibler-Kappen reference, this white metal medal features Pan and Neptune on the obverse. It was issued by New York City from dies engraved by Charles Cushing Wright. A sharply struck example with minor marks above Pan. The surfaces are granular from natural oxidation.

- 5108 1909 Henrik Hudson Daalder MS66 NGC. DeLorey-75, HK-371.** Prolific medal issuer Thomas Elder was responsible for this unofficial gold so-called dollar variety, which commemorated the Hudson-Fulton Celebration in New York City. A pristine butter-gold matte finish example.

- 5109 1920 Wilson Dollar, Silver MS64 ANACS. HK-449.** This popular so-called dollar variety celebrates the opening of the Manila Mint in the Philippines, then a United States territory. The motifs are taken from the 1882 and 1920 and assay office medals. Lustrous and sharply struck with light green-gold toning. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

- 5110 1933 Nevada Dollar, Sterling Investment Co. AU55 NGC. HK-821.** A rare variant of the popular Pedley-Ryan series of so-called dollars, HK-821 has the reverse of HK-825 but a storecard obverse for Sterling Investment Co. Most of the order was returned to Pedley-Ryan and melted. This pearl-gray example is unblemished aside from traces of aqua residue within the RE in RENO.

- 5111 1905 Denver Mint Opening MS62 Brown NGC. HK-876.** Struck to commemorate the official opening of the Denver Mint, though the earliest coins from the facility are dated 1906. This smooth walnut-brown bronze medal bears the simple legends DENVER 1905 on the obverse. The reverse is featureless aside from the rim and dentils.

**MEDALS AND TOKENS**

- 5112 1837 Feuchtwanger Three Cent, Coat of Arms AU55 PCGS. Low-117, HT-262, R.3.** Feuchtwanger's cent tokens are plentiful, but his various three cent varieties range from scarce to very rare. This smooth dove-gray example is nicely struck and shows scant evidence of wear. The die engraver attempted to enter the New York motto EXCELSIOR on the ribbon between Liberty and Justice, but ran out of room and had to omit the letter R. Listed on page 404 of the 2014 *Guide Book*.

**CIVIL WAR PATRIOTIC**

- 5113 Our Union — Full Brockage — MS66 Brown NGC, Fuld-201/201a, the obverse displays substantial orange-gold; and a No Compromise With Traitors MS65 Brown NGC, Fuld-201/432a, colorfully toned cherry-red, lavender, and peach-gold.** A brockage occurs when a coin is struck between a die and a previously struck coin. The consignor believes the present lot is a mated pair, supported by consecutive certified serial numbers, similar preservation, and identical die states of the obverses. (Total: 2 tokens)

**ALASKA TOKEN**

- 5114 Complete Set of Eight 1935 Alaska Rural Rehabilitation Corporation Tokens.** Popularly known as "Bingles," these Alaska Territory tokens are listed in the *Guide Book*. The lot includes: one cent AU55 NGC, five cents MS61 NGC, ten cents MS62 NGC, twenty-five cents MS61 NGC, fifty cents — Scratches — Unc Details NGC, one dollar — Scratches — Unc Details NGC, five dollars AU58 NGC, and ten dollars MS61 NGC. (Total: 8 tokens)

**INGOT**

- 5115 Undated San Francisco Silver Ingot.** This 32 x 51 x 10 mm ingot is stamped on the top side with the oval imprint of the San Francisco Mint, then the individual ingot number, 1333, is in large numerals, followed by 999.5 / FINE. The bottom side gives the weight: 5.23 / OZS. The top has partial gold toning and the bottom displays lilac patina. Several small pits are on the eagle's left wing within the oval imprint. ## SESSION FOUR

### PATTERNS

1838 Half Dollar Pattern, Judd-72  
A Sharply Struck Proof

- 5116** 1838 Half Dollar, Judd-72, Pollock-75, R.5 — Improperly Cleaned — NCS. Proof. A large bust of Liberty faces left, with stars and the date at the margins. The reverse features an eagle with spread wings. For many decades, the obverse design was attributed to William Kneass, but Gobrecht was almost certainly the engraver, as the portrait bears close resemblance to the gold eagle also introduced in 1838. Struck in silver with a reeded edge and close to medal turn. Mostly retoned peach and lavender-violet, though hairlines remain on the too-uniform luster.  
Ex: Bowers and Merena (1/2008), lot 442. PCGS# 11282

1855 Flying Eagle Cent, PR63 Brown  
Judd-168 Original

- 5117** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR63 Brown PCGS. A Flying Eagle cent pattern in a large format, featuring a hooked-neck eagle, slanting 5s on the obverse, and ONE CENT in the center of the reverse surrounded by a thick laurel wreath similar to its counterpart on the large cent. Struck in copper with a plain edge. Gunmetal-blue dominates this well struck Select specimen, though orange-red and lilac are also noted. Unlike most Judd-168 patterns, clash marks are absent. PCGS# 11720

1856 Judd-177 Half Cent, PR64  
Regular Dies Trial Strike

- 5118** 1856 Half Cent, Judd-177, Pollock-205, R.5, PR64 PCGS. CAC. Regular die trials striking for the half cent, attributed as Breen-2b or 2c in his *Half Cent Encyclopedia*. Struck in copper-nickel with a plain edge. Breen reported two compositions of the copper-nickel planchets. His B-2b is recorded as 90% copper and 10% nickel, and B-2c is recorded as 88% copper and 12% nickel. It is impossible to distinguish between them without metallurgical testing. This Choice proof offers smooth walnut-tan surfaces. The centers are well brought up although the broad rims are softly impressed. Both sides are lightly reflective. Population: 14 in 64 (1 in 64+), 4 finer (1/14). PCGS# 11777

1859 Longacre Half Dollar, PR62  
Judd-237, Silver

- 5119** 1859 Half Dollar, Judd-237, Pollock-293, R.4, PR62 PCGS. The Longacre-designed French Liberty Head, facing right with laurel and vine in her hair. A ribbon below the bust is inscribed LIBERTY, with UNITED STATES OF AMERICA around, and the date below. The reverse displays the agricultural wreath of the Seated dime, resized to appropriate scale, around the denomination HALF DOLLAR. Struck in silver with a reeded edge. This boldly struck specimen displays blended golden-brown and stone-gray toning. Minor hairlines determine the grade.  
Ex: David Golding Collection (Stack's, 6/1952), lot 8; Washington ANA (Stack's, 8/1971), lot 446; Harry W. Bass, Jr. Collection, Part I (Bowers and Merena, 5/1999), lot 1166. PCGS# 11966

**1859 Longacre Half Dollar, PR63  
Judd-241, Silver, French Head**

- 5120** 1859 Half Dollar, Judd-241, Pollock-297, R.4, PR63 NGC. The Longacre "French Head of Liberty" design for the half dollar. The reverse displays 50 CENTS encompassed by a cereal wreath that is very similar to that introduced on the issued 1860 Seated dime, although much larger in scale. Struck in silver with a reeded edge. This sharply struck Select proof has blue-gray and yellowish-green toning over fully mirrored fields. PCGS# 11978

**1863 Washington Two Cent Piece  
Judd-305, Copper, PR64 Brown**

- 5121** 1863 Two Cents, Judd-305, Pollock-370, R.4, PR64 Brown PCGS. CAC. A patriotic portrait of Washington faces right with GOD AND OUR COUNTRY around and the date and two stars below. Reverse with the denomination 2 CENTS centered in a wheat wreath with UNITED STATES OF AMERICA around. The word CENTS is curved dramatically. Struck in copper with a plain edge. The obverse has delicate rose, violet, and blue patina, while the reverse is entirely blue and violet. Both sides have sharp design details and fully mirrored fields. PCGS# 60460

**1865 Three Cent Nickel in Copper  
Judd-411, PR64 Brown**

- 5122** 1865 Three Cent Nickel, Judd-411, Pollock-482, High R.6, PR64 Brown PCGS. Similar in design to the issued three cent nickel, but the ribbon ends extend to the denticles, giving the reverse a crowded appearance. Struck in copper with a plain edge. A razor-sharp example of this scarce Judd variety. Vibrant fire-red, sea-green, and orange toning emerges when the piece is rotated beneath a light. A hair-thin mark is noted on the cheek. PCGS# 60592

**1865 Three Cent Nickel, PR63 Brown  
Judd-413, Struck in Copper**

- 5123** 1865 Three Cent Nickel, Judd-413, Pollock-484, R.5, PR63 Brown PCGS. This regular dies trial piece shares the same obverse die as the scarce proof 1865 three cent nickel, since the date exhibits similar broad recutting. A high date variant, unlisted in Pollock, is also known. Struck in copper with a plain edge. Both sides are draped in deeply blended peach, cherry, and olive toning. Well struck and undisturbed with a few small spots. Housed in an old green holder. PCGS# 60594

**1867 Judd-566 Pattern, PR65  
Five Cents in Nickel**

- 5124** 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR65 NGC. The obverse features a bust of Liberty facing left, wearing a coronet but lacking a star, surrounded by the legend and date. The denomination is within a laurel wreath that is close to the edges on the reverse, with a tiny IN GOD WE TRUST above. CENTS is in a straight line. Struck in nickel with a plain edge. An attractive Gem with pleasing mirrored fields beneath delicate gold toning, exhibiting a hint of contrast. Census: 4 in 65, 2 finer (1/14). PCGS# 60776

**1867 Five Cent Pattern in Nickel  
Judd-566, PR65**

- 5125** 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR65 PCGS. The obverse features a bust of Liberty facing left, wearing a coronet but lacking a star, surrounded by the legend and date. The denomination is within a laurel wreath that is close to the edges on the reverse, with a tiny IN GOD WE TRUST above. CENTS is in a straight line. Struck in nickel with a plain edge. About two dozen examples are known of this five cent pattern. This is a nicely reflective example that shows muted gray patina in the fields. PCGS# 60776

1868 Judd-608 Cent, PR66  
Design Based on Three Cent Nickel

- 5126** 1868 One Cent, Judd-608, Pollock-673, R.4, PR66 PCGS. The design closely resembles the contemporary three cent nickel, but only a single pillar represents the denomination within the wreath, and the ribbon ends are more prominent. The die variant with the 1 in the date centered over a dentil. Struck in nickel with a plain edge. Well struck and immaculate with milky olive-gray toning. Certified in a green label holder. PCGS# 60820

1868 Five Cent, Choice Proof  
Judd-633 in Nickel, High Date

- 5127** 1868 Five Cents, Judd-633, Pollock-705, R.5, PR64 NGC. The obverse design resembles the adopted three cent nickel, but on a larger planchet, with minor design modifications appropriate to the increased diameter. The reverse features a Roman numeral V in the center, with a wreath encircling, scroll with IN GOD WE TRUST and Maltese cross above. The High Date Pollock variant. Struck in nickel with a plain edge. A nicely struck glittering proof with light gray surfaces and wispy blue toning, showing minuscule carbon on each side. Census: 7 in 64, 10 finer (1/14). PCGS# 60851

1869 Three Cent Nickel, Gem Proof  
Judd-676, Smooth Pillars

- 5128** 1869 Three Cent Nickel, Judd-676, Pollock-755, R.4, PR65 PCGS. Similar to the contemporary three cent nickel, except the date is larger and the denomination pillars are smooth. The rare Pollock variant with a short lower left ribbon end. Struck in nickel with a plain edge. Essentially untuned and devoid of hairlines. A good strike, though the shoulder curl and ribbon loop are incomplete. The motifs and legends exhibit moderate cameo contrast with the reflective fields. PCGS# 60901

Select Proof Judd-742 1869  
Standard Silver Half Dollar

- 5129** 1869 Standard Silver Half Dollar, Judd-742, Pollock-823, R.5, PR63 PCGS. A bust of Liberty faces right with UNITED STATES OF AMERICA around and a scroll with IN GOD WE TRUST below. Liberty wears a cap ornamented with two large stars. William Barber's initial "B" can be seen within the folds of the ribbon at the back of the cap, and pronounced doubling is seen on the motto IN GOD WE TRUST. The reverse has 50 CENTS centered within a wreath of oak and laurel leaves with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. Pale golden-tan toning settles over lightly hairlined silver surfaces. Population: 9 in 63, 14 finer (1/14). PCGS# 60969

1871 Five Cent Pattern in Copper  
Judd-1054, PR63 Brown

- 5130** 1871 Five Cents, Judd-1054, Pollock-1189, High R.6, PR63 Brown PCGS. Longacre's three cent nickel Liberty motif is adapted here for the five cent piece, although the arrangement of the denomination and wreath is more reminiscent of the two cent piece. Struck in copper with a plain edge. Examples of this design were struck in both copper and nickel. The Brown designation actually includes a significant amount of blue patina, especially in the fields on each side. A few minor contact marks account for the grade. PCGS# 61313

1879 Judd-1617 Metric Dollar  
Proof Example of a Popular Design

- 5131** 1879 Metric Dollar, Judd-1617, Pollock-1813, R.4 — Improperly Cleaned — NGC Details. Proof. This William Barber design features a bust left of Liberty on the obverse. She wears a coronet inscribed LIBERTY. The reverse displays an agricultural wreath and the uncommon motto DEO EST GLORIA within a scrollwork. The cumbersome goloid alloy is listed within a beaded circle. Struck in goloid with a reeded edge. Light hairlines are evident under pale gold and lavender toning. Still, a sharply struck and pleasing example.

**1879 Metric Dollar in Silver  
Judd-1618, PR58**

- 5132 1879 Metric Dollar, Judd-1618, Pollock-1813, R.5, PR58 NGC.** William Barber's Metric dollar pattern. Liberty wears a coronet with a border of pearls. The reverse shows a partial wreath of cotton and corn tied at the base, a ribbon, and inscriptions that include DEO EST GLORIA and the elemental composition of goloid. Struck in silver with a reeded edge. This naturally toned example has lovely gray and iridescent surfaces with reflective fields. PCGS# 61996

**Legend Obverse 1883 Liberty Nickel  
Judd-1710, PR66 Cameo**

- 5133 1883 Liberty Head Five Cents, Judd-1710, Pollock-1914, R.5, PR66 Cameo NGC.** The obverse is similar to the regular issue 1883 Liberty nickel, but UNITED STATES OF AMERICA substitutes for 13 stars around the periphery. The reverse reads 50 N. / 50C. within a wreath of corn and cotton, FIVE above and CENTS is below. Struck in nickel with a plain edge. Brilliant nickel-gray surfaces on this Premium Gem Cameo proof exhibit deeply mirrored fields around frosty white devices. Census: 2 in 66 Cameo, 2 finer (1/14). PCGS# 62127

**GOLD DOLLARS**

- 5134 1851-C VF35 PCGS. Variety 1.** An original Choice VF Charlotte type coin certain to please many Southern gold collectors. Toned olive-green with glimpses of orange and rose. Marks are minor for the designated grade. Certified in a green label holder. NGC ID# 25BL, PCGS# 7514
- 5135 1851-C AU50 PCGS. Variety 3.** The High Date variant of the popular Charlotte issue. The rare early die state without a radial crack to the second S in STATES. The nicely struck apricot-gold surfaces are free from noticeable marks, though a strike-through (as made) is at the ribbon loop. NGC ID# 25BL, PCGS# 7514
- 5136 1851-C AU50 PCGS. Variety 3.** Sea-green luster outlines design elements of this otherwise caramel-gold Charlotte dollar. A fully struck example with minimal evident high point friction. The fields display a moderate number of hair-thin marks. NGC ID# 25BL, PCGS# 7514

- 5137 1851-C AU58 NGC. Variety 3.** Cracked at the second S in STATES on the reverse. This Charlotte dollar issue is one of the more accessible routes to Southern gold, and this near-Mint example has a pleasing gold-orange glow with only a few light spots of rub on the high points. NGC ID# 25BL, PCGS# 7514

- 5138 1851-C AU58 NGC. Variety 1.** The crack from the F in OF confirms the die marriage. An original and nicely struck Borderline Uncirculated representative of this scarce Charlotte variety. Orange-gold fields accompany sea-green borders. The only remotely consequential mark is relegated to Liberty's chin. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25BL, PCGS# 7514

- 5139 1851-O MS63 NGC. Variety 2.** Lengthy slender obverse die cracks readily attribute the New Orleans die marriage. This unmarked caramel-gold example is sharply struck save for the dentils and the second L in DOLLAR. NGC ID# 25BN, PCGS# 7516

**1852-D Gold Dollar, AU55  
Variety 1-A**

- 5140 1852-D AU55 NGC. Variety 1-A.** The only known die variety. The Dahlonega, Georgia Mint has a limited production of only 6,360 gold dollars in 1852, in the waning days of Bechtler private gold production. This bright yellow-gold example exhibits brilliant orange overtones on each side. An exceptional Choice AU gold dollar. NGC ID# 25BS, PCGS# 7519

- 5141 1852-O MS61 NGC. Variety 1.** This wheat-gold New Orleans representative has good luster and occasional minor thin field marks. The portrait is well struck, though the lower obverse margin shows softness. NGC ID# 25BT, PCGS# 7520

**1853-D Gold Dollar, AU53  
Variety 5-G**

- 5142 1853-D AU53 PCGS. Variety 5-G.** The only known die pair for the 1853-D gold dollars was used to produce 6,583 coins that year. This attractive example has lustrous yellowish orange-gold surfaces with rich blue and iridescent toning. A highly attractive gold dollar. Population: 12 in 53, 51 finer (1/14). NGC ID# 25BW, PCGS# 7523

**1853-D Gold Dollar, AU58  
Only 6,583 Pieces Struck**

**5143 1853-D AU58 PCGS. Variety 5-G.** The 1853-D gold dollar boasts a mintage of 6,583 pieces, with only one pair of dies for the date. This attractive near-Mint example shows just a trace of wear on the sharply detailed design elements and the pleasing yellow-gold surfaces are lustrous and lightly abraded. Population: 22 in 58, 14 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25BW, PCGS# 7523

**5144 1856 Upright 5 MS64 PCGS.** Frosty and beautiful with hints of lavender against a medium-yellow base. Decently struck overall but softness on the 5 in the date, which nonetheless is identifiable as the Upright variety. Population: 20 in 64 (2 in 64+), 5 finer (1/14). PCGS# 7541

**5145 1859-D — Reverse Improperly Cleaned — NGC Details. AU. Variety 11-O.** A peach-gold and olive-green example of a late and low mintage Dahlonega issue. The central reverse displays a patch of horizontal hairlines. The 5 in the date has been strengthened. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**5146 1864 AU58 PCGS.** Light yellow-gold overall with occasional hints of green-gold. Excellent detail on the design elements, though the date shows localized weakness. Population: 7 in 58, 43 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25CY, PCGS# 7563

**5147 1867 MS62 NGC.** Lacking evidence of die clashing that often is seen on this issue, this orange-gold example displays delightful toning accents and a bold strike. A small mintage of just 5,250 pieces is reflected in the few examples represented in NGC Census: 15 in 62, 21 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25D3, PCGS# 7566

**1870-S Gold Dollar, MS62+  
Bold Luster and Great Eye Appeal**

**5148 1870-S MS62+ NGC. CAC.** The 1870-S gold dollar issue is one that is quite popular, due in part to its own inherent qualities and as well owing to its association with the unique 1870-S three dollar gold piece, now in the Harry Bass Foundation Collection. The 1870-S gold dollars were the only mintmarked gold dollars made after the 1860-S, and only 3,000 pieces were struck. They were curiosities in the Old West of the era, however, and were saved in some quantity. This MS62+ piece is toward the higher end of certified survivors, showing great eye appeal on orange-gold surfaces with bold luster. A few tiny field marks account for the grade but do not defeat the eye appeal. Census: 11 in 62 (1 in 62+), 10 finer (1/14). NGC ID# 25D7, PCGS# 7570

**5149 1872 MS62 PCGS.** The low mintage of just 3,500 pieces makes this gold dollar a seldom-seen rarity in any condition. This example displays prooflike fields surrounding frosted, sharply-struck devices. Numerous tiny marks are scattered about the medium-gold surfaces, but none are overly significant for the grade. NGC ID# 25D9, PCGS# 7572

**5150 1873 Closed 3 MS61 NGC.** Semireflective, as usually seen for this low-mintage issue. Striking weakness is noted in the middle of the date but the overall eye appeal is decent for the grade. Census: 21 in 61, 56 finer (1/14). NGC ID# 25DA, PCGS# 7574

**5151 1874 MS66 NGC.** Gold dollars were produced in large numbers in 1874, making the issue reasonably available in high grade and a favorite choice of type collectors. This delightful Premium Gem displays well-detailed design elements and lustrous orange-gold surfaces. Census: 53 in 66 (1 in 66+, 2 in 66 ★), 40 finer (1/14). NGC ID# 25DC, PCGS# 7575

**5152 1876 MS62 NGC.** From a mintage of 3,200 pieces, this well-detailed MS62 gold dollar exhibits lightly marked yellow-gold surfaces with prooflike reflectivity and outstanding eye appeal. Census: 21 in 62, 47 finer (1/14). NGC ID# 25DE, PCGS# 7577

**5153 1881 MS61 Prooflike NGC.** Known for excellent quality, this issue is often found with the bold strike and deep, prooflike fields as displayed by this example. Although a few small marks are sprinkled among some delicate hairlines, this MS61 Prooflike appears to be a higher grade when viewed in hand. PCGS# 77582

**5154 1883 MS66 PCGS.** Sharply struck with glimmering luster and great yellow-gold color. This Premium Gem is a quality survivor from late in the series. NGC ID# 25DM, PCGS# 7584

**5155 1884 MS64 Prooflike NGC. CAC.** Both sides are clearly reflective on this gleaming canary-gold near-Gem. The obverse is pleasingly preserved, though a few marks are mixed in with the small planchet flaws on the reverse. Census: 7 in 64 Prooflike, 11 finer (1/14). PCGS# 77585

**5156 1885 MS64 PCGS.** Wheat-gold elements enhance the pale yellow luster across each side. A pleasing near-Gem representative of this later-date gold dollar issue with a small five-figure mintage. NGC ID# 25DP, PCGS# 7586

**5157 1885 MS64 Prooflike NGC. CAC.** Outstanding reflectivity and flash on pale yellow-gold surfaces. This Prooflike near-Gem has exquisite detail on the portrait. Census: 8 in 64 Prooflike, 11 finer (1/14). PCGS# 77586

**5158 1886 MS64 PCGS. CAC.** Primarily pale yellow with a few coppery areas near the rims. Glimmering luster through the fields enhances the all-around eye appeal. Population: 84 in 64 (1 in 64+), 63 finer (1/14). NGC ID# 25DR, PCGS# 7587

**5159 1889 MS65 PCGS.** The rich luster and deep color of this Gem provide this piece with immediate eye appeal. This beautiful coin is predominantly peach-gold, though blushes of lime-green and powder-blue are also evident. The strike is precise. An as-made strike-through is present near the R in AMERICA. The lower wreath is die doubled, as always on business strikes of this final year issue. NGC ID# 25DU, PCGS# 7590

**5160 1889 MS65 PCGS. CAC.** The final year of issue for the gold dollars except for a few later commemoratives. This Gem has light yellow surfaces and frosty luster with minimal marks and above average design definition. NGC ID# 25DU, PCGS# 7590

## CLASSIC QUARTER EAGLES

- 5161** 1834 AU53 NGC. Breen-6140, Variety 2, R.3. An attractive tan-gold example with only a single relevant mark, on the field near the bust tip. Stars 2, 3, and 11 are boldly repunched. The Wide AM reverse die would be used again in 1835 (Variety 6) and 1836 (Varieties 9 and 12).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25FS, PCGS# 7692*

- 5162** 1834 AU55 PCGS. Breen-6140, Variety 4, R.3. The "Broken M" variety with a defective M in AMERICA. The Large Head obverse shows strong repunching on stars 2, 3, and 11. This nicely struck canary-gold representative displays bright luster near design elements. No marks are individually consequential. NGC ID# 25FS, PCGS# 7692

- 5163** 1834 AU55 NGC. Breen-6140, Variety 4, R.3. Luster fills the margins of this sun-gold Choice AU quarter eagle. Marks are surprisingly absent, and the strike is good despite blending on the curl above the ear. A Large Head example, scarcer than the Small Head Variety 1.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25FS, PCGS# 7692*

- 5164** 1834 AU55 NGC. Breen-6138, Variety 1, R.1. The introductory Small Head subtype. The modest dip between the two leftmost curls on Liberty's head confirms the attribution. Honey-gold rim toning yields to pale yellow at the lustrous interiors. NGC ID# 25FS, PCGS# 7692

- 5165** 1836 Script 8 AU50 NGC. Breen-6143, Variety 11, R.2. Uncommonly well-defined on the eagle's feathers, though the portrait is blunter than only light wear can account for. A die crack passes through star 6 on the still-lustrous yellow-gold obverse. NGC ID# 25FU, PCGS# 7694

### 1836 Quarter Eagle, MS61 Script 8, Variety 13

- 5166** 1836 Script 8 MS61 NGC. Breen-6143, Variety 13, R.4. Ex: Manhattan Collection. The obverse exhibits a script style 8 and the usual diagonal crack from star 6 to the border between stars 12 and 13. This Mint State example has fully brilliant yellow-gold surfaces with exceptional eye appeal. NGC ID# 25FU, PCGS# 7694

### 1839-C Quarter Eagle, AU Details Variety-22, Winter-2

- 5167** 1839-C — Improperly Cleaned — NGC Details. AU. Breen-6150, Winter-2, Variety-22, R.4. Both sides of this lightly worn example have myriad abrasions with light yellow surfaces and a splash of copper toning at the upper reverse.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

### 1839-C Quarter Eagle, AU Details Winter-2, Variety-22

- 5168** 1839-C — Improperly Cleaned — NGC Details. AU. Breen-6150, Winter-2, Variety-22, R.4. The date is boldly repunched on this obverse that appears nowhere else in the series. Both sides are moderately abraded on this lightly worn yellow-gold quarter eagle. This early die state example has a delicate reverse crack from the left shield point to the eagle's beak. NGC ID# 25G4, PCGS# 7699

- 5169** 1839-O VF30 NGC. CAC. Breen-6152, Variety 27, R.3. A first-year issue for the New Orleans Mint, this quarter eagle is desirable both as early branch mint gold and as a coin with an obverse mintmark. This VF30 example earned CAC-Approval for quality and appeal, with orange-gold surfaces and few abrasions for the grade. The coin is well-detailed and scarce because of demand. NGC ID# 25G7, PCGS# 7701

- 5170** 1839-O XF45 NGC. Breen-6152, Variety 27, R.3. The wide fraction variety of the only New Orleans Classic issue. Peach-red visits design recesses while the remainder of the coin is olive-gold. A lens reveals occasional faded obverse marks. The '39-O has a mintage of just 17,781 pieces.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25G7, PCGS# 7701*

- 5171** 1839-O — Improperly Cleaned — NGC Details. AU. Breen-6153, Variety 28, R.4. Close fraction. Designated by NGC as a mint error due to a medallion alignment of the dies. U.S. coins typically have "coin turn," but the New Orleans Mint was only in its sophomore year when the present piece was struck. The high points are mildly glossy and the smooth green-gold fields are slightly subdued. A minor obverse rim ding at 9 o'clock.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

- 5172** 1839-O — Cleaning — PCGS Genuine. AU Details. Breen-6153, Variety 28, R.4. Low Date, Close Fraction. The scarcer of the two die marriages for the 1839-O. All four mint branches struck quarter eagles in 1839, though the combined mintage was less than 80,000 pieces. This well struck and unworn example displays lightly abraded but lackluster mattelike surfaces. NGC ID# 25G7, PCGS# 7701

## LIBERTY QUARTER EAGLES

- 5173 1840 XF45 NGC.** Very few abrasions are seen on this Choice XF example, with faint greenish patina over its medium-gold surfaces. Evidence of a weak strike at the centers combines with moderate wear. This is a scarce early Liberty quarter eagle, the first year for Christian Gobrecht's design. NGC ID# 25GA, PCGS# 7717
- 5174 1841-C — Mount Removed, Whizzed — NGC Details. AU. Variety 1.** A rare Charlotte issue with a meager mintage of 10,281 pieces. The present apricot-gold example was formerly mounted to jewelry at 3 and 9 o'clock on the reverse. Those areas have strengthened legends and dentils. Liberty's face and neck are smoothed. Both sides are whizzed. NGC ID# 25GE, PCGS# 7721
- 5175 1842-O AU55 NGC. Variety 1.** Sole dies for the year. Honey-gold surfaces brim with luster despite light wear. Striking softness at the lower eagle is typical for the issue. NGC ID# 25GK, PCGS# 7726
- 5176 1843-C Large Date, Plain 4 XF45 PCGS. Variety 1.** The Large Date with Plain 4 defines the obverse and thus the variety. Still luminous surfaces have pale yellow centers and orange margins. A few parallel pinscratches appear below the hair bun. Population: 30 in 45, 56 finer (1/14). NGC ID# 25GN, PCGS# 7728

### 1843-C Large Date Two and a Half, AU58 Bright Yellow-Gold Surfaces

- 5177 1843-C Large Date, Plain 4 AU58 NGC. Variety 1.** This reasonably attainable Charlotte quarter eagle had a mintage of 23,076 pieces, and of the 250-350 pieces that are believed to have survived in all grades only 50-80 coins are estimated extant in AU today. This is a bright yellow-gold example with surprising amounts of mint luster remaining, especially on the reverse. Lightly abraded, the strike is somewhat soft in the centers, as always on this issue. NGC ID# 25GN, PCGS# 7728

### 1843-C Large Date Quarter Eagle, AU58 Variety 1, Small Partial Brockage Probably a Unique Error

- 5178 1843-C Large Date, Plain 4 — Small Partial Brockage — AU58 PCGS. Variety 1.** The brockage error appears in the form of a small oval indent at the upper obverse border that is confined to the rim and dentils. This gorgeous example has brilliant orange-gold surfaces with traces of green color on its reflective surfaces. Population: 9 in 58, 11 finer (1/14), for the variety, probably unique as a mint error. NGC ID# 25GN, PCGS# 7728

- 5179 1843-C Small Date, Crosslet 4 — Reverse Scratched — NGC Details. XF. Variety 1.** A wheat-gold example with hints of chestnut-brown toning at the margins. A strong loupe reveals a few delicate pinscratches on the reverse, but most collectors will accept these as unobtrusive for the XF level. A rare Charlotte variety. PCGS# 7729
- 5180 1844-C VF25 PCGS. Variety 1.** This challenging Charlotte issue has a mintage of only 11,622 pieces. A green-gold example with partial plumage detail despite a typical strike. No marks are noticeable aside from a uniformly abraded area beneath the eagle's right (facing) wing. NGC ID# 25GU, PCGS# 7735
- 5181 1847-O AU55 NGC. Variety 1.** The 1 in the date is repunched. A sun-gold New Orleans two and a half with minimal marks and a typical strike. Rotation displays pockets of luster about design elements. NGC ID# 25H8, PCGS# 7747
- 5182 1848 AU50 PCGS.** With only 6,500 pieces produced, the 1848 quarter eagle is a rare issue that simply gets overlooked by collectors. Arguably equal in scarceness to the famous CAL issue according to the population reports, the two variants are worlds apart in value. The Philadelphia date is also more scarce than either of the 1848 branch mint issues, but they remain more highly valued. This sharp example is an appealing, deep-gold color with vibrant orange fields. Some prooflike flash remains with underlying mint luster. Only a few abrasions are in evidence for the grade. NGC ID# 25H9, PCGS# 7748

### 1848-D Quarter Eagle, AU50 Scarcer Variety 10-O, Low Mintmark

- 5183 1848-D AU50 PCGS. Variety 10-O,** the mintmark nearly touches the top of the fraction, scarcer than the Variety 10-N which shows the D mintmark touching the olive stem. This medium yellow-gold piece shows surfaces that remain reflective and show few marks for the assigned grade. The pleasingly bold strike is a plus. A total of 13,771 pieces were struck for the issue. NGC ID# 25HC, PCGS# 7751
- 5184 1849-D VF20 PCGS. Variety 11-N.** The High Date variety, more available than 12-N although the two share a mintage of only 10,945 piece between them. Luminous orange-gold with steel-gray toning in protected areas. One thin mark is plain above the hairbun. Encapsulated in an old green label holder. Ex: *Coinfest Signature* (Heritage, 10/2010), lot 4616. NGC ID# 25HF, PCGS# 7754
- 5185 1851-C VF25 PCGS. Variety 1.** This lime-green and straw-gold Charlotte two and a half has considerable hair and plumage detail. Abrasions are of little consequence, and the surfaces are minutely granular. Certified in a green label holder. NGC ID# 25HM, PCGS# 7760

**1851-D Quarter Eagle, Unc Details  
Only Dies for the Date**

- 5186 1851-D — Obverse Improperly Cleaned — NGC Details. Unc. Variety 15-N.** A single pair of dies was used to strike the entire mintage of 11,264 quarter eagles at the Dahlonega Mint in 1851. This pale greenish-gold example shows some prooflike reflectivity on the reverse, but the obverse shows signs of a prior cleaning. The design elements are sharply detailed and the overall presentation is quite attractive.

- 5187 1851-O AU58 PCGS. CAC. Breen-6214, Variety 1.** The date is repunched, evident southwest of the bases of the 51. The honey-gold surfaces are luminous and clean. A sharp strike save for the usual inexactness on the claws and the eagle's left (facing) leg. Population: 11 in 58, 17 finer (1/14).

*Ex: Long Beach Signature (Heritage, 5/2009), lot 1529, which realized \$2,070. NGC ID# 25HP, PCGS# 7762*

- 5188 1852-O AU58 PCGS. Variety 2.** The "mintmark left" variety, more available than its "mintmark right" Variety 1 alternative. An unmarked and attractive butter-gold near-Mint two and a half. The strike is sharp at the borders though the motifs show selected softness. Population: 17 in 58, 13 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25HU, PCGS# 7766*

- 5189 1853 MS64 PCGS. CAC.** Rich gold-orange with reddish and pale yellow elements intermixed. Luster is generally frosty with a few bright patches. Population: 62 in 64, 7 finer (1/14). NGC ID# 25HV, PCGS# 7767

- 5190 1854 MS64 NGC.** Both sides of this Choice Mint State 1854 quarter eagle are highly lustrous with pristine bright yellow surfaces. Census: 24 in 64, 11 finer (1/14). NGC ID# 25HX, PCGS# 7769

- 5191 1855 MS62 NGC.** *Ex: Bass.* This impressive quarter eagle from the Harry W. Bass, Jr. Collection has brilliant yellow luster with bold design motifs and excellent eye appeal. NGC ID# 25J4, PCGS# 7774

- 5192 1856-S AU58 PCGS. CAC.** Largely honey-gold with elements of orange. Just a hint of rub visits the high points of this well-struck near-Mint example. Population: 16 in 58, 19 finer (1/14). NGC ID# 25JB, PCGS# 7781

- 5193 1859-D — Misaligned Obverse Die, Smoothed — PCGS Genuine. AU Details. Variety 22-N (formerly 21-M).** The obverse die is misaligned several degrees toward 12 o'clock. The upper reverse dentils are indistinct. Formerly mounted at 3 and 9 o'clock on the reverse with nearby evidence of repair. The yellow-gold surfaces are glossy and hairlined. NGC ID# 25JM, PCGS# 7789

- 5194 1860 Old Reverse, Type One AU53 NGC.** The 1860 Liberty quarter eagle with the Old Reverse is much more elusive than its new Reverse counterpart. This attractive AU53 example offers lightly abraded orange-gold surfaces that retain much original mint luster. Census: 1 in 53, 22 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 97791*

- 5195 1861 New Reverse, Type 2 MS63 NGC.** The Small Arrowheads subtype usual for this popular Civil War issue. Fully struck with booming luster and exceptionally smooth orange and lime-green surfaces. Housed in a former generation holder. NGC ID# 25JX, PCGS# 7794

- 5196 1866-S AU58 NGC.** Gleaming straw-gold surfaces have hints of lemon. Peripheral elements are well-defined, though parts of the portrait and eagle show softness. Census: 22 in 58, 8 finer (1/14). NGC ID# 25K8, PCGS# 7804

- 5197 1867-S AU55 NGC.** An important entry in the Liberty quarter eagle series, this 1867-S remains from its 28,000 coin mintage, and is far finer than typical for the issue. Both sides are lustrous light yellow with excellent eye appeal. Census: 24 in 55, 32 finer (1/14). NGC ID# 25KA, PCGS# 7806

- 5198 1869-S AU58 NGC.** This near-Mint San Francisco Mint quarter eagle is far finer than the typical AU50 example, and exhibits brilliant light yellow-gold surfaces with nearly complete luster. NGC ID# 25KE, PCGS# 7810

**1870 Quarter Eagle, MS61  
Conditionally Scarce, Low-Mintage Issue**

- 5199 1870 MS61 NGC.** This low-mintage issue is scarce in Mint State, and examples grading MS62 or finer are downright rare. The lustrous yellow-gold surfaces of this example display strong rose undertones in the fields, and deeper peach accents near the devices. Only minor marks limit the grade.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25KE, PCGS# 7811*

- 5200 1871 MS61 PCGS.** From a mintage of 5,320 pieces, the 1871 Liberty quarter eagle is a rare date in Mint State grades. This attractive MS61 example is sharply detailed and brightly lustrous, with pleasing yellow-gold surfaces that show a scattering of minor contact marks. Population: 7 in 61, 20 finer (1/14). NGC ID# 25KH, PCGS# 7813

**1873 Open 3 Quarter Eagle, MS65  
Remarkable Quality and Eye Appeal**

- 5201 1873 Open 3 MS65 PCGS.** Despite the relatively high mintage of 122,800 pieces, this issue is rare at the MS65 level, and just three coins are graded even finer at NGC and PCGS combined. This remarkable Gem example displays gorgeously deep apricot-gold coloration, interspersed with occasional accents of lilac. Full, shimmering mint frost illuminates the clean, nearly blemish-free surfaces. Population: 11 in 65, 2 finer (1/14). NGC ID# 25KN, PCGS# 7817

**1877 Quarter Eagle, MS61+  
Rare Mint State Example**

**5202 1877 MS61+ NGC. CAC.** The 1877 quarter eagle is a scarce low-mintage issue of 1,652 pieces that is rare in Uncirculated condition. This is a lovely piece with deep champagne-gold toning that turns to lighter antique-gold color on the highest points of the design. All elements are solidly struck. A few shallow luster grazes and wispy hairlines limit the grade. Census: 7 in 61 (1 in 61+, 1 in 61 ★), 15 finer (1/14). NGC ID# 25KW, PCGS# 7826

**5203 1884 MS60 NGC.** Only 1,950 business-strike Liberty quarter eagles were struck at the Philadelphia Mint in 1884. This sharply detailed Mint State example is brightly lustrous and lightly marked. Census: 6 in 60, 64 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25L8, PCGS# 7836*

**5204 1895 MS63 NGC.** Rich orange-gold color with a blush of rose visiting the central obverse. This brightly lustrous Select example would fit well in a similarly graded 19th century gold type set.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25LK, PCGS# 7847*

**5205 1897 MS65 PCGS.** A notch below the 1900 to 1907 quarter eagles in availability, the 1897 is priced about the same and, when available, is a good candidate for type. This appealing Gem displays lime-green and lilac margins surrounding honey-gold centers. The coin is smooth, lustrous, and nearly mark-free with a full strike. NGC ID# 25LM, PCGS# 7849

**5206 1897 MS66 PCGS.** Broad wheat-gold luster has a hint of satin to it. This well-defined Premium Gem would be a great fit in a high-end 19th century type collection. Population: 29 in 66, 11 finer (1/14). NGC ID# 25LM, PCGS# 7849

**5207 1901 MS66+ PCGS.** An extraordinary Premium Gem, this Plus-designated quarter eagle has bold design elements with brilliant yellow luster and considerable orange patina. Population: 82 in 66 (3 in 66+), 13 finer (1/14). NGC ID# 25LS, PCGS# 7853

**5208 1903 MS65 NGC.** A distinctive splash of reddish-orange toning appears on the obverse of this highly lustrous yellow-gold Gem. An exceptional type coin. NGC ID# 25LU, PCGS# 7855

**5209 1903 MS66 NGC.** Exquisitely detailed with light to medium yellow shadings across each side. Only a few tiny marks on the lower portrait preclude an even finer designation. A great type coin. NGC ID# 25LU, PCGS# 7855

**5210 1903 MS66 NGC.** Bright and pale yellow luster swirls in the centers, while the margins show a degree of patina. Excellent interior detail and ample eye appeal.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25LU, PCGS# 7855*

**5211 1903 MS66 PCGS.** This pristine Premium Gem exhibits bold design motifs and frosty yellow-gold luster. Any Liberty quarter eagle from the 20th century will serve ideally as a type coin. PCGS has only certified 61 finer examples (1/14). NGC ID# 25LU, PCGS# 7855

**5212 1905 MS66 PCGS. CAC.** This delightful Premium Gem is housed in a green-label holder and exhibits rich lemon-yellow luster with bold design definition. NGC ID# 25LW, PCGS# 7857

**5213 1906 MS65 NGC.** Deep gold-orange color overall with substantial violet elements through the fields. This Gem has gorgeous luster and ample eye appeal. NGC ID# 25LX, PCGS# 7858

**5214 1907 MS65 NGC.** The final year of the Liberty design, and this Gem quarter eagle is an outstanding representative, with bold design motifs and frosty yellow-gold luster. Faint splashes of coppery toning appear, mostly on the reverse. NGC ID# 25LY, PCGS# 7859

**5215 1907 MS66+ NGC. CAC.** This could be a type collector's dream coin. It is an end-of-series issue, an available date, and a high-end coin for the grade as confirmed by the NGC Plus designation. The wonderful color, full strike, and nearly mark-free surfaces should complete the appeal. NGC ID# 25LY, PCGS# 7859

## INDIAN QUARTER EAGLES

**1908 Indian Quarter Eagle, MS65  
Vivid Colorful Surfaces**

**5216 1908 MS65 PCGS. CAC.** Bela Lyon Pratt's innovative incuse design made its debut on the quarter eagle in 1908 and contemporary collectors saved a number of high-grade examples for posterity. This impressive Gem displays vivid orange-gold surfaces and well-detailed design elements with no mentionable distractions. NGC ID# 288Y, PCGS# 7939

**1908 Quarter Eagle, MS65  
Important First-Year Issue**

**5217 1908 MS65 PCGS. CAC.** This first-year issue is extremely popular and surprisingly scarce in grades any finer than MS65. Beautiful shades of deep peach-gold, lighter antique-gold, and pale mint-green coloration are blended across both sides. A well-struck Gem with a few tiny nicks detected, on the upper reverse, with the aid of a loupe. NGC ID# 288Y, PCGS# 7939

**5218 1909 MS64 NGC. CAC.** Softly lustrous and perhaps a bit subdued, this sharply struck example is free of any mentionable marks or abrasions. The frosted, high-point fields are clean and pleasing. Medium-gold color displays peach-gold highlights. NGC ID# 288Z, PCGS# 7940

**5219 1911 MS63+ PCGS.** Lightly granular surfaces were preferred by the Mint in 1911, as seen on this Select Uncirculated quarter eagle. The luster is satiny-soft as a result, but the strike is full and the incuse elements fully rendered. An attractive example, with only a few wispy marks on the high-point fields. NGC ID# 2893, PCGS# 7942

**5220 1911-D — Improperly Cleaned — NGC Details. AU.** While the mintmark is not as bold on this example as on others in this sale, it is completely outlined with its interior space defined. Delicate orange peripheries appear on this light yellow example.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**5221 1911-D — Removed From Jewelry — NCS. AU Details.** The Denver mintmark is bold. This wheat-gold example has glossy surfaces from a thorough cleaning. Some definition is present within the headdress. The key to the series. NGC ID# 2894, PCGS# 7943

#### 1911-D Quarter Eagle, Unc Details Popular Low-Mintage Issue

**5222 1911-D — Improperly Cleaned — NGC Details. Unc.** The khaki-gold surfaces are overbright and show considerable thin hairlines throughout each side, indicative of a cleaning, but there are few distractions otherwise. This piece would serve as a nice collector-grade example of this key date in a complete Uncirculated set of Indian Head quarter eagles.

#### 1911-D Quarter Eagle, Unc Details Bold Mintmark

**5223 1911-D — Improperly Cleaned — NGC Details. Unc.** Sharply defined with satiny light yellow-gold surfaces and strong design elements that include a bold mintmark. Trivial hairlines and minuscule scrapes appear on both sides.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

#### 1912 Quarter Eagle, MS64+ Intensely Lustrous and Appealing

**5224 1912 MS64+ PCGS. CAC.** Despite a relatively high mintage of 816,000 business strikes, the 1912 quarter eagle is scarce in advanced Mint State grades. This near-Gem displays intense mint frost and pleasing honey-gold toning with lovely undertones of pale rose color. Sharply struck and well-preserved, there are no surface distractions worthy of note. NGC ID# 2896, PCGS# 7944

**5225 1913 MS64 NGC.** A dusky near-Gem, this lovely example has frosty orange-gold patina over its delicate yellow surfaces with splashes of dark orange on each side. NGC ID# 2897, PCGS# 7945

**5226 1913 MS64 PCGS. CAC.** A splendid Choice Mint State piece, this khaki-gold near-Gem exhibits brilliant mint luster and bold design elements. NGC ID# 2897, PCGS# 7945

#### 1914 Quarter Eagle, MS63 Scarce Series Key Date

**5227 1914 MS63 PCGS.** This issue is one of the scarcest in the series, trailing only the primary 1911-D as an important key date among Indian Head quarter eagles. This is a lovely coin with sharp strike definition and shimmering mint frost. Other than a handful of trivial nicks, this coin is nicely preserved for a Select Mint State example. NGC ID# 2898, PCGS# 7946

#### 1914-D Quarter Eagle, MS64 Lustrous and Well-Preserved

**5228 1914-D MS64 NGC.** The Denver mint struck 448,000 quarter eagles in 1914, a relatively high number, but survivors become scarce at grades any finer than MS64. This delightful near-Gem is lustrous and well-preserved, offering distraction-free surfaces and lovely light toning. NGC ID# 2899, PCGS# 7947

**5229 1925-D MS64+ PCGS. CAC.** Satin-frost surfaces are primarily apricot-gold with a few elements of lighter yellow. Well-defined overall, if a trifle soft on the lowest pendant of the necklace. NGC ID# 289B, PCGS# 7949

**5230 1926 MS64 NGC.** Bright yellow-gold color covers each side of this sharply struck near-Gem example. This would make an excellent type representative. NGC ID# 289C, PCGS# 7950

**5231 1926 MS64 NGC. CAC.** Yellow-orange overall with substantial lavender elements scattered at the margins. Ample luster grants this colorful coin substantial eye appeal. NGC ID# 289C, PCGS# 7950

**5232 1927 MS64 NGC.** Light wheat-gold overall with touches of canary and honey. This near-Gem from late in the series is well-struck and well-suited to a type collection. NGC ID# 289D, PCGS# 7951

**5233 1929 MS64 NGC.** The final year of issue for Indian quarter eagles and half eagles. This frosty near-Gem has brilliant light yellow luster with sharp design elements. NGC ID# 289F, PCGS# 7953

**5234 1929 MS64+ PCGS.** An absolutely stunning near-Gem, this sharply detailed and frosty yellow-gold example has attractively blended pink and blue overtones. The final year of issue Indian quarter eagle. NGC ID# 289F, PCGS# 7953

**5235 1929 MS64 NGC. CAC.** Wheat-gold overall with glimmers of lighter yellow. This final-year quarter eagle has smooth, understated luster that gives it solid, if not flashy eye appeal. NGC ID# 289F, PCGS# 7953

### THREE DOLLAR GOLD PIECES

**5236 1854 XF45 NGC.** Sure to be of interest to a number of collectors, this moderately circulated three dollar has the charm of the first year of issue combined with the relative affordability of a Choice XF. The surfaces are original and portions of mint luster can be seen around the devices along with russet-tinting.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25M3, PCGS# 7969*

**5237 1854 XF45 NGC.** This first-year three dollar gold piece offers evidence that the odd denomination circulated, no matter for how brief a time. Faint glimmers of luster remain in the protected areas of the yellow-to-orange fields.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25M3, PCGS# 7969*

**5238 1854 AU58 PCGS.** Light canary-yellow and deeper honey hues mingle on each side. Occasional coppery elements are present near the margins on this modestly rubbed near-Mint example. NGC ID# 25M3, PCGS# 7969

**5239 1854 — Improperly Cleaned — NGC Details. Unc.** A razor-sharp and bagmark-free first year type coin. The honey-gold surfaces display delicate hairlines but nonetheless possess substantial eye appeal.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**5240 1854-O — Improperly Cleaned — NGC Details. XF. Variety 2.** Parallel hairlines emerge when this subdued straw-gold example is rotated under a loupe. No marks are evident to the unaided eye. Luster brightens the legends and headdress plumes.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25M5, PCGS# 7971*

**5241 1855-S VF35 PCGS.** The low mintage of 6,600 pieces was a first attempt by the San Francisco Mint to produce three dollar gold, but there was no demand for the denomination. Most of the issue entered circulation, however, where they lingered and acquired moderate wear. This VF35 example is light-yellow gold with a bit of remaining luster around the devices. The coin is lightly abraded and moderately worn. NGC ID# 25M7, PCGS# 7973

**5242 1856 AU53 NGC.** As one of the more available early threes the 1856 is a popular date for type collectors. This lightly circulated example is minimally abraded, shows ever-so-slight reflectivity in the fields, and a trace of luster around the devices.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25M8, PCGS# 7974*

**5243 1856 AU55 PCGS. CAC.** Deeply toned orange-gold with violet-gray patina around and on the portrait. Attractive despite light rub and softness on the wreath knot thanks to generous remaining luster. NGC ID# 25M8, PCGS# 7974

**5244 1857 AU53 NGC.** Even friction over each side does not dampen the mint luster that surrounds the devices. The reddish-gold color deepens slightly around the margins and there are no mentionable marks.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25MA, PCGS# 7976*

**5245 1859 AU50 PCGS.** By 1859 the business strike mintage of the three dollar gold piece fell to 15,558 pieces, a clear sign of the denomination's unpopularity. This briefly circulated example has primarily light yellow-gold surfaces with some antique-gold highlights. NGC ID# 25MD, PCGS# 7979

**5246 1863 — Improperly Cleaned — NGC Details. XF.** Gold coins did not circulate in Philadelphia by the Civil War year of 1863, and just 5,000 pieces were struck for commerce. This moderately glossy straw-gold representative displays prominent clash marks along with a few obverse abrasions.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**5247 1863 — Improperly Cleaned — NGC Details. AU.** The pale orange-gold surfaces of this lightly circulated three dollar gold piece show some signs of cleaning, with a few minor abrasions on each side and traces of mint luster near the devices. A low-mintage date, with just 5,000 pieces produced.

#### 1863 Three Dollar Gold, AU53 Scare Low-Mintage Issue

**5248 1863 AU53 NGC.** This low-mintage issue saw a total production of 5,000 coins. This lightly circulated piece rewards the viewer with relatively smooth surfaces that reveal glints of original mint luster in the protected areas. A well-detailed example with typical wear on the high points, as expected for the grade.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25MJ, PCGS# 7984*

#### 1871 Three Dollar Gold, AU53 Clean, Appealing Surfaces

**5249 1871 AU53 NGC.** While the original mintage of 1,300 coins was meager, even by three dollar gold standards, apparently quite a few of those coins were spared from heavy circulation. This AU53 example shows remarkably clean surfaces that display appealing honey-tan coloration.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25MU, PCGS# 7993*

#### 1874 Three Dollar, MS63 Popular Type Coin

**5250 1874 MS63 NGC.** A lovely honey-gold piece, with peach accents that outline some of the devices. Shimmering mint luster and light surface marks match the MS63 rating by NGC. A pleasing type coin from one of the three most available issues in the series.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25MX, PCGS# 7998*

- 5251** 1882 — Reverse Damage, Cleaned — NGC Details. Unc. Well struck with mildly prooflike pale orange-gold surfaces. A lens reveals scrapes on the left obverse and central reverse. A mere 1,500 pieces were struck, though many of those were acquired shortly thereafter by well-connected Philadelphia dealers. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25N5, PCGS# 8004

**1888 Three Dollar, MS61 ★  
Pleasing, High-End Example**

- 5252** 1888 MS61 ★ NGC. 1888 was the penultimate date in the three dollar gold series, and business strikes had a low mintage of 5,000 pieces. This pleasingly toned example is well-detailed and reveals few relevant surface marks on either obverse or reverse. It is not surprising that NGC has awarded the Star designation, for special eye appeal, to this high-end example. NGC ID# 25NB, PCGS# 8010

**1889 Three Dollar Gold, MS62  
Final Year of Denomination**

- 5253** 1889 MS62 PCGS. Ex: South Texas Collection. This last-year 1889 three dollar is sharply struck with fairly good luster for the grade. Reddish-gold patina covers most of the surfaces, complementing daubs of pale ice-blue in the fields. Scattered, undistracting marks are consistent with the grade. Only 2,300 pieces were struck of the issue; Breen suggests that many were melted in 1890 after the denomination was abolished. *Ex: Signature Sale (Heritage, 11/2003), lot 7432.* NGC ID# 25NC, PCGS# 8011

## EARLY HALF EAGLES

- 5254** 1806 Round Top 6, 7x6 Stars — Repaired — NGC Details. XF. BD-6, R.2. Bass-Dannreuther Die State c/d. Smoothed on the upper left obverse field and the top of Liberty's cap. The cheek and right field are also smoothed. The eagle's neck and shield is re-engraved where the coin was likely once affixed to jewelry. Both sides display fine parallel hairlines. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**1832 BD-1 Half Eagle, VF Details  
13 Stars, Square Base 2**

- 5255** 1832 Square Base 2, 13 Stars — Ex-Jewelry, Altered Surfaces, Rims Filed — ANACS. VF20 Details. BD-1, R.5. This rare date early half eagle is glossy and hairlined from cleaning. The obverse field is smoothed near Liberty's chin. The rims are mostly obscured by the encapsulation. All legends are clear and partial plumage detail remains. The typical 13 Stars 1832 trades for \$50,000 or more, but the present lot allows acquisition at a collectible price. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25RG, PCGS# 8156

## CLASSIC HALF EAGLES

- 5256** 1834 Plain 4 AU53 NGC. Breen-6502, McCloskey 2-A, R.1. A sun-gold Classic representative that boasts ample luster for the AU53 level. Small marks throughout the fields do not challenge the grade. The strike is crisp aside from the curl northwest of the ear. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25RR, PCGS# 8171
- 5257** 1834 Plain 4 AU55 NGC. Breen-6501, McCloskey 3-B, R.1. Glimpses of golden-brown toning visit the borders, though a majority of this first-year Classic five is olive-green. Marks are refreshingly minor. Light wear on the curls and forehead decides the grade. NGC ID# 25RR, PCGS# 8171
- 5258** 1834 Plain 4 AU55 ANACS. Breen-6502, McCloskey 2-A, R.1. The 4 in the date is triple punched. A partially lustrous Classic type coin with rich pumpkin-gold toning and a modicum of minor marks. Nicely struck despite some blending near the centers. NGC ID# 25RR, PCGS# 8171
- 5259** 1834 Plain 4 AU58 NGC. First Head, Breen-6501, McCloskey 3-B, R.1. Semireflective and in an early die state without the usual obverse cracks. Canary-yellow surfaces have a pale radiance despite light rub on the high points. NGC ID# 25RR, PCGS# 8171
- 5260** 1834 Plain 4 AU58 NGC. Breen-6501, McCloskey 3-B, R.1. The vertical die crack beneath the eye is characteristic of this available die variety. An apricot-gold slider with slight friction on the curls and only minor incompleteness of strike at the centers. There are no singularly noticeable marks. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25RR, PCGS# 8171

**5261 1834 Plain 4 — Improperly Cleaned — NGC Details. Unc. Breen-6501, McCloskey 3-B, R.1.** This wheat-gold first-year Classic type coin is noticeably bright, but luster outlines design elements, and relevant marks are confined to the left obverse field. The strike is crisp except on the curl above the ear.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25RR, PCGS# 8171*

**5262 1836 XF45 PCGS. CAC. Second Head, Large Date, Breen-6509, McCloskey 6-E, R.4.** The prominent die crack up through the date and well into Liberty's portrait confirms the obverse and thus the variety. Honey-gold surfaces remain luster despite light wear. NGC ID# 25RY, PCGS# 8174

**5263 1837 XF45 NGC. Breen-6513, McCloskey 3-C, R.4.** The very scarce Small Date, Script 8 variety, mentioned in a *Guide Book* footnote but currently without the separate listing it deserves. Most 1837 fives have a Large Date and Block 8. This butter-gold representative has subtle field marks beneath the chin and rim imperfections on the reverse near 12 o'clock.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25RZ, PCGS# 8175*

**5264 1837 XF45 NGC. Breen-6512, McCloskey 2-B, R.2.** Large Date, Block 8. A green-gold Classic five with hints of charcoal toning in crevices of the reverse design. Moderate marks are mostly confined to the field above the date.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25RZ, PCGS# 8175*

**5265 1838 AU50 NGC. Breen-6515, McCloskey 2-B, R.1.** A pleasing Classic half eagle collector coin. The nicely struck and original khaki-gold surfaces lack any relevant marks. Luster accompanies all protected areas. The Small Arrows variant of the final Philadelphia date.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25S4, PCGS# 8176*

**5266 1838 AU53 NGC. Breen-6514, McCloskey 1-A, R.2.** Breen's Large Arrows variety. The present caramel-gold final-year type coin shows light wear on the curls and cheek. The strike is good, and none of the scattered small marks merit singular mention.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25S4, PCGS# 8176*

#### 1838-C Half Eagle, VF25 Debut Branch Mint Issue

**5267 1838-C VF25 NGC. Breen-6517, Variety 1, R.4.** The Charlotte and Dahlonega Mints began operation in 1838 with the Classic Head design that also appeared on quarter eagles in 1839. These distinctive coins have the mintmark on the obverse. This moderately worn example has rich yellow-gold color with minor grade-consistent abrasions.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25S5, PCGS# 8177*

## LIBERTY HALF EAGLES

### 1842 Half Eagle, AU50 Large Letters Reverse

**5268 1842 Large Letters AU50 PCGS.** The Large Letters variant has the letters in FIVE virtually touching, and this variety is considerably scarcer than the Small Letters reverse. This light yellow-gold example retains hints of luster, with delicate orange peripheral toning. Population: 3 in 50, 7 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25SU, PCGS# 8206*

### 1842-D Half Eagle, Unc Details Small Date Variant

**5269 1842-D Small Date — Saltwater Damage — NGC Details. Unc. Variety 7-E.** From a mintage of 59,608 pieces, the 1842-D Small Date half eagle is one of the more available issues from the famous Southern facility. The lightly abraded peach-gold surfaces of this well-detailed example show the flat luster characteristics that indicate a long immersion in seawater.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

### 1843-C Half Eagle, AU55 Variety 1

**5270 1843-C AU55 NGC. Variety 1.** Die State II, showing a light crack from the eagle's left (right facing) wing tip. The 1843-C half eagle is a rare date from the lower AU grades on up through Mint State. Bright yellow-gold surfaces display traces of luster in the recessed areas on this choice AU example. The design elements are sharply defined, except for the normal weakness in the hair about Liberty's ear. The normal assortment of light marks are scattered over each side. Census: 12 in 55, 30 finer (1/14). NGC ID# 25T3, PCGS# 8214

**1844 Liberty Five, MS62  
Bisecting Reverse Crack**

- 5271 1844 MS62 NGC.** Bold design definition on both sides indicates a full strike on this beautiful satiny Mint State example. Both sides have brilliant greenish yellow-gold surfaces with reflective fields. The reverse has a vertical bisecting die crack with a branch crack from the eagle's neck to the left facing wing. Census: 11 in 62 (1 in 62+), 23 finer (1/14). NGC ID# 25T7, PCGS# 8219

**1844-C Five Dollar, AU50  
Only 24-32 Pieces Believed Known in AU**

- 5272 1844-C AU50 NGC. Variety 1.** Die State II. This scarcer C-mint five is estimated to only have between 125 and 175 examples remaining in all grades. Of that already low number, only an estimated 24-32 pieces are believed known in AU. This is a bright example whose otherwise yellow-gold surfaces display deep reddish patina outlining the devices. Light, but numerous abrasions are peppered over each side. NGC ID# 25T8, PCGS# 8220

- 5273 1844-D — Improperly Cleaned — NGC Details. XF. Variety 11-G (formerly 11-H).** Although mildly bright, the present Dahlonega half eagle will satisfy many Southern gold type collectors. Abrasions are relatively minor. The strike shows the usual D-mint softness on Liberty's curls and the eagle's neck and fletchings. NGC ID# 25T9, PCGS# 8221

- 5274 1845-O — Improperly Cleaned — NCS. AU Details. Variety 1.** The 18 in the date is repunched. A New Orleans No Motto issue with a low mintage of 41,000 pieces. This sun-gold No Motto five is mildly glossy and has a few faded thin field marks near the eagle's neck. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25TD, PCGS# 8225

- 5275 1846 Large Date MS61 PCGS.** The base of the 1 in the date is repunched. The Large Date is considered scarcer than its Small Date counterpart, and is distinguished by the close spacing between the 846. This is a well struck No Motto five with luminous canary-gold fields. There are no consequential abrasions. Population: 7 in 61, 9 finer (1/14). NGC ID# 28BG, PCGS# 8226

- 5276 1846-D/D — Improperly Cleaned — NCS. XF Details. Variety 17-J.** The most prominent of all Dahlonega repunched mintmark varieties. This green-gold representative is cloudy from hairlines, but marks are inconsequential aside from faint pinscratches near star 8. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* PCGS# 8229

**1846-D/D Half Eagle, AU50  
Prominent Repunched Mintmark  
Low Date, Variety 16-J**

- 5277 1846-D/D AU50 PCGS. Variety 16-J.** One of the most appealing and sought-after varieties of the series, this doubled mintmark half eagle clearly displays the Dahlonega mintmark punched too high above a second D in proper position. A glimpse of mint luster remains at the stars and legend of this well-detailed half eagle. Yellow-gold surfaces display olive-gold overtones. The few abrasions on the coin are softened by wear and expected for the grade. This variety is one of the most dramatic overmintmarks in any series and is Variety 16-J, which couples the reverse with an obverse with the date punched low. PCGS# 8229

- 5278 1847 MS61 NGC.** The 1847 Liberty half eagle is a challenging issue in all Mint State grades. This well-detailed MS61 example displays vibrant mint luster and lightly marked yellow and greenish-gold surfaces. Census: 41 in 61, 77 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25TL, PCGS# 8231

- 5279 1847 MS61 PCGS.** A plentiful half eagle issue from the highest mintage issue prior to 1880, this No Motto piece has brilliant green-gold surfaces with frosty luster and sharp design motifs. NGC ID# 25TL, PCGS# 8231

- 5280 1847-C VF30 PCGS. Variety 1.** A green-gold Charlotte type coin. The wings are well defined but Liberty's hair is lightly brought up. Free from conspicuous marks although a loupe reveals microgranularity. NGC ID# 25TN, PCGS# 8233

- 5281 1847-C — Improperly Cleaned — NGC Details. AU. Variety 1.** Though inoffensively cleaned, this yellow-gold rare date half eagle will please many collectors. Field marks are relatively minor, and the devices have an above-average strike by the standards of the Charlotte Mint. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25TN, PCGS# 8233

**1847-D Liberty Five, AU55  
Popular D-Mint Type Coin**

- 5282 1847-D AU55 PCGS. Variety 18-K.** The 1847-D Liberty half eagle claims a substantial mintage of 64,405 pieces, making it one of the more available D-mint issues. Probably 200-225 examples of the 1847-D are still extant in all grades. This attractive specimen displays well-detailed design elements and lightly abraded orange-gold surfaces that show traces of prooflike reflectivity in sheltered areas. Population: 13 in 55, 23 finer (1/14). NGC ID# 25TP, PCGS# 8234

- 5283 1848-C — Reverse Repaired — NGC Details. AU. Variety 1.** The reverse field is smoothed between the eagle's neck and TES OF. Otherwise, this luminous lemon-gold Charlotte type coin is only lightly abraded. A fairly good strike with expected blending on the fletchings and claws.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25TT, PCGS# 8237*

**1850-D Liberty Five, AU53  
Conditionally Rare in Higher Grades**

- 5284 1850-D AU53 PCGS. Variety 28-U.** The '50-D is conditionally rare, given its median grade of XF45 at PCGS. The present coin has orange-gold surfaces with portions of mint luster surrounding the devices on each side. An above average strike is seen on each side, and a number of minor abrasions are noted, mostly in the left obverse field. Population: 5 in 53, 24 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25U3, PCGS# 8245*

- 5285 1851-C VF35 PCGS. Variety 1.** The usual "earring" variety with a small hole in Liberty's earlobe, as struck. A yellow-gold Charlotte representative that has ample traces of luster within the legends. The strike is typical and we note marks on Liberty's neck and the shield. Certified in a green label holder. NGC ID# 25U6, PCGS# 8247

**1851-C Five Dollar, XF45  
Attractive Example of the 'Earring' Variety**

- 5286 1851-C XF45 PCGS Secure. CAC. Variety 1.** This Choice XF "earring" variety of the 1851-C has lightly abraded surfaces and the overall yellow-gold color deepens only around the margins to pale rose patina. Each side shows traces of mint luster surrounding the devices, and minimal abrasions are present. An estimated 70 to 85 pieces are estimated known in Extremely Fine condition. NGC ID# 25U6, PCGS# 8247

**1851-C Half Eagle, AU53  
Pleasing, Reddish Toned Surfaces**

- 5287 1851-C AU53 PCGS. Variety 1.** The mintage was substantial for a Charlotte five with 49,176 pieces struck, but survivors are surprisingly difficult to locate, especially in better grades. Only 175 to 225 pieces are believed known in all grades, and a mere 26-30 examples are estimated known in Almost Uncirculated grades. Rich reddish patina is seen across each side, and the only marks of note are a series of shallow depressions above the eagle's head.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25U6, PCGS# 8247*

**1852 No Motto Five, MS62**

- 5288 1852 MS62 PCGS. CAC.** Half of the stars on the obverse are flat on this Mint State piece, although the balance of the design motifs on both sides are boldly detailed. This example has frosty yellow-gold mint luster with excellent eye appeal. Population: 40 in 62 (1 in 62+), 29 finer (1/14). NGC ID# 25UA, PCGS# 8250

- 5289 1853-C — Improperly Cleaned — NGC Details. AU. Variety 1.** A middle die state with an obverse rim break at 11 o'clock but no breaks at 2 o'clock. The present Charlotte Mint type coin is virtually void of wear and lacks visible marks. The canary-gold surfaces are overly bright.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25UE, PCGS# 8254*

- 5290 1854-C XF40 PCGS. Variety 2.** The mintmark was lightly entered on the reverse die above the E in FIVE. The obverse is green-gold and the reverse is apricot-gold. A good strike for the Charlotte facility though the motifs show selected softness. The sole relevant mark is on Liberty's chin. NGC ID# 25UH, PCGS# 8257

**1856-C Five Dollar, AU55**  
**Few Known in AU or Finer Grades**

- 5291 1856-C AU55 NGC. Variety 1.** The only dies. This scarce and underrated issue had a significant mintage (for a C-mint five) of 28,457 pieces, with a survivorship of only 34-43 pieces estimated in AU condition. This is a reasonably well-struck example that shows numerous small abrasions scattered over each side. The only mentionable surface flaw is a planchet flaw in the lower-left obverse field. Rich reddish-gold color. NGC ID# 25UW, PCGS# 8267

**1856-S Five Dollar, Sharply Struck AU58**

- 5292 1856-S AU58 NGC.** Large S. This near-Mint State piece is far finer than the norm for this high-mintage issue of 105,100 pieces, one that circulated extensively in early Gold Rush California. The gold-yellow surfaces boast extensive luster remaining and display light field chatter but no singular marks. The sharp strike is a bonus. Census: 17 in 58, 7 finer (1/14). NGC ID# 25UZ, PCGS# 8270

- 5293 1857-D Fine 12 PCGS. Variety 41-HH (formerly 34-CC).** A luminous lemon-gold representative of this very scarce and low mintage Dahlonega issue. No marks are consequential and the eye appeal is attractive for the designated grade. The shield lines are distinct and some plumage detail remains. NGC ID# 25V4, PCGS# 8273

- 5294 1857-O XF40 NGC. Variety 1.** A mintage of 13,000 pieces ensures the 1857-O is very scarce. The present almond-gold and lime-green New Orleans half eagle has a generally good strike, though the claws and fletchings are soft, as are the curls near the hairbun. One faded field mark noted near star 3.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25V5, PCGS# 8274*

- 5295 1859-D Medium D — Improperly Cleaned — NGC Details. AU. Variety 44-HH (formerly 36-CC).** A moderately luminous sun-gold example of this elusive Dahlonega issue. The strike shows the occasional softness on the curls and fletchings customary for the Georgian facility. There are no obtrusive marks. A scant 10,366 pieces were issued.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25VD, PCGS# 8282*

- 5296 1859-S Fine 12 PCGS. CAC.** An important early S-mint half eagle from a mintage of just 13,220 pieces, well-worn but pleasingly luminous with violet peripheral accents on the orange-gold obverse. Two long near-vertical abrasions descend from near the underside of the eagle's left (facing) wing. Population: 2 in 12, 33 finer (1/14). NGC ID# 25VE, PCGS# 8283

- 5297 1860 AU55 NGC. CAC.** Honey-gold and wheat surfaces are broadly luminous despite minor wear across the high points. Detail is decidedly above-average, particularly on the eagle's feathers. Census: 28 in 55, 33 finer (1/14). NGC ID# 25VF, PCGS# 8284

- 5298 1864 — Planchet Flaw, Cleaned — NGC Details. AU.** Major mint errors are rare on gold coins, but here is a rare date Civil War half eagle with a large strike-through on the right obverse field. The strike-through extends from the field above the hairbun to the upper point of star 13. A mildly glossy but surprisingly unabraded olive-gold example. Just 4,170 pieces were struck.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25VU, PCGS# 8296*

- 5299 1866-S No Motto VF20 PCGS. CAC.** Yellow-orange with a degree of encrustation at the margins. A moderately worn example of this final No Motto half eagle issue, lightly abraded but fundamentally pleasing. Population: 7 in 20, 33 finer (1/14).  
*Ex: Houston Signature (Heritage, 12/2010), lot 4430. NGC ID# 25VY, PCGS# 8300*

- 5300 1868-S AU50 NGC.** This scarce issue saw immediate circulation of its emission of 52,000 pieces, like so many other S-mint coins in the coinage-starved West, and survivors are scarce in XF or higher grades. Hints of green and peach are present on this lightly circulated example displaying overall even wear. Census: 11 in 50, 45 finer (1/14). NGC ID# 25W6, PCGS# 8316

**1871-CC Half Eagle, AU Details**  
**Elusive Issue in All Grades**

- 5301 1871-CC — Tooled-Cleaned — ANACS. AU Details, Net XF40. Variety 1-A.** The 1871-CC Liberty half eagle claims a small mintage of 20,770 pieces and the surviving population probably numbers 140-150 examples in all grades. This lightly worn orange-gold example remains an attractive alternative to a more expensive high-grade specimen, despite the noted problems.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25WD, PCGS# 8323*

- 5302 1872 — Improperly Cleaned — NGC Details. AU.** Only 1,660 business strike 1872 half eagles were struck, as unbacked Federal paper money enforced Gresham's Law. Most survivors are in AU grades. This honey-gold example has a good strike and is surprisingly unabraded, but both sides are unnaturally prooflike from a wipe.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25WF, PCGS# 8325*

**1872-CC Liberty Five, VF30  
Scarcer Carson City Issue**

- 5303 1872-CC VF30 PCGS. Variety 1-B.** From a low mintage of 16,980 pieces, the 1872-CC half eagle has a surviving population of 70-80 examples in all grades. This pleasing VF example shows a bold ribbon and motto, with even wear on Liberty's hair and the eagle's head. The lustrous yellow-gold surfaces are lightly abraded for the grade. Population: 10 in 30, 41 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25WG, PCGS# 8326

- 5304 1873 Closed 3 MS62 PCGS.** Pretty apricot-gold and rose toning adorns the satiny surfaces of this conditionally scarce survivor. The apparent mintage for this issue is 112,480 business strikes, but that number includes both Open 3 and Closed 3 varieties. Garrett and Guth (2006) opine that the Closed 3 is the scarcer of the two types. Boldly struck and lustrous, this piece shows numerous wispy marks and a couple of shallow pinscratches, on the upper reverse, that define the grade. Population: 17 in 62, 18 finer (1/14). NGC ID# 25WJ, PCGS# 8329

- 5305 1877-S AU53 NGC.** This still-lustrous straw-gold example, one of just 26,700 pieces coined, offers excellent visual appeal. Well struck with small, scattered marks and just a touch of wear on the central devices. Census: 17 in 53, 30 finer (1/14). *Ex: West Palm Beach FUN (Heritage, 7/2009), lot 1613, which brought \$1,380.00.* NGC ID# 25X3, PCGS# 8344

- 5306 1877-S AU55 NGC.** A lovely Choice AU example, this San Francisco Mint half eagle survives from a mintage of 26,700 coins. The typical example grades just over XF40, so this is a far above average representative. Both sides have satiny bright yellow surfaces with bold details. Census: 21 in 55, 9 finer (1/14). NGC ID# 25X3, PCGS# 8344

**1880 Five Dollar, MS65  
Popular 19th Century Type Coin**

- 5307 1880 MS65 NGC.** The high-mintage 1880 five dollar is one of the few 19th century issues available for type up to MS65. However, few are available in Gem condition, and only two have been certified finer. This is a brightly lustrous example that shows no obvious or detracting marks, just a few small ones here and there. Light reddish-gold patina is present over each side. Census: 32 in 65 (3 in 65+, 2 in 65 ★), 1 finer (1/14). NGC ID# 25XA, PCGS# 8351

**1880-S Five Dollar, MS65  
Generous Luster and a Sharp Strike**

- 5308 1880-S MS65 NGC.** The 1880-S half eagle saw a prodigious mintage of more than 1.3 million pieces, but only a handful achieve the grade of the present Gem — two submissions at PCGS and 17 at NGC, to be precise, and none are finer at either service (1/14). Generous, flowing luster appears on each side of this lovely orange-gold surfaces, and the sharp strike and lack of singular contact put this piece into a small minority. NGC ID# 25XC, PCGS# 8353

- 5309 1881-S MS64 NGC.** The 1881-S Liberty half eagle is scarce at the MS64 level, and finer examples are rare. This well-detailed Choice specimen displays lightly marked peach-gold surfaces with vibrant mint luster on both sides. NGC has graded 22 numerically finer examples (1/14). NGC ID# 25XF, PCGS# 8357

- 5310 1882-CC AU53 PCGS. Variety 1-A.** This low mintage Carson City five has a good strike and rich butter-gold toning. The borders teem with luster. Smooth aside from small marks near the profile. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25XH, PCGS# 8359

**1882-S Five Dollar, MS65  
Pleasing Mint Luster, Minimal Abrasions**

- 5311 1882-S MS65 NGC.** The mintage for the 1882-S five dollar approaches the million-coin level, but Gems such as this piece are surprisingly difficult to locate. This example shows uniform reddish-gold mint surfaces and the soft mint frost is only interrupted by the smallest abrasions, none of which are worthy of individual mention. Census: 29 in 65, 3 finer (1/14). NGC ID# 25XJ, PCGS# 8360

**1884-CC Variety 1-A Half Eagle, AU50**

- 5312 1884-CC AU50 PCGS. Variety 1-A.** Only one die pair is known for the 16,402 coin mintage of 1884-CC half eagles. This example has splashes of coppery-orange toning over its still lustrous yellow-gold surfaces with a trace of high-point wear. Population: 23 in 50, 37 finer (1/14). *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25XP, PCGS# 8365

**5313 1887-S MS64 PCGS.** A well struck peach-gold half eagle that has vibrant luster and moderate obverse marks. A better date at the near-Gem level. Housed in a green label holder. Population: 48 in 64, 3 finer (1/14).  
*Ex: Santa Clara Bullet (Heritage, 11/2002), lot 1877; Ft. Lauderdale FUN (Heritage, 1/2005), lot 9081, which realized \$1,380. NGC ID# 25XW, PCGS# 8371*

**5314 1891-CC AU58 PCGS. Variety 1-A.** A crisply struck canary-gold Borderline Uncirculated five with fewer noticeable marks than is typical for the grade. 1891 was a banner year for half eagle and eagle production at Carson City, though the 1891-CC twenty dollar is rare.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25Y5, PCGS# 8378*

**5315 1891-CC MS61 NGC. CAC. Variety 1-A.** Caramel-gold centers are bounded by sea-green margins. This well struck Carson City type coin is only lightly abraded for the grade despite a thin mark near the branch stem. NGC ID# 25Y5, PCGS# 8378

#### 1892-CC Liberty Five, MS62 Rare in Finer Grades

**5316 1892-CC MS62 PCGS. Variety 1-A.** Most of the known 1892-CC half eagles are in Extremely Fine or About Uncirculated condition, and most, whether circulated or Uncirculated, are heavily bagmarked. Mint State examples are few and far between. The lustrous, peach-gold surfaces of this MS62 specimen are devoid of significant abrasions, though some scuffs and fine hairlines are visible under magnification. The design elements are well defined throughout. Population: 27 in 62, 13 finer (1/14). NGC ID# 25Y7, PCGS# 8380

**5317 1893-CC AU55 NGC. Variety 1-A.** The final Carson City five dollar emission has a low mintage of 60,000 pieces. This caramel-gold representative exhibits ample peripheral luster and is free from any individually consequential contact.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25YB, PCGS# 8384*

**5318 1893-CC AU58 NGC. Variety 2-A.** Traces of rose-red toning visit this primarily honey-gold example. Boldly struck and partly lustrous with minor marks near OF and the profile. From the final year of coinage at the storied Carson City Mint.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25YB, PCGS# 8384*

**5319 1893-O MS62 NGC. Variety 1.** A peach-gold New Orleans half eagle. The strike shows minor blending on Liberty's hair and the eagle's neck. Field marks are unobtrusive given the third party grade. Census: 62 in 62, 19 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25YC, PCGS# 8385*

#### 1894-S Half Eagle, MS62 Lovely and Conditionally Rare

**5320 1894-S MS62 NGC.** The 1894-S half eagle is even scarcer than its low mintage of 55,900 pieces might indicate, especially in Mint State. Indeed, there are only four examples graded higher than MS62 at NGC. This delightful specimen reveals razor-sharp strike definition on each side. The highly lustrous surfaces display lovely honey-gold toning. Nearly blemish-free on the reverse, a single noticeable abrasion resides just to the right of obverse star 3. Census: 6 in 62, 4 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 25YG, PCGS# 8389*

**5321 1896 MS64 PCGS. CAC.** Surface hues range from wheat-gold to orange depending on the angle to the light. Excellent overall detail, particularly on the eagle's feathers. Population: 20 in 64 (1 in 64+), 3 finer (1/14). NGC ID# 25YK, PCGS# 8392

#### 1897 Half Eagle, MS65+ Remarkably Clean and Lustrous Surfaces

**5322 1897 MS65+ PCGS.** The mintage for the 1897 five dollar approaches 900,000 pieces, and a few higher grade examples are known. The finest is mentioned in Garrett-Guth as an MS66 coin sold in 1999. That coin had grease stains struck into it, as does this example, only lightly seen on the cheek of Liberty. Even reddish-gold color and smooth mint luster is barely interrupted by post-striking abrasions, none of which are of singular note. Population: 27 in 65 (3 in 65+), 2 finer (1/14). NGC ID# 25YM, PCGS# 8394

**5323 1901/0-S MS63 NGC. CAC. FS-301.** The 1901/0-S is the last of the unchallenged overdates in the Federal series that originated from punching a logotype over remnants of a prior date. Subsequent overdates were caused by preparing a working die with hubs of two different dates. Sharply struck and lustrous with the customary count of minor abrasions. NGC ID# 25YX, PCGS# 8403

**5324 1903-S MS64 NGC. CAC.** The 3 in the date is lightly repunched south, an unlisted and undoubtedly scarce variety. A lustrous peach-gold and lime-green Choice Liberty type coin. Well preserved save for a short thin field mark beneath the chin. In a former generation holder. NGC ID# 25Z3, PCGS# 8408

**1904-S Liberty Half Eagle, MS64**  
**Very Rare Any Finer**

**5325 1904-S MS64 PCGS.** Even with a mintage of 97,000 pieces, the 1904-S proves to be an elusive coin in all Mint State grades. Gleaming, lustrous rich yellow-gold surfaces provide this near-Gem with outstanding eye appeal. Scattered abrasions, consistent with the grade, are present, including a few small hair thin marks. Population: 5 in 64, 5 finer (1/14). NGC ID# 25Z5, PCGS# 8410

**5326 1906-S MS63 NGC. CAC.** Dark greenish patina appears on the high points of this fully brilliant and lustrous yellow gold example. A splendid Select Mint State half eagle. Census: 68 in 63, 32 finer (1/14). NGC ID# 25ZB, PCGS# 8415

**5327 1907 MS64+ NGC.** A high-end Choice example of this popular type issue, with sharply detailed design elements and vibrant mint luster on both sides. The well-preserved peach-gold surfaces show just a few minor signs of contact. NGC ID# 25ZC, PCGS# 8416

**PROOF LIBERTY HALF EAGLE**

**1895 Liberty Half Eagle, PR60**  
**Surviving Population of 20-25 Pieces**

**5328 1895 PR60 NGC.** Only 81 proof Liberty half eagles were struck in 1895, making the issue rare in all grades today. This sharply detailed specimen offers deeply reflective yellow-gold fields that show a few hairlines and minor contact marks on both sides. Census: 1 in 60, 1 finer (1/14).

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 28CZ, PCGS# 8490*

**INDIAN HALF EAGLES**

**5329 1908 MS63 NGC.** The 1908 Indian half eagle represents the first year of the design, an important consideration for type collectors. This well-detailed Select example displays lustrous greenish-gold surfaces with only minor signs of contact. NGC ID# 28DE, PCGS# 8510

**1908 Half Eagle, MS64**  
**Well-Preserved and Appealing**

**5330 1908 MS64 NGC.** An important first-year type issue, the 1908 Indian Head half eagle saw a reasonably high mintage of 577,800 business strikes. This is a delightful near-Gem example with lovely honey-tan toning and faint reddish undertones. The satiny surfaces are nearly blemish-free on the obverse, while the reverse shows a wispy pin mark in the upper left field. NGC ID# 28DE, PCGS# 8510

**1908-D Half Eagle, MS64**  
**Vivid Colorful Surfaces**

**5331 1908-D MS64 PCGS.** From a mintage of 148,000 pieces, the 1908-D Indian half eagle is very rare in grades above the MS64 level. This lustrous yellow and orange-gold specimen offers sharply detailed design elements and lightly marked surfaces. PCGS has certified 11 numerically finer examples (1/14). NGC ID# 28DE, PCGS# 8511

**1909 Indian Half Eagle, MS64+**  
**Scarce Issue in Higher Grades**

**5332 1909 MS64+ PCGS. CAC.** The 1909 Indian half eagle is very scarce at the Gem level, making this high-end Choice specimen a good balance of quality and value. The design elements are sharply detailed and the lustrous greenish-gold surfaces show only minor signs of contact. Eye appeal is outstanding. NGC ID# 28DH, PCGS# 8513

- 5333 1909-D MS64+ NGC. CAC.** A precise strike is characteristic of this luminous straw-gold Indian five. Refreshingly unabraded aside from faint marks on the upper right reverse field. The mintmark is sharply impressed.  
*Ex: Long Beach Signature (Heritage, 9/2010), lot 5405. NGC ID# 28DJ, PCGS# 8514*

**1910 Half Eagle, MS64**  
**Lustrous and Well-Preserved**

- 5334 1910 MS64 NGC.** This attractive specimen is high-end for the near-Gem grade level. The motifs are boldly struck and the carefully preserved surfaces display vibrant mint luster and lovely antique-gold toning, imbued with faint accents of rose. Surface marks are minimal. NGC ID# 28DK, PCGS# 8517

**1911-D Half Eagle, AU58**  
**Lovely Key-Date Example**

- 5335 1911-D AU58 ANACS.** Only the elusive 1909-O has an even lower mintage than this Denver Mint key date. This lovely honey-gold example only has a few superficial marks on the upper right reverse field, and the obverse is nearly blemish-free. Pleasing mint frost adds to the appeal of this near-Mint half eagle.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 28DR, PCGS# 8521*

- 5336 1912 MS63+ PCGS. CAC.** Pale gold interiors with deeper orange at the margins and coppery skeins through much of the reverse. Well-struck for the issue with few of the usual grade-defining abrasions. NGC ID# 28DS, PCGS# 8523

**1913 Indian Half Eagle, MS64**  
**Difficult to Locate in Higher Grades**

- 5337 1913 MS64 PCGS.** Despite the large business-strike mintage of 915,901 pieces, the 1913 Indian half eagle is very scarce in grades above the MS64 level. This well-detailed Choice specimen offers lightly marked yellow and reddish-gold surfaces with a few hints of lilac. PCGS has graded 52 numerically finer examples(1/14). NGC ID# 28DT, PCGS# 8525

**1914 Indian Half Eagle, MS64**  
**Rare Any Finer**

- 5338 1914 MS64 NGC. CAC.** From a mintage of 247,000 pieces, the 1914 Indian half eagle is not as available as the other Philadelphia issues from 1909-1914. This attractive Choice example offers sharply detailed design elements and vibrant mint luster. The lightly marked yellow-gold surfaces show hints of green. NGC has graded 19 numerically finer examples (1/14). NGC ID# 28DU, PCGS# 8527

**LIBERTY EAGLES**

- 5339 1840 XF45 NGC.** The 1840 Philadelphia eagle is a condition rarity with fewer than a dozen known in Mint State. Date collectors are often limited to circulated examples of this issue since there were no branch mint eagles struck for the year. This XF example displays olive-gold color with some hints of remaining mint luster. A series of small marks appear in the left obverse field and on Liberty's chin, limiting the grade.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 262G, PCGS# 8581*

- 5340 1842 Large Date AU50 ANACS.** There were 15 1842 eagles on the wreck of the S.S. Republic — 11 examples of the Large Date variety and 4 examples of the Small Date punch. The proportions reflect the mintages of the two varieties and their overall availability, with the Large Date between two and three times more common than the Small Date in circulated condition. This example has nice remaining mint luster and a scattering of small abrasions on lemon-gold surfaces. A few shallow abrasions on Liberty's cheek are the most noticeable marks.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 262K, PCGS# 8584*

- 5341 1842 Small Date AU55 PCGS.** The Small Date eagle had a mintage less than one-third the amount of its Large Date counterpart and it is approximately two times as rare as a result. This early, No Motto eagle is always in demand and seldom seen finer than this Choice AU example. Moderate abrasions exist. The coin is brilliant, with remaining luster at the margins and strong detail.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 262L, PCGS# 8585*

- 5342 1842-O — Improperly Cleaned — NGC Details. AU. Variety 1.** With a mintage of 27,400 pieces, the 1842-O is intermediate in rarity between the highly challenging 1841-O and the fairly plentiful 1843-O. The present yellow-gold example has ample luster. The typically abraded surfaces are somewhat bright and glossy.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

1842-O Eagle, AU53  
Variety 2

**5343 1842-O AU53 NGC. Variety 2.** This early O-mint issue tends to come well struck, more so than other contemporaneous New Orleans pieces. This example is probably kept from Choice AU only by a single scrape across Liberty's cheek, and a small reverse rim bump at 7 o'clock. The strike is well executed, some faint prooflike luster radiates from the peripheral devices, and there are no other singular distractions. Census: 39 in 53, 61 finer (1/14). NGC ID# 262N, PCGS# 8587

**5344 1843-O AU50 NGC. Variety 4.** Appealing for the grade, this is a semiprooflike example of the issue, which is common in lower circulated grades but scarce in AU or finer condition. Lightly abraded surfaces limit the technical grade, but the coin is an appealing yellow-gold color and retains a nice amount of mint luster for an early-date eagle.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 262R, PCGS# 8589*

**5345 1843-O — Improperly Cleaned — NGC Details. AU. Variety 2.** Hints of luster fill design recesses of this caramel-gold No Motto New Orleans type coin. Mildly bright from a wipe, but less abraded than a majority of examples.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 262R, PCGS# 8589*

**5346 1844-O AU50 NGC. Variety 5.** Although the 1844-O eagle production of 118,700 pieces is high, this early issue is desirable in all grades. This AU50 example retains reflectivity in its fields and displays pleasing orange-gold toning accents. Relatively few abrasions exist and none are distracting on this well-struck, New Orleans ten.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 262T, PCGS# 8591*

**5347 1844-O — Reverse Tooled — NGC Details. Unc. Variety 1.** A luminous yellow-gold representative of this conditionally rare New Orleans issue. Peripheral luster is abundant but portions of the fields exhibit clusters of fine marks. Tops of two misplaced date digits are within the dentils beneath the 84 in the date. The mintmark is repunched inside the loop.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 262T, PCGS# 8591*

**5348 1846 XF45 PCGS.** The 1846 Liberty eagle is a scarce issue from a mintage of 20,095 pieces. This Choice XF example displays slightly granular yellow and orange-gold surfaces with a scattering of minor abrasions on both sides. Population: 21 in 45, 25 finer (1/14). NGC ID# 262W, PCGS# 8594

1846 Eagle, AU50  
Pre-Gold Rush Issue

**5349 1846 AU50 NGC.** This pre-California Gold Rush issue has a mintage of just over 20,000 pieces, and most survivors show considerable wear; as Garrett and Guth note, "The typical 1846 example is only EF or worse. About Uncirculated pieces are definitely rare ... ." This yellow-orange piece, though moderately marked with a scrape in the right obverse field, exhibits only slight rub on the high points. Census: 15 in 50, 33 finer (1/14). NGC ID# 262W, PCGS# 8594

**5350 1846-O XF40 PCGS. Variety 3.** Designated as an overdate on the green label insert, but we believe the die lump within the 6 was caused by a defective date punch. A well defined green-gold example with a cloudy appearance and moderate marks noted near star 7.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 262X, PCGS# 8595*

**5351 1846-O XF45 PCGS. Variety 3.** This die variety was at one time considered an overdate, but is actually the result of a damaged date punch. The present orange-gold New Orleans representative is well defined and features original, typically abraded surfaces. NGC ID# 262X, PCGS# 8595

**5352 1847 AU58 NGC.** Rounded Bun subtype. No shield ring. A well struck sun-gold No Motto type coin without any mentionable marks. Luster brightens the margins and motifs. A minor retained lamination is noted near the lowest arrowhead.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 262Z, PCGS# 8597*

**5353 1847 AU58 NGC.** Rounded Bun subtype. No shield ring. An apricot-gold near-Mint Liberty type coin. Lightly abraded and only mildly luminous. The war with Mexico was likely one reason for the increased mintages of eagles in 1847.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 262Z, PCGS# 8597*

**5354 1847-O AU50 NGC. Variety 1.** At least seven die varieties are known for the 1847-O ten. Variety 1, however, appears to be scarce, relative to Varieties 6 and 7. This caramel-gold example has a typical strike and retains glimmers of its initial luster within the legends. Small abrasions are prevalent but we note only a line on the obverse rim at 3 o'clock.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2632, PCGS# 8598*

**5355 1847-O AU55 NGC. Variety 2.** The base of the 1 in the date is repunched, and both sides have several spindly die cracks. This yellow-gold New Orleans type coin is mildly luminous and free from any mentionable abrasions. Luster is prevalent on the legends, curls, and eagle.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2632, PCGS# 8598*

**5356 1847-O AU58 NGC. Variety 2.** With the largest mintage of any New Orleans gold coin — 571,500 pieces were produced — this 1847-O ten is the logical favorite of type collectors. The coin is rare, however, in Mint State and seldom available in Uncirculated condition. This near-Mint example is minimally abraded with orange-gold toning and pleasing mint luster around the devices. The soft strike on Liberty's curls is diagnostic of the issue.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2632, PCGS# 8598*

**5357 1847-O — Improperly Cleaned — NGC Details. Unc. Variety 2.** The base of the 1 in the date is repunched. No Motto New Orleans tens with Uncirculated sharpness are rarely encountered, but the present lot provides an opportunity for acquisition at an affordable cost. Sharply struck and satiny with moderately hairlined apricot-gold surfaces.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2632, PCGS# 8598*

**5358 1848-O — Improperly Cleaned — NGC Details. AU. Variety 1.** The usually encountered die pair with a shield ring at the top of the second vertical stripe. This apricot-gold New Orleans ten displays parallel hairlines on both sides and has a cluster of thin marks beneath the second S in STATES.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2634, PCGS# 8600*

**5359 1848-O — Improperly Cleaned — NGC Details. AU. Variety 1.** The present die marriage is interesting for its shield ring atop the second vertical stripe. This yellow-gold example is minutely granular and somewhat bright. The strike is typical and the obverse field displays expected marks.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2634, PCGS# 8600*

**5360 1848-O — Improperly Cleaned — NGC Details. AU. Variety 1.** This wheat-gold O-mint ten displays ample luster. Both sides are hairlined, most noticeable on the upper reverse field. The strike is somewhat soft, as usual for Variety 1. A shield ring is present atop the second vertical stripe.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2634, PCGS# 8600*

**5361 1848-O AU50 NGC. Variety 1.** A scarce New Orleans issue from a mintage of 35,850 pieces. Most examples have a shield ring atop the second vertical stripe, as does the present coin. It is a butter-gold representative with a typical strike. Marks are unimportant aside from contact on the obverse rim near 2:30.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2634, PCGS# 8600*

#### 1848-O Eagle, AU53 A Collectible, Early O-Mint Ten

**5362 1848-O AU53 NGC. CAC. Variety 1.** This variety shows a better-positioned date in the exergue, and on the reverse there are horizontal lines at the juncture of the eagle's wing that were not polished away before striking. While the 1848-O is a better issue, there are several higher grade examples known. This piece retains much original brightness and there are fewer marks than usually encountered. Slightly soft in the centers, but not distractingly so.  
 NGC ID# 2634, PCGS# 8600

**5363 1849 AU55 NGC. CAC.** The year on this eagle brings to mind the famous gold discoveries of California. This yellow-to-orange example has modest wear on softly struck devices but ample field luster.  
 NGC ID# 2635, PCGS# 8601

#### 1849-O Ten Dollar, XF45 Scarcer Issue and Die Variety

**5364 1849-O XF45 PCGS. Variety 3.** This scarcer variety is characterized by the mintmark's position over the left serif of the N in TEN and the centering ring at the top of the shield. The 1849-O is a scarce issue, not only from the 1840s but in the series as whole. It is also conditionally elusive. This Choice XF piece displays the extensive abrasions and the softness of high-point detail that are almost always seen on surviving examples.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2636, PCGS# 8602*

**5365 1850 Large Date XF40 NGC.** Luminous surfaces shift from wheat-gold to rich orange depending on the angle to the light. Scattered wispy marks contribute to the grade of this Large Date example.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2637, PCGS# 8603*

**5366 1850 Large Date AU58 PCGS.** The more available of the two date sizes, this Large Date ten exhibits bright, attractive surfaces with significant remaining mint luster. Reddish patina covers the otherwise yellow-gold surfaces. Numerous light field marks can be seen on each side, none of which are individually distracting. Population: 6 in 58, 11 finer (1/14).  
 NGC ID# 2637, PCGS# 8603

**5367 1850-O — Improperly Cleaned — NGC Details. AU. Variety 1.** A butter-gold example of this low mintage New Orleans issue. Mildly luminous but the major devices are well struck, and relevant marks are relegated to the field beneath the F in OF. A shallow strike-through (as made) between stars 2 and 3. A scant 57,500 pieces were struck.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2639, PCGS# 8605*

**5368 1850-O AU50 NGC. Variety 2.** This issue is the first of a series of challenging 1850s New Orleans eagles. Most are seldom seen in XF45 condition, scarce in AU, and rare in Uncirculated grades. Although 57,000 pieces of the 1850-O eagle were minted, the issue is rarely available in AU condition and nearly unobtainable in Mint State. This olive-gold example has only a few scattered abrasions on its smooth surfaces. Traces of orange-gold mint luster remain.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2639, PCGS# 8605*

**5369 1851-O — Sea Salvaged — AU58 ANACS. Variety 2.** All '51-O and '52-O tens have a shield ring, visible at the reverse center. The luminous gold-orange surfaces have the distinctive matte texture generally associated with prolonged exposure to warm seawater.  
 NGC ID# 263B, PCGS# 8607

**5370 1852 AU58 NGC.** The 1852 ten is surprisingly difficult to find any finer than this AU58 example. The high mintage of 263,106 pieces must not have survived in normal percentages. This example shows a rather weak central strike on Liberty's curls and on the eagle. Orange highlights frame the devices, and some luster remains on the lightly abraded surfaces.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 263C, PCGS# 8608*

**5371 1852-O — Damaged — NGC Details. AU. Variety 2.** Another difficult New Orleans issue. The 1852-O has a mintage of only 18,000 pieces, less than one-tenth the double eagle production that year at the Southern facility. The present mildly glossy apricot-gold example has a couple of small obverse rim nicks. The obverse has myriad minute marks that altogether provide a textured appearance.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 263D, PCGS# 8609*

**5372 1853 AU58 NGC.** The base of the 1 is repunched north. This sun-gold No Motto type coin has a broad band of luster throughout both margins. The strike is sharp except on the stars. The distributed small marks are consistent with the grade.

*From Christopher Bently's Nob Hill Collection. NGC ID# 263E, PCGS# 8610*

**5373 1853-O XF45 NGC. Variety 1.** The New Orleans eagles from the 1850s are all rare in one way or another, although the 1853-O ten is somewhat more available than others in VF to XF condition. This bright, yellow-gold example has the expected abrasions but they are minimized by wear, resulting in smoother surfaces than expected.

*From Christopher Bently's Nob Hill Collection. NGC ID# 263F, PCGS# 8612*

**5374 1854 AU50 NGC.** Both sides show a mix of pale yellow and deeper orange tones with considerable luster remaining. Scrapes in the left obverse field and scattered marks elsewhere contribute to the grade.

*From Christopher Bently's Nob Hill Collection. NGC ID# 263G, PCGS# 8613*

**5375 1854-O Small Date XF45 PCGS. Variety 1.** A peach-gold Choice XF New Orleans No Motto ten with hints of lilac patina near star 5 and above the eagle's neck. Moderate marks include a hair-thin line on the field near the profile. The Small Date and Large Date are so similar in scarcity that they are identically priced in the *Guide Book*.

*From Christopher Bently's Nob Hill Collection. NGC ID# 28EC, PCGS# 8614*

**5376 1854-O Large Date AU55 NGC. Variety 1.** The Large Date variety of the 1854 New Orleans issue is about equally rare as its Small Date counterpart, but it is more eagerly sought by collectors because of its huge date punch (the punch was intended for a silver dollar). This is a Choice AU example with minimal abrasions and apricot-gold surfaces. Prooflike reflectivity remains around the stars and devices amid glimpses of original mint luster. A sharply struck, pleasing ten-dollar gold. Census: 42 in 55 (1 in 55+★), 38 finer (1/14).

*From Christopher Bently's Nob Hill Collection. PCGS# 98614*

**5377 1854-O Large Date AU55 NGC. Variety 2.** The Large Date 1854-O has the largest date logotype of any Liberty eagle issue. Presumably, the logotype was intended for a larger diameter denomination. This is a lovely apricot-gold example with noticeable bright luster and unblemished surfaces. The strike is somewhat soft at the centers. PCGS# 98614

**5378 1854-O Large Date — Improperly Cleaned — NGC Details. Unc. Variety 4.** Well struck except on the lower stars. A lightly hairlined and minimally bagmarked straw-gold example of this more available No Motto New Orleans issue. The bust truncation has a small scrape.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 98614*

**5379 1854-S AU53 PCGS.** Light yellow-orange luster overall with ample remaining luster in the fields. Scattered minor to moderate abrasions pepper the surfaces of this first-year San Francisco ten dollar piece. Population: 31 in 53, 34 finer (1/14). NGC ID# 263K, PCGS# 8615

**5380 1854-S AU55 NGC.** The 1854-S eagle is a major rarity in Uncirculated condition, making alternatives such as this Select AU example more appealing to many collectors. This example is moderately abraded but displays attractive apricot-gold color and ample remaining mint luster. Evidence of a strong strike is obvious, but a bit softened by brief circulation.

*From Christopher Bently's Nob Hill Collection. NGC ID# 263K, PCGS# 8615*

**5381 1856 AU58 NGC.** Well-defined on the interiors, though the obverse stars are blunt. Considerable yellow-orange luster remains in the fields, particularly on the reverse.

*Ex: Long Beach Signature (Heritage, 9/2005), lot 4773.*

*From Christopher Bently's Nob Hill Collection. NGC ID# 263P, PCGS# 8619*

**5382 1856-O — Improperly Cleaned — NGC Details. AU. Variety 3.** The 1856-O is a scarce date from a mintage of 14,500 pieces. This lustrous orange and greenish-gold specimen is lightly worn and shows only minor contact marks but the surfaces show evidence of cleaning.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

### 1856-O Ten Dollar, AU50 Scarce in About Uncirculated Grades

**5383 1856-O AU50 NGC. Variety 1.** This advanced die state of Variety 1 shows die rust within the coronet. As one would expect from a New Orleans gold piece, as well as a coin with only 14,500 pieces struck, there are few AU and Mint State pieces available for collectors. Even wear is seen over the high points of the devices, and numerous, small marks are scattered over each side. The only mentionable abrasions are a couple of longer ones in the left obverse field.

*From Christopher Bently's Nob Hill Collection. NGC ID# 263R, PCGS# 8620*

**5384 1856-S AU53 NGC.** A few About Uncirculated 1856-S eagles surfaced from the S.S. *Central America* and S.S. *Republic*, but nothing like the quantity of 1856-S double eagles that were salvaged from those wrecks. Two or three noticeable abrasions limit the grade of this honey-gold ten — a scrape on Liberty's cheek and another above the eagle's head are the most obvious marks. The coin is otherwise attractive with ample remaining mint luster and a strong strike.

*From Christopher Bently's Nob Hill Collection. NGC ID# 263S, PCGS# 8621*

**5385 1857 — Reverse Improperly Cleaned — NGC Details. AU. Breen-6925.** A lightly circulated and moderately cleaned honey-gold example of this underrated and low mintage No Motto issue. Breen's so-called "overdate" with a die line between the final two digits. The variety was listed in *Coin World Values* for several years but has been delisted.

*From Christopher Bently's Nob Hill Collection.*

**5386 1857 AU50 NGC. Breen-6925.** A thin diagonal die line connects the 5 and 7 in the date. Breen regarded the variety as "extremely rare" and an overdate, though it more likely represents a mere die worker's slip. A sun-gold No Motto ten with pleasing luster extent and a nice strike on the major devices. A subtle obverse rim mark is noted at 1:30.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 263T, PCGS# 8622*

**5387 1857 AU55 NGC.** A scarce No Motto issue, the 1857 eagle had a mintage of just 16,606 pieces. Most were heavily circulated. The coin is rare in Choice AU such as this example. Several small abrasions are seen but none are individually severe, and the coin has nice remaining mint luster around well-struck devices. Census: 20 in 55, 24 finer (1/14). NGC ID# 263T, PCGS# 8622

**5388 1857-S XF45 NGC.** A lightly worn and faintly luminous Choice XF representative of this earlier San Francisco eagle issue. An old pinscratch runs from below star 5 to Liberty's forehead. Census: 10 in 45, 32 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 263V, PCGS# 8624*

**5389 1858-O — Improperly Cleaned — NGC Details. AU. Variety 1.** This briefly circulated and typically abraded honey-gold New Orleans eagle is only mildly bright. A loupe fails to locate any hairline patches. The obverse border has a trio of mint-made strike-throughs. A scant 20,000 pieces were issued.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 263X, PCGS# 8626*

**5390 1858-O AU53 NGC. Variety 1.** The obverse is lime-green and the reverse is peach-gold. Well defined and nicely struck, though several stars are soft. A loupe reveals faded moderate marks near the shoulder tip and on the left obverse field. A rare date New Orleans issue.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 263X, PCGS# 8626*

#### 1858-O Ten Dollar, AU55 Scarce Low-Mintage Issue

**5391 1858-O AU55 NGC. Variety 1.** An attractive Choice AU specimen with clean surfaces and minor rub on the high points. Well-detailed except on the lower obverse stars, with a few wispy hairlines detected in the fields. This low-mintage New Orleans Mint issue only saw a total production of 20,000 pieces, and survivors are scarce in AU and Mint State grades.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 263X, PCGS# 8626*

**5392 1858-S — Rim Filed, Improperly Cleaned — NCS. AU Details.** Like most San Francisco issues prior to 1879, the 1858-S is both low mintage and rare. This is a briefly circulated example with mildly glossy caramel-gold surfaces. The rims are lightly filed near 2 o'clock on each side and a thin mark is noted above the portrait.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 263Y, PCGS# 8627*

#### 1859 Ten Dollar, AU58 Underrated No Motto Issue

**5393 1859 AU58 NGC.** The 1859 is both an absolute as well as condition rarity. Only 16,093 pieces were struck, and while a few have been certified in mint condition, those pieces are rare and predictably pricey. Even though both sides are peppered with numerous small abrasions, luster can still be seen surrounding the devices. Even orange-gold color. Census: 21 in 58, 8 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 263Z, PCGS# 8628*

#### 1860 Liberty Ten, AU58 Significant Mint Luster Around the Devices

**5394 1860 AU58 NGC.** The 1860, like the 1859, is similarly unavailable in near-Mint and mint condition. Only 15,105 pieces were struck, and NGC has certified a mere eight pieces in Mint State. Significant portions of mint luster remain around the devices on each side, and the only mentionable marks are a couple just in front of Liberty's ear. The fields show reflectivity that is ever-so-slight on each side, undoubtedly the initial die polish had not completely diminished when this piece was struck.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2644, PCGS# 8631*

#### 1860-S Ten Dollar Gold, XF Details Rare in Any Condition

**5395 1860-S — Improperly Cleaned — NCS. XF Details.** A small mintage of just 5,000 pieces with only two known Mint State examples (both from the *S.S. Republic*) makes the 1860-S eagle a rarity and desirable in any condition. PCGS estimates only 30 to 45 known in all grades. This example is improperly cleaned with hairlines visible when rotated under light, and the surfaces are a bit dull as a result. The coin is well-detailed for the assigned grade and displays a pleasing, olive-gold color. It is an extremely rare and undervalued issue in this challenging series.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2646, PCGS# 8632*

- 5396 1861 AU55 NGC.** Bulging Bun subtype. A partly lustrous apricot-gold Choice AU No Motto type coin. Moderate marks are distributed across the obverse and upper reverse. The only readily collectible ten dollar issue from the 1860s.  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 2647, PCGS# 8633

**1862 Ten Dollar, AU55  
Scarce P-Mint Issue**

- 5397 1862 AU55 NGC.** This low-mintage issue saw a total business strike production of just 10,960 pieces. The antique-gold surfaces show considerable amounts of luster in the protected regions. Well-struck except for a few of the obverse stars, with faint high-point wear and small scattered marks on each side. Census: 15 in 55, 15 finer (1/14).  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 2649, PCGS# 8635

**1862-S Ten Dollar, VF35  
Low-Mintage Date**

- 5398 1862-S VF35 NGC.** The motifs are generally bold, if evenly worn on the design's higher points. A mixture of deep khaki and reddish-gold coloration covers each side. Small to moderate marks are evident, as expected for the grade. This is a scarce, low-mintage issue of just 12,500 pieces, and survivors are few at any level of preservation. Census: 3 in 35, 39 finer (1/14).  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 264A, PCGS# 8636

**1865 Ten Dollar, AU Details  
Just 3,980 Pieces Struck**

- 5399 1865 — Improperly Cleaned — NCS. AU Details.** As with most Philadelphia tens from this decade, the 1865 had an impressively low production run of only 3,980 pieces. The obverse details are not as well-defined as those on the reverse, but each side is minimally abraded. The surfaces are lightly cleaned, but not offensively so.  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 264F, PCGS# 8641

**1868 Ten Dollar, AU55  
Ample Remaining Luster**

- 5400 1868 AU55 NGC.** This low-mintage issue of 10,665 coins is exceedingly scarce in AU grades, and rare in Mint State. This example captures the viewer with bright surfaces and pleasing antique-gold toning. High-point wear is minimal for the Choice AU level, and small abrasions are scattered across both sides.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 264N, PCGS# 8653

**1868-S Ten Dollar, AU55  
Ex: Bass**

- 5401 1868-S AU55 NGC.** Ex: Bass. The surfaces display a variegated blend of deep rose and terra cotta coloration. The design elements are boldly rendered, if somewhat soft on the obverse stars. Slight wear on the high points and stray surface blemishes are only as expected for a Choice AU example. This is an elusive low-mintage issue, rare at all grade levels. Census: 13 in 55, 8 finer (1/14).  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 264P, PCGS# 8654

- 5402 1870 XF45 NGC.** Minuscule mintages for all the 1870 eagles explain why the date — regardless of mintmark — is a classic for collectors. The Philadelphia mintage was just 3,900 pieces; Carson City produced 5,908 pieces; and San Francisco managed 8,000 pieces. Today, all are rare and desirable. This Philadelphia Mint example is a caramel-gold example and lightly abraded, with the most significant abrasion a curved scrape between stars 2 and 3. A bit of mint luster exists beneath orange toning around the peripheries. Sharp for the grade. Census: 14 in 45, 39 finer (1/14).  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 264T, PCGS# 8657

- 5403 1870-S — Rim Damaged, Cleaned — ANACS. AU Details, Net XF45.** A quartet of small rim cuts are hidden by the holder between 9 and 10 o'clock of this lustrous 1870-S eagle, which also shows signs of a light cleaning. The 1870-S ten is a rare issue, and this one is desirable despite the problems. Bright, yellow-gold surfaces are well-detailed with only a few abrasions, none of them significant for the grade. Doug Winter suggests that fewer than 100 examples of the 1870-S eagle are known today, with most existing in the VF-XF range.  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 264V, PCGS# 8659

- 5404 1871 — Improperly Cleaned — NGC Details. AU.** The 1871 is one of many unheralded rarities within the challenging Liberty ten series. PCGS estimates 60 to 75 survivors are known from the tiny mintage of 1,790 pieces. The present sun-gold coin is unnaturally prooflike from a cleaning and displays a smattering of small marks. The reverse exergue displays light pinscratches. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**1872-S Eagle, AU55  
Conditionally Scarce**

- 5405 1872-S AU55 NGC.** The San Francisco Mint did not produce a high number of gold ten dollar coins, prior to 1879. In 1872, they struck 17,300 pieces of this denomination, few of which were deliberately spared from circulation. The design elements are remarkably well-struck, especially on the obverse, and gleaming orange-gold luster remnants, along the borders, complement the straw-gold surfaces. Scattered small abrasions and modest high-point wear define the grade of this Choice AU specimen. Census: 31 in 55 (2 in 55+★), 15 finer (1/14). *From Christopher Bently's Nob Hill Collection. NGC ID# 2653, PCGS# 8665*

- 5406 1873-SXF45 NGC.** The 1873-S Liberty eagle is an elusive issue from a mintage of just 12,000 pieces. This Choice XF specimen is lightly worn and minimally abraded. Census: 18 in 45, 38 finer (1/14). *From Christopher Bently's Nob Hill Collection. NGC ID# 2656, PCGS# 8668*

- 5407 1874 AU58 NGC.** This attractive near-Mint specimen displays lightly abraded yellow and greenish-gold surfaces with prooflike reflectivity in sheltered areas. The design elements show just a trace of wear on the high points. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2657, PCGS# 8669*

- 5408 1874 MS60 NGC.** Semireflective yellow-gold fields with hints of orange and copper at the margins. Well-struck overall with numerous abrasions but significant eye appeal nonetheless. Census: 21 in 60, 40 finer (1/14). *From Christopher Bently's Nob Hill Collection. NGC ID# 2657, PCGS# 8669*

- 5409 1874 MS61 PCGS.** Pale yellow-wheat interiors deepen toward the margins. Well-defined overall, if a touch soft on the star to the right of the date, and moderately abraded. Population: 23 in 61, 14 finer (1/14). NGC ID# 2657, PCGS# 8669

**1874-S Ten Dollar, XF45  
Rare, Low-Mintage Issue**

- 5410 1874-S XF45 NGC.** The motifs are nicely defined, and doubling is noted along the edges of the eagle's head, neck and wings. The deep reddish-khaki toning yields to lighter coloration across the central high points. A surprisingly bright Choice XF example of this rare, low-mintage issue. *From Christopher Bently's Nob Hill Collection. NGC ID# 2659, PCGS# 8671*

**1876-S Ten Dollar, XF45  
An Even 5,000 Pieces Produced**

- 5411 1876-S XF45 NGC.** The 1876-S ten dollar has a low mintage of only 5,000 pieces. Examples are rare in all grades because of the heavy use in circulation among the hard-money populace found in the western states. Few pieces are known above the present Choice XF level. The fields are bright and the surfaces overall are light reddish-gold with significantly deeper reddish-russet accents surrounding the devices. The obverse is a bit softer in strike than the reverse. Minimal abrasions are present. *From Christopher Bently's Nob Hill Collection. NGC ID# 265E, PCGS# 8676*

**1877-CC Ten Dollar, AU Details  
Popular Carson City Date**

- 5412 1877-CC — Damage — PCGS Genuine Secure. AU Details.** Only 3,332 pieces were struck of this very scarce CC ten, and the vast majority of the 55-65 survivors are no better than VF. This example shows only slight softness on the central devices. The Damage mentioned on the insert is in the form of a number of tiny pinprick marks on each side.

**5413 1877-S XF45 NGC.** This is a scarce eagle with only 17,000 pieces produced. There are relatively few survivors, with about 300 examples in all grades submitted for certification by PCGS and NGC combined, including duplicate submissions. This example is yellow-gold with a bit of orange at the rims. Numerous small abrasions dot the surfaces. NGC ID# 265H, PCGS# 8679

**5414 1877-S AU53 NGC.** Only 17,000 Liberty eagles were struck at the San Francisco Mint in 1877. This lightly circulated yellow-gold example shows the expected number of minor abrasions on both sides. Census: 26 in 53, 42 finer (1/14).  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 265H, PCGS# 8679

**5415 1878-CC — Polished — PCGS Genuine. XF Details. Variety 1-A.** One of many rare Carson City issues from the 1870s, the 1878-CC has a mintage of only 3,244 pieces. PCGS estimates 60 to 75 survivors. The present coin has only light wear but is unnaturally bright and prooflike from polishing. NGC ID# 265K, PCGS# 8681

#### 1879-O Ten Dollar, AU Details Key New Orleans Issue

**5416 1879-O — Improperly Cleaned — NCS. AU Details.** The 1879-O is a well-known absolute and condition rarity among New Orleans gold as well as With Motto tens in general. Only 1,500 pieces were struck, and very few have been seen in AU or mint condition. With such a low mintage, the initial die polish never wore off, and almost all examples are prooflike to one degree or another. This piece retains much of that field brightness, and in addition the surfaces show extra brightness from cleaning. Numerous small- to medium-sized abrasions are scattered across each side, but the only one worthy of individual mention is a shallow scrape behind the mouth of Liberty.  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 265P, PCGS# 8685

**5417 1879-S MS61 NGC.** The high mintmark variant. Sharply struck and satiny with generally smooth honey-gold surfaces. The 1879-S is the earliest S-mint issue readily available in Uncirculated grades, though it is scarce relative to successors such as the 1881-S. Census: 64 in 61, 15 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 265R, PCGS# 8686

**5418 1880-CC — Rim Filed, Damaged — NCS. AU Details. Variety 1-B.** The challenging 1880-CC has a mintage of only 11,190 pieces. The present straw-gold representative displays noticeable luster on the motifs and margins. Both rims are extensively filed. The date, star 13, and TES OF appear flattened.  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 265T, PCGS# 8688

**5419 1880-O XF40 PCGS. CAC. Variety 2.** All Motto New Orleans eagles struck prior to 1888 are rare. This is the rarer of the two known 1880-O varieties with the mintmark placed lower in the field than on Variety 1. The lemon-gold and lilac surfaces are richly detailed and moderately abraded. Only 9,200 pieces were struck. Housed in a green label holder. NGC ID# 265U, PCGS# 8689

**5420 1880-O — Improperly Cleaned — NCS. AU Details. Variety 1.** Unnaturally bright surfaces display yellow-gold color with areas of reflectivity surrounding the well-struck devices. It is a low-mintage New Orleans issue, with only 9,200 pieces produced and desirable as such.  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 265U, PCGS# 8689

#### 1881-CC Eagle, AU58 Deep Reddish-Gold Patina

**5421 1881-CC AU58 NGC. Variety 1-A.** The Carson City Mint set a record for eagle production in 1881 at 24,015 coins, one that would stand until the enormous 1891-CC issue exceeding 100,000 pieces. This near-Mint 1881-CC certified by NGC shows a sharp strike on deep reddish-orange surfaces with scattered lilac accents, an extremely appealing coin. The population data at this grade level are likely to be highly inflated from resubmissions attempting to cross the Mint State barrier. Census: 78 in 58, 48 finer (1/14).  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 265X, PCGS# 8692

**5422 1881-O AU53 NGC. Variety 1.** This is a scarce O-Mint issue in any condition and one that is a rarity in Mint State. The low mintage of 8,350 pieces attracts attention but somehow this date is always undervalued, perhaps due to the rarity of the surrounding dates including the extremely rare 1879-O and 1883-O eagles. This example is a bright yellow-gold with numerous small abrasions on both sides of the coin. It is well-struck for the issue and seldom available any finer.  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 265Y, PCGS# 8693

#### 1881-O Ten Dollar, AU55 Scarce, Low-Mintage Issue

**5423 1881-O AU55 NGC. Variety 1.** The small mintage of 8,350 coins makes the 1881-O eagle a scarce, desirable issue at any grade level. The current Choice AU representative is generally well-detailed, if a trifle weak on some of the obverse stars, and the reddish-tan surfaces display glints of original mint luster in the protected areas. Small marks pepper each side.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 265Y, PCGS# 8693

**5424 1882-CC — Improperly Cleaned — NCS. AU Details. Variety 2-A.** A moderately glossy representative of this much better Carson City issue. Luster illuminates the borders. The obverse displays abrasions consistent with light circulation. Only 6,764 pieces were struck.  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 2663, PCGS# 8696

**5425 1882-O AU50 NGC. Variety 1.** A modest mintage of 10,820 pieces provides enough 1882-O eagles for collectors who specialize in this challenging series. Like many New Orleans eagles, the issue is a rarity in Mint State and difficult to find in AU. This yellow-gold AU example has numerous shallow abrasions on the surfaces but retains prooflike flash around the stars and devices for nice appeal.  
*From Christopher Bently's Nob Hill Collection.* NGC ID# 2664, PCGS# 8697

**1882-S Ten Dollar, MS63  
Bright Mint Luster**

**5426 1882-S MS63 PCGS. CAC.** The 1882-S has a relatively low mintage of 132,000 pieces, but the Mint State coins that are available usually top out at MS62. This is a bright orange-gold example that shows a number of small, grade-consistent marks in the fields, none of which are serious. Sharply struck throughout. Population: 12 in 63, 3 finer (1/14). NGC ID# 2665, PCGS# 8698

**5427 1883 MS61 Prooflike ANACS.** Compared with the multi-million mintages of 1881 and 1882, the 1883 has a comparatively low production of 208,740 pieces. The present flashy and crisply struck eagle exhibits a quantity of small abrasions consistent with the designated grade.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. PCGS# 78699*

**1883-CC Eagle, AU55  
Scarce Low-Mintage Issue**

**5428 1883-CC AU55 NGC. Variety 1-B.** Well-struck on most of the design features, save for the central hair curls on the obverse. The high points display antique-gold toning that turns to dusky olive-gold color in the fields. Deep peach-gold accents adorn the margins. A scarce low-mintage issue out of Carson City that becomes rare in Mint State. Census: 28 in 55, 16 finer (1/14).  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2667, PCGS# 8700*

**5429 1883-S MS61 NGC.** Despite numerous abrasions, this example has appeal thanks to a full strike and attractive, orange-gold color. The fields were at one time semiprooflike before rough transport and handling compromised the surfaces. The 1883-S is conditionally rare above MS61.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 2669, PCGS# 8702*

**5430 1887 MS62 NGC.** This pleasing MS62 example is sharply detailed except for some softness on the stars. The lustrous yellow-gold surfaces show a number of grade-consistent contact marks on each side. Census: 18 in 62, 3 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 266H, PCGS# 8710*

**5431 1888 MS62 NGC.** The lustrous orange-gold surfaces of this attractive MS62 specimen show a scattering of minor contact marks on both sides and the design elements are well-detailed. Census: 49 in 62, 3 finer (1/14).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 266K, PCGS# 8712*

**5432 1888-O AU58 NGC. Variety 2.** The scarcer of the two die marriages. The date is slightly further west than on the more accessible Variety 1. The butter-gold surfaces display a smattering of marks, though a prominent diagonal line near the jaw appears to be a mint-made strike-through. Certified in a former generation holder.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 266L, PCGS# 8713*

**5433 1888-O AU58 NGC. Variety 1.** A peach-gold New Orleans type coin. Less abraded than often seen for the Borderline Uncirculated level. Luster fills the margins and motifs. A few stars are lightly struck but the portrait and eagle are mostly sharp.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 266L, PCGS# 8713*

**5434 1888-O MS61 NGC. Variety 2.** The mintage of 21,335 pieces is small, but this is a commonly available eagle in Mint State through MS63. This radiant, MS61 example is brilliant yellow-gold with cartwheel mint luster. A small copper spot is seen near star 13. The surfaces are sharply struck with only a few tiny abrasions, none of them severe or distracting.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 266L, PCGS# 8713*

**5435 1888-O MS61 PCGS. Variety 1.** An orange-gold representative of this low mintage yet collectible New Orleans issue. Well struck throughout. Marks are relatively few for the MS61 level. Certified in a green label holder.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 266L, PCGS# 8713*

**5436 1888-O MS62 NGC. Variety 1.** This lustrous and low mintage New Orleans ten displays apricot-gold toning and a precise strike. Marks are inconsequential except for a slender bright area beneath the right (facing) wing.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 266L, PCGS# 8713*

**5437 1889-S MS63 PCGS.** The 1889-S Liberty ten becomes rare in grades above the MS63 level. This attractive Select specimen is sharply detailed, with vibrant mint luster and outstanding eye appeal. PCGS has graded 21 numerically finer examples (1/14). NGC ID# 266P, PCGS# 8716

**5438 1890-CC AU53 NGC. Variety 1-A.** The borders of this yellow-gold Carson City eagle exhibit bright luster. Marks are minor aside from a cluster between star 1 and the chin. Scarcer than its '91-CC successor.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 266S, PCGS# 8718*

**5439 1891-CC AU58 PCGS. CAC. Variety 1-A.** Light wear on the curl above the ear confirms a momentary stint in commerce, but this wheat-gold Carson City ten displays bright luster across both borders. The eagle and portrait are also lustrous. No marks are consequential. NGC ID# 266U, PCGS# 8720

**5440 1891-CC MS61 ANACS. Variety 1-A.** A bold strike and highly lustrous, brilliant surfaces make this plentiful Carson City eagle a good choice for type. Rich, orange-gold color shows a hint of lime-green near the rims. Some prooflike reflectiveness surrounds the reverse devices. Three or four small copper spots dot the reverse and a few abrasions are widely scattered, but these do not distract from this fresh-looking, sharp gold eagle.  
*From Christopher Bently's Nob Hill Collection. NGC ID# 266U, PCGS# 8720*

**5441 1891-CC MS61 NGC. Variety 1-A.** The mintmark is furthest left on Variety 1-A, one of five die marriages known for the issue. This apricot-gold Carson City eagle has good luster and a bold strike. Small marks are scattered but none are individually of interest.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 266U, PCGS# 8720*

**1891-CC Liberty Ten, MS62  
Repunched Mintmark, FS-501**

**5442 1891-CC MS62 PCGS. FS-501. Variety 4-C.** The Carson City mintmark is clearly repunched west, and there is a spike below Liberty's jaw and a die crack through stars 1 to 5, identifying the popular FS-501 variety. The design elements are sharply detailed and the prooflike fields show a scattering of minor contact marks on both sides.. NGC ID# 266U, PCGS# 8720

**5443 1892-CC XF45 NGC. FS-501, Variety 1-A.** IN GOD WE TRUST is die tripled. All '92-CC tens were struck from the same reverse die. Nonetheless, FS-501 is photographed on the cover of the *Cherrypicker's* Fifth Edition, Volume II. A moderately circulated but completely problem-free peach-gold example. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 266W, PCGS# 8722

**5444 1892-O MS61 PCGS. Variety 1.** A nicely struck lemon-gold example that displays distributed small abrasions. The low mintage 1892-O is usually encountered in grades between AU55 to MS62. None have been certified above MS63. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 266X, PCGS# 8723

**5445 1892-O MS61 NGC. Variety 1.** An undisturbed and well struck New Orleans ten. Marks are minor and mostly confined to the left obverse field. The honey-gold surfaces display minute traces of dirt, indicative of the coin's originality. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 266X, PCGS# 8723

**5446 1892-O MS62 NGC. Variety 1.** An attractive and minimally abraded New Orleans eagle, this orange-gold example has a bold strike and eye appeal suggestive of an even higher grade. The mintage of just 28,688 pieces provides examples available up to the MS62 grade, yet only 8 pieces are graded numerically finer than MS62 by PCGS and NGC combined (1/14). *From Christopher Bently's Nob Hill Collection.* NGC ID# 266X, PCGS# 8723

**5447 1893-CC AU53 NGC. Variety 1-A.** The final year 1893-CC is much scarcer than the 1891-CC, since only 14,000 pieces were struck. This nicely struck honey-gold eagle offers ample luster and is lightly abraded aside from a thin diagonal mark on the portrait. *From Christopher Bently's Nob Hill Collection.* NGC ID# 2672, PCGS# 8726

**5448 1893-O MS61 NGC. Variety 1.** Only 17,000 pieces were produced of this New Orleans issue, but Mint State representatives are available up to MS62 before becoming scarce. This example is brilliant, reflective, and highly lustrous. Orange-gold surfaces display fully struck, lightly frosted devices. The fields show several abrasions and bagmarks consistent with the assigned grade, but the eye appeal is excellent. *From Christopher Bently's Nob Hill Collection.* NGC ID# 2673, PCGS# 8727

**5449 1894 MS64 NGC.** One of the most common Liberty eagle issues, this 1894 ten is radiantly beautiful and unabraded. Cartwheel luster rolls beneath lilac accents on sun-gold surfaces. A full strike completes the outstanding eye-appeal of this near-Gem eagle. NGC ID# 2675, PCGS# 8729

**5450 1894-O MS61 NGC. Variety 4.** Despite a relatively low mintage of 107,500 coins, the 1894-O eagle is available without much difficulty in circulated and lower Uncirculated grades. This example has attractive, satiny mint luster and remarkably few abrasions for the grade, but is softly struck as often seen on this O-mint ten. *Ex: Long Beach Signature (Heritage, 2/2005), lot 2422.* *From Christopher Bently's Nob Hill Collection.* NGC ID# 2676, PCGS# 8730

**5451 1894-S AU58 NGC.** An rarity in Uncirculated condition, this near-Mint example has all the appeal of a lower grade Mint State coin at a fraction of the price. Attractive, orange-gold highlights appear on lustrous, yellow-gold surfaces. Tiny abrasions are present but fewer than expected. A bold strike remains undisturbed by brief circulation. *From Christopher Bently's Nob Hill Collection.* NGC ID# 2677, PCGS# 8731

**5452 1899 MS64+ PCGS. CAC.** Thick swirls of lilac and sunset-gold toning appear on this highly original eagle. Strong luster resides beneath the toning and over a full strike on the devices. The 1899 issue is readily available, and thus a good candidate for type. This example will appeal to collectors who prefer coins with a generous amount of toning. NGC ID# 267J, PCGS# 8742

**5453 1899-S MS63 NGC.** The 1899-S Liberty eagle is seldom encountered in high grade. This attractive Select example exhibits well-detailed design elements and lightly marked lustrous surfaces. Census: 68 in 63 (1 in 63+), 13 finer (1/14). NGC ID# 267L, PCGS# 8744

**5454 1900 MS64+ PCGS. CAC.** Only a few small marks from a higher grade, this borderline Gem example would fit nicely in any MS65 set without looking out of place. Radiant luster is strong beneath apricot-gold surfaces with olive-green and red-gold accents. A full strike greets the eye. NGC ID# 267M, PCGS# 8745

**5455 1901 MS65+ NGC.** A high-end Gem example of this popular date, with sharply detailed design elements and vibrant mint luster on both sides. The well-preserved peach-gold surfaces show only minor signs of contact. NGC ID# 267P, PCGS# 8747

**5456 1901-S MS64 PCGS.** This orange-gold near-Gem provides dynamic luster and a crisp strike. The reverse is well preserved and the obverse has only unobtrusive abrasions. Certified in a green label holder. NGC ID# 267S, PCGS# 8749

**5457 1902-S MS64 NGC.** Aside from some softness on the lower stars, the design elements of this impressive Choice example are sharply detailed and the brightly lustrous surfaces are minimally marked. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 267U, PCGS# 8751

**5458 1902-S MS64 NGC. CAC.** Well-defined with a touch of satin to the glowing yellow-gold surfaces that show elements of honey and apricot. Well-defined overall and a worthy coin for a 20th century type set. NGC ID# 267U, PCGS# 8751

**5459 1903-O MS62 NGC. Variety 1.** The mintmark is entered high. Three die pairs are currently known. A lustrous and lovely sun-gold New Orleans type coin. The strike is bold aside from a few star centers. Marks are marginal for the MS62 level. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 267W, PCGS# 8753

**1903-O Ten Dollar, MS63**  
**Satiny, Well-Struck, Minimally Marked**

**5460 1903-O MS63 NGC. CAC. Variety 3.** The 1903-O is one of the more available tens from the New Orleans mint, even though only 112,771 pieces were produced. This is a satiny, well-struck example that shows minimal abrasions. The combination of these three elements is undoubtedly the reason for the CAC endorsement. Census: 52 in 63 (1 in 63+), 8 finer (1/14). NGC ID# 267W, PCGS# 8753

**5461 1903-S MS65 NGC.** This Gem eagle will be on the radar of type collectors because of the issue's frequent availability and traditionally attractive surfaces. This example is brilliantly lustrous and fully struck. Lilac and red-gold highlights appear on yellow-gold surfaces, which show a few tiny obverse marks but no meaningful abrasions. NGC ID# 267X, PCGS# 8754

**5462 1907 MS62 NGC.** An attractive final-year Liberty eagle with a rich orange-gold base and significant violet overtones. Wispy abrasions and a few shallow scrapes affect the generous luster. *From Christopher Bently's Nob Hill Collection.* NGC ID# 2688, PCGS# 8763

**5463 1907 MS64 NGC.** Razor-sharp definition is evident on the design elements of this attractive Choice example and vibrant mint luster radiates from both sides. The pleasing peach-gold surfaces show only a few scattered contact marks. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2688, PCGS# 8763

**5464 1907 MS64 PCGS.** This frosty near-Gem has sharp details and brilliant yellow surfaces with excellent eye appeal. Each side has trivial grade-consistent marks. PCGS has only certified 22 finer examples (1/14). NGC ID# 2688, PCGS# 8763

## INDIAN EAGLES

**1907 No Motto Ten, MS63**  
**Uniformly Well-Produced Issue**

**5465 1907 No Periods MS63 PCGS.** After its trial strikings involving the Wire Rim and Rolled Rim issues, the regular issue 1907 tens are well-produced coins, grade for grade. On this piece, the central obverse devices are slightly soft, though the reverse design is bold. The bright yellow-gold surfaces show a bright break in the luster to the left of the date. *Ex: Dallas Signature (Heritage, 11/2006), lot 2425.* NGC ID# 28GF, PCGS# 8852

**1907 Indian Eagle, MS63**  
**First-Year No Periods Example**

**5466 1907 No Periods MS63 ANACS.** This is a splendid example of what might well be called the "Saint-Gaudens eagle," in emulation of the double eagle series styled after the famous sculptor. The surfaces are brilliant yellow-gold that is set off nicely by the ANACS gold-label insert. A couple of minor contact marks well hidden in the Indian's headdress account for the grade, but the luster is gorgeous and the eye appeal is right. NGC ID# 28GF, PCGS# 8852

**5467 1908 No Motto MS61 NGC.** An attractive Mint State specimen of this popular two-year design, with well-detailed design elements and vivid orange-gold surfaces that radiate vibrant mint luster. NGC ID# 28GG, PCGS# 8853

**1908-D Indian Eagle, MS62**  
**Scarce Type Without Motto**

**5468 1908-D No Motto MS62 NGC.** The 1908-D No Motto Indian eagle is a scarce issue in high grade, from a mintage of 210,000 pieces. This MS62 example exhibits well-detailed design elements and vibrant frosty mint luster, with lightly marked yellow and rose-gold surfaces. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 28GH, PCGS# 8854

**1908-D No Motto Eagle, MS62**  
**Elusive Denver Mint Issue**

**5469 1908-D No Motto MS62 NGC.** This example shows bright peach-gold patina, and adequately struck motifs, though the hair around the Indian's face is a touch soft. A few minor ticks are observed on the cheek. The 1908-D is the sole No Motto Saint-Gaudens eagle issue struck outside the Philadelphia Mint. Surviving examples are scarce at this grade level, and increasingly difficult to locate any finer. NGC ID# 28GH, PCGS# 8854

**5470 1908 Motto MS62+ PCGS.** A lustrous, brilliant example of the With Motto 1908 eagle, this coin approaches Select status for its eye appeal and sharp strike. Although there are hardly any abrasions on the coin, the few that are present congregate on Liberty's cheek and chin, accounting for the assigned grade. The color is exceptional, with red highlights jumping from rich-gold surfaces. NGC ID# 28GJ, PCGS# 8859

**5471 1908 Motto MS63 NGC.** The 1908 Indian eagle with the motto IN GOD WE TRUST is a popular first-year type coin. This attractive Select specimen displays lustrous orange-gold surfaces, with highlights of rose and minor, well-scattered contact marks. NGC ID# 28GJ, PCGS# 8859

**5472 1908 Motto MS63 NGC.** Although President Theodore Roosevelt was personally opposed to adding the Motto to U.S. coinage, he acquiesced to the demands of Congress. As a result, this is a first-year type coin for collectors. The coin displays a bold strike and lustrous, yellow-gold surfaces. Only a few abrasions are scattered about the frosty fields and devices. NGC ID# 28GJ, PCGS# 8859

**5473 1909-D MS61 NGC.** From a mintage of 121,540 pieces, the 1909-D Indian eagle is an elusive date in high grade. This well-detailed Mint State example displays pleasing orange-gold surfaces with well-scattered minor contact marks.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 28GN, PCGS# 8863

#### 1909-D Ten Dollar, MS62 Lustrous and Appealing

**5474 1909-D MS62 NGC.** The Denver Mint production of this early Indian Head eagle date amounted to 121,540 pieces. It is a relatively available issue in Mint State, and a highly suitable choice for type purposes. The lustrous sun-gold surfaces of this satiny example show strong rose accents, and lovely peach toning complements the peripheries. A small number of trivial marks keep it from grading finer. NGC ID# 28GN, PCGS# 8863

#### 1911 Indian Eagle, MS64 Sharply Detailed

**5475 1911 MS64 PCGS. CAC.** The 1911 Indian eagle is a popular type issue from a mintage of 505,500 pieces. This attractive Choice example exhibits sharply detailed design elements and lustrous orange and rose-gold surfaces, with only minor signs of contact. Overall eye appeal is quite strong. NGC ID# 28GT, PCGS# 8868

**5476 1911-D AU53 NGC.** While a few light abrasions dot the fields and devices of this scarce Denver date, the coin makes a pleasing appearance with good remaining luster and a sharp strike on the mattelike surfaces. Just 30,100 pieces were minted of this elusive issue. A minimally circulated, appealing example. NGC ID# 28GU, PCGS# 8869

**5477 1912 MS64 PCGS.** Finely textured surfaces of this 1912 eagle are characteristic of the date, struck during a time when the Mint preferred such finishes to reflective ones. The strike is crisp on this highly lustrous, orange-gold example, with only a few minor abrasions limiting the coin from an even higher grade. NGC ID# 28GW, PCGS# 8871

#### 1912-S Indian Eagle, MS62 Lustrous and Highly Attractive

**5478 1912-S MS62 PCGS.** This issue is very scarce in Uncirculated condition. Softly frosted mint luster and crisp strike definition are seen on both sides of this San Francisco Mint product. The surfaces are smooth, and only minuscule ticks are detected, none of which are individually noticeable. An attractive Mint State coin, secured in an early first-generation PCGS holder. NGC ID# 28GX, PCGS# 8872

#### 1912-S Ten Dollar, MS62 Appealing High-End Example

**5479 1912-S MS62 NGC.** This appealing example is nicely preserved, especially on the obverse which presents surprisingly clean and virtually blemish-free surfaces. Even rose-gold color is seen over both sides. A few inconsequential marks on the upper reverse field seemingly limit the NGC grade assessment to MS62. NGC ID# 28GX, PCGS# 8872

#### 1912-S Ten Dollar, MS62 Rich Patina

**5480 1912-S MS62 PCGS.** The 1912-S is a scarce issue in mint condition, and grows increasingly difficult to locate in higher grades. This piece is unusually attractive for the grade with brick-red color and the usual frosted mint luster with a few small to medium sized abrasions on either side.  
*Ex: FUN Signature (Heritage, 1/2004), lot 7886.* NGC ID# 28GX, PCGS# 8872

**1912-S Indian Eagle, MS62**  
**Elusive Issue in Finer Grades**

**5481 1912-S MS62 PCGS.** From a mintage of 300,000 pieces, the 1912-S Indian eagle is an elusive issue in high grade. This impressive MS62 specimen offers a much better-than-average strike, with just a touch of softness on the eagle's wing. The slightly granular yellow and orange-gold surfaces are lustrous and lightly marked. NGC ID# 28GX, PCGS# 8872

**5482 1913-S AU55 NGC.** An attractive Choice AU example from a mintage of just 66,000 pieces. This coin shows a trace of wear on the sharply impressed design elements, but the lustrous greenish-gold surfaces are lightly abraded.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 28GZ, PCGS# 8874*

**5483 1913-S AU55 PCGS. CAC.** Collections of Indian Head eagles are often defined by the presence of both a 1913-S and a 1911-D in the set — two key dates. While they are big dollar coins in high Uncirculated grades, most collectors can afford an example such as this Choice AU ten. Lustrous and well-detailed, the surfaces are lightly abraded with a small spot in the headdress. The coin is CAC-Approved for eye appeal and quality. NGC ID# 28GZ, PCGS# 8874

**5484 1914-D MS63 NGC.** Apricot-gold color blankets pleasing satiny surfaces that reveal a few light ticks on the Indian's cheek. The design elements are sharply detailed and eye appeal is strong for the grade. NGC ID# 28H3, PCGS# 8876

**5485 1914-S AU53 NGC.** This well-detailed AU53 specimen displays a touch of wear on the eagle's wing and leg and the lustrous yellow and rose-gold surfaces are lightly abraded. From a mintage of 208,000 pieces. NGC ID# 28H4, PCGS# 8877

**5486 1914-S MS61 ANACS.** Pale yellow-gold overall with slight deepening at the margins. Delicately textured surfaces have ample rolling luster but also a number of light to moderate marks. Housed in a small-format ANACS holder.  
*Ex: Palm Beach Signature (Heritage, 3/2005), lot 7099. NGC ID# 28H4, PCGS# 8877*

**5487 1915 MS63 PCGS.** Lively luster lurks beneath a frosted coat of olive-green toning on this Select Uncirculated example. The devices are enhanced by areas of brilliance with red-gold highlights. Only random abrasions, all minor, are scattered among the devices that are nominally weak at the high points.  
*Ex: New York Signature (Heritage, 11/2003), lot 7767, where it brought \$1,121.25. NGC ID# 28H5, PCGS# 8878*

**5488 1915 MS63 PCGS. CAC.** Primarily light yellow-gold with hints of apricot. A few small coppery dots appear below the well-defined form of the eagle. Strong eye appeal for a Select coin. NGC ID# 28H5, PCGS# 8878

**1915 Ten Dollar, MS64**  
**Excellent P-Mint Type Coin**

**5489 1915 MS64 PCGS.** Pleasing luster and a strong strike combine with lightly marked surfaces to provide impressive eye appeal. The 1915 is the final Philadelphia Mint issue prior to 1926, and while this date is not rare in mint condition, examples such as this are desirable as type coins.  
*Ex: Dallas Signature (Heritage, 11/2005), lot 4408. NGC ID# 28H5, PCGS# 8878*

**1915-S Eagle, AU58**  
**Attractively Toned and Lustrous**

**5490 1915-S AU58 PCGS.** This San Francisco Mint issue has the fourth-lowest mintage in the Indian eagle series, at 59,000 pieces. Uncirculated coins are considerably scarcer and more expensive than their AU counterparts. The surfaces display significant remaining luster, and the lovely honey-rose central toning yields to brighter yellow-gold peripheral hues. Surface marks are absolutely minimal for the grade. NGC ID# 28H6, PCGS# 8879

**5491 1916-S AU58 NGC.** Soft yellow and sun-gold luster remains largely intact despite rub on the high points. Lightly abraded with a few longer marks but still an appealing example of a San Francisco issue struck on the eve of America's entry into World War I. NGC ID# 28H7, PCGS# 8880

**5492 1916-S MS61 NGC.** This sharply detailed Mint State specimen exhibits vibrant mint luster on both sides and the pleasing yellow-gold surfaces show a number of minor contact marks, none worthy of individual mention. NGC ID# 28H7, PCGS# 8880

**1916-S Indian Eagle, MS62**  
**Seldom Encountered in High Grade**

**5493 1916-S MS62 PCGS.** From a mintage of 138,500 pieces, the 1916-S Indian eagle is not too difficult to locate in lower Uncirculated grades, but high grade examples are rare. This attractive MS62 specimen displays well-detailed design elements and lustrous orange-gold surfaces with highlights of rose. No large or distracting contact marks are present. NGC ID# 28H7, PCGS# 8880

- 5494 1932 MS64 PCGS.** A Choice lemon-gold Indian ten that possesses potent luster and a sharp strike. Marks are minor despite a few ticks on the front wing. Housed in a green label holder. NGC ID# 28HB, PCGS# 8884
- 5495 1932 MS64 PCGS.** Lustrous surfaces of this attractive eagle are sharply struck but a little busy on the high points, preventing an even higher grade. Mint frost covers the obverse; however, the reverse is more brilliantly presented. Yellow-gold color prevails. NGC ID# 28HB, PCGS# 8884
- 5496 1932 MS64 NGC.** Color shifts from wheat-gold to rich peach depending on the angle to the light. Frosty luster has few disturbances, though one appears just off Liberty's nose. NGC ID# 28HB, PCGS# 8884
- 5497 1932 MS64+ NGC.** A gorgeous "so-close" near-Gem that has a mix of pale apricot and canary shades. Well-struck overall with a clean obverse, though a cut on the reverse affects the eagle's front wing. NGC ID# 28HB, PCGS# 8884

### 1932 Indian Eagle, MS65 Only Collectible 1930s Gold Coin

- 5498 1932 MS65 NGC.** Thick, swirling mint luster covers each side of this outstanding Gem type coin. Sharply defined, there are no mentionable marks on either side. Even, light golden-orange coloration covers the surfaces. A highly attractive example of the only plentiful gold piece from the 1930s. NGC ID# 28HB, PCGS# 8884
- 5499 1932 MS65+ PCGS.** Lilac accents enhance flowing, brilliant-orange toning on the lustrous surfaces of this ten dollar gold piece. With the largest mintage by far of any Indian Head eagle, the 1932 is always the first option for type collectors. A full strike complements the eye appeal, confirmed by the PCGS Plus designation for high-end quality. NGC ID# 28HB, PCGS# 8884

## LIBERTY DOUBLE EAGLES

### 1852 Liberty Twenty, AU55 Well-Detailed Central Devices

- 5500 1852 AU55 PCGS.** Despite a huge mintage of 2 million pieces, the 1852 Liberty double eagle is seldom encountered in Mint State grades. This attractive Choice AU specimen shows just a touch of wear on the well-detailed design elements and the lightly abraded yellow-gold surfaces retain significant amounts of original mint luster. NGC ID# 268K, PCGS# 8906

### 1853 Twenty Dollar, AU55 Considerable Luster Remaining

- 5501 1853 AU55 NGC.** Golden-yellow surfaces show a decent strike and considerable luster remaining on this Choice AU 1853 twenty dollar. Some light field chatter on each side is accompanied by a couple of larger marks, including some reeding marks on Liberty's cheek, but they are consistent with the grade and not overt. NGC ID# 268M, PCGS# 8908

### 1853 Liberty Double Eagle, AU55 Bright Surfaces

- 5502 1853 AU55 NGC.** The bright yellow-gold surfaces of this Choice AU example retain much of their original mint luster and show the expected number of minor abrasions for the grade. A trace of wear shows on the high points of the design elements but almost all interior detail remains intact.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 268M, PCGS# 8908
- 5503 1854 Large Date VF30 NGC.** The hair around Liberty's ear is worn, as well as the prongs of the coronet, but a significant amount of interior detail remains intact. The surfaces show the expected number of minor abrasions.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* PCGS# 98911
- 5504 1855 XF40 NGC.** This pleasing Type One double eagle shows some wear on the prongs of Liberty's coronet and hair, but much interior detail remains intact. The vivid orange-gold surfaces show only minor abrasions.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 268V, PCGS# 8914
- 5505 1857 AU50 NGC.** The 1857 is one of the more available Type One twenties. This is a pleasing AU example that exhibits strongly contrasting orange-gold and yellow-gold color on each side. Lightly but extensively abraded.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2693, PCGS# 8920

---

**1857 Liberty Double Eagle, AU55  
Scarce Type One Issue**

**5506 1857 AU55 PCGS.** Unlike the San Francisco issue, few Philadelphia 1857 double eagles were included in the treasure of the S.S. *Central America*. This Choice AU specimen is lustrous and lightly worn, with a scattering of minor contact marks on both sides. Only a scratch below Liberty's eye and a dig in the left obverse field merit individual mention. Population: 37 in 55, 91 finer (1/14). NGC ID# 2693, PCGS# 8920

**5507 1858 AU50 ANACS.** This lightly circulated Liberty double eagle shows just a trace of wear on the well-detailed design elements, and the lustrous yellow-gold surfaces exhibit the expected number of minor abrasions for the grade.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2697, PCGS# 8923*

---

**1858 Twenty Dollar, AU53  
Conditionally Scarce Type One**

**5508 1858 AU53 NGC.** Despite a moderate original mintage of 211,714 coins, this issue is somewhat challenging in AU condition, and extremely scarce in Mint State. This example displays attractive antique-gold toning and sharply struck design motifs. Both sides are peppered with small to moderate marks.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 2697, PCGS# 8923*

---

**1858-S Liberty Twenty, AU53  
Attractive Type One Example**

**5509 1858-S AU53 NGC.** The 1858-S Liberty double eagle was a heavily circulated issue that came just too late to have any examples preserved in the S.S. *Central America*. As a result, the 1858-S is seldom encountered in high grade. This impressive AU53 example retains most of its original design detail and mint luster, with pleasing yellow-gold surfaces that show a scattering of minor abrasions. NGC ID# 2699, PCGS# 8925

**5510 1859-S XF45 NGC.** The lightly abraded orange-gold surfaces of this popular Type One double eagle retain traces of original mint luster and the design elements show a little wear on the hair and coronet.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 269C, PCGS# 8928*

**5511 1860 — Improperly Cleaned — NGC Details. AU.** Wheat-gold surfaces are lightly hairlined but the luster is remarkably intact for a coin that is worn as well. Color is largely yellow-gold with a few hints of orange and honey. NGC ID# 269D, PCGS# 8929

---

**1860 Double Eagle, Near-Mint  
Warm Luster**

**5512 1860 AU58 NGC.** A warmly lustrous near-Mint representative of the 1860 double eagle, primarily apricot-gold in color with aspects of peach. Modestly rubbed with generally light abrasions, though a handful of deeper digs appear on the cheek. NGC has graded just 51 examples in the Mint State range (1/14). NGC ID# 269D, PCGS# 8929

**5513 1860-S XF40 NGC.** The 1860-S twenty is one of the few Type One issues that can be located in circulated condition for type purposes. This is an original piece that shows even wear and only minimal abrasions.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 269F, PCGS# 8931*

**5514 (10) 1861 XF45 NGC.** All ten 1861 double eagles are identically graded in circa 1997 to 2003 small hologram NGC holders. Most of the coins display green-gold toning though one example has ruby-red in recessed areas. Most coins are lightly abraded for the grade but one has moderate rim dings.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. (Total: 10 coins) NGC ID# 269G, PCGS# 8932*

**5515 1861 AU50 NGC.** Production of nearly 3 million 1861 double eagles was accomplished by the Philadelphia Mint — a notable achievement. The workhorse date was called upon for domestic circulation, foreign export, and occasional hoarding. This example saw moderate circulation and displays olive-gold surfaces and a bit of remaining mint luster. It is well-detailed and only lightly abraded. NGC ID# 269G, PCGS# 8932

**5516 (10) 1861 AU53 NGC.** The ten 1861 double eagles are identically graded and housed in separate mid-2000s large hologram holders. The coins are lightly circulated and partly lustrous with minimal to typical abrasions for the AU53 level.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. (Total: 10 coins) NGC ID# 269G, PCGS# 8932*

---

**1861 Twenty Dollar, AU55**  
**Lustrous Orange-Gold Example**

**5517 1861 AU55 NGC. CAC.** In 1861, the year the Civil War began in April, the Philadelphia Mint struck nearly 3 million double eagles, while in 1862 the mintage would plummet to 92,000-plus pieces. The 1861 thus makes an ideal representative for the No Motto type, struck from 1850 to 1866. This Choice AU piece shows much mint luster remaining on orange-gold surfaces that show only a couple of minor marks, well within the context of the grade. NGC ID# 269G, PCGS# 8932

**5518 1861-S XF40 NGC.** Slight wear shows on the coronet and Liberty's hair, but much interior detail remains intact. The pleasing apricot-gold surfaces show the expected number of minor abrasions. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 269K, PCGS# 8935

---

**1862-S Double Eagle, AU50**

**5519 1862-S AU50 NGC.** Although a number of 1862-S Liberty double eagles were recovered from recent shipwreck finds, the issue remains rare in Mint State. This attractive AU specimen is lightly worn and the lustrous yellow-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 269N, PCGS# 8938

---

**1864 Liberty Double Eagle, XF45**  
**Prooflike Reflectivity Around the Devices**

**5520 1864 XF45 PCGS.** An attractive Choice XF specimen of this scarce Civil War issue, with vivid orange-gold surfaces that show prooflike reflectivity in sheltered areas. The design elements show some wear on the high points, but Liberty's hair and coronet retain much interior detail intact. NGC ID# 269S, PCGS# 8941

---

**1865 Double Eagle, AU55**  
**Pleasingly Toned and Attractive**

**5521 1865 AU55 NGC. CAC.** This is a gorgeous Choice AU example that displays deep reddish khaki-gold coloration across the fields and centers. Bright light-orange highlights complement the margins. A modestly worn representative with a few shallow abrasions noted on each side. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 269U, PCGS# 8943

---

**1867 Double Eagle, MS60**  
**Scarce in Mint State**

**5522 1867 MS60 NGC.** Writing in his *Guide Book of Double Eagle Gold Coins*, Bowers comments: "This seems to be the earliest double eagle date for which overseas hoards have revealed significant amounts of Mint State coins."

Still a relatively scarce date in Uncirculated condition, this example displays intense, frosty mint luster and pale pink-gold toning. A moderately abraded appearance on the obverse limits the grade. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 269Z, PCGS# 8951

**5523 1868-S XF45 PCGS.** This attractive Choice XF specimen shows a few scratches in the lower-left obverse field but only light wear shows on the design elements and the greenish-gold surfaces retain traces of original mint luster. NGC ID# 26A4, PCGS# 8954

**1868-S Twenty Dollar, AU55**  
**An Attractive, Collectible Example**

**5524 1868-S AU55 NGC. CAC.** Despite a hefty original mintage of 837,500 coins, this San Francisco Mint issue is rare in Mint State. Consequently, many collectors seek out a much less costly AU example such as this one.

The design motifs are generally well-detailed, save for slight weakness on some of the obverse stars and reverse peripheral legends. Minor abrasions are noted, as expected for a briefly circulated gold coin.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26A4, PCGS# 8954*

**5525 1870-S AU55 NGC.** Pale golden surfaces remain brightly lustrous despite a touch of rub. The peripheries are lightly abraded like the centers but also show elements of honey-gold and peach.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26A9, PCGS# 8959*

**1870-S Double Eagle, AU58**  
**Lustrous and High-End**

**5526 1870-S AU58 NGC.** According to Jeff Garrett and Ron Guth, this issue was heavily circulated, exported and destroyed. They describe the 1870-S double eagle as "very rare in Mint State."

This AU58 example is lustrous, well-struck, and high-end for the grade. Distributed small to moderate marks are consistent with a brief stint in circulation.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26A9, PCGS# 8959*

**5527 1873-S Closed 3 MS60 NGC.** Softly struck, particularly on the uppermost stars, but with no trace of wear on its moderately abraded yellow-gold surfaces. An unusual Mint State Type Two twenty. NGC ID# 26AL, PCGS# 8969

**5528 1873-S Closed 3 MS60 PCGS.** Small S. The issue is often softly struck and heavily abraded — as is this example, although not as much as some might be. Strong mint luster with reddish-gold highlights confirm the MS60 grade. Despite more than 1 million pieces produced, this San Francisco date is scarce even in low Uncirculated grades. NGC ID# 26AL, PCGS# 8969

**1874 Twenty Dollar, MS60**  
**Conditionally Scarce**

**5529 1874 MS60 PCGS. CAC.** The 1874 double issue is not a rare date, but it is elusive in Mint State. This highly lustrous coin exhibits lovely yellow-gold toning, with intermingled accents of peach-rose coloration in the fields. It is moderately marked, as expected for the grade. Encapsulated in a green label PCGS holder.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AN, PCGS# 8970*

**1874-CC Liberty Twenty, XF40**

**5530 1874-CC XF40 PCGS. Variety 1-A.** The vivid greenish-gold surfaces of this pleasing XF example display the expected number of minor abrasions for the grade and the design elements show moderate wear on Liberty's Hair and coronet, but much interior detail remains intact.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AP, PCGS# 8971*

**1874-CC Liberty Twenty, XF45**  
**Nice Color and Luster**

**5531 1874-CC XF45 ANACS. Variety 1-A.** Production of double eagles increased dramatically at the Carson City Mint in 1874, with a large mintage of 115,085 pieces. This Choice XF specimen displays vivid greenish-gold surfaces that retain much of their original mint luster and show the expected number of minor contact marks for the grade.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AP, PCGS# 8971*

**5532 1874-S — Improperly Cleaned — NGC Details. Unc.** Broad S. Softly struck, as often seen, but with no trace of wear. Gold-orange surfaces retain considerable cartwheel luster despite a cleaning and moderate abrasions.

- 5533 1875-CC VF30 NGC. Variety 4-A.** A honey-gold twenty dollar piece from the Carson City Mint, which still stands today at 600 North Carson Street. The portrait shows wear but luster accompanies the legends. Abrasions correlate to the grade though we note a few marks near the crest of the right (facing) wing. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AT, PCGS# 8974

**1875-CC Double Eagle, XF40  
Popular Mintmark Type Issue**

- 5534 1875-CC XF40 PCGS. CAC. Variety 2-A.** With a mintage of 111,151 pieces, the 1875-CC is the most available Carson City double eagle of the decade and a favorite choice of type collectors. This lightly circulated orange-gold specimen shows traces of prooflike reflectivity around the devices. Housed in a green label holder. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AT, PCGS# 8974

**1875-CC Twenty Dollar, XF45  
An Attractive, Affordable Example**

- 5535 1875-CC XF45 NGC. Variety 7-A.** This Carson City issue is readily available in all grades, through the lower Mint State levels, making it an affordable Type Two for many collectors. The current Choice XF example shows yellow-gold surfaces that are moderately abraded and lightly worn on the high points. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AT, PCGS# 8974

**1875-CC Double Eagle, Choice XF  
Popular Carson City Type Coin**

- 5536 1875-CC XF45 ANACS. Variety 2-A.** Considerable luster remains in yellow-gold fields with apricot and orange elements. Lightly rubbed with scattered minor abrasions and a deeper dig in the right reverse field. Housed in a small-format ANACS holder. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AT, PCGS# 8974

- 5537 1876 MS61 NGC. Heavy Motto.** A well struck sea-green and butter-gold Centennial-year twenty that boasts refreshingly unmarked surfaces. Both sides display cartwheel luster. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AV, PCGS# 8976

**1876 Double Eagle, MS62  
Lustrous and Appealing**

- 5538 1876 MS62 PCGS. Heavy Motto.** This lovely, intensely lustrous specimen displays light yellow-gold and rose toning, with few marks noted on either obverse or reverse. With sharply struck design elements also seen, we must opine that this piece seems conservatively graded (although we cannot guarantee future grading results.) NGC ID# 26AV, PCGS# 8976

- 5539 1876-CC XF40 NGC. Variety 3-A.** An original peach-gold Carson City type coin. Traces of luster emerge from design elements, and marks are minor for the XF level. Minor struck-in grease (as coined) is noted between the arrowheads and the lower right shield border. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AW, PCGS# 8977

**1876-CC Double Eagle, XF45  
Variety 1-A**

- 5540 1876-CC XF45 NGC. Variety 1-A.** The Carson City Mint made use of six obverse dies and four reverse dies to produce 138,441 double eagles from nine combinations of those dies. This Choice XF example has satin surfaces with hints of luster. Scattered grade-consistent marks are evident on both sides. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26AW, PCGS# 8977

**1876-CC Double Eagle, AU50  
High-Mintage Centennial Issue**

- 5541 1876-CC AU50 NGC. Variety 1-A.** This attractive Carson City double eagle shows lightly abraded yellow and orange-gold surfaces, with a typical number of abrasions for the grade and bright mint luster on both sides. The 1876-CC was struck in large numbers during the nation's centennial year.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AW, PCGS# 8977*

**1876-CC Double Eagle, AU53  
Heavily Exported Issue**

- 5542 1876-CC AU53 NGC. Variety 1-A.** The 1876-CC Liberty double eagle claims a series-record mintage of 138,441 pieces, but the issue was heavily exported and the coins that remained in the United States circulated widely in the regional economy. As a result, the 1876-CC is seldom encountered in high grade. This lustrous greenish-gold example is lightly marked and shows just a trace of wear on the design elements.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AW, PCGS# 8977*

- 5543 1876-S AU58 PCGS.** The last San Francisco Type Two double eagle issue, represented by a near-Mint example retaining bold yellow-orange luster. Small and generally wispy marks are scattered on each side. NGC ID# 26AX, PCGS# 8978

- 5544 1877 MS61 NGC.** This well-detailed Mint State example shows just a touch of softness on the obverse stars. The obverse is brightly lustrous, while the reverse shows prooflike reflectivity in many areas.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AY, PCGS# 8982*

- 5545 1877 MS61 NGC.** An exceptional example of the first-year-of-issue Type Three Liberty double eagle, this Mint State example has myriad grade-consistent marks on its lustrous pinkish yellow-gold surfaces. NGC ID# 26AY, PCGS# 8982

- 5546 1877-CC XF40 NGC. Variety 3-A.** A wheat-gold double eagle from the famous Old West Carson City Mint. Luster fills the legends and visits other protected areas. The obverse has a small rim ding at 11 o'clock but the remainder of the coin is minimally marked for the grade.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26AZ, PCGS# 8983*

- 5547 1877-S MS61 NGC.** The design elements of this impressive Mint State piece are sharply rendered but the lustrous surfaces show a number of grade-consistent contact marks on both sides.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26B2, PCGS# 8984*

- 5548 1878 MS61 NGC.** The reverse is lightly die doubled, strongest on PLURIBUS. This is a sharply defined, orange-gold example with a few small abrasions scattered about and several tiny alloy spots.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26B3, PCGS# 8985*

- 5549 1878-CC — Improperly Cleaned — NGC Details. XF. Variety 1-A.** The usually encountered marriage, noteworthy for its wide CC mintmark and a bold mint-made die line on the center of Liberty's neck. The obverse displays fine parallel hairlines and the reverse is mildly glossy. Bagmarks are inconsequential despite moderate circulation.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26B4, PCGS# 8986*

- 5550 1879 MS61 NGC.** Wheat-gold and apricot are the major hues on this broadly lustrous Type Three double eagle. The obverse has a number of choppy marks, though the reverse offers a cleaner appearance. NGC ID# 26B6, PCGS# 8988

**1879-CC Liberty Twenty, XF45  
Lightly Abraded Antique-Gold Surfaces**

- 5551 1879-CC XF45 NGC. Variety 1-A.** The early die state with full tail feathers. The 1879-CC Liberty double eagle claims a mintage of just 10,708 pieces and the surviving population numbers 300-350 pieces in all grades. This Choice XF specimen exhibits some wear on Liberty's hair and coronet, but most interior detail remains intact. The lightly abraded antique-gold surfaces retain traces of original mint luster.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26B7, PCGS# 8989*

**1882-CC Twenty, Bright XF45**

- 5552 1882-CC XF45 PCGS Secure. Variety 1-B.** Even though only 39,140 pieces were struck of this CC double eagle, it is one of the more available CC issues from the 1880s. The surfaces on this example are bright and mostly glowing yellow-gold, but the devices and margins are trimmed with deep reddish-gold accents. Minimally abraded. NGC ID# 26BF, PCGS# 8997

- 5553 1883-CC XF40 NGC. Variety 2-A.** A peach-gold Carson City twenty with a nice strike and plentiful luster for the XF40 level. Marks are moderate, though we note an inconspicuous cluster between star 5 and the forehead.  
*Ex: St. Louis Central States (Heritage, 5/2003), lot 7437.  
From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BH, PCGS# 8999*

---

1883-CC Liberty Double Eagle, XF45

- 5554** 1883-CC XF45 NGC. **Variety 2-A.** The design elements were strongly impressed and most of Liberty's hairlines are visible but some wear shows on the top of her coronet. The pleasing yellow and greenish-gold surfaces are lightly abraded and retain much of their original mint luster.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BH, PCGS# 8999*

---

1883-CC Double Eagle, AU53  
Lustrous, Colorful Surfaces

- 5555** 1883-CC AU53 NGC. **Variety 2-A.** Ex: Dr. Anderson Nevada Collection. The 1883-CC Liberty double eagle is reasonably available in high grade, making it a popular issue with mintmark type collectors. This well-struck greenish-gold example shows a touch of wear but the lustrous surfaces are remarkably free of large or distracting abrasions.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BH, PCGS# 8999*

---

- 5556** 1883-S MS61 PCGS. Tall S. The vivid orange-gold surfaces of this attractive Liberty double eagle are brightly lustrous and show a few hints of lilac. The design elements are well-detailed and only minor contact marks are evident. NGC ID# 26BJ, PCGS# 9000
- 

1884-CC Double Eagle, XF45  
Variety 1-A

- 5557** 1884-CC XF45 NGC. **Variety 1-A.** The Carson City Mint coined 81,139 double eagles in 1884. However, only one die pair is recorded in the literature. The possibility of a second variety certainly exists. This example retains traces of luster on its honey-gold surfaces with light wear on the high points, and scattered but trivial marks as expected.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BK, PCGS# 9001*

---

---

1884-CC Double Eagle, AU53  
Favorite Type Three Issue

- 5558** 1884-CC AU53 NGC. **Variety 1-A.** The 1884-CC Liberty double eagle is an available Type Three issue and a popular choice with mintmark type collectors. This brightly lustrous yellow and orange-gold specimen shows a touch of wear on the hair and coronet and the surfaces show a moderate number of minor abrasions for the grade. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BK, PCGS# 9001*
- 

1884-CC Double Eagle, AU58  
Lustrous and Colorful

- 5559** 1884-CC AU58 NGC. **Variety 1-A.** A sharply detailed near-Mint representative that shows just a trace of wear on the design elements, with vibrant mint luster and vivid orange-gold surfaces that reveal a few minor abrasions on both sides. The 1884-CC is an available date and often trades as a type coin. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BK, PCGS# 9001*
- 

- 5560** 1885-CC — Improperly Cleaned — NGC Details. **XF. Variety 1-A.** A moderately circulated example of this better CC-mint issue. The portrait and left obverse field are thickly hairlined, and we note a cluster of thin marks beneath the left (facing) wing. 1885 coinage at Carson City abruptly ended shortly after Grover Cleveland's inauguration. Only 9,450 pieces were struck. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

- 5561** 1888-S MS62 PCGS. **CAC.** The design elements of this attractive MS62 example are sharply detailed throughout and the greenish-gold surfaces radiate vibrant mint luster with traces of prooflike reflectivity in some areas. NGC ID# 26BU, PCGS# 9009

- 5562** 1889-CC VF30 NGC. **Variety 1-A.** A lower mintage Carson City issue. The present peach-tinged twenty exhibits wear on Liberty's hair but noticeable luster lingers in recesses. Abrasions are unobtrusive aside from a cluster of thin marks beneath the beak. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BV, PCGS# 9011*
-

**1889-CC Twenty Dollar, XF40  
Rich Orange-Gold Color**

- 5563 1889-CC XF40 NGC. Variety 1-A.** This interesting CC twenty shows a thin line of die doubling along the bottom of Liberty's ear. The orange-gold surfaces are peppered with numerous abrasions, but the only ones worthy of individual mention are two across the nose of Liberty and a milling mark above the left (facing) wing of the eagle.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BV, PCGS# 9011*

**1889-CC Liberty Twenty, AU58  
Attractive Color and Luster**

- 5564 1889-CC AU58 NGC. Variety 1-A.** Brightly lustrous and sharply detailed, this attractive near-Mint specimen displays lightly abraded orange and greenish-gold surfaces that show a few hints of rose. A scratch on Liberty's cheek is the only mark of note and eye appeal is outstanding.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BV, PCGS# 9011*

- 5565 1889-S MS62+ PCGS.** Distinctly reflective in the fields with sharp detail on the central devices. Lightly patinated yellow-gold with a shallow but long scuff to the left of Liberty's profile. NGC ID# 26BW, PCGS# 9012

**1889-S Twenty Dollar, MS62+  
Lustrous and Attractive**

- 5566 1889-S MS62+ PCGS. CAC.** Although not rare in Mint State, examples grading any finer than Select Mint State are elusive. The current MS62+ specimen displays vibrant mint frost and lovely light coloration. This piece should appeal to the collector of special eye appeal, despite a couple of moderate marks that appear in the outer field areas on the obverse. NGC ID# 26BW, PCGS# 9012

- 5567 1890-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** This khaki-gold Carson City type coin is only lightly cleaned. Remaining luster is substantial. Marks are minor except northwest of the arrows. A fairly early die state with full tail feathers. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**1890-CC Double Eagle, AU50  
Lustrous Greenish-Gold Surfaces**

- 5568 1890-CC AU50 NGC. Variety 1-A.** The design elements of this attractive AU specimen retain almost all of their original detail and the lightly abraded greenish-gold surfaces remain brightly lustrous, with minimal abrasions for the grade.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BY, PCGS# 9014*

**1890-CC Double Eagle, AU53**

- 5569 1890-CC AU53 NGC. Variety 1-A.** The 1890-CC Liberty double eagle was a well-struck issue and this coin shows just a trace of wear on the typically well-detailed design elements. The lustrous greenish-gold surfaces are lightly abraded and eye appeal is strong for the grade.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BY, PCGS# 9014*

**1890-CC Liberty Double Eagle, AU53  
Lightly Circulated Lustrous Example**

- 5570 1890-CC AU53 NGC. Variety 1-A.** From a substantial mintage of 91,209 pieces, the availability of the 1890-CC double eagle has increased in recent times due to its presence in some foreign holdings. This lightly circulated orange and greenish-gold specimen retains most of its original luster and design detail, with outstanding eye appeal for the issue.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation. NGC ID# 26BY, PCGS# 9014*

**1890-CC Double Eagle, AU55  
Later Die State**

- 5571 1890-CC AU55 NGC. Variety 1-A.** This later die state shows overzealous die lapping on the reverse that has affected some of the right-side tail feathers. Each side is primarily yellow-gold with a slight accent of reddish patina. Generally lightly abraded, the only exceptions are a single mark in the left and right obverse fields. NGC ID# 26BY, PCGS# 9014

**1890-CC Liberty Twenty, AU55  
Lightly Abraded Greenish-Gold Surfaces**

- 5572 1890-CC AU55 NGC. Variety 1-A.** The 1890-CC Liberty double eagle is one of those issues whose availability has increased in recent years due to its presence in foreign hoards. This Choice AU example displays lightly abraded greenish-gold surfaces that show vibrant mint luster and strong eye appeal for the grade. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26BY, PCGS# 9014

**1891-CC Liberty Double Eagle, XF45  
Partially Prooflike Surfaces**

- 5573 1891-CC XF45 NGC. Variety 1-A** The 1891-CC Liberty double eagle claims the second-lowest mintage of the series at a meager 5,000 pieces. This Choice XF specimen displays the high number of abrasions always seen on this issue and the greenish-gold surfaces show prooflike reflectivity in sheltered areas. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26C3, PCGS# 9017
- 5574 1892-CC XF40 NGC. Variety 1-A.** A green-gold example of the low mintage penultimate Carson City issue. Luster fills design crevices. Small marks are distributed but fewer than expected for the XF40 level. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26C6, PCGS# 9020

- 5575 1894 MS63 NGC.** This impressive Select specimen exhibits well-detailed design elements and the pleasing orange and rose-gold surfaces are brightly lustrous, with some scattered minor contact marks. NGC ID# 26CB, PCGS# 9025

- 5576 1894-S MS63 NGC.** An important condition rarity in higher grades, this Select Mint State piece represents the optimum collecting grade; an attractive coin at an affordable price. This brilliant piece has lustrous yellow-gold surfaces with traces of orange overtones. NGC ID# 26CC, PCGS# 9026

- 5577 1894-S MS62 Prooflike NGC.** Powerful yellow-gold reflectivity enhances the eye appeal of this MS62 Prooflike coin. Moderately abraded but with considerable eye appeal for the grade. Census: 10 in 62 Prooflike, 1 finer (1/14). PCGS# 79026

- 5578 1895 MS64 NGC.** an Attractive 1895 Liberty double eagle with sharply detailed design elements and lightly marked peach-gold surfaces that radiate vibrant mint luster. NGC has graded nine numerically finer examples (1/14). NGC ID# 26CD, PCGS# 9027

- 5579 1895 MS64 NGC.** The vivid orange-gold surfaces of this sharply detailed Choice example radiate vibrant mint luster and show only minor signs of contact. NGC has graded nine numerically finer examples (1/14). NGC ID# 26CD, PCGS# 9027

- 5580 1895-S MS63 PCGS. CAC.** An impressive Liberty double eagle, this Select Mint State piece has fully brilliant and lustrous yellow-gold surfaces with delicate bluish overtones. NGC ID# 26CE, PCGS# 9028

- 5581 1898 MS62 NGC.** This attractive Liberty double eagle displays well-detailed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces show the expected number of minor contact marks. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26CK, PCGS# 9033

- 5582 1899 MS64 PCGS. CAC.** Few 1899 double eagles are seen above the near-Gem level represented by this coin. Thick mint frost covers apricot-gold surfaces, the frost appearing and disappearing depending on rotation of the coin under light. The surfaces of the are mostly unabraded. A bold strike and cartwheel luster reside beneath the frost. NGC ID# 26CM, PCGS# 9035

- 5583 1900 MS64+ NGC. CAC.** Satiny peach-apricot surfaces offer generous eye appeal. Both sides have excellent detail and this coin would rank as a Gem if not for a handful of shallow luster scrapes on the obverse. NGC ID# 26CP, PCGS# 9037

**1902-S Double Eagle, MS63  
Lustrous With Splendid Eye Appeal**

- 5584 1902-S MS63 NGC.** According to Bowers' *Guide Book of Double Eagle Gold Coins*: "The 1902-S is abundant in AU through MS-63 grades thanks to massive imports, most of which occurred since the mid-1990s. The typical coin encountered is very attractive."

This example matches Bowers' general description for the issue, and its splendid eye appeal is undeniable. The strike definition is full and crisp throughout, and radiant mint luster complements the lightly marked surfaces. This piece would be an excellent choice for the type collector, as finer-graded specimens are both scarce and costly. NGC ID# 26CV, PCGS# 9042

**5585 1903 MS64 PCGS.** The central design elements of this attractive Choice specimen are sharply detailed, but a touch of softness shows on the obverse stars. The green and orange-gold surfaces are brightly lustrous and well-preserved. NGC ID# 26CW, PCGS# 9043

**1903 Double Eagle, MS65  
Exceptional Eye Appeal**

**5586 1903 MS65 PCGS.** This splendid Gem displays much finer-than-average eye appeal, even for the MS65 grade level. The intensely lustrous orange-gold surfaces are imbued with delightful accents of peach and rose toning. The motifs are fully struck, and both sides are beautifully preserved and free of distracting marks. Only three coins are graded higher at PCGS (1/14). NGC ID# 26CW, PCGS# 9043

**5587 1903 MS65 NGC.** The design elements of this attractive Gem are sharply detailed and the well-preserved peach-gold surfaces radiate vibrant mint luster. NGC has graded nine numerically finer examples (1/14). NGC ID# 26CW, PCGS# 9043

**1903-S Liberty Twenty, MS64  
Vibrant Luster and Vivid Color**

**5588 1903-S MS64 PCGS.** Despite a reported mintage of nearly 1 million pieces, the 1903-S Liberty double eagle is rare in grades above the MS64 level. This delightful Choice example exhibits well-detailed design elements and vibrant mint luster, with lightly marked peach-gold surfaces. PCGS has graded 13 numerically finer examples (1/14). NGC ID# 26CX, PCGS# 9044

**5589 1904 MS64 PCGS.** This lemon-gold Liberty twenty type coin exhibits vibrant luster and has a bold strike. The obverse displays faint marks while the reverse has outstanding preservation. Housed in a green label holder. NGC ID# 26CY, PCGS# 9045

**5590 1904 MS64+ PCGS.** The design elements of this high-end Choice example are sharply detailed in most areas, but some softness shows on the obverse stars. The vivid peach-gold surfaces radiate vibrant mint luster. NGC ID# 26CY, PCGS# 9045

**5591 1904 MS65 NGC.** Brilliant and unabraded, this lustrous 1904 double eagle is a logical choice for type and a splendid Gem example of the With Motto twenty. Olive highlights enhance the apricot-gold surfaces. The coin is fully struck and essentially without any distractions. NGC ID# 26CY, PCGS# 9045

**5592 1904 MS65+ NGC.** Always a top selection for type, this Gem example with the important Plus designation from NGC is brilliant, lustrous, and fully struck. Smooth, clean surfaces display honey-gold color and cartwheel flash. Only a few outlying abrasions exist and limit this attractive double eagle from an even higher grade. NGC ID# 26CY, PCGS# 9045

**5593 1904 MS65+ NGC.** The most common date in the series, this 1904 double eagle is remarkably unmarked and lustrous, with smooth fields and devices. The rich, gold surfaces reveal lilac highlights amid the cartwheel luster. This fully struck example received NGC's Plus designation for quality and exceptional appeal. NGC ID# 26CY, PCGS# 9045

**5594 1904 MS62 Prooflike NGC. CAC.** Clearly reflective on both sides of this wheat-gold example. Moderately abraded but appealing thanks to its flash and a solid type coin. PCGS# 79045

**5595 1907 MS64 NGC.** A sharply detailed Choice example of this final-date type coin, with vibrant mint luster and lightly marked peach-gold surfaces. NGC has graded 18 numerically finer examples (1/14). NGC ID# 26D7, PCGS# 9052

**SAINT-GAUDENS DOUBLE EAGLES**

**5596 1907 Arabic Numerals MS62 NGC.** A lovely MS62 specimen of this first-year type issue, with well-detailed design elements and lustrous orange-gold surfaces that show a scattering of minor contact marks. NGC ID# 26F5, PCGS# 9141

**5597 1907 Arabic Numerals MS64 PCGS.** An impressive Choice Mint State 1907 double eagle, this modified Saint-Gaudens design has hints of blue toning on the high points, with frosty orange-gold luster elsewhere. NGC ID# 26F5, PCGS# 9141

**5598 1908 No Motto MS65 NGC.** Long Rays obverse. This lemon-gold Gem exhibits dynamic luster and is well struck except on UNITED and the leg feathers of the eagle. A loupe reveals only a couple of unimportant abrasions. Encapsulated in a prior generation holder. NGC ID# 26F6, PCGS# 9142

**1908 No Motto Double Eagle, MS66  
Exquisite Eye Appeal**

**5599 1908 No Motto MS66 PCGS.** This outstanding Premium Gem displays exuberant mint frost and exquisite light toning. Numerous examples exist in this grade level, at both of the major services, but not many will be able match or exceed this exquisite specimen in terms of stunning eye appeal. NGC ID# 26F6, PCGS# 9142

**5600 1908 Motto MS63+ PCGS.** Pale yellow-gold with a stronger cartwheel effect on the reverse. Well-defined overall and smooth for the grade aside from a long stuttering mark to the right of Liberty's head. NGC ID# 26F8, PCGS# 9147

**5601 1908 Motto MS63+ PCGS.** Fresh as if just leaving the Mint, this first-year Motto twenty is a perfect yellow-gold color and displays a full strike. Exceptional mint luster prevails. Only minor abrasions — none significant — prevent an even higher grade. NGC ID# 26F8, PCGS# 9147

- 5602 1908 Motto MS63+ PCGS.** Mint-fresh luster and a bold strike make this 1908 Motto an excellent candidate for any collection. A few minor abrasions are scattered here and there, but none detract from the appearance of this Select Uncirculated twenty with the Plus designation from PCGS. NGC ID# 26F8, PCGS# 9147
- 5603 1908 Motto MS63+ PCGS.** This Select Uncirculated example earned the Plus designation from PCGS for its outstanding color, luster, bold strike, and eye appeal. A higher grade seems possible since the abrasions are minimal and there are no other distractions. The 1908 Motto is a first-year type and popular for that reason. NGC ID# 26F8, PCGS# 9147
- 5604 1908-D Motto MS64+ PCGS.** This high-end Choice example represents the lower-mintage design with the motto IN GOD WE TRUST. Sharply detailed and lustrous, with well-preserved orange-gold surfaces. NGC ID# 26F9, PCGS# 9148
- 5605 1908-D Motto MS64+ NGC.** A high-end Choice example of this popular type coin, with sharply detailed design elements and vibrant mint luster. The pleasing yellow and rose-gold surfaces show no mentionable distractions. NGC ID# 26F9, PCGS# 9148
- 5606 1908-D Motto MS64 PCGS. CAC.** An intricately struck and lustrous orange-gold near-Gem. Abrasions are inconsequential aside from a slender vertical mark above the eagle's breast. Certified in an old green label holder. NGC ID# 26F9, PCGS# 9148
- 5607 1908-S — Scratch — PCGS Genuine. AU Details.** While a long, thin scratch affects the left obverse field, it is not immediately visible at most angles. Lustrous gold-orange surfaces are rubbed on the high points. One of just 22,000 examples struck. NGC ID# 26FA, PCGS# 9149

**1908-S Saint-Gaudens Twenty, AU55  
Scarce San Francisco Issue**

- 5608 1908-S AU55 NGC.** Unlike many other dates in the series, which were heavily melted after the Gold Recall of 1933, the 1908-S Saint-Gaudens double eagle is a scarce issue because of its low mintage. This Choice AU specimen is lightly worn, with reddish-gold surfaces that show the expected number of contact marks. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26FA, PCGS# 9149
- 5609 1909/8 MS61 NGC. FS-301.** As the only recognized overdate of the Saint-Gaudens series, the 1909/8 enjoys considerable popularity. This yellow-orange representative has few obvious marks, though discoloration is noted at the knee. NGC ID# 26FC, PCGS# 9151
- 5610 1911-D MS65 NGC.** As one of the more plentiful issues from the early years of the Saint-Gaudens' design, the 1911-D is popular with type collectors. This Gem displays the usual granular surfaces with satiny mint luster and even orange-gold color. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26FK, PCGS# 9158
- 5611 1911-D MS65 PCGS. CAC.** A splendid Gem, this Denver Mint Saint-Gaudens double eagle has frosty luster and bold design motifs with brilliant orange-gold surfaces and traces of pale blue overtones. NGC ID# 26FK, PCGS# 9158

- 5612 1911-D/D MS64 PCGS. FS-501.** Primarily apricot-gold surfaces have a few variations toward honey and wheat. This repunched mintmark near-Gem has ample luster and eye appeal to match. PCGS# 145010
- 5613 1911-D/D MS65 PCGS. FS-501.** The mintmark is strongly repunched due east. A thoroughly lustrous orange-gold Gem. The strike is sharp and marks are minimal. Final year of the 46-star obverse subtype, due to the 1912 admission of New Mexico and Arizona to the Union. PCGS# 145010

**1913 Saint-Gaudens Double Eagle, MS63  
Low-Mintage Early Series Issue**

- 5614 1913 MS63 NGC. CAC.** This attractive Select double eagle exhibits just a touch of wear on the high points of the well-detailed design elements and the lustrous yellow and rose-gold surfaces show some well-scattered minor contact marks. From a mintage of 168,780 pieces, the 1913 Saint-Gaudens twenty is a scarce issue in high grade. NGC ID# 26FN, PCGS# 9161
- 5615 1913-D MS64 NGC.** This near-Gem shows much brighter, vibrant mint luster than one would expect from a Denver product. The surfaces are minimally marked and show even orange-gold color. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26FF, PCGS# 9162

**1913-S Saint-Gaudens Double Eagle, MS63  
Low-Mintage S-Mint Issue**

- 5616 1913-S MS63 PCGS.** Always popular because of its low mintage of only 34,000 pieces. However, examples are more frequently encountered than the mintage would suggest. This is a sharply struck coin that has thick, satiny mint luster and light reddish patina. There are no mentionable abrasions on either side. NGC ID# 26FR, PCGS# 9163
- 5617 1915 MS63 PCGS.** A pleasing lemon-gold double eagle that boasts strong luster and an equally strong strike. A small spot is noted beneath the T in LIBERTY. The final pre-war Philadelphia issue, the 1915 has a fairly low mintage. Certified in a first generation holder. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26FV, PCGS# 9167
- 5618 1915 MS63 PCGS.** The vivid orange-gold surfaces of this well-detailed Select specimen exhibit vibrant mint luster and show a scattering of minor contact marks, none worthy of individual notice. *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 26FV, PCGS# 9167

**1922 Saint-Gaudens Twenty, MS65  
Conditionally Rare in Higher Grades**

- 5619 1922 MS65 NGC.** Generous luster prevails over peach-gold surfaces on this untroubled Gem Saint-Gaudens, a well-struck and relatively unmarked piece. The 1922 double eagle is among the most available in the entire series, leading to its frequent selection for type coin purposes. A great-looking coin. NGC has graded eight numerically finer examples (1/14). NGC ID# 26G3, PCGS# 9173

**1923 Twenty Dollar, MS65  
Lustrous Better-Date Issue**

- 5620 1923 MS65 PCGS.** The 1923 double eagle is a better-date issue in Gem grade, struck to the extent of only 566,000 pieces. This MS65 PCGS-certified example shows great luster and a paucity of mentionable marks on each side, making it an excellent representative of the issue. The surfaces are sharply struck throughout, and a couple of small die cracks run through LIBERTY on the upper obverse. PCGS has seen only three submissions numerically finer (1/14). NGC ID# 26G5, PCGS# 9175

- 5621 1923-D MS65 NGC.** The 1923-D Saint-Gaudens double eagle is a plentiful issue in high grade and a popular choice with mintmark type collectors. This spectacular Gem is sharply detailed and brightly lustrous, with well-preserved yellow-gold surfaces. NGC ID# 26G6, PCGS# 9176

- 5622 1923-D MS65+ NGC.** A renowned issue for full strikes and eye appeal, this 1923 Denver date is a favorite with type and series collectors alike. A few tiny bagmarks are hidden on the surfaces, but the brilliant luster and outstanding toning are complemented by a bold strike. Wonderful toning hues of orange-gold, lilac, and red-gold are framed by a touch of olive-green at the rims. This Gem was awarded the Plus designation by NGC. NGC ID# 26G6, PCGS# 9176

- 5623 1923-D MS66+ PCGS.** The 1923-D Saint-Gaudens double eagle becomes very scarce at the MS67 level, making this sharply detailed high-end Premium Gem a good balance of quality and value. The well-preserved yellow and rose-gold surfaces radiate vibrant mint luster. NGC ID# 26G6, PCGS# 9176

- 5624 1924 MS65 NGC.** A bold strike and very few marks characterize this Gem double eagle. Bright mint luster radiates from the frosted surfaces. With more than 400,000 pieces graded by the major services, in excess of 80,000 pieces are certified in MS65 condition or better, which is why this issue is the perennial favorite with type collectors. NGC ID# 26G7, PCGS# 9177

- 5625 1924 MS66 NGC.** Generous satiny luster with a hint of patina and few marks. The color on this Premium Gem type coin ranges from wheat-gold to orange depending on the angle to the light. NGC ID# 26G7, PCGS# 9177

**1924-D Saint-Gaudens Twenty, Unc Details**

- 5626 1924-D — Improperly Cleaned — NGC Details. Unc.** The 1924-D Saint-Gaudens double eagle was once a great rarity despite a mintage of more than 3 million pieces. The issue is more plentiful today. This sharply detailed example offers bright yellow-gold surfaces with few signs of contact, but with an unnatural sheen that indicates a light cleaning in the past.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

- 5627 1925-S — Cleaning — PCGS Genuine. AU Details.** An uncommon opportunity to own a more accessible example of the mass-melted 1925-S double eagle. Lightly rubbed surfaces are too pale yellow-gold with a strange brightness from cleaning. Still, an important piece. NGC ID# 26GC, PCGS# 9182

- 5628 1926 MS65 PCGS.** A sharply detailed Gem, with radiant mint luster on both sides and vivid orange-gold surfaces that show few signs of contact. The 1926 Saint-Gaudens double eagle is an ideal type coin for the series. NGC ID# 26GD, PCGS# 9183

- 5629 1926 MS65 PCGS.** Rich pumpkin-orange and brass-gold colors compete for territory on the radiantly lustrous surfaces of this magnificent Gem. These attributes are complemented by sharply struck devices and minimally abraded surfaces. NGC ID# 26GD, PCGS# 9183

**1926-S Double Eagle, Unc Details  
Popular Mintmark Type Coin**

- 5630 1926-S — Improperly Cleaned — NGC Details. Unc.** The 1926-S is a popular mintmark type coin from a mintage of more than 2 million pieces. This well-detailed orange-gold example displays smooth lightly marked surfaces that show some evidence of a prior cleaning.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

- 5631 1927 MS65 PCGS.** Olive-green dominates though peach-red fills recesses portions of the motifs. This highly lustrous Gem has a bold strike and good eye appeal. Visible marks are confined to the sun. Housed in a first generation holder. NGC ID# 26GG, PCGS# 9186

- 5632 1927 MS65 PCGS.** Pale yellow interiors with gold-orange elements through the peripheries. A great Gem example of one of the most popular type issues of the series. NGC ID# 26GG, PCGS# 9186

- 5633 1927 MS65 PCGS. CAC.** Olive-green and apricot-gold patina graces fully struck and exceptionally preserved surfaces. The 1927 is plentiful in Uncirculated grades but a supermajority of the issue is considerably more bagmarked than the present piece. Housed in a green label holder. NGC ID# 26GG, PCGS# 9186

- 5634 1927 MS66 PCGS.** Yellow-gold overall with a subtly frosted character. Liberty's torch hand is a trifle soft, though the top of the torch itself is clearer than usual. NGC ID# 26GG, PCGS# 9186
- 5635 1927 MS66 PCGS.** This sharply detailed Premium Gem would make an ideal type coin to represent the Saint-Gaudens design. The well-preserved greenish-gold surfaces display especially vibrant mint luster with no mentionable distractions. PCGS has graded 14 numerically finer examples (1/14). NGC ID# 26GG, PCGS# 9186

## TERRITORIAL GOLD

**1861 K-5 Quarter Eagle, AU58  
Clark, Gruber & Co.**

- 5636 1861 Clark, Gruber & Co. Quarter Eagle AU58 NGC. K-5, R.4.** Colorado was part of the unofficial Jefferson Territory. Kansas was the other part and was admitted to the Union in 1861. A concerted movement in Congress made sure that the remainder of Jefferson Territory, i.e., Colorado, and its vast mineral resources, would remain in the Union. Similar to California 13 years earlier, the monetary needs of the new territory outstripped the government's resources to convert raw bullion into coinage. As a result, private industry stepped in temporarily in the firms of Conway & Co. and Clark, Gruber. 1861 was the most productive year for Clark, Gruber with more than a half million dollars of coinage placed in circulation. Because the needs for commerce were so great, quarter eagles, such as this piece, are seldom seen in such a superior state of preservation. The centers of each side are a bit softly struck, as always, with noticeable traces of mint luster surrounding the devices. The basic green gold color of the planchet has taken on a light overlay of reddish patina, and there are no distracting abrasions on either side. Census: 22 in 58, 25 finer (1/14). PCGS# 10139

**1852 U.S. Assay Office Ten, AU53  
Popular K-12a Variety**

- 5637 1852 Assay Office Ten Dollar AU53 NGC. K-12a, R.4.** The O in OFFICE is located under the N in UNITED, identifying the K-12a variety. The U.S. Assay Office was the successor to Moffat & Co., with Curtis, Perry, and Ward as the chief partners, after Moffat retired. Faint traces of green and pale orange color appear on the yellow-gold surfaces of this still lustrous example. Listed on page 383 of the 2014 *Guide Book*. PCGS# 10001

**1850 Moffat & Co. Five Dollar, VF20  
K-7, Small Eagle Variety**

- 5638 1850 Moffat & Co. Five Dollar VF20 PCGS. K-7, R.4.** Thin arrowheads are separated on this Small Eagle variant, with a berry positioned over the FI in FIVE. Traces of pale orange and green color appear on the light yellow-gold surfaces of this moderately worn but attractive example. Listed on page 380 of the 2014 *Guide Book*. PCGS# 10243

## CALIFORNIA FRACTIONAL GOLD

**1853 BG-421 Fractional, MS66  
Round Liberty 50 Cents**

- 5639 1853 Liberty Round 50 Cents, BG-421, R.4, MS66 NGC.** This amazing Premium Gem is the only MS66 that has been certified at either NGC or PCGS, and it is the single finest certified example (1/14). Both sides feature bold design definition and brilliant yellow-gold surfaces with frosty luster. PCGS# 10457
- 5640 1859 Liberty Octagonal 25 Cents, BG-702, R.3, MS65 Prooflike NGC.** Breen-Gillio Die State II, lapped reverse. The flashy sun-gold fields are smooth aside from wispy marks near the 9 in the date. A minor retained lamination (as made) above the bust tip. PCGS# 710529
- 5641 1870 Liberty Round 25 Cents, BG-808, R.3, MS67 NGC.** A pristine sun-gold Superb Gem with flashy fields and excellent eye appeal. Concentric die lines emerge beneath a loupe, as coined. The centers display minor incompleteness of strike due to the basined reverse die. Census: 4 in 67, 2 finer as 67 Prooflike (1/14). PCGS# 10669

**1872 BG-816 California Gold, MS65 Prooflike  
Round Liberty 25 Cents**

- 5642** 1872 Liberty Round 25 Cents, BG-816, R.6, MS65 Prooflike NGC. NGC has certified four examples of BG-816, and PCGS has added 21 pieces to the population data. Of all those submissions, the present piece is one of only four MS65 examples, and the only one that carries the Prooflike designation (1/14). Both sides of this green-gold example have fully mirrored fields and lustrous devices. PCGS# 710677

- 5643** 1872 Washington Round 25 Cents, BG-818, Baker-A504, Low R.4, MS64 NGC. BG-818 is the sole round quarter Washington head variety, and as a California small denomination gold type coin, it is subject to strong collector demand. An attractive yellow-gold representative. Minor hairlines are noted near the fraction. Census: 5 in 64, 8 finer (1/14). PCGS# 10679

**1876 BG-853 Gold Piece, MS66  
Round Indian 25 Cents**

- 5644** 1876 Indian Round 25 Cents, BG-853, Low R.5, MS66 NGC. This Premium Gem is tied with one other NGC submission for the finest certified, as PCGS has never certified an example finer than MS65 (1/14). This beauty has brilliant yellow-gold luster with reflective fields, providing impressive eye appeal. PCGS# 10714

**1878/6 BG-883 25 Cents, MS66 ★ Deep Prooflike  
Round Indian Gold Piece**

- 5645** 1878/6 Indian Round 25 Cents, BG-883, High R.4, MS66 ★ Deep Prooflike NGC. This Premium Gem has exceptional eye appeal with excellent field-to-device contrast. The fields are unusually deeply mirrored around lustrous devices with brilliant yellow-gold surfaces. This is the finest certified at NGC or PCGS, and the only Deep Prooflike example at either service (1/14). PCGS# 10744

- 5646** 1871 Liberty Octagonal 50 Cents, BG-912, R.3, MS66 NGC. Though undesignated as Prooflike, the canary-gold fields are decidedly flashy. They also appear pristine aside from small "ghosts" (as made) from the portrait near the denomination. Census: 1 in 66, 3 finer as 66 Prooflike (1/14). PCGS# 10770

**1871 BG-1011 50 Cent Piece, MS67  
Round Liberty Gold Piece**

- 5647** 1871 Liberty Round 50 Cents, BG-1011, R.2, MS67 NGC. A stunning Superb Gem, this frosty light yellow example has extraordinary luster with traces of delicate green overtones on its brilliant surfaces. This piece is tied for the finest certified at NGC or PCGS. Census: 4 in 67, 0 finer (1/14). PCGS# 10840

- 5648** 1876/5 Indian Round 50 Cents, BG-1059, R.4, MS65 Deep Prooflike NGC. The prominently mirrored canary-gold surfaces are well preserved. The strike is sharp except on the O in DOLLAR. A curly lint mark (as made) near star 11. As of (1/14), NGC has certified only three Deep Prooflike examples, one each in the MS64, MS65, and MS66 grades. PCGS# 910888

- 5649** 1869 Liberty Octagonal 1 Dollar, BG-1106, High R.4, MS63 PCGS. Die State I with a partial initial G beneath the portrait. The glassy fields are toned caramel-gold. The centers show softness, as always for the variety, though the remainder of the strike is bold. Housed in a green label holder. Population: 10 in 63, 1 finer (1/14). PCGS# 10917

## COMMEMORATIVE SILVER

- 5650** 1893 Isabella Quarter MS65 PCGS. CAC. This lovely Gem displays emerald-green, rose-red, and cream-gray toning. The strike is full except on the lower reverse dentils. Devoid of marks and certain to attract bidder attention. Queen Isabella was the first real woman (as opposed to allegorical Liberty) to appear on a U.S. coin. NGC ID# 28HR, PCGS# 9220

- 5651** 1893 Isabella Quarter MS65 PCGS. CAC. The Isabella quarter is unusual both in its denomination and in its design — women on both sides, one a historical figure, the other an archetype (or stereotype) of women of the era. Together they make the Isabella quarter a popular outlier in the silver commemorative series, just as is the 1900 Lafayette dollar. This Gem boasts the usual sharp strike with original surfaces showing moderate russet-gold patina that congregates most heavily at the rims and the reverse high points, a beautiful example of the type. NGC ID# 28HR, PCGS# 9220

**1893 Isabella Quarter, MS66  
Flawlessly Preserved**

**5652 1893 Isabella Quarter MS66 NGC.** A beautiful, radiantly lustrous representative of the popular Isabella quarter. The fields and centers are silver-white and untoned, while touches of pewter-gray patina accent the peripheral legends and the date. Fully struck and flawlessly preserved. NGC ID# 28HR, PCGS# 9220

**5653 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B.** Mildly dusky almond-gold toning drapes this lustrous and well struck representative. The reverse is uncommonly free from contact, and the obverse is also pleasing despite an unobtrusive graze on Washington's jaw. NGC ID# 28N8, PCGS# 9222

**5654 1900 Lafayette Dollar MS63 ANACS. DuVall 1-B.** The irregular lineup of the letters in DOLLAR confirms the obverse, while on the reverse the rightmost bottom leaf falls between the 1 and 9 in the date. Lightly abraded on the portraits with a mix of pale silver and spots of deeper gold and gray. NGC ID# 28N8, PCGS# 9222

**5655 1900 Lafayette Dollar MS63 PCGS. CAC. DuVall 1-B.** Only a trace of golden toning visits this lustrous and boldly struck commemorative. The obverse is well preserved, and the reverse exhibits scattered small marks. The sole silver dollar entry in the classic commemorative series. NGC ID# 28N8, PCGS# 9222

**5656 1921 Alabama MS65 PCGS.** Brilliant-white with frosted silver surfaces, this lustrous Alabama is boldly struck with only minor softness on the eagle's wing, leg and talon. There are no nicks or marks as evidence of a light strike. Gem examples such as this radiant half dollar are scarce and highly prized by commemorative specialists. NGC ID# 28HT, PCGS# 9224

**5657 1921 Alabama MS66 NGC.** Deep multicolored patina with green-gold and lavender-violet hues dominant. An impressively lustrous Premium Gem beneath the toning and all-around appealing. Census: 78 in 66 (1 in 66+, 3 in 66 ★), 7 finer (1/14). NGC ID# 28HT, PCGS# 9224

**5658 1921 Alabama 2x2 MS65 NGC.** From a small distribution of 6,006 pieces, this spectacular Gem exhibits well-detailed design elements and vibrant mint luster under shades of pale gold patina. The well-preserved surfaces are free of significant distractions. NGC ID# 28HS, PCGS# 9225

**5659 1921 Alabama 2x2 MS65 PCGS.** The 2x2 variant increased sales of Alabama half dollars as collectors needed two examples instead of just one for most other issues. This Gem is fully lustrous beneath delicate gold toning. NGC ID# 28HS, PCGS# 9225

**5660 1921 Alabama 2x2 MS66 NGC.** Splashes of aquamarine, lavender-red, and ocean-blue alternate across coruscating and virtually mark-free surfaces. The Alabama Centennial half followed the example of its Missouri cousin in adding a scarce variety with the state admission rank on the obverse field. Census: 90 in 66 (5 in 66+, 9 in 66 ★), 3 finer (1/14). NGC ID# 28HS, PCGS# 9225

**5661 1921 Alabama 2x2 MS66 PCGS.** Pale gold and blue overtones enhance the eye appeal of this brightly lustrous Premium Gem. The Alabama 2x2 variety, meant to sell more examples of the design, saw only 6,006 pieces struck. Population: 92 in 66 (2 in 66+), 7 finer (1/14). NGC ID# 28HS, PCGS# 9225

**5662 1936 Albany MS67 PCGS.** Light silver-gray in the subtly frosted centers with gold and orange elements of varying intensity around. A noteworthy Superb Gem. PCGS has graded only one coin as MS68 or better (1/14). NGC ID# 28HU, PCGS# 9227

**5663 1937 Antietam MS67 PCGS.** A very attractive example of this popular commemorative, this Superb Gem representative boasts rich satin luster and brilliant untuned centers. Small areas of rich toning in hues of rose, orange, and purple appear at portions of the peripheries. Only 17 examples have been awarded higher numeric grades by PCGS (1/14). NGC ID# 28HV, PCGS# 9229

**5664 1937 Antietam MS67 PCGS.** A tab-toned obverse with fire-red and jade-green peripheral patina. The obverse center is stone-gray. The reverse is only lightly toned. Lustrous and immaculate with outstanding eye appeal. NGC ID# 28HV, PCGS# 9229

**5665 1937 Antietam MS67 PCGS. CAC.** Areas of toning at the outer edges and silver centers add to the eye appeal of this Superb Gem example. The toning includes small splashes of orange, yellow, crimson, and russet. Rich satin luster adds to the attractiveness. PCGS has graded 17 numerically finer examples (1/14). NGC ID# 28HV, PCGS# 9229

**5666 1935-S Arkansas MS67 PCGS. CAC.** Exceptionally clean surfaces for this normally heavily abraded issue. Both sides are lightly covered with gentle silver-gray toning, golden-russet accents are at the borders. A must-see coin for the commemorative specialist and well worth stretching to acquire. Population: 22 in 67 (2 in 67+), 0 finer (1/14). NGC ID# 28HY, PCGS# 9235

**5667 1936-D Arkansas MS67 PCGS. CAC.** The obverse is deep blue with a ring of green-gold, while the reverse has more muted versions of the same colors. Outstanding luster and eye appeal. Population: 28 in 67 (1 in 67+), 1 finer (1/14). NGC ID# 28J2, PCGS# 9238

**5668 1937-D Arkansas MS67 PCGS.** Frosty silver through most of each side with gold, rose, and violet patina visiting the extreme margins. The portrait side shows a few small marks, including a couple of reed marks to the left of the chief's profile. Population: 24 in 67 (3 in 67+), 1 finer (1/14). NGC ID# 28J5, PCGS# 9242

**5669 1938-S Arkansas MS66 PCGS.** Largely silver with a few blue spots and peripheral golden-tan elements. Two small reed marks at the upper left reverse contribute to the grade. Population: 71 in 66 (3 in 66+), 2 finer (1/14). NGC ID# 28J9, PCGS# 9247

**5670 1939-D Arkansas MS66 PCGS.** Modestly toned with occasional hints of gray. Both sides show generous remaining luster. Only 2,104 pieces were struck, four of them assay coins. Population: 94 in 66 (10 in 66+), 8 finer (1/14). NGC ID# 28JB, PCGS# 9250

**5671 1939-S Arkansas MS66 PCGS.** Light gold-gray overall with lavender touches at the peripheral reverse. This Premium Gem is one of just 2,105 examples struck. Population: 91 in 66 (6 in 66+), 10 finer (1/14). NGC ID# 28JC, PCGS# 9251

**5672 1939 Arkansas PDS Set MS65 PCGS. CAC.** This identically graded trio is separately encased in holders bearing consecutive certification numbers. The three coins exhibit similar toning. The obverses display dappled lavender patina while the reverses are partly patinated blue-green. Three old collector envelopes accompany the lot. (Total: 3 coins) PCGS# 9252

### 1936-S Bay Bridge Half, MS67+

**5673 1936-S Bay Bridge MS67+ PCGS.** An absolutely beautiful Bay Bridge half dollar, this San Francisco Mint product exhibits an excellent strike with frosty silver luster. The obverse displays peripheral gold and pale blue toning, and the reverse is essentially untuned. PCGS has only certified 10 finer examples (1/14). NGC ID# 28JD, PCGS# 9254

**5674 1935-S Boone MS67 NGC.** Light blue-gray, gold, and steel elements mingle on this Superb Gem S-mint Boone half. Though the more common variety for that date and mint, its production amounted to only 5,005 pieces. Census: 32 in 67 (4 in 67 ★), 1 finer (1/14). NGC ID# 28JH, PCGS# 9260

**5675 1935/34 Boone MS67 PCGS. CAC.** Light gold and apricot outer toning yields to silver at the centers. A gorgeous dual-date Boone Superb Gem. Population: 55 in 67 (4 in 67+), 2 finer (1/14). NGC ID# 28JJ, PCGS# 9262

### 1935 Boone Half Dollar, MS67 Additional 1934 Date

**5676 1935/34-S Boone MS67 PCGS.** The 1935 Boone half dollars are known with or without a small font 1934 in the reverse field. The Denver and San Francisco Mints produced 5,000 each without the added date, and an additional 2,000 each with the addition of 1934. This Superb Gem has satin silver luster with brilliant, untuned surfaces. Population: 16 in 67 (1 in 67+), 2 finer (1/14). NGC ID# 28JL, PCGS# 9264

**5677 1937-D Boone MS67 PCGS. CAC.** Ex: Young Collection. This impressive Superb Gem has pale violet toning over both surfaces with outstanding orange and iridescent peripheral toning. Population: 47 in 67 (2 in 67+), 4 finer (1/14). NGC ID# 28JS, PCGS# 9271

**5678 1938-S Boone MS67 NGC.** Pale apricot and richer peach, lavender, and blue-violet hues enhance the eye appeal of this Superb Gem, one of only 2,100 pieces struck. Census: 32 in 67 (1 in 67 ★), 2 finer (1/14). NGC ID# 28JW, PCGS# 9276

**5679 1925-S California MS67 NGC.** Dramatic toning is this Superb Gem's greatest asset. The left obverse has pink-purple patina, while dappled gold, orange, maroon, and related shades dominate the rest of the surfaces. NGC has graded 14 numerically finer examples (1/14). NGC ID# 28JY, PCGS# 9281

**5680 1925-S California MS67 NGC.** Rich satin luster provides this Superb Gem with immediate eye appeal. Attractive toning in shades of peach, pink, and soft green is present on both sides. NGC has graded only 14 coins as MS68 or better (1/14). NGC ID# 28JY, PCGS# 9281

**5681 1925-S California MS67 PCGS.** The design is sometimes called the Prospector, and clearly represents the history of California. This Superb Gem has brilliant and satiny silver luster with exceptional peripheral iridescence. PCGS has only certified six finer examples (1/14). NGC ID# 28JY, PCGS# 9281

**5682 1936 Cleveland MS67 PCGS. CAC.** An impressive Superb Gem, this Cleveland half dollar is consigned from an old-time collection and displays impressive dusky gold toning over its pearl-gray surfaces. Population: 66 in 67 (8 in 67+), 1 finer (1/14). NGC ID# 28K4, PCGS# 9288

### 1936 Cleveland Half Dollar, MS67+ Only One Finer at PCGS

**5683 1936 Cleveland MS67+ PCGS. CAC.** An impressive Superb Gem, this Cleveland half dollar has frosty silver luster beneath gorgeous reddish-gold and forest-green toning, showing splashes of brilliant white, and offers exceptional eye appeal. Population: 66 in 67 (8 in 67+), 1 finer (1/14). NGC ID# 28K4, PCGS# 9288

**5684 1892 Columbian MS66 Prooflike NGC.** Well-defined for the issue with substantial reflectivity in light steel-gray fields. Blue and gold-orange peripheral shadings add to the eye appeal. Census: 22 in 66 (2 in 66 ★) Prooflike, 1 finer (1/14).  
Ex: *The Jerry Bagne Collection of Prooflike Commemoratives* (Heritage, 12/2009), lot 1228. PCGS# 89296

**5685 1892 Columbian MS66 Prooflike NGC.** Both sides are profoundly reflective beneath delicate blue, green-gold, and rose patina. A well-defined Premium Gem with outstanding eye appeal.  
Ex: *The Jerry Bagne Collection of Prooflike Commemoratives* (Heritage, 12/2009), lot 1227. PCGS# 89296

**5686 1892 Columbian MS66 Prooflike NGC.** Ex: Bagne Collection. Golden-russet and ocean-blue toning invigorate the peripheries of this Premium Gem. Splendidly struck with marvelous mirrors, a worthy contribution to an advanced collection of silver commemoratives.  
Ex: *Houston Signature* (Heritage, 12/2009), lot 1226, which brought \$1,495.00. PCGS# 89296

**5687 1892 Columbian MS66 Prooflike NGC.** Ex: Jerry Bagne Collection. Subtle cloud-white toning over parts of the gleaming silver surfaces, with the most obvious point of toning at the M of AMERICA on the obverse. Well struck and strongly appealing.  
Ex: *Houston Signature* (Heritage, 12/2009), lot 1231, which brought \$1,495.00. PCGS# 89296

**5688 1935 Connecticut MS66+ PCGS. CAC.** An amazing Premium Gem, this Plus-designated example has frosty silver luster beneath dazzling iridescent toning. NGC ID# 28K8, PCGS# 9299

**5689 1936 Elgin MS67 PCGS.** Areas of slightly subdued iridescent color appear along portions of the periphery on this Superb Gem. The coin displays an attractive satin luster. PCGS and NGC combined have awarded higher numeric grades to only 13 examples (11/14). NGC ID# 28KA, PCGS# 9303

**5690 1936 Elgin MS67 PCGS. CAC.** Frosty surfaces range from pale silver to gold, peach, and even a touch of sky-blue over the pioneer figures. An amply appealing Superb Gem. NGC ID# 28KA, PCGS# 9303

**5691 1936 Elgin MS67 PCGS. CAC.** Frosty silver at small cores with rich gold, orange, and peach outer hues. A gorgeous Superb Gem example of this artistically accomplished commemorative design. NGC ID# 28KA, PCGS# 9303

**5692 1936 Gettysburg MS66 NGC.** Subtly gold-gray with warm luster filtering through the patina. A carefully preserved example of this “Blue and Gray Reunion” commemorative marking the 75th anniversary of the Battle of Gettysburg. NGC ID# 28KB, PCGS# 9305

**5693 1936 Gettysburg MS66+ NGC.** Light gold-to-gray on parts of the obverse with a shift toward dusky orange and violet as on the entirety of the reverse. A lustrous MS66+ example of the Gettysburg half dollar. NGC ID# 28KB, PCGS# 9305

**5694 1922 Grant With Star MS63 PCGS.** The usual satiny luster with swirling die polish appears on this attractive Select Mint State piece, with wisps of golden-violet toning. NGC ID# 28KC, PCGS# 9307

**5695 1922 Grant With Star MS64 NGC.** Brilliant surfaces are fully lustrous, and exhibit sharply struck design elements. A horizontal planchet void is noted on Grant’s cheek. Only 4,256 pieces were struck of this issue, making certain that this early commemorative would be an absolute rarity. It is also a highly respected condition rarity as few examples were well taken care of, many having been sold to the non-collecting public.

*Ex: San Francisco Signature (Heritage, 7/2005), lot 7097; Central States Signature (Heritage, 4/2006), lot 4949. NGC ID# 28KC, PCGS# 9307*

**5696 1922 Grant With Star MS64 PCGS.** A satiny near-Gem, this example has gold, sea-green, and iridescent toning over its brilliant silver surfaces with reflective fields as usual. NGC ID# 28KC, PCGS# 9307

**5697 1922 Grant With Star MS64 NGC.** Gold, lavender, and violet overtones embrace each side of this lustrous near-Gem. The With Star half dollars were a mistake, or rather an unexpected bonus, as the sellers had requested only With Star and “plain” gold dollars. NGC ID# 28KC, PCGS# 9307

**5698 1922 Grant With Star MS66 PCGS.** *Ex: Young Collection.* Early in the life of the Grant With Star half dollar obverse die, it clashed, and was then lapped by the press operator. As a result, most examples display prominent obverse die polish lines along with clash marks near the nose and chin. The present high grade and satiny example is from that die state. Peripherally toned golden-brown, rose-red, and lavender. NGC ID# 28KC, PCGS# 9307

**5699 1928 Hawaiian MS63 PCGS.** A bright, satiny-white representative of this popular commemorative issue. Any offering of a Hawaiian Sesquicentennial (from “discovery”) half dollar sparks considerable interest. NGC ID# 28KE, PCGS# 9309

#### 1928 Hawaiian Half Dollar, MS65 Beautifully Toned and Pristine

**5700 1928 Hawaiian MS65 NGC.** The blended hues of original toning displayed by this lovely Gem include mint-green, lilac, and peach accents. Satiny and fully struck, this example is also well-preserved and free of surface distractions. A superior example of this key commemorative issue. NGC ID# 28KE, PCGS# 9309

#### 1928 Hawaiian Half Dollar, MS65 Sharp Devices

**5701 1928 Hawaiian MS65 NGC.** Silver-gray surfaces display nuances of lilac, rose, and magenta. This Hawaiian half has well-defined devices, including even the intricate elements of the beach landscape and the chieftain’s robe and other regalia. The fields are smooth and clean with no abrasions of note. Nice silvery appeal for this rare Gem Hawaiian half. NGC ID# 28KE, PCGS# 9309

**5702 1935 Hudson MS65 NGC.** Areas of scattered light toning are present on this Gem, primarily at the outer edges. Among the hues appearing are tan, dark brown, and deep gray-green. A few tiny marks do not pose a distraction on this lustrous piece. NGC ID# 28KF, PCGS# 9312

**5703 1935 Hudson MS65 PCGS.** The obverse motif is fanciful, but it is partly derived from the City of Hudson seal. A low mintage type that ranks only behind the Hawaiian in importance. A smooth and lustrous cream-gray Gem. Certified in an old green label holder. NGC ID# 28KF, PCGS# 9312

**5704 1935 Hudson MS65 NGC.** Gold-gray overall with a touch of steel. This Gem Hudson half has ample eye appeal despite a slightly dusky appearance. One of just 10,000 coins struck plus assay pieces. NGC ID# 28KF, PCGS# 9312

**5705 1935 Hudson MS65 PCGS.** A Gem possessing a high degree of eye appeal, this coin displays rich frosty satin luster. Portions of the rims exhibit dark gray toning, however the patina on the rest of the coin consists of subtle light shades of rose and champagne, providing it with a brilliant appearance overall. NGC ID# 28KF, PCGS# 9312

#### 1935 Hudson Half Dollar, MS66+

**5706 1935 Hudson MS66+ PCGS. CAC.** The entire authorized quantity of 10,000 half dollars were issued for the city of Hudson, New York, marking the sesquicentennial of the founding of that city. This Premium Gem has satin mint luster beneath lovely gold and iridescent toning. PCGS has only certified 11 finer examples (1/14). NGC ID# 28KF, PCGS# 9312

**5707 1924 Huguenot MS66+ NGC. CAC.** Bright silver luster has just a hint of frostiness on the high points and toning is minimal save for a touch of peripheral gold. Generally well-defined and attractive. NGC ID# 28KG, PCGS# 9314

**5708 1946 Iowa MS68 ★ NGC.** Both sides display magnificent multicolor concentric toning. Orange-gold, lilac-red, and sea-green provide the most prominent hues. Census: 59 in 68 (20 in 68 ★, 1 in 68+★), 2 finer (1/14). NGC ID# 28KJ, PCGS# 9316

**5709 1925 Lexington MS66 PCGS. CAC.** Boldly struck and attractive, this lustrous Lexington half displays lovely light-gold toning over undisturbed surfaces. A touch of lavender accents the rims and high points. This example is highly collectible and desirable with its Premium Gem designation and the CAC-Approved label for quality and eye appeal. NGC ID# 28KK, PCGS# 9318

**5710 1925 Lexington MS66+ PCGS. CAC.** The mostly brilliant surfaces of this high-end Premium Gem show a few hints of lilac and pale gold toning, with no mentionable distractions. Vibrant mint luster and sharply detailed devices add to the terrific eye appeal. NGC ID# 28KK, PCGS# 9318

**5711 1936 Lynchburg MS67 PCGS.** This lovely Superb Gem has satiny silver luster with amazing gold and iridescent toning resulting from its old-time collection envelope. Population: 93 in 67 (8 in 67+), 0 finer (1/14). NGC ID# 28KM, PCGS# 9324

#### 1921 Missouri Centennial Half Dollar, MS65+ Conditionally Scarce and Rare Any Finer

**5712 1921 Missouri MS65+ NGC.** The Missouri Centennial half dollar is an early commemorative issue that saw limited production. Beautiful layers of lilac, peach, and cinnamon coloration endow this impressive Gem example with an especially high degree of visual appeal. The design elements are crisply impressed and the lustrous surfaces are blemish-free. NGC ID# 28KS, PCGS# 9330

#### 1921 Missouri Half, MS65 Commemorative Condition Key

**5713 1921 Missouri MS65 PCGS. CAC.** Satiny luster occupies each side of this Gem 1921 Missouri half dollar, a grade level exceeded by only 37 submissions at PCGS (1/14). In MS65 the Missouri is one of the keys to the commemorative series, along with its 2★4 counterpart. The surfaces are pinkish-gray with mottled accents of smoke-gray and ice-blue. A couple of marks on the portrait and in the left obverse field account for the grade. NGC ID# 28KS, PCGS# 9330

**5714 1921 Missouri 2x4 MS63 PCGS.** This Select Mint State Missouri 2★4 half dollar is highly lustrous with frosty silver surfaces and delicate gold toning. NGC ID# 28KR, PCGS# 9331

**5715 1921 Missouri 2x4 MS64 NGC.** The 2x4 was an artificial variety created to sell more Missouri halves, mintage 5,000 pieces. This near-Gem has deep golden-tan and violet-gray toning with hints of violet. NGC ID# 28KR, PCGS# 9331

**5716 1921 Missouri 2x4 MS64+ NGC.** Pale blue and gold overtones on the interiors with patches of deeper rose and violet at the margins. Just a few wispy marks keep this piece from a clear Gem grade. NGC ID# 28KR, PCGS# 9331

**5717 1921 Missouri 2x4 MS65 PCGS.** A lustrous Gem with pale gold and blue patina across each side. Appealing, though the usual striking softness affects the frontiersman's upper body. NGC ID# 28KR, PCGS# 9331

**5718 1921 Missouri 2x4 MS65 NGC.** Examples MS65 and finer of the Missouri 2x4 variant are challenging to find with sharply struck centers. The strike on this well-balanced and lustrous representative is bold, but a trifle short of full. Lustrous silver surfaces show overall hints of clear-gold and lilac toning. An appealing Gem — scarce and difficult to find any finer. NGC ID# 28KR, PCGS# 9331

#### 1921 Missouri 2★4 Half, MS65

**5719 1921 Missouri 2x4 MS65 PCGS. CAC.** This is a key commemorative issue that is especially difficult to locate in Gem or finer grades. This example has frosty silver luster on exceptional surfaces, with delicate gold and iridescent toning to heighten its eye appeal. PCGS has only certified 30 finer examples (1/14). NGC ID# 28KR, PCGS# 9331

**5720 1938 New Rochelle MS67 PCGS. CAC.** A sharply detailed Superb Gem, this brilliant half dollar displays vibrant mint luster and subtle hints of gold and lavender toning. No visible distractions are noted. PCGS has graded five numerically finer examples (1/14). NGC ID# 28KU, PCGS# 9335

**5721 1938 New Rochelle MS66 Prooflike NGC.** Sage and tan peripheral toning is present mostly on the obverse, and the central mirrors of this outstanding coin are generally brilliant. Three small reed marks are noted on the calf.  
*Ex: The Jerry Bagne Collection of Prooflike Commemoratives (Heritage, 12/2009), lot 1263. PCGS# 89335*

**5722 1938 New Rochelle MS66 Prooflike NGC.** *Ex: Bagne Collection.* Delicate gold and lilac tints enhance the eye appeal of this Prooflike Premium Gem. Minimally marked on the well struck obverse with just a few stray flaws on the reverse. This coin pedigrees to the Jerry Bagne Collection of Prooflike Commemoratives.  
*Ex: Houston Signature (Heritage, 12/2009), lot 1259, which brought \$690.00. PCGS# 89335*

**5723 1938 New Rochelle MS66 Prooflike NGC.** *Ex: Bagne Collection.* Whispers of peripheral gold and peach visit each side of this flashy example. Well-defined for the issue with eye appeal substantially better than what would be found on a lesser-graded piece.  
*Ex: Houston Signature (Heritage, 12/2009), lot 1266, which brought \$690.00. PCGS# 89335*

**5724 1938 New Rochelle MS66 Prooflike NGC.** This pleasing Premium Gem has strong reflectivity that perseveres through the slight haze over each side. Well struck overall with slight softness at the centers.  
*Ex: The Jerry Bagne Collection of Prooflike Commemoratives (Heritage, 12/2009), lot 1260. PCGS# 89335*

**5725 1938 New Rochelle MS66 Prooflike NGC.** *Ex: Bagne Collection.* Largely untuned with distinctly flashy and reflective, prooflike silver-white surfaces. Well struck overall with a few small reed marks noted on and near the flower. The 2014 *Guide Book* mentions examples with prooflike fields are sometimes offered as "presentation pieces." However, to our knowledge, they were not used for presentation.  
*Ex: Houston Signature (Heritage, 12/2009), lot 1261, which brought \$747.50. PCGS# 89335*

- 5726 1936 Norfolk MS68 PCGS.** The Norfolk has the most verbose legends of any commemorative issue, which may also account for the sizeable number of MS68 examples. A pristine and lustrous coin with a rich arc of ruby-red and jade-green toning on the upper reverse margin. Housed in a green label holder. NGC ID# 28KV, PCGS# 9337
- 5727 1928 Oregon MS67+ PCGS.** Lightly toned gold, violet, and blue over most of the obverse with deeper versions of those colors on the lustrous reverse. An attractive Oregon half dollar from the second year of strikings. NGC ID# 28KY, PCGS# 9342
- 5728 1933-D Oregon MS67 PCGS. CAC.** Excellent eye appeal is exhibited by this Superb Gem that displays small splashes of color in shades of orange, gold, yellow, and peach. Deep satin luster and an attractive strike are among the attributes of this piece. NGC ID# 28KZ, PCGS# 9343
- 5729 1936-S Oregon MS67+ PCGS.** Light blue-gray and gold-gray with dots of vibrant reddish-orange along the margins. An impressively preserved S-mint Oregon Trail half. PCGS has graded just four coins as MS68 or better (1/14). NGC ID# 28L4, PCGS# 9346
- 5730 1936-S Oregon MS67+ PCGS. CAC.** The obverse is pale blue-gray with touches of gray-gold that have stronger representation on the reverse. Smooth and appealing. PCGS has graded only four coins as MS68 or better (1/14). NGC ID# 28L4, PCGS# 9346
- 5731 1937-D Oregon MS67+ PCGS. CAC.** Pale blue and violet and richer gold colors enrich the eye appeal of this Denver Oregon half dollar. Luster and detail are characteristically strong. NGC ID# 28L5, PCGS# 9347
- 5732 1937-D Oregon MS68 PCGS.** A favorite design for collectors, the Oregon Trail half is often found in high grades but seldom as nice as this Superb Gem. Appealing golden-orange toning at the rims blends with lilac and pearlescent silver on the obverse, with clear gold translucence over a silver center on the reverse. A bold strike combines with outstanding eye appeal and mark-free surfaces for the MS68 designation. Few could be any finer. NGC ID# 28L5, PCGS# 9347
- 5733 1938-D Oregon MS67+ PCGS. CAC.** The Oregon Trail half dollar is acknowledged as one of the most beautiful designs of the commemorative series and was the longest-running design of the series. Apricot, golden-brown, and olive-green tints along with spots of fiery-red add to the eye appeal of this Superb Gem. PCGS has only assigned higher numeric grades to 42 pieces (1/14). NGC ID# 28L7, PCGS# 9349
- 5734 1938-D Oregon MS67+ PCGS. CAC.** An example with tremendous eye appeal on both sides, this high-end Superb Gem displays rich luster. Areas of light toning include shades of light golden-brown and peach. NGC ID# 28L7, PCGS# 9349
- 5735 1938-D Oregon MS68 NGC.** Faint blue and gold overtones across each side with a hint of peach at the peripheral obverse. Only 6,000 pieces were struck, plus a few assay coins. Census: 61 in 68 (1 in 68+, 35 in 68 ★, 1 in 68+★), 2 finer (1/14). NGC ID# 28L7, PCGS# 9349
- 5736 1939 Oregon MS67 PCGS. CAC.** Faint golden overtones visit each side of this final-year Oregon Trail half dollar. Luster is understated but pleasing and the preservation is excellent. Population: 95 in 67 (4 in 67+), 4 finer (1/14). NGC ID# 28L9, PCGS# 9352
- 5737 1939-D Oregon MS67 NGC.** Light blue-violet overall with a turn toward peach on the reverse "sky." An amply lustrous Superb Gem example of the final Denver Oregon half dollar issue. NGC ID# 28LA, PCGS# 9353
- 5738 1915-S Panama-Pacific MS64 NGC.** Richly toned violet, blue, and peach with narrow rings of deep color at the obverse and reverse margins. The underlying luster is soft but pleasing. NGC ID# 26H7, PCGS# 9357
- 5739 1915-S Panama-Pacific MS65+ NGC.** Light silver interiors have strong luster, while the margins are gold-orange, violet, and blue. Generally well-struck, though a degree of softness is noted on Columbia's hair. NGC ID# 26H7, PCGS# 9357

## 1921 Pilgrim Half, MS67 Tied for the Finest Certified

- 5740 1921 Pilgrim MS67 PCGS.** The second year of the Pilgrim half dollar with a low distribution of just 20,053 coins, or only slightly more than 10% of the total distribution for the design. This Superb Gem has brilliant and frosty silver luster under champagne toning within a peripheral gold frame. Population: 29 in 67 (3 in 67+), 0 finer (1/14). NGC ID# 28LD, PCGS# 9360
- 5741 1936 Robinson MS66+ PCGS. CAC.** This variant of the Arkansas half dollar has a portrait of then-senator Joseph T. Robinson, who still lived at the time of the coin's release. Lavender, violet, and blue outer toning yields to lighter silver at the lustrous centers. NGC ID# 28LJ, PCGS# 9369
- 5742 1935 Spanish Trail MS63 PCGS.** A sharply struck and coruscating representative of the low mintage Old Spanish Trail type. Unobtrusive field grazes correspond to the grade. Encased in a green label holder. NGC ID# 28LN, PCGS# 9376
- 5743 1935 Spanish Trail MS64 NGC.** Intermingled shades of tan, olive-green, red-orange, yellow, and plum appear on this near-Gem representative. The few abrasions present do not pose a distraction on this piece. NGC ID# 28LN, PCGS# 9376
- 5744 1935 Spanish Trail MS64 NGC.** Pale golden tints grace the fields of this brightly lustrous near-Gem Spanish Trail half. The reverse has a few scattered abrasions, most visibly on and near Texas. NGC ID# 28LN, PCGS# 9376
- 5745 1935 Spanish Trail MS66 NGC.** Violet, tan, and powder-blue through the obverse and the reverse margins with a fade on the latter side to gold and finally silver. Great reverse eye appeal. NGC ID# 28LN, PCGS# 9376
- 5746 1935 Spanish Trail MS66 NGC.** Uncommonly effusive luster from pale silver surfaces that show little trace of toning. A few small reddish dots underline the word TRAIL on the reverse. NGC ID# 28LN, PCGS# 9376
- 5747 1927 Vermont MS66+ NGC.** The Vermont half dollar has the highest relief of any commemorative issue. The strong strike on this representative is almost medallion in its appearance. Deep orange-gold toning covers the obverse. Delightful hues of gold, lime-green, pink, and blue grace the reverse. Strong luster radiates beneath the toning. A small reed mark above the catamount's back is the only limiting factor between MS66+ and an even finer grade. NGC ID# 28M6, PCGS# 9401
- 5748 1946 Booker T. Washington MS67+ PCGS. CAC.** Gold, orange, heather, and violet-blue hues enrich the eye appeal of this early Booker T. Washington half dollar. Luster is generous and little of the usual planchet roughness affects the portrait. Population: 72 in 67 (7 in 67+), 1 finer (1/14). NGC ID# 28M7, PCGS# 9404
- 5749 1948-D Booker T. Washington MS67 PCGS.** Silver on the portrait with lush rose-to-violet colors around and on the reverse. One of just 8,005 pieces struck for this first-year Booker T. Washington issue. Population: 21 in 67, 0 finer (1/14). NGC ID# 28ME, PCGS# 9413
- 5750 1948-S Booker T. Washington MS67 PCGS. CAC.** Bright with a faint blue overtone on much of each side. This Superb Gem is almost free of post-striking faults, though a degree of planchet roughness affects Washington's jaw, as usually seen. Population: 23 in 67 (2 in 67+), 0 finer (1/14). NGC ID# 28ME, PCGS# 9414

- 5751 1948-S Booker T. Washington MS67 PCGS. CAC.** A few hints of greenish-gold toning accent the peripheries of this delightful Superb Gem. The design elements are sharply detailed throughout and vibrant mint luster adds to the terrific eye appeal. Population: 23 in 67 (2 in 67+), 0 finer (1/14). NGC ID# 28MF, PCGS# 9414

**1949-D Booker T. Washington Half Dollar, MS67+  
Tied for the Finest Certified**

- 5752 1949-D Booker T. Washington MS67+ PCGS.** Miniature splashes of orange-gold toning appear at the lower obverse of this otherwise entirely brilliant and untuned Superb Gem Booker T. Washington half dollar. Both sides exhibit remarkable design definition. Population: 27 in 67 (2 in 67+), 0 finer (1/14). NGC ID# 28MH, PCGS# 9417

- 5753 1951-S Booker T. Washington MS67 PCGS.** An extraordinary Superb Gem, tied for the finest certified, this Booker T. Washington half dollar has a bold strike and brilliant, satin mint luster. Population: 41 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 28MR, PCGS# 9426

- 5754 1951-S Booker T. Washington MS67 PCGS. CAC.** Rich satin luster provides this piece with nice eye appeal. Brilliant centers and scattered toning at the outer edges appear on this Superb Gem representative. The toning includes shades of green-gray, pink, and red-orange. Population: 41 in 67 (1 in 67+), 0 finer (1/14). NGC ID# 28MR, PCGS# 9426

**1952 Washington-Carver Half, MS67  
Mottled Patina**

- 5755 1952 Washington-Carver MS67 PCGS.** The Washington-Carver type was a successor to the Booker T. Washington halves, many of which were later melted to make the Washington-Carver pieces. The 1952 saw the largest net distribution of the series by far, at about 1.1 million pieces. This Superb Gem shows softly lustrous surfaces with mottled patina in attractive shades of pinkish-gray, jade, and ice-blue. Both sides are notably free of mentionable contact. Population: 15 in 67 (2 in 67+), 1 finer (1/14). NGC ID# 28MV, PCGS# 9434

- 5756 1953 Washington-Carver MS66+ PCGS.** PCGS awarded this Premium Gem the Plus designation for high quality and eye appeal. The obverse includes intermingled shades of gold with pink, lilac, and blue. The reverse reveals toning accents of orange, gold, yellow, pink, and red in varying intensities. A few small marks are present on Carver's portrait. Population: 82 in 66 (5 in 66+), 5 finer (1/14). NGC ID# 28MY, PCGS# 9438

- 5757 1936 York MS67+ ★ NGC. CAC.** A tab-toned York commemorative with exquisite ruby-red, orange-gold, and apple-green patina on the obverse. The reverse is brilliant aside from a hint of peripheral sun-yellow toning. Lustrous, fully struck, and pristine. NGC ID# 28N7, PCGS# 9449

- 5758 1936 York MS68 ★ NGC.** The tab-toned obverse (fort motif) displays rich orange-gold, fire-red, and apple-green at the margins. The reverse (shield motif) exhibits similar but significantly deeper colors. Census: 32 in 68 (7 in 68 ★), 0 finer (1/14). NGC ID# 28N7, PCGS# 9449

**COMMEMORATIVE GOLD**

- 5759 1903 Louisiana Purchase/Jefferson MS65 PCGS.** A lovely yellow-orange Gem of this elusive introductory commemorative gold type. A trace of powder-blue residue is seen on reverse letters. The strike is full except for blending on the dentils beneath ST. LOUIS. NGC ID# 26HA, PCGS# 7443

- 5760 1903 Louisiana Purchase/Jefferson MS65 PCGS. CAC.** Pale gold with bluish tints visiting the obverse fields. Broad and fabulous luster adds to the sharp strike for excellent eye appeal. A few tiny coppery areas visit the obverse lettering. NGC ID# 26HA, PCGS# 7443

- 5761 1903 Louisiana Purchase/Jefferson MS65 PCGS. CAC.** Both sides are decidedly reflective on this pale canary-yellow example of the Jefferson gold dollar. Most of the details in the wig are brought out, and there is a hint of a wire rim visible on close examination. An intriguing piece. NGC ID# 26HA, PCGS# 7443

- 5762 1903 Louisiana Purchase/Jefferson MS66 PCGS.** President Thomas Jefferson arranged for the massive land acquisition known as the Louisiana Purchase, and he is commemorated on this gold dollar issued for the St. Louis World's Fair. This lovely piece has brilliant yellow luster with hints of greenish color on its near-pristine surfaces. NGC ID# 26HA, PCGS# 7443

- 5763 1903 Louisiana Purchase/Jefferson MS66 PCGS.** An impressive Premium Gem from the first U.S. Mint commemorative gold design, featuring President Thomas Jefferson who made the famous land purchase. This example has splendid pale blue toning over its brilliant yellow-gold surfaces. NGC ID# 26HA, PCGS# 7443

- 5764 1903 Louisiana Purchase/Jefferson MS66 PCGS Secure.** This first commemorative gold dollar honors the centennial of the monumental Louisiana Purchase from France in 1803. This Premium Gem offers bountiful luster with orange-gold and hazel tints at the rims. Only a few minuscule marks preclude an even finer grade. PCGS has certified 81 examples as MS67 or finer (1/14). Ex: Long Beach Signature (Heritage, 6/2010), lot 1344. NGC ID# 26HA, PCGS# 7443

- 5765 1903 Louisiana Purchase/Jefferson MS66 PCGS. CAC.** Large splashes of orange add to the visual appeal of this Premium Gem. This piece displays a crisp strike. The 1903 Louisiana Purchase gold dollars enjoyed a business-strike distribution of 35,000 pieces, evenly split between the Jefferson and McKinley types. NGC ID# 26HA, PCGS# 7443

- 5766 1903 Louisiana Purchase/McKinley MS65 PCGS.** This well-struck Gem exudes vibrant luster. A few splashes of color, primarily orange, appear on each side. A minute die crack is evident between the rim and the second I in LOUISIANA. The reverse exhibits a few small abrasions. NGC ID# 26HB, PCGS# 7444

- 5767 1903 Louisiana Purchase/McKinley MS65 PCGS.** Boldly struck on the political portrait with shimmering apricot-to-yellow luster around. A popular and relatively accessible issue, the Louisiana Purchase/McKinley gold dollar is a good starting-point for a high-grade commemorative gold collection. NGC ID# 26HB, PCGS# 7444

- 5768 1903 Louisiana Purchase/McKinley MS65 PCGS.** Pale yellow luster through the centers with slight deepening toward the margins. A fantastically flashy example with few marks of any significance. NGC ID# 26HB, PCGS# 7444

- 5769 1903 Louisiana Purchase/McKinley MS65 PCGS.** Peach-gold on the obverse with a more apricot reverse that also has coppery areas. Well-defined on the late president's portrait and pleasingly preserved. NGC ID# 26HB, PCGS# 7444

**5770 1903 Louisiana Purchase/McKinley MS65 PCGS. CAC.** Light blue overtones through the centers with a reversion to rich yellow at the margins. A charming example of this issue that put McKinley's face on a dollar of the metal whose standard he championed. NGC ID# 26HB, PCGS# 7444

**5771 1903 Louisiana Purchase/McKinley MS66 PCGS.** Smooth yellow-gold luster is this McKinley gold dollar's most immediately obvious asset. Small copper spots appear at the R in AMERICA and the E in ONE. NGC ID# 26HB, PCGS# 7444

**5772 1903 Louisiana Purchase/McKinley MS66 PCGS.** A stunning Premium Gem, this McKinley gold dollar has delicate blue toning on the obverse and distinctive green on the reverse. NGC ID# 26HB, PCGS# 7444

**5773 1903 Louisiana Purchase/McKinley MS66 PCGS.** A lovely Premium Gem, this specimen displays lustrous, yellow-gold surfaces with subtle greenish undertones along with a few, small scattered splashes of russet. The design features are well impressed, and there are no mentionable marks to report. A minute die crack is evident between the rim and the second I in LOUISIANA. NGC ID# 26HB, PCGS# 7444

**5774 1903 Louisiana Purchase/McKinley MS66 PCGS.** A well preserved yellow-gold example of this early gold commemorative issue. The portrait is sharply struck though the dentils show occasional softness. Though dated 1903, the coin celebrated the Louisiana Purchase Exposition held in 1904. NGC ID# 26HB, PCGS# 7444

**5775 1904 Lewis and Clark MS63 PCGS.** This issue has a reputation for being poorly struck, but the current example displays very good detail on both of the portraits, save for minor flatness on Clark's ear and upper hair curls. The luster is bright and attractive, and the deep orange-gold and green toning is also quite appealing. A small abrasion is noted on the cheek of Mr. Lewis, very close to the nose. Although the reported mintage is 10,025 pieces, many fewer than that were actually distributed.

*Ex: Dallas Signature (Heritage, 10/2006), lot 1906, which brought \$2,070.00. NGC ID# 26HC, PCGS# 7447*

#### 1904 Lewis and Clark Gold Dollar, MS65

**5776 1904 Lewis and Clark MS65 PCGS.** The 1904 Lewis and Clark Expo gold dollar is far more elusive than the 1903 Louisiana Purchase-McKinley and Jefferson dollars, but far more obtainable than the 1905 Lewis and Clark. This Gem 1904 offers two-toned flashy surfaces with orange-red fields and mint-green glints closer to the rims. Both Lewis and Clark show no singular contact. NGC ID# 26HC, PCGS# 7447

**5777 1905 Lewis and Clark MS63 PCGS.** The 1905-dated issue is considerably scarcer than the 1904 issue (David Bowers estimated by a factor of 20%). Actual distribution was much less than the reported mintage, and the Lewis and Clark issues of 1904 and 1905 are far rarer than other gold commemoratives in MS63 and finer. This sharp example shows little evidence of the usual strike weakness. Lustrous yellow-gold surfaces display a touch of orange at the rims. The fields are prooflike with only light marks. NGC ID# 26HD, PCGS# 7448

**5778 1905 Lewis and Clark MS63 PCGS. CAC.** This second-year Lewis and Clark dollar has yellow-gold luster with a subtly rolling cartwheel effect. Detail is strong on both portraits. NGC ID# 26HD, PCGS# 7448

#### 1905 Lewis and Clark Gold Dollar, MS64 A Lustrous, Well-Preserved Example

**5779 1905 Lewis and Clark MS64 PCGS. CAC.** A Centennial Exposition was held in Portland, Oregon in 1905 to commemorate the famous Lewis and Clark Expedition. Gold dollars dated 1904 and 1905 were sold in order to finance a bronze memorial of the expedition's female Native American guide, Sacagawea.

This example is sharply struck and displays an attractive mixture of antique-gold and light orange-gold coloration. Intense mint luster shimmers over the carefully preserved, distraction-free surfaces. NGC ID# 26HD, PCGS# 7448

**5780 1915-S Panama-Pacific Gold Dollar MS65 PCGS. CAC.** Boldly struck on the hat and dolphins, this radiant Panama-Pacific gold dollar is a lustrous, colorful Gem. Gleaming hues of orange and lemon-gold blend with lilac accents. The coin is Mint-fresh and unabraded. NGC ID# 26HE, PCGS# 7449

**5781 1915-S Panama-Pacific Gold Dollar MS66 PCGS.** Primarily sun-gold with a few areas of paler hue. An attractively preserved Premium Gem example of the smallest gold Panama-Pacific commemorative. NGC ID# 26HE, PCGS# 7449

**5782 1915-S Panama-Pacific Gold Dollar MS66 PCGS.** Only 15,000 Panama-Pacific gold dollars were actually distributed from the total mintage of 25,034 pieces. The remaining coins were melted on October 30, 1916 at the San Francisco Mint. The issue is in great demand today and the Premium Gem grade offers a good combination of spectacular eye appeal and reasonable cost. The present coin is sharply struck, with lustrous surfaces, and good original color that shows areas of lilac intermingled with the otherwise deep reddish-gold patina. NGC ID# 26HE, PCGS# 7449

**5783 1915-S Panama-Pacific Gold Dollar MS66 PCGS.** An attractive Premium Gem, this coin displays consistent, frosty straw-gold surfaces on each side. Even when viewed under magnification, no mentionable distractions appear. Only 55 examples have received higher numeric grades from PCGS (1/14).  
*Ex: Denver Signature (Heritage, 8/2006), lot 3963. NGC ID# 26HE, PCGS# 7449*

**5784 1915-S Panama-Pacific Gold Dollar MS66 PCGS.** A lovely Premium Gem, this popular gold dollar bears the smallest physical size of any coin from the Panama-Pacific gold commemorative collection, but it looms large in historical importance. Here is a lovely yellow-gold example with frosty mint luster and excellent eye appeal. NGC ID# 26HE, PCGS# 7449

**5785 1915-S Panama-Pacific Gold Dollar MS66 PCGS. CAC.** Yellow-gold overall with elements of butter and honey. A pleasing Premium Gem example of one of the few U.S. coins to specifically celebrate labor. NGC ID# 26HE, PCGS# 7449

**1915-S Panama-Pacific Two and a Half  
Satiny and Remarkably Clean MS63**

- 5786 1915-S Panama-Pacific Quarter Eagle MS63 PCGS.** A satiny and sharply struck piece with unexpectedly few marks given its grade. Peach-gold toning is comprehensive save for a blush of ice-blue on the tail of the hippocampus, a mythical beast that makes its only U.S. coinage appearance on this attractive gold commemorative type.  
*Ex: Portland ANA Signature (Heritage, 3/2004), lot 6847; Dallas Signature (Heritage, 11/2007), lot 1699. NGC ID# 26HK, PCGS# 7450*

- 5787 1916 McKinley MS66 PCGS.** Predominantly sun-yellow surfaces show touches of orange. Swirling luster on both sides has the usual near-brilliant streaks above the memorial on the reverse. NGC ID# 26HF, PCGS# 7454

- 5788 1916 McKinley MS66 PCGS.** Light yellow-gold overall and generally satiny. Touches of apricot appear at the margins and above the reverse memorial. PCGS has graded 76 pieces as MS67 or finer (1/14). NGC ID# 26HF, PCGS# 7454

- 5789 1917 McKinley MS65 PCGS.** A satiny Gem with splendid and pristine yellow-gold surfaces, this example features delicate pink overtones to enhance its eye appeal. NGC ID# 26HG, PCGS# 7455

- 5790 1917 McKinley MS65 PCGS.** Lustrous yellow-orange with faint blue-to-violet elements through parts of the fields. An attractive second-year McKinley gold dollar with solid detail. NGC ID# 26HG, PCGS# 7455

- 5791 1917 McKinley MS65 PCGS.** A satiny Gem, this 1917 McKinley gold dollar has a bold strike and brilliant wheat-gold luster with excellent eye appeal. NGC ID# 26HG, PCGS# 7455

**1917 McKinley Gold Dollar, MS67  
Final Gold Issue of the Decade**

- 5792 1917 McKinley MS67 PCGS.** A stunning Superb Gem, this second-year McKinley gold dollar represents the only U.S. gold coin struck during the last three years of the decade. This frosty and highly lustrous example has brilliant yellow-gold surfaces with splendid orange overtones. Population: 62 in 67, 0 finer (1/14). NGC ID# 26HG, PCGS# 7455

- 5793 1922 Grant No Star MS61 NGC.** From a low distribution of just 5,000 pieces, this Grant gold dollar is lustrous and well-detailed, with a scattering of minor contact marks on both sides. Eye appeal is quite strong for the grade. NGC ID# 26HJ, PCGS# 7458

- 5794 1922 Grant No Star MS63 PCGS.** A bright and lustrous example that is well struck aside from the tree trunk near the window. A planchet flaw (as made) affects GRANT, and is a minor mint error that is unusual for a Gold Commemorative. This glowing gold dollar has the eye appeal of an even higher grade.  
*Ex: Long Beach Signature (Heritage, 3/2003), lot 8753, which brought \$1,380.00. NGC ID# 26HJ, PCGS# 7458*

- 5795 1922 Grant With Star MS63 PCGS.** This sunset-gold commemorative dollar is lustrous and unabraded. Orange and lemon-gold highlights add to the appeal. The strike is minimally soft on the high points of the hair and on the tree trunks opposite. NGC ID# 26HH, PCGS# 7459

- 5796 1922 Grant With Star MS65 PCGS. CAC.** This brilliant Gem exhibits a bold strike and satiny yellow-gold brilliance with a trivial copper spot on the obverse that most catalogers would not bother to mention. This lovely piece will make a nice addition to a gold commemorative collection. Housed in a first-generation PCGS holder. NGC ID# 26HH, PCGS# 7459

**1922 Grant With Star Gold Dollar  
MS65, Gold CAC, Green Holder**

- 5797 1922 Grant With Star MS65 PCGS. Gold CAC.** The present sun-gold Gem possesses pristine fields and shows only trivial imperfections on the portrait. The strike is bold except for customary incompleteness on the tree trunk near the frame house window. Housed in a green label holder.  
*Ex: Coinfest Signature (Heritage, 10/2010), lot 4467. NGC ID# 26HH, PCGS# 7459*

- 5798 1922 Grant With Star MS66 NGC.** A With Star 1922 Grant gold dollar, rather unusually expressed on the holder, graded MS66 NGC (and not MS66 ★). Pale yellow-gold colors dominate the reverse, while the obverse has a slightly deeper shade. NGC ID# 26HH, PCGS# 7459

- 5799 1926 Sesquicentennial MS65 PCGS.** The surfaces switch between yellow-gold and strong peach depending on the angle to the light. A gorgeous Gem representative of the Sesquicentennial quarter eagle with only a few small marks scattered on each side. NGC ID# 26HL, PCGS# 7466

- 5800 1926 Sesquicentennial MS65 PCGS.** Broadly lustrous surfaces range from wheat-gold to honey with a few coppery spots. This Gem has above-average definition and visual appeal for the issue. NGC ID# 26HL, PCGS# 7466

- 5801 1926 Sesquicentennial MS65 PCGS.** Gold-orange, peach, and pale apricot are the major hues on this lustrous Gem. Both sides are uncommonly smooth and the eye appeal is strong. NGC ID# 26HL, PCGS# 7466

- 5802 1926 Sesquicentennial MS65 PCGS.** Reddish touches at the obverse margins yield to yellow-gold luster across the rest of each side. A charming Gem example of this historic Sesquicentennial issue. NGC ID# 26HL, PCGS# 7466

- 5803 1926 Sesquicentennial MS65 PCGS.** Lemon-gold margins merge with wheat-gold centers of this commemorative quarter eagle. The strike is always problematic with this issue, but this Gem example is bold. A few abrasions are seen but they do not prevent the MS65 grade. Luster is especially strong and appealing. NGC ID# 26HL, PCGS# 7466
- 5804 1926 Sesquicentennial MS65 PCGS.** Hues of orange and apricot add to the eye appeal of this lustrous Gem. Portions of the rims display a deep lemon color. A few minor marks are present, including a couple of small reed marks on the reverse. NGC ID# 26HL, PCGS# 7466
- 5805 1926 Sesquicentennial MS65 PCGS.** Primarily orange-gold with occasional touches of deeper yellow. A broadly lustrous Gem example of the last commemorative quarter eagle issue. NGC ID# 26HL, PCGS# 7466
- 5806 1926 Sesquicentennial MS65 PCGS.** This rich orange-gold Gem exhibits splashes of delicate blue and green toning on each side. A bold strike and pristine surfaces characterize this piece. NGC ID# 26HL, PCGS# 7466
- 5807 1926 Sesquicentennial MS65 PCGS. CAC.** The lime-green borders encroach upon the butter-gold centers. This well struck Gem has exemplary luster and only inconsequential contact. The final gold commemorative prior to 1984. NGC ID# 26HL, PCGS# 7466

**7182 1920-D MS64 Red and Brown PCGS.** PCGS Population (161/32). NGC Census: (99/37). Mintage: 49,280,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$260. NGC ID# 22C4, PCGS# 2526

**7183 1920-S MS64 Brown NGC.** NGC Census: (39/9). PCGS Population (50/4). Mintage: 46,220,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$280. NGC ID# 22C5, PCGS# 2528

**7184 1921-S MS64 Brown PCGS. CAC.** PCGS Population (38/3). NGC Census: (35/9). Mintage: 15,274,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$300. *From The Teich Family Collection.* NGC ID# 22C7, PCGS# 2534

**7185 1922-D MS65 Red and Brown PCGS. CAC.** PCGS Population (30/2). NGC Census: (37/2). Mintage: 15,274,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$395. NGC ID# 22C8, PCGS# 2538

**7186 1922 No D Strong Reverse VG8 PCGS.** PCGS Population (140/4084). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : \$575. NGC ID# 22C9, PCGS# 3285

**7187 1922 No D Strong Reverse, FS-401, Die 2 Fine 15 ANACS.** NGC Census: (0/0). PCGS Population (444/3118). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$676. NGC ID# 22C9, PCGS# 3285

**7188 1922 No D Weak Reverse — Cleaned, Tooled — ANACS. XF40 Details.** FS-103.2, Die-2. NGC Census: (0/0). PCGS Population (51/75). Mintage: 7,160,000. PCGS# 2540

**7189 1924-D MS62 Brown PCGS. CAC.** PCGS Population (22/100). NGC Census: (22/84). Mintage: 2,520,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$250. NGC ID# 22CD, PCGS# 2552

**7190 1925-D MS64 Red and Brown NGC.** NGC Census: (114/34). PCGS Population (188/27). Mintage: 22,580,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$280. NGC ID# 22CG, PCGS# 2562

**7191 1925-D MS64 Red and Brown PCGS.** PCGS Population (188/27). NGC Census: (114/34). Mintage: 22,580,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$280. NGC ID# 22CG, PCGS# 2562

**7192 1926 MS66 Red NGC. CAC.** NGC Census: (208/24). PCGS Population (474/84). Mintage: 157,088,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$190. NGC ID# 22CJ, PCGS# 2569

**7193 1926-S MS63 Brown PCGS.** PCGS Population (89/59). NGC Census: (64/67). Mintage: 4,550,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$325. NGC ID# 22CL, PCGS# 2573

**7194 1926-S MS62 Red and Brown NGC.** NGC Census: (27/203). PCGS Population (25/315). Mintage: 4,550,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$425. NGC ID# 22CL, PCGS# 2574

**7195 1928-D MS65 Red NGC.** NGC Census: (32/3). PCGS Population (79/12). Mintage: 31,170,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$965. NGC ID# 22CS, PCGS# 2590

**7196 1931-D MS65 Red PCGS.** PCGS Population (141/31). NGC Census: (46/9). Mintage: 4,480,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$810. NGC ID# 22D3, PCGS# 2617

**7197 1936 MS67 Red PCGS. CAC.** PCGS Population (218/0). NGC Census: (635/1). Mintage: 309,637,568. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$140. NGC ID# 22DE, PCGS# 2650

**7198 1937-S MS67 Red NGC.** NGC Census: (376/0). PCGS Population (168/0). Mintage: 34,500,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$300. NGC ID# 22DK, PCGS# 2665

**7199 1944-D/S Over Mintmark, FS-512 MS64 Red PCGS. CAC. (FS-021).** PCGS Population (19/11). NGC Census: (0/0). PCGS# 37837

**7200 1946-S MS67 Red PCGS.** PCGS Population (103/0). NGC Census: (567/0). Mintage: 198,100,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$110. NGC ID# 22EM, PCGS# 2749

**7201 1947-S MS67 Red PCGS.** PCGS Population (134/0). NGC Census: (454/0). Mintage: 99,000,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$150. NGC ID# 22ER, PCGS# 2758

**7202 1947-S MS67 Red PCGS. CAC.** PCGS Population (153/0). NGC Census: (472/0). Mintage: 99,000,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$180. NGC ID# 22ER, PCGS# 2758

**7203 1951 MS66+ Red PCGS. CAC.** PCGS Population (427/15). NGC Census: (589/29). Mintage: 284,633,504. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$125. NGC ID# 22F3, PCGS# 2788

**7204 (50) 1954-D MS65 Red NGC.** NGC Census: (330/1998). PCGS Population (483/820). Mintage: 251,552,496. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$12. (Total: 50 coins) NGC ID# 22FD, PCGS# 2818

**7205 (50) 1954-S MS65 Red NGC.** NGC Census: (427/4920). PCGS Population (1100/3686). Mintage: 96,190,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$12. (Total: 50 coins) NGC ID# 22FE, PCGS# 2821

**7206 (50) 1954-S MS65 Red NGC.** NGC Census: (427/4920). PCGS Population (1100/3686). Mintage: 96,190,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$12. (Total: 50 coins) NGC ID# 22FE, PCGS# 2821

**7207 (50) 1954-S MS66 Red NGC.** NGC Census: (4242/678). PCGS Population (3487/199). Mintage: 96,190,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$22. (Total: 50 coins) NGC ID# 22FE, PCGS# 2821

**7208 (50) 1955-D MS65 Red NGC.** NGC Census: (478/2114). PCGS Population (697/1371). Mintage: 563,257,472. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$12. (Total: 50 coins) NGC ID# 22FH, PCGS# 2830

**7209 1958-D MS67 Red PCGS.** PCGS Population (99/0). NGC Census: (211/0). Mintage: 800,953,280. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$190. NGC ID# 22FR, PCGS# 2851

**7210 1972 Doubled Die Obverse MS65 Red PCGS.** PCGS Population (1262/536). NGC Census: (585/183). Mintage: 75,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$590. NGC ID# 22GU, PCGS# 2950

**7211 1972 Doubled Die Obverse MS65+ Red PCGS.** PCGS Population (1262/536). NGC Census: (585/183). Mintage: 75,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$590. NGC ID# 22GU, PCGS# 2950

**7212 1995-D Doubled Die Obverse, FS-101, MS64 Red PCGS.** (FS-041). PCGS Population (10/20). NGC Census: (0/0). PCGS# 38111

## PROOF LINCOLN CENTS

**7213 1912 PR63 Brown PCGS.** PCGS Population (26/99). NGC Census: (14/87). Mintage: 2,172. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$400. NGC ID# 22KV, PCGS# 3312

**7214 1936 Type Two — Brilliant Finish PR63 Red NGC.** NGC Census: (34/213). PCGS Population (140/622). Mintage: 5,569. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$400. NGC ID# 22L3, PCGS# 3335

**7215 1937 1C PR63 Red PCGS and 1937 25C PR64 PCGS.** (Total: 2 coins)

**7216 1939 PR66 Red PCGS.** CAC. PCGS Population (294/29). NGC Census: (153/28). Mintage: 13,520. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$270. NGC ID# 22L6, PCGS# 3344

**7217 1940 PR66 Red PCGS.** CAC. PCGS Population (224/11). NGC Census: (113/6). Mintage: 15,872. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$285. NGC ID# 22L7, PCGS# 3347

**7218 1953 PR67 Cameo NGC.** NGC Census: (71/14). PCGS Population (38/2). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$575. NGC ID# 22LD, PCGS# 83368

**7219 1957 PR68 Cameo NGC.** NGC Census: (22/4). PCGS Population (15/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR68: \$375. NGC ID# 22LH, PCGS# 83380

**7220 1963 PR69 Deep Cameo PCGS.** PCGS Population (89/0). NGC Census: (32/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR69: \$300. From *The Elite Cameo Collection*. NGC ID# 22LR, PCGS# 93401

## TWO CENT PIECES

**7221 1864 Small Motto — Altered Color — NGC Details.** Unc. NGC Census: (2/209). PCGS Population (2/122). Mintage: 19,847,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$900.

**7222 1864 Large Motto MS65 Brown PCGS.** CAC. PCGS Population (53/3). NGC Census: (245/33). Mintage: 19,847,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$340. NGC ID# 22N9, PCGS# 3576

**7223 1864 Large Motto MS62 Red and Brown PCGS.** Gold CAC. PCGS Population (73/1884). NGC Census: (25/1411). Mintage: 19,847,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$155. NGC ID# 22N9, PCGS# 3577

**7224 1864 Large Motto MS64 Red and Brown NGC.** NGC Census: (560/681). PCGS Population (979/322). Mintage: 19,847,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$320. NGC ID# 22N9, PCGS# 3577

**7225 1864 Large Motto MS65 Red and Brown NGC.** NGC Census: (583/98). PCGS Population (310/12). Mintage: 19,847,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$535. NGC ID# 22N9, PCGS# 3577

**7226 1865 MS64 Red and Brown PCGS.** CAC. PCGS Population (628/290). NGC Census: (352/425). Mintage: 13,640,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$300. NGC ID# 22NA, PCGS# 3583

**7227 1865 MS64+ Red PCGS.** PCGS Population (148/231). NGC Census: (78/124). Mintage: 13,640,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$700. NGC ID# 22NA, PCGS# 3584

**7228 1867 MS64 Brown NGC.** NGC Census: (60/29). PCGS Population (33/4). Mintage: 2,938,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$275. NGC ID# 22NB, PCGS# 3591

**7229 1867 MS64 Red and Brown PCGS.** PCGS Population (195/70). NGC Census: (104/98). Mintage: 2,938,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$400. NGC ID# 22NB, PCGS# 3592

**7230 1867 MS64 Red and Brown PCGS.** CAC. PCGS Population (195/70). NGC Census: (104/98). Mintage: 2,938,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$400. NGC ID# 22NB, PCGS# 3592

**7231 1868 MS65 Brown NGC.** NGC Census: (37/1). PCGS Population (4/0). Mintage: 2,803,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$400. NGC ID# 22NC, PCGS# 3597

**7232 1869 MS64 Brown PCGS.** PCGS Population (47/4). NGC Census: (73/22). Mintage: 1,546,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. NGC ID# 22ND, PCGS# 3603

**7233 1871 MS63 Brown PCGS.** CAC. PCGS Population (73/54). NGC Census: (54/104). Mintage: 721,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$350. NGC ID# 22NE, PCGS# 3609

## PROOF TWO CENT PIECES

- 7234 1867 PR63 Brown NGC.** NGC Census: (4/36). PCGS Population (5/17). Mintage: 625. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$360. NGC ID# 274W, PCGS# 3633
- 7235 1867 PR64 Brown NGC.** NGC Census: (12/24). PCGS Population (13/4). Mintage: 625. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$450. NGC ID# 274W, PCGS# 3633
- 7236 1869 PR64 Red and Brown NGC. CAC.** NGC Census: (45/80). PCGS Population (92/72). Mintage: 600. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$675. NGC ID# 274Y, PCGS# 3640
- 7237 1871 PR63 Red and Brown PCGS.** PCGS Population (41/202). NGC Census: (13/128). Mintage: 960. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$480. NGC ID# 22NH, PCGS# 3646

## SEATED HALF DIMES

**7357 1837 No Stars, Large Date (Curl Top 1) — Improperly Cleaned — NGC Details. Unc.** NGC Census: (5/735). PCGS Population (15/452). Mintage: 1,405,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$475.

**7358 1837 No Stars, Small Date (Flat Top 1) AU50 PCGS.** PCGS Population (25/193). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$365. NGC ID# 232M, PCGS# 4312

**7359 1838-O No Stars — Cleaned, Obverse Scratched — NGC Details. AU.** NGC Census: (5/19). PCGS Population (4/19). Mintage: 70,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,375.

**7360 1838 Large Stars, No Drapery MS62 NGC.** NGC Census: (90/425). PCGS Population (58/268). Mintage: 2,225,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$290. NGC ID# 2TXX, PCGS# 4317

**7361 1839 No Drapery MS64 NGC.** NGC Census: (64/63). PCGS Population (46/47). Mintage: 1,069,150. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$625. NGC ID# 232S, PCGS# 4319

**7362 1845 MS64 NGC.** NGC Census: (45/38). PCGS Population (48/40). Mintage: 1,564,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$500. NGC ID# 2337, PCGS# 4335

**7363 1853 No Arrows — Cleaned — ANACS. AU55 Details.** NGC Census: (6/114). PCGS Population (8/73). Mintage: 135,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$425.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**7364 1853-O Arrows MS61 NGC.** NGC Census: (4/40). PCGS Population (1/45). Mintage: 2,200,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$375. NGC ID# 233Z, PCGS# 4357

**7365 1857 MS65 PCGS.** PCGS Population (69/27). NGC Census: (110/59). Mintage: 7,280,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$800. NGC ID# 233S, PCGS# 4365

**7366 1860-OMS64 PCGS.** PCGS Population (44/29). NGC Census: (57/33). Mintage: 1,060,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$460.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2348, PCGS# 4378

**7367 1860-O MS64 NGC.** NGC Census: (57/33). PCGS Population (44/29). Mintage: 1,060,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$460. NGC ID# 2348, PCGS# 4378

**7368 1861 MS63 PCGS.** PCGS Population (81/175). NGC Census: (107/235). Mintage: 3,361,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$225. NGC ID# 2349, PCGS# 4379

**7369 1862 MS65 PCGS. CAC.** PCGS Population (81/99). NGC Census: (92/70). Mintage: 1,492,550. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$725. NGC ID# 234B, PCGS# 4381

**7370 1863 VG10 PCGS.** PCGS Population (3/161). NGC Census: (0/111). Mintage: 18,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$204. NGC ID# 234C, PCGS# 4382

**7371 1863-S AU53 PCGS.** PCGS Population (5/51). NGC Census: (3/79). Mintage: 100,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$350. NGC ID# 234D, PCGS# 4383

**7372 1868 XF45 PCGS.** PCGS Population (5/64). NGC Census: (0/65). Mintage: 88,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$257. NGC ID# 234N, PCGS# 4392

**7373 1872-S Mintmark Below Bow MS64 ANACS.** NGC Census: (196/191). PCGS Population (167/144). Mintage: 837,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$330.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 2352, PCGS# 4401

**7374 1872-S Mintmark Below Bow MS65 PCGS.** PCGS Population (86/58). NGC Census: (137/54). Mintage: 837,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$725. NGC ID# 2352, PCGS# 4401

**7375 1873-S MS63 PCGS. CAC.** PCGS Population (64/106). NGC Census: (46/134). Mintage: 324,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$275. NGC ID# 2354, PCGS# 4405

## PROOF SEATED HALF DIME

**7376 1861 PR63 PCGS.** PCGS Population (34/31). NGC Census: (16/69). Mintage: 1,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$500. NGC ID# 235W, PCGS# 4444

## EARLY DIME

**7377 1798 Large 8 AG3 PCGS.** PCGS Population (3/65). NGC Census: (0/66). Mintage: 27,550. Numismedia Wsl. Price for problem free NGC/PCGS coin in AG3 : \$382. NGC ID# 236E, PCGS# 4466

## BUST DIMES

**7378 1820 Large 0 AU55 PCGS. CAC.** PCGS Population (15/87). NGC Census: (10/177). Mintage: 942,587. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$725. NGC ID# 236X, PCGS# 4492

**7379 1824/2 Flat Top VF25 NGC. JR-1.** NGC Census: (4/49). PCGS Population (4/43). Mintage: 100,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$543. NGC ID# 2373, PCGS# 4502

**7380 1833 XF45 ANACS.** NGC Census: (12/262). PCGS Population (53/225). Mintage: 485,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$267.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 237D, PCGS# 4522

**7381 1833 AU58 NGC.** NGC Census: (46/176). PCGS Population (30/115). Mintage: 485,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$525. NGC ID# 237D, PCGS# 4522

**7382 1835 XF45 PCGS.** PCGS Population (75/352). NGC Census: (28/393). Mintage: 1,410,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$275. NGC ID# 237F, PCGS# 4527

**7383 1837 AU53 PCGS.** PCGS Population (10/86). NGC Census: (5/111). Mintage: 359,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$375. NGC ID# 237H, PCGS# 4529

## SEATED DIMES

**7384 1838-O No Stars — Improperly Cleaned — NGC Details.** XF. NGC Census: (19/90). PCGS Population (26/110). Mintage: 406,034. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$665.

**7385 1838 Large Stars MS62 NGC.** NGC Census: (36/209). PCGS Population (26/165). Mintage: 1,992,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$480. NGC ID# 237U, PCGS# 4568

**7386 1848 MS63 NGC.** NGC Census: (10/14). PCGS Population (7/13). Mintage: 451,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$950. NGC ID# 238F, PCGS# 4590

**7387 1853 No Arrows — Obverse Improperly Cleaned — NGC Details.** NGC Census: (0/74). PCGS Population (0/61). Mintage: 95,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$525.

**7388 1853 Arrows MS64 PCGS.** PCGS Population (149/122). NGC Census: (174/125). Mintage: 12,078,010. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$725. NGC ID# 2398, PCGS# 4603

**7389 1858-O XF45 PCGS. CAC.** PCGS Population (11/34). NGC Census: (0/41). Mintage: 290,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$211. NGC ID# 2392, PCGS# 4617

**7390 1860 MS64 PCGS. CAC.** PCGS Population (39/22). NGC Census: (29/30). Mintage: 606,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$460. NGC ID# 239D, PCGS# 4631

**7391 1861 MS63 PCGS.** PCGS Population (41/77). NGC Census: (17/61). Mintage: 1,884,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$325. NGC ID# 239F, PCGS# 4633

**7392 1862 MS64 PCGS.** PCGS Population (41/31). NGC Census: (54/46). Mintage: 847,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$480. NGC ID# 239H, PCGS# 4635

**7393 1862-S — Damaged, Corroded — ANACS. AU55 Details.** NGC Census: (0/8). PCGS Population (3/4). Mintage: 180,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$1,875.

**7394 1875 MS64 PCGS.** PCGS Population (83/69). NGC Census: (114/98). Mintage: 10,350,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$360. NGC ID# 23AC, PCGS# 4672

**7395 1875-CC Mintmark Above Bow MS62 PCGS. CAC.** PCGS Population (35/110). NGC Census: (40/161). Mintage: 4,645,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$425. NGC ID# 23AE, PCGS# 4673

**7396 1876-S MS64 PCGS.** PCGS Population (22/22). NGC Census: (17/19). Mintage: 10,420,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$480. NGC ID# 23AK, PCGS# 4681

**7397 1877-CC MS62 PCGS. CAC.** PCGS Population (53/224). NGC Census: (29/275). Mintage: 7,700,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$300. NGC ID# 23AM, PCGS# 4683

**7398 1883 MS65 PCGS.** PCGS Population (72/71). NGC Census: (78/62). Mintage: 7,674,673. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$650. NGC ID# 23AW, PCGS# 4691

**7399 1884 MS64 PCGS.** PCGS Population (81/113). NGC Census: (95/132). Mintage: 3,365,505. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$375. NGC ID# 23AX, PCGS# 4692

**7400 1891 MS64 PCGS. CAC.** PCGS Population (218/176). NGC Census: (282/201). Mintage: 15,310,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. NGC ID# 23BD, PCGS# 4706

## PROOF SEATED DIMES

**7401 1866 PR62 ANACS.** NGC Census: (16/102). PCGS Population (25/101). Mintage: 725. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR62: \$480.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 23CP, PCGS# 4759

**7402 1867 PR62 Cameo ANACS.** NGC Census: (2/24). PCGS Population (1/30).  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* PCGS# 84760

**7403 1870 PR60 ANACS.** NGC Census: (2/126). PCGS Population (5/168). Mintage: 1,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR60: \$275.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 23CU, PCGS# 4763

**7404 1872 PR64 Cameo PCGS.** PCGS Population (9/12). NGC Census: (3/17). PCGS# 84765

**7405 1886 PR64 PCGS.** PCGS Population (69/61). NGC Census: (76/100). Mintage: 886. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$700. NGC ID# 23DB, PCGS# 4783

## BARBER DIMES

**7406 1892-S AU55 PCGS.** PCGS Population (8/110). NGC Census: (4/99). Mintage: 990,710. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$335. NGC ID# 23DM, PCGS# 4798

**7407 1893 MS64+ PCGS.** PCGS Population (57/62). NGC Census: (57/67). Mintage: 3,340,792. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$300. NGC ID# 23DN, PCGS# 4800

**7408 1897-O — Obverse Damage — NGC Details. AU.** NGC Census: (1/56). PCGS Population (6/88). Mintage: 666,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$500.

**7409 1900-S MS63 PCGS.** PCGS Population (23/58). NGC Census: (18/42). Mintage: 5,168,270. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$360. NGC ID# 23EE, PCGS# 4823

**7410 1901 MS65 NGC.** NGC Census: (26/10). PCGS Population (36/15). Mintage: 18,860,478. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$540. NGC ID# 23EF, PCGS# 4824

**7411 1901-S Fine 12 ANACS.** NGC Census: (4/84). PCGS Population (15/142). Mintage: 593,022. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$300.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 23EH, PCGS# 4826

**7412 1901-S VF30 PCGS.** PCGS Population (12/107). NGC Census: (4/69). Mintage: 593,022. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$414. NGC ID# 23EH, PCGS# 4826

**7413 1904-S AU53 NGC.** NGC Census: (4/61). PCGS Population (7/89). Mintage: 800,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$425. NGC ID# 23ES, PCGS# 4834

**7414 1906-S MS63 NGC.** NGC Census: (9/51). PCGS Population (14/72). Mintage: 3,136,640. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$340.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 23F2, PCGS# 4841

**7415 1908 MS64 NGC.** NGC Census: (87/60). PCGS Population (101/54). Mintage: 10,600,545. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$300.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 23F7, PCGS# 4846

**7416 1911 MS65 PCGS.** PCGS Population (130/91). NGC Census: (134/57). Mintage: 18,870,544. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$500. NGC ID# 23FJ, PCGS# 4857

**7417 1912 MS65+ NGC.** NGC Census: (151/40). PCGS Population (140/52). Mintage: 19,350,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$500. NGC ID# 23FM, PCGS# 4860

**7418 1912-D MS65 PCGS.** PCGS Population (23/17). NGC Census: (26/7). Mintage: 11,760,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$560. NGC ID# 23FN, PCGS# 4861

**7419 1913 MS64+ PCGS.** PCGS Population (216/123). NGC Census: (209/102). Mintage: 19,760,622. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$300. NGC ID# 23FR, PCGS# 4863

**7420 1913-S MS62 NGC.** NGC Census: (10/72). PCGS Population (11/90). Mintage: 510,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$550. NGC ID# 23FS, PCGS# 4864

**7421 1914-S MS64 PCGS.** PCGS Population (46/36). NGC Census: (42/28). Mintage: 2,100,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$460. NGC ID# 23FV, PCGS# 4867

**7422 1915-S MS64 PCGS.** PCGS Population (53/24). NGC Census: (43/25). Mintage: 960,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$535.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 23FX, PCGS# 4869

**7423 1916-S MS65 NGC.** NGC Census: (38/25). PCGS Population (49/11). Mintage: 5,820,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$515.  
*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 23FZ, PCGS# 4871

## PROOF BARBER DIMES

**7424 1894 PR63 PCGS.** PCGS Population (52/224). NGC Census: (29/214). Mintage: 972. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$490. NGC ID# 23G6, PCGS# 4878

**7425 1895 PR64 Cameo PCGS.** PCGS Population (17/36). NGC Census: (10/34). PCGS# 84879

**7426 1897 PR64 PCGS.** PCGS Population (62/92). NGC Census: (43/87). Mintage: 731. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$730. NGC ID# 23GA, PCGS# 4881

**7427 1905 PR64 PCGS.** PCGS Population (56/90). NGC Census: (54/91). Mintage: 727. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$725. NGC ID# 23GJ, PCGS# 4889

**7428 1908 PR65 NGC.** CAC. NGC Census: (37/51). PCGS Population (15/33). Mintage: 545. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$1,150. NGC ID# 23GN, PCGS# 4892

## MERCURY DIMES

**7429 1917 MS65 Full Bands PCGS.** CAC. PCGS Population (210/104). NGC Census: (101/48). Mintage: 55,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$300. NGC ID# 23H2, PCGS# 4911

**7430 1917-D MS64 PCGS.** PCGS Population (67/19). NGC Census: (92/24). Mintage: 9,402,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$325. NGC ID# 23H3, PCGS# 4912

**7431 1918 MS65 Full Bands NGC.** NGC Census: (62/17). PCGS Population (93/44). Mintage: 26,680,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$965. NGC ID# 23H5, PCGS# 4917

**7432 1920 MS65 Full Bands NGC.** NGC Census: (109/50). PCGS Population (205/113). Mintage: 59,030,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$350. NGC ID# 23HB, PCGS# 4929

**7433 1920-D MS65 NGC.** NGC Census: (27/18). PCGS Population (29/11). Mintage: 19,171,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$575. NGC ID# 23HC, PCGS# 4930

**7434 1920-D MS63 Full Bands PCGS.** PCGS Population (77/163). NGC Census: (28/83). Mintage: 19,171,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$540. NGC ID# 23HC, PCGS# 4931

**7435 1921 VF35 PCGS.** PCGS Population (62/231). NGC Census: (33/167). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$327. NGC ID# 23HE, PCGS# 4934

**7436 1921 XF40 PCGS.** PCGS Population (66/165). NGC Census: (42/125). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$415. NGC ID# 23HE, PCGS# 4934

**7437 1921 XF45 NGC.** NGC Census: (35/90). PCGS Population (53/112). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$506. NGC ID# 23HE, PCGS# 4934

**7438 1921 XF45 NGC.** NGC Census: (35/90). PCGS Population (53/112). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$506. NGC ID# 23HE, PCGS# 4934

**7439 1921 XF45 PCGS.** PCGS Population (53/112). NGC Census: (35/90). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$506. NGC ID# 23HE, PCGS# 4934

**7440 1921 XF45 PCGS.** PCGS Population (53/112). NGC Census: (35/90). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$506. NGC ID# 23HE, PCGS# 4934

- 8346 1927 MS63 PCGS.** PCGS Population (2787/2306). NGC Census: (3729/2990). Mintage: 388,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$570. NGC ID# 289D, PCGS# 7951

**8347 1928 MS63 PCGS.** PCGS Population (2812/1766). NGC Census: (4402/3025). Mintage: 416,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$570. NGC ID# 289E, PCGS# 7952

**8348 1928 MS63 PCGS. CAC.** PCGS Population (2812/1766). NGC Census: (4402/3025). Mintage: 416,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$570. NGC ID# 289E, PCGS# 7952

**8349 1929 MS62 PCGS.** PCGS Population (4156/5444). NGC Census: (7422/8699). Mintage: 532,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$440. NGC ID# 289F, PCGS# 7953

### THREE DOLLAR GOLD PIECES

**8350 1854 — Cleaned — ANACS. AU Details, Net XF40.** NGC Census: (79/3653). PCGS Population (85/2805). Mintage: 138,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$900. NGC ID# 25M3, PCGS# 7969

**8351 1854 — Rim Damaged — PCGS Genuine. XF Details.** NGC Census: (79/3653). PCGS Population (85/2805). Mintage: 138,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$900. NGC ID# 25M3, PCGS# 7969

**8352 1854-O — Damaged — NGC Details. VF.** NGC Census: (3/756). PCGS Population (4/493). Mintage: 24,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,625.

**8353 1856-S — Mount Removed — NGC Details. XF.** NGC Census: (43/386). PCGS Population (60/222). Mintage: 34,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,500.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**8354 1857 — Reverse Scratched — NGC Details. AU.** NGC Census: (37/496). PCGS Population (46/227). Mintage: 20,891. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,100.

### LIBERTY HALF EAGLES

**8355 1844 AU55 NGC.** NGC Census: (59/114). PCGS Population (21/38). Mintage: 340,330. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$520. NGC ID# 25T7, PCGS# 8219

**8356 1849 — Reverse Repaired — NGC Details. AU.** NGC Census: (22/127). PCGS Population (20/27). Mintage: 133,070. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$550.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**8357 1853 AU53 NGC.** NGC Census: (50/313). PCGS Population (21/138). Mintage: 305,770. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$500.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25UD, PCGS# 8253

**8358 1856 AU58 NGC.** NGC Census: (104/40). PCGS Population (31/27). Mintage: 197,990. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$740.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25UV, PCGS# 8266

**8359 1856-S VF30 PCGS.** PCGS Population (7/113). NGC Census: (2/126). Mintage: 105,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$555. NGC ID# 25UZ, PCGS# 8270

**8360 1857 AU58 NGC.** NGC Census: (100/42). PCGS Population (28/38). Mintage: 98,180. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$675.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25V2, PCGS# 8271

**8361 1860-S — Improperly Cleaned — NCS. VF Details.** NGC Census: (1/46). PCGS Population (3/25). Mintage: 21,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,125.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25VJ, PCGS# 8287

**8362 1869 — Improperly Cleaned — NGC Details. XF.** NGC Census: (1/33). PCGS Population (3/28). Mintage: 1,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,750.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**8363 1880 MS63 NGC.** NGC Census: (165/109). PCGS Population (142/94). Mintage: 3,166,436. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,100. NGC ID# 25XA, PCGS# 8351

**8364 1881 88/88 MS62+ NGC.** *From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.*

**8365 1883-S AU55 NGC.** NGC Census: (23/165). PCGS Population (20/140). Mintage: 83,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$395.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25XM, PCGS# 8363

**8366 1884-S MS61 NGC.** NGC Census: (113/165). PCGS Population (41/148). Mintage: 177,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$460.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25XR, PCGS# 8366

**8367 1884-S MS62 NGC.** NGC Census: (92/73). PCGS Population (88/60). Mintage: 177,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$470. NGC ID# 25XR, PCGS# 8366

**8368 1884-S MS63 PCGS.** PCGS Population (48/12). NGC Census: (51/22). Mintage: 177,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,075. NGC ID# 25XR, PCGS# 8366

**8369 1886 MS62 NGC.** NGC Census: (132/69). PCGS Population (83/63). Mintage: 388,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$470. NGC ID# 25XU, PCGS# 8369

**8370 1891-CC VF25 NGC.** NGC Census: (6/1904). PCGS Population (8/1480). Mintage: 208,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$546.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25Y5, PCGS# 8378

**8371 1891-CC AU50 PCGS.** PCGS Population (96/1251). NGC Census: (61/1730). Mintage: 208,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$735.

*From the collection of Donald E. Bently, sold for the benefit of the Bently Foundation.* NGC ID# 25Y5, PCGS# 8378

## COUNTERSTAMPS

- 8831** 1854 Arrows Half Dollar, B.C. Hoff, Good 6 NGC. Rulau-NY-SY-11E.
- 8832** A Small Collection of Counterstamps on Bust Half Dollars. This interesting group includes the following pieces: 1807 Capped Bust half dollar with a retrograde "S" countermark, ANACS F15 Details; 1814 half with ".DOWS." from a prepared punch, ANACS VF20 Details; 1827 half stamped "MAKER." from a prepared punch, ANACS VG8 Details; 1831 half with the "O.H" punch, NCS XF Details; 1833 half with "EP" stamped twice from letter punches, ANACS VF20 Details; 1834 half stamped "1884" from individual number punches, ANACS Good 4 Details. (Total: 6 coins)
- 8833** 1790 2 Reales Counterstamped C.M. BERRY SALOON Brunk B-594. Circular prepared punch of Casper M. Berry, whose saloon was located at the corner of Chestnut and Fifth Streets in Philadelphia, PA 1857-1860.
- 8834** 1776 4 Reales CARSON & HALL Counterstamp. Brunk C-223. Thomas H. Carson and Green Hall were partners in an early Albany, NY silversmithing business. The bar punch used on this coin was their hallmark.
- 8835** 1816 1 Real J. CHINERY DIE CUTTER Counterstamp. Brunk C-425. This is the Brunk plate coin. James Chinery was a letter and tool cutter circa 1830 in New York City.
- 8836** 1776 2 Reales CONSULT DR. DARBY Counterstamp. Brunk D-78. Dr. Ralph H. Darby was first an apothecary at 91 Broad Street in Boston, MA but by 1853 he was listed as a physician. An excellent example of this popular counterstamp.

- 8837** 1788 2 Reales CONSULT DR. DARBY and PIERCE'S ROSETTA HAIR TONIC Dual Counterstamp. Brunk D-78 with P-743. An unusual two-sided piece issued by two possibly unrelated merchants. The CONSULT DR. DARBY mark is a Boston, MA counterstamp; PIERCE'S ROSETTA HAIR TONIC was made by Dr. William Pierce, also of Boston. Perhaps they had a business deal, or the coin was stamped independently by each because it circulated locally.
- 8838** Unknown Date 1 Real JONES EXCHANGE HOTEL Counterstamp Brunk J-184. A popular counterstamp from multiple line punches. The Jones Exchange Hotel operated in Philadelphia, PA at 37 1/2 cents per night, or \$2.50 per week.
- 8839** 1761 2 Reales J.T. JONES San Francisco Counterstamp Brunk J-218. During the 1850s, J.T. Jones operated the Blue Wing Saloon, one of the most notorious establishments of the Barbary Coast with a history of mayhem and murder. This is the Brunk plate coin.
- 8840** 1830 Bolivian 4 Soles N.S. KIMBALL Counterstamp. Brunk K-181. N.S. Kimball was a Haverhill, MA merchant, perhaps related to the jewelry trade in one way or another. A rare host coin for the counterstamp, which is punched multiple times on the host.
- 8841** French 5 Franc Piece PHILLIPS CHEAP STORE Counterstamp. Brunk P-449. Phillips sold dry goods on Noyades Street "near the Horse Station" in New Orleans, LA in the 1850s.
- 8842** 1840 East India Company Rupee J.L. POLHEMUS Counterstamp Brunk P-563. James Lozier Polhemus was a druggist who was an early California pioneer, arriving in 1849 during the Gold Rush. An intricate curved counterstamp from a single prepared punch.
- 8843** 1844 English Shilling J.L. POLHEMUS Counterstamp Brunk P-563. The J.L. Polhemus counterstamp is one of the most interesting and desired of all countermarked issues. He was a mid-1800s Sacramento, CA druggist who counterstamped many coins that passed through his till, including some gold coins.
- 8844** 1826 English Shilling J.L. POLHEMUS Counterstamp Brunk P-563. J.L. Polhemus first set up a pharmacy opposite the Magnolia Saloon in Sacramento, CA in August, 1850. He moved to 190 J Street in December of that year, where he remained until his death in 1866 (according to the Brunk reference). His counterstamp is highly prized and pictures a mortar and pestle.
- 8845** 1795 2 Reales. J.M.TAYLOR Counterstamp. Brunk T-94. James M. Taylor was a broker of currency in Brooklyn, NY and New York City around 1850.

- 8846** 1778 2 Reales J. WALTER Counterstamp. Brunk W-136. This exact piece not listed in the Brunk reference, but most likely the mark of Jacob Walter, the Baltimore, MD silversmith and clockmaker circa 1840. Another counterstamp, a pictorial bent arm and hand holding a cudgel in a circle of leaves, appears on the coin and is possibly unrelated to the Walter mark.
- 8847** 1776 2 Reales G.W. WELSH COACH MAKER Counterstamp. Brunk W-384. G.W. Welsh was a well-known coach maker in Hanover, PA in the mid-1800s. The Brunk plate coin.
- 8848** 1813 2 Reales H.M. WHITBECK'S CIRCUS Counterstamp. Brunk W-472. H.M. Whitbeck's circus operated circa 1853 and featured the "Original One-Horse Show."
- 8849** 1774 2 Reales ADMIT TO WOOD'S MINSTRELS Counterstamp Brunk W-796. A classic counterstamp from the minstrel show that was the successor to Christy and Woods Minstrels. Admission was a quarter, or two bits.

## HARD TIMES TOKENS

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000..

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-443-8425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments for Signature auctions; Internet-only auction bidding increments are approximately half of these amounts (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment
< - \$10	\$1
\$10 - \$29	\$2
\$30 - \$49	\$3
\$50 - \$99	\$5
\$100 - \$199	\$10
\$200 - \$299	\$20
\$300 - \$499	\$25
\$500 - \$999	\$50
\$1,000 - \$1,999	\$100
\$2,000 - \$2,999	\$200
\$3,000 - \$4,999	\$250
\$5,000 - \$9,999	\$500

Current Bid	Bid Increment
\$10,000 - \$19,999	\$1,000
\$20,000 - \$29,999	\$2,000
\$30,000 - \$49,999	\$2,500
\$50,000 - \$99,999	\$5,000
\$100,000 - \$199,999	\$10,000
\$200,000 - \$299,999	\$20,000
\$300,000 - \$499,999	\$25,000
\$500,000 - \$999,999	\$50,000
\$1,000,000 - \$4,999,999	\$100,000
\$5,000,000 - \$9,999,999	\$250,000
>\$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is

an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1500 and there is no sales tax on coins in Texas) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes..
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount or three percent (3%) of any installment that is past due. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor

# Terms and Conditions of Auction

- under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

## **Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website [www.HA.com/common/shipping.php](http://www.HA.com/common/shipping.php) for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.
- 36B. Auctioneer shall not be liable for any loss caused by or resulting from:
- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
  - b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

## **Cataloging, Warranties and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

## **Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

## **Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

## **Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

## **State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

# Terms and Conditions of Auction

## Additional Terms & Conditions:

### COINS & CURRENCY

**COINS and CURRENCY TERM A:** Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. **AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY.** Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

**COINS and CURRENCY TERM B:** Auctions conducted solely on the Internet **THREE (3) DAY RETURN POLICY:** Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

**COINS and CURRENCY TERM C:** Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

**COINS and CURRENCY TERM D:** Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgsc.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

**COINS and CURRENCY TERM E:** Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

**COINS and CURRENCY TERM F:** Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

**COINS and CURRENCY TERM G:** Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

**COINS and CURRENCY TERM H:** Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

**COINS and CURRENCY TERM I:** Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

**COINS and CURRENCY TERM J:** All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

**COINS and CURRENCY TERM K:** Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

**COINS and CURRENCY TERM L: NOTE:** Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

**COINS and CURRENCY TERM M:** For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

**COINS and CURRENCY TERM N:** Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

## New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558; Michael J. # HOW TO COLLECT RARE BOOKS

Books and manuscripts were among the first objects that collectors valued highly based on scarcity. Cicero and Atticus were rare book collectors. By 1824, the word “bibliophile” had been coined to describe the love of accumulating books. In 1884, J.P. Morgan set a record when he purchased a 1459 Mainz Psalter for \$24,750—more than \$600,000 in today’s dollars.

“There’s still a strong market for antiquarian books,” says Heritage Auctions Director of Rare Books James Gannon, “but these days the strongest growth is in genre fiction—especially fantasy and science-fiction—and children’s books. Books about travel and voyages are also popular. In 2011, a set of nine volumes on the travels of Captain James Cook brought more than \$33,000.”

As with any category of collecting, Gannon advises buyers not to focus on profit and instead to collect based on passion. However, he does have one bit of investment-grade advice: focus on buying the best available copies of any book because, in the long run, top-condition copies rise in value more rapidly than lesser examples. While that may mean a smaller collection in the beginning, it will be a better collection for it.

“Buy the best copy you can afford,” he advises. “It’s about accepting less of something better.”

Gannon believes the outlook for rare books—antiquarian and modern—remains positive. “Over the past decade, eBay and Amazon.com’s forays into used books have driven down prices of common items, but that transformation is now reflected in prices, and further value erosion seems unlikely.”

And once you’ve started to accumulate a collection? Now more than ever, decorators are recognizing the value of beautiful books in design. As Henry Ward Beecher once wrote, “Books are not made for furniture, but there is nothing else that so beautifully furnishes a house.” Consider picking up a copy of House Beautiful’s book, *Decorating With Books*. Avoid shelving books too tightly together and use acid-free clear covers to protect the dust jackets. For especially rare volumes, consider a bookcase with a glass front.

Importance. How did the publication of the book impact history, politics, literature, the history of ideas, the development of culture or a literary movement, etc.? The bigger the impact, usually, the more valuable the book.

Edition. People want the first version of the book, despite, and in many cases, because of any defects in the book’s printing. Printing errors in first editions can result in a book being worth many times what a second or corrected edition is worth.

Rarity. How many copies were printed of an important book? Of those, how many survive? How many are available in the public market, and are not locked away in libraries or other private institutions? Of course, a caveat to this is that rarity and scarcity really only matter for books that are desirable to collectors.

Condition. As in almost all other collecting fields, the condition of a book is a huge factor in value. The condition of a book in a catalog description is usually limited to one of seven categories, which are, in descending order: As New, Fine, Near Fine, Very Good, Good, Fair, and Poor. But there are many gradations within these condition levels.

To view and search past auction results, members can search Heritage’s free Auction Archives. For collectors just getting started, Heritage’s weekly internet-only rare books auctions offer a wide variety with the potential for great values. To search this week’s offerings, please go to [HA.com/books](http://HA.com/books).

Friends of the Children of Haiti

Heritage Auctions would like to help worthy charities save time and resources while raising more money, goodwill and awareness for your cause. We are offering our services to approved charities and their donors as a way for Heritage to give back and to meet new friends. Any and all of Heritage's profits after direct expenses will be donated to charities selected by our employees. Call today to find out how the professionals at Heritage Charity Auctions can sharpen your philanthropic efforts and help you reach your fundraising goals. [HA.com/charity](http://HA.com/charity).

For a free auction catalog in any category, plus a copy of *The Collector's Handbook* (combined value \$65), visit [HA.com/CAT30330](http://HA.com/CAT30330) or call 866-835-3243 and reference code CAT30330.
